So consumers obviously are willing to make a hefty investment that they don't want devalued by a maze of incompatible equipment, industry experts agree.

At the same time that the vcr industry is expanding, the market for basic, advertiser-supported cable is also.

Daniel L. Ritchie, chairman-chief executive officer, Westinghouse Broadcasting, says advertiser-supported cable was, in 1984, "the only sector in all of television to grow in audience share—up by no less than 30%."

One important force behind this increase is the spreading penetration of cable.

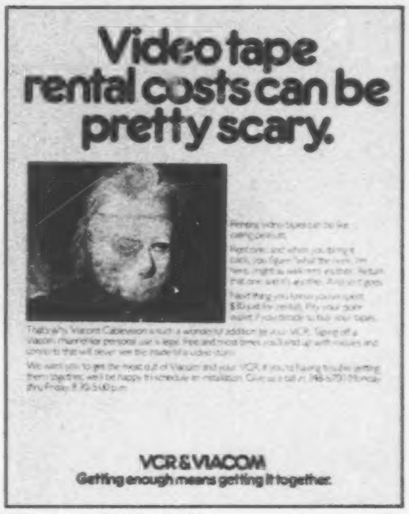
Nearly 44% of U.S. tv households had cable service in 1984. At the current rate, cable services are adding about 300,000 households a month, which means penetration by 1990 could reach 58% of all tv households.

As cable companies realize that their subscribers' entertainment centers invariably will contain vcrs, they are realigning marketing strategies.

According to Group W's Mr. Johnston, current cable marketing trends lean toward how easily cable services work with a consumer's other home entertainment equipment.

Otherwise, he says, "Group W would be seeking to make itself compatible with other manufacturers' products. But we're not in that business; our business is satisfying our customer, whatever sort of equipment he has. It's a subtle difference, but important, because it keeps our attention focused on our customers."

At American Television & Communications Corp., the second largest mso with about 2.4 million subscribers, a similar emphasis is evident in the evolution of its own ad tag lines. Until recently, ATC was very product-oriented, says Steven St. Marie, vp-marketing and programing.



Video tape rental costs can be pretty scary.

VCR & VIACOM
Getting enough means getting it together.

Viacom Cablevision encourages subscribers with videocassette recorders to tape movies off the channel.

To illustrate, he quotes a former ATC marketing tag: "Television is worth watching," a slogan that clearly highlights tv as a product, he says.

"But compare that to the new tag, 'Everybody loves something about cable,'" which he says is intended to emphasize cable as a service.

"We're marketing ourselves as retailers of a service, not retailers of a product. So as a service industry, we're trying to serve our customers as well as we can, and that includes making sure our services are compatible with what our customers need," he says.

This philosophy is also present at Warner Amex Cable Communications, New York, which has 1.2 million subscribers. Warner Amex assists consumers in connecting new vcrs, according to John Charlton, senior vp-sales and programing.

Like many of his colleagues, Mr. Charlton stresses the need to be "customer friendly."

Warner Amex's marketing strategy is designed to demonstrate that "we're not [viewers'] adversaries in any way, and that no matter how complicated their own setup is, we still want to be sure they're getting high-quality viewing pleasure unimpeded by technical difficulties," he says.

The simplest way to do that, he seys, is to eliminate the problem before it begins by offering technical assistance to customers in their homes.

According to David Wilson, vp-marketing and customer services for Viacom Cablevision, Denver, his company is taking similar, basic steps toward heading off customers' potential problems. Viacom is the nation's 10th largest mso with about 785,000 subscribers.

For example, Mr. Wilson says, Viacom Cablevision of Long Island offers a videotape that

Sharon Donovan is a frequent contributor to Special Report on cable tv and other topics.

In the world of corporate communications, video and film are two of the strongest ways to make your point.

Broad Street Productions, a division of Drexel Burnham Lambert Incorporated, can develop your video/film from concept to finished product.

And since we're the only video/film production company whose home is right on the Street, you won't have to waste time teaching us the language of business.

Which is a point worth remembering.

And a good reason to call Lisa Ross (212/480-8031) to arrange a screening of our new reel.

Broad Street Productions
50 Broad Street
New York, NY 10004

How to avoid panic when your client casually mentions 'Cable' in Central Pennsylvania.

Tell them, yes, you're right on top of it. Tell them you've known all along about the potential brilliance of a media strategy which takes into account an incredible 57% cable penetration in the nation's 48th largest market. Oh yes. Definitely. Very astute.

Then, the minute you're back in the shop, call us at Cable Adnet. We're the exclusive advertising contact for MTV, ESPN, USA, CNN and the Nashville Network – here in the Harrisburg/Lebanon/Lancaster/York DMA. Through us, you can reach well over 150,000 upscale, free-spending households. In a vibrant, growing market.

Then sit back, take a deep breath, and smile. Once again, you're a genius.

explains wiring techniques. Viacom Cablevision of Cleveland offers written material covering the same subject, he says.

But efforts such as this will be unnecessary in the future if the hopes of the NCTA are realized, Ms. Rutkowski says. Four years ago, the NCTA and the Electronic Industries Assn., the trade association for manufacturers of electronic equipment, agreed to set up a task force to investigate the technical problems underlying compatibility.

"Engineers and research-development people from both associations have been meeting on and off for about the past four years now," Ms. Rutkowski says. Reports on some of their findings will be released at the NCTA conference June 2-5 in Las Vegas.

The task force's main target is to get marketers and system operators to agree on a single interface design to make connection simpler.

Because these technical problems have not been ironed out, the NCTA and the EIA also are co-sponsoring a task force whose goal will be a statement to be attached to merchandise in stores, advising consumers to consider the capabilities of their local cable systems and their current equipment before purchasing new equipment, she says.

Compatibility encompasses more than technical issues. Perception is also important.

"Consider a subscriber who has just bought a vcr and doesn't realize that he can't watch one premium channel at the same time he wants to record off another premium channel, without paying for two connections," Group W's Mr. Johnston says.

After spending a lot of money for a vcr, the subscriber will not feel he's getting his money's worth from his cable, he says.

So according to cable executives, the task is to show the public that cable service and vcrs go hand in hand. A number of cable operators are working to convey this concept.

ATC, for example, has introduced the "cable store" in Shreveport, La., and Orlando, Fla. Located in major malls, the nearly 2-year-old stores offer cable-related merchandise such as MTV: Music Television t-shirts and ESPN baseball caps. A subscriber may also pay a bill there and change service.

In addition to these cable services, the store also offers prerecorded vcr movie tapes for purchase or rental, as well as a line of vcrs for rental only. Prices are reduced for subscribers.

Mike Hugunin, president of Cablevision of Shreveport, an ATC subsidiary, says the cable store is designed to enhance customer service.

"There was some concern, not just here, but in industry generally, that vcr and tape rental would erode demand for cable service," he says. "But this has not occurred. A high percentage of those who belong to the store's video club are also cable subscribers."

Another company testing the perceptual compatibility of vcrs and cable is Denver-based Jones Intercable, the 18th largest operator in the nation with more than 460,000 subscribers.

As of May 1, Jones offers new service in four test markets: Oxnard, Cal.; Jefferson County, Colo.; the Cedarburg and Grafton areas of Wisconsin, and Wapauca, Wis.

For $44.95 a month, the new service offers basic cable, a choice of two premium channels (out of HBO, Cinemax, Showtime, the Movie Channel and the Disney Channel) and a vcr.

Jones Intercable will offer General Electric vcrs, model 6010, normally retailing for $499, with this new service. After three years, the subscriber will own the vcr.

"This test is an aggressive step to respond to the current demands of the home-entertainment marketplace," says Glenn Jones, Jones Intercable president.

"Our decision to go forth with this test marketing comes after lengthy research and integrates both the current popularity of vcrs and our desire to bolster pay service retention."

However, Jones officials have no clear-cut expectations as to how the marketing of vcrs and cable will increase sales. But, like many other cable companies searching for ways to capitalize on the compatibility of cable and vcrs—and improve profit ratios—Jones executives believe such pilot projects are needed if the cable industry is to carve itself an even larger niche on the shelf of consumers' home entertainment centers. ■

Channels answer interactive call

By Sallie Rose Hollis

Lifetime network's "Hot Properties" host Richard Belzer gets involved with guests on his cable tv talk show—so much so that a bout with wrestler Hulk Hogan resulted in a concussion and eight stitches in his head. For Mr. Belzer, that is.

He used the incident to his ultimate advantage, and in a subsequent show conducted a poll posing this basic question: Is wrestling sleaze or sport? Eighteen thousand viewers responded. The consensus was it was sleaze.

Sallie Rose Hollis is an associate professor of journalism at Louisiana Tech University in Ruston, La., and a contributor to a previous Special Report on cable tv.

The 18,000 viewer call-ins demonstrates another consensus as well: There's a new entertainment form that's taking off with gusto. It started years ago as the radio talk show, but it has taken on a new dimension. It's talk tv, a marriage of cable tv and the telephone that offers viewers a high level of tv intimacy.

The premise is simple. Viewers call in to offer opinions or to question hosts and guests, using either an 800 (toll-free) or 900 (toll call) number. Such involvement breeds program loyalty, network executives reason.

Cable channels employing this programing strategy run the gamut—Cable News Network, C-SPAN, Financial News Network, MTV: Music Television and, at the top of the list in sheer volume of such programing, Lifetime.

For some it's old news. "We've been doing it since we signed on in 1980," a CNN spokeswoman says. "It's kind of a matter of fact, a way of life around here, we've been doing it so long."

CNN shows promoting call-ins include an hourlong nightly in-depth interview show "Freeman Reports," a two-hour morning show called "Take Two" and the one-hour "Sports Sunday" on weekends. Viewer calls occupy only a small portion of these shows' airtime, the spokeswoman says.

At Lifetime, viewer calls are often the show's reason for being. No calls, no show. But with more than 3,000 people trying to get through to "Good Sex!" host Ruth Westheimer each night, there's apparently no need to fret about that possibility.

Lifetime, New York, was formed Feb. 1, 1984, through a merger of two struggling cable enterprises, Daytime and the Cable Health Network. Its revamped weeknight prime-time programing (77% of the existing 6 p.m. to midnight schedule was replaced) now features what Lifetime president Thomas F. Burchill calls "famous faces or outrageous personalities."

Mr. Burchill says Lifetime's interactive concept "had its genesis in some research that we did where people felt that if they could participate on the phone, the programing would have more impact."

Dr. Westheimer went on the air as a test case in August. The therapist previously had hosted a popular New York radio show. Lifetime merely adopted the concept to tv, "with a lot of caviar," Mr. Burchill says.

Since "Good Sex!" was introduced, it has doubled the network's previous 10 p.m. audience; more than 1.6 million viewers tuned in during a single week in February. In the week after the new lineup was introduced in January, Lifetime's average prime-time audience rose from 67,500 viewers to 112,500, network officials say.

That apparently was no fluke. According to the network, numbers are holding their own, with about 110,000 people leaving their dial set on Lifetime each night—still tiny numbers in the cable world, but a step upward for Lifetime.

The network's shows are designed to touch important facets of viewers' personal lives. "America Talks Back," with Stanley Siegel, cashes in on current issues. "Hot Properties," as the title implies, looks at "what's hot and what's not" in such areas as films, fashions and funseeking.

"Regis Philbin's Lifestyles" examines self-improvement techniques for feeling and looking better. And "Smart Money" hosts Fran Tarkenton and Kathleen Campion clue viewers in on how to handle their dollars and make more of them.

The interactive talk show concept has been so successful for Lifetime that the network is discussing adding even more shows that promote this close viewer relationship.

Financial News Network also is looking at enlarging its offerings in the talk tv realm. The channel began using this format with a one-hour weekday program called "Money Talks." Investment experts are interviewed on the program, and the public "is invited to call in with questions or argue with them," a FNN spokesman says.

Without the reciprocal relationship of call-ins, he says, "You may admire the program, but you're not pals." With the personal contact, viewers "become a part of us," he says.

The popularity of "Money Talks" is obvious, according to producer Debby Everett. "There are always people waiting on the line," she says. When the network aired a 13-hour special on Memorial Day in 1984, some viewers watched the entire program. FNN's current talk tv plans center on the May debut of "Sports Talk."

Viewers' potential impact is illustrated perhaps most graphically on MTV.

Friday night video contests, in which two popular recording artists are pitted against each other in phone-in popularity polls, are an MTV staple. But stakes are even higher for the unknown musician in a program titled "The Basement Tapes," aired the second Sunday of each month.

An MTV spokeswoman says network officials screen submissions from musicians with no recording contract and select six videos for each show. "Basement Tapes" viewers phone in their favorites, and the poll winner gets $5,000 worth of recording equipment and a chance to compete with five other semifinalists in six months. The ultimate winner receives a recording contract and $30,000 worth of recording equipment.

Viewers can profit monetarily from participating in the MTV call-ins, too. Last New Year's Eve, a four-hour giveaway show awarded $10,000 to one caller each hour.

So for both viewers and program hosts, this viewer-cable meshing is big business. That thought extends into advertising as well.

Lifetime vp-sales Andrew H. Feinstein says that because the viewer is involved, "that helps the advertiser to get his message better received." Lifetime kicked off a $5 million marketing campaign in the spring, and Mr. Feinstein says the channel is experiencing a substantial increase in advertiser commitments.

Top 10 cable advertisers*

Company	1984
1. Procter & Gamble Co.	$17,914,387
2. Anheuser-Busch Cos.	13,171,018
3. General Foods Corp.	10,124,011
4. General Mills	7,482,672
5. Ford Motor Co.	5,601,576
6. Time Inc.	5,493,922
7. Bristol-Myers Co.	5,290,405
8. Toyota Motor Sales Co.	4,861,676
9. Thompson Medical Co.	3,608,438
10. Eastern Airlines	3,334,286

*In the first nine months of 1984, the top 10 advertisers increased their commitment to cable by 24%. These figures are for the four cable networks measured by Broadcast Advertiser Reports (CNN, ESPN, USA, WTBS) and do not reflect other advertiser-supported networks.

Source: Cabletelevision Advertising Bureau

Mr. Feinstein would not reveal specific advertising results or revenue gains, but he did say Procter & Gamble had renewed, among others, indicating solid advertiser support.

"Several of our advertisers have taken advantage of 'Lifetime Minutes,' which are 60-second informational tips on topics that are compatible with an advertiser's product," Mr. Feinstein says.

One Lifetime advertiser using this device is General Foods. In 90 seconds, the GF "Shortcuts" offer meal-preparation tips for people on the run.

Mr. Feinstein also says General Foods often will forgo the regular midsegment commercial and merely feature a toll-free phone number offering a free booklet for all such GF recipes.

The toll-free number makes it possible to have a sort of interactive commercial. This idea has been around for some time, but now—with the emergence of the viewer call-in phenomenon on regular programing—some advertisers are asking for their direct response lines to be included strictly within that format. *USA Today*, for example, takes that approach on Lifetime.

Whether the concept of interactive programing as a whole is the wave of the future remains to be seen.

Maybe the caller on "America Talks Back" described the public's sentiment best during a show focusing on the question of whether tv is worthwhile. He said he didn't watch much tv as a rule. Then why was he watching this show, host Stanley Siegel wanted to know.

"People get to speak their opinions," the faceless voice replied. "And I think we should have more of these kinds of shows so you can get the public's opinion. I would call this show 'the entertainment of reality.' "

Industry's deregulated forecast is rosy

By Don Veraska

In the five months since the Cable Communications Policy Act of 1984 took effect Dec. 29, cable officials have not wavered in their belief that the legislation has ensured the industry's health, wealth and security.

Cable fees will rise, offset only by a temporary slip in subscribers, and ad revenue may increase as cable companies improve their stability and marketability, cable industry experts say.

"Over time, deregulation will mean literally hundreds of millions of dollars in earnings to the cable industry," says Edward W. Dooley, vp-public affairs, National Cable Television Assn.

Higher subscriber fees is the first effect of deregulation. Previously, local authorities in franchised areas controlled fees for basic service, and cable companies complained that they were not allowed to increase charges to cover inflation.

The law now allows a 5% increase in basic service price in each of the first two years and total price deregulation as of Dec. 29, 1986, for about 90% of the industry. Local authorities retain price control only in areas serviced by fewer than three over-the-air stations.

"What you've got now is a strengthening of the industry through the establishment of national ground rules for cable instead of a patchwork of local regulations," says Ken Lerer, vp-corporate affairs, Warner Amex Cable Communications, New York.

"We looked at each system individually," Mr. Lerer says of Warner Amex's 104 systems, "and where financially justified, we raised our rates by that 5%. I think maybe it affected about 50% of our subscriber base."

Bruce Clark, vp-director of operations, Colony Communications, Providence, R.I., which serves 54 communities, says Colony generally increased rates by 5% in communities in which rate increases had been denied during the past 18 to 20 months, or by the difference in communities that allowed less than 5% within that period.

What will happen to fees after total deregulation?

First Boston Institutional Investors, an investment banking company, urged investors to purchase cable stocks in a November report. "With deregulation we foresee aggressive price increases in basic service rates that will result in cash flow margin expansion even if pay television revenues erode from current levels," the report said.

Stock prices of publicly owned cable tv companies during the first quarter of 1985 already have increased almost 30%, more than six times the rate of the Dow Jones average, reports Paul Kagan Associates, Carmel, Cal.-based industry consulting and publishing company that tracks cable ad revenues.

Colony's Mr. Clark says that although cable services are undervalued, he believes basic rates will increase by 30% to 50% over a three-to-five-year period.

NCTA's Mr. Dooley says competition for the consumer's entertainment dollar from other tv services will prevent cable companies from pricing themselves out of the market.

Another important effect of rate deregulation will be increased innovations in marketing techniques, such as tiering levels of service offered by cable companies, Mr. Dooley says.

Although the spokesmen for Warner Amex and Colony say they plan no wholesale retiering, Mr. Dooley predicts substantial moves in that direction by many cable systems, including the packaging of cable services into several separate tiers of programing—sports, music and family entertainment.

Robert Alter, president of the Cabletelevision Advertising Bureau, New York, says that as cable is deregulated, marketing will have to be emphasized.

Mr. Alter says the CAB has set up an audience promotion committee to explore how cable networks and systems can work more closely to promote cable service.

"With larger audiences, the systems can charge more for advertising. There's a synergism at work there which can only benefit advertising."

Little consensus appears on how important advertising will be to a deregulated cable industry. Only about 1,000 of the nation's 6,500 cable systems now carry advertising, and in most of those 1,000, advertising amounts to a maximum of 5% to 10% of revenues.

Paul Kagan Associates predicts cable revenue will rise fivefold in the next decade, but no one is suggesting it will make serious inroads into commercial tv ad revenues.

Don Veraska is a Washington-based free lance writer who has been following cable deregulation for Special Report for several months.

Associate editor Len Strazewski coordinated this report on Cable Television.

BAR adding CBN and MTV to cable TV network service

BAR videotapes are capturing 24-hour satellite activity on the CBN and MTV cable networks, every day of the year, starting with 1985 service. Along with CNN, ESPN, USA, and WTBS, the BAR service includes the big six advertiser-supported cable TV networks.

Each week BAR publishes logs of all program and commercial activity on the monitored networks. The data is also arranged by parent company and by individual brands, products and services advertised.

Monthly and quarterly summaries apply rates to each commercial. This produces estimated expenditures, which are compiled by brand, by parent company and by product classification. All estimated expenditures are cumulated year-to-date.

Subscriptions are on an annual basis. For more information, call your nearest BAR sales office. New York (212) 682-8500.

RJR/Nabisco would top ad list

By WILLIAM F. GLOEDE

New York—If Nabisco Brands is betrothed to R.J. Reynolds Industries, Procter & Gamble, long the nation's leading national advertiser, would find itself a distant No. 2 to a $19 billion company spending more than $1 billion a year in advertising and promotion.

P&G, according to Advertising Age estimates for 1983, spent $773.6 million in measured and nonmeasured advertising, while RJR spent $593.5 million and Nabisco spent $367.5 million.

Nabisco, based in Parsippany, N.J., confirmed last week that buyout talks with Winston-Salem, N.C.-based RJR had taken place. RJR reportedly would acquire Nabisco for what analysts estimate would be about $5.25 billion. Both companies declined further comment.

If this megamerger—the largest non-oil-industry merger in U.S. history—goes through, industry sources believe Nabisco Brands' stable of ad agencies would continue business as usual, at least for the near term. However, sources believe RJR eventually would begin looking at Nabisco's agencies, placing special emphasis on whether they fit RJR agency criteria concerning image, the way the shop does business, its international potential and, to some extent, brand assignments that are competitive with RJR products.

"Reynolds does not Reynolds-ize its acquisitions," said one source. "There are no Reynolds agencies licking their chops right now, or at least there shouldn't be."

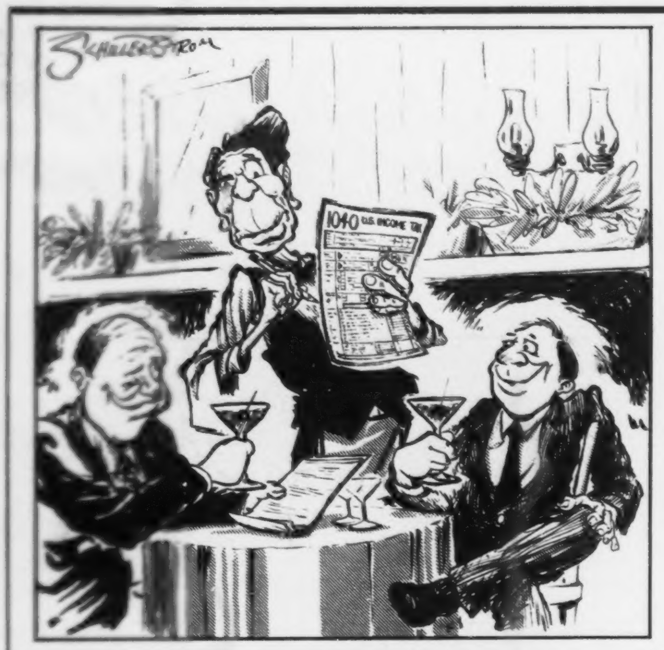
The source noted it took some six years for Del Monte to switch agencies after it was acquired by RJR and, similarly, Heublein waited 2½ years before it changed shops.

A spokesman for RJR said there is "no written policy" regarding agencies. "Each and every relationship with an ad agency is considered on its own particular merits."

Despite the absence of a written policy, sources say RJR indeed has a policy by which it evaluates its agencies. While its agency roster includes shops that handle products competitive with its own, it is widely believed in the agency business that Reynolds likes shops that avoid conflicts.

There are several direct account conflicts between Nabisco's agency roster and RJR's, and a raft of indirect conflicts that together

(Continued on Page 102)



Reagan plan taxes shops' imagination

An Advertising Age roundup

Ad agency executives and industry spokesmen are greeting President Reagan's tax reform proposals as a mixed blessing.

Most seem willing to take their medicine when it comes to reduced write-offs for business entertainment.

Everyone embraces the proposal to slash corporate tax rates. But some are reaching for the distress flares—not the check.

Among aspects of the President's proposals expected to gore the advertising ox: A change in accounting methods that will oblige large agencies, in many cases, to pay taxes on income before it's actually received, and the elimination of state and local tax deductions, expected to make it more difficult for agencies to attract and keep talent in high-tax areas such as New York and California.

The biggest boon for agencies, according to an Advertising Age survey of industry leaders across the nation, is the proposed reduction in the corporate tax rate from 46% to 33%.

Not only would this ease the anguish in agency accounting departments, it could free up money for new-product development and marketing on the part of noncapital-intensive clients like Procter & Gamble or Colgate-Palmolive that also will benefit from a reduced corporate tax rate.

New products mean more advertising, a plus for agencies. And if industry in general has more "discretionary" funds because of a corporate tax break, that, too, could translate to larger ad budgets.

"Basically, I think most ad agencies look on the tax proposals as pretty favorable," said Don Ambuhl, senior vp at the American Assn. of Advertising Agencies. Proposed restrictions on deductions for business entertainment and travel expenses will be "a little bothersome to agencies, but that's secondary com-

(Continued on Page 102)

Bergin in line for own shop?

By JOHN J. O'CONNOR

New York—McCann-Erickson USA president John Bergin and Philip H. Geier Jr., chairman of parent Interpublic Group of Cos., have been talking about establishing a separate agency bearing Mr. Bergin's name.

Mr. Bergin, the key creative person on McCann's Coca-Cola account, insisted last week the dialog still is in the "truly nebulous stage" and "may not happen." He added that while he has been "hankering" for such an arrangement for some time, circumstances simply have made it "impossible" to make any headway.

Mr. Bergin, also vice-chairman, McCann-Erickson Worldwide, said he and Mr. Geier initially have envisioned "a SWAT team concept, or tactical creative group."

Owing to the preliminary nature of the discussions, Mr. Bergin said he hadn't the "vaguest idea" about what accounts or creative people might be reassigned to such a unit.#

Net news prices log in under 10%

By VERNE GAY

New York—Network tv news started selling last week in the upfront market for next season with prices rising 8% to 9%, about half the increases clocked last season.

The networks also are expected to finish pricing daytime inventory this week and, agency sources said, increases are expected to be less than 10%. Price increases in daytime last year were between 14% and 15%.

The pricing action in news and daytime is being seen as an indicator that prime time upfront sales (which could begin as early as next week) will also garner the smallest percentage increases in several years. Last season, the prime time upfront market was a $2.4 billion bonanza for the networks, with cost-per-thousand rates climbing about 9%. In recent years, prime time rate increases have trailed other dayparts, especially news and daytime.

Also, sources suggested that because the total prime time market is expected to grow by only $150 million—or possibly less—this year, price increases will continue to be moderate. The networks, however, expect the market to grow by as much as $240 million.

An expected slowdown in the economy also could dampen the market.

Sources said Paul Schulman, president of the Gardner Advertising subsidiary Paul Schulman Co., New York, will begin placing prime time upfront orders for clients this week. Along with Leo Burnett USA, Chicago, Mr. Schulman is usually the first to make upfront buys in prime time.

A key factor guiding the current moderation continues to be the total audience share loss across all network dayparts except early-morning news. Also, there appears to be a growing resolve by most advertisers to keep upfront increases below 10% this year. "I didn't get a 10% raise in my salary this year," complained one package-goods advertiser. "Why should the networks get one?"

Advertisers, however, have expressed the same resolve to hold down network pricing every year. The nets, for their part, have routinely said pricing has never been tied to inflation and certainly has nothing to do

Great names pop up everywhere.

Gone but not forgotten

Sunkist Growers is promoting products bearing its name—soft drinks, fruit rolls, fruit gems, vitamins and fruit juice—in a first-ever umbrella ad campaign. In July, Sherman Oaks, Cal.-based Sunkist will begin the campaign with an ad that highlights Sunkist soft drinks. The ad shows the last few drops of the orange drink trickling out of a crushed can—in a two-page spread exclusively in *Life* magazine. Foote, Cone & Belding, Los Angeles, is Sunkist's agency.

P&G adds Zest to JC&M roster

By STEWART ALTER
and JULIE FRANZ

Procter & Gamble, true to its reputation for secrecy, had Jordan, Case & McGrath pitch for some of its business without knowing for which brand—or even which P&G division—was involved.

Just before New York-based JC&M learned it had joined the stable of P&G agencies, the agency discovered it was being considered for Zest deodorant soap. The account, estimated to be worth between $9 million and $11 million, had been at Benton & Bowles, New York.

Losing the Zest account certainly won't break B&B, which still has more than $100 million in P&G business. Cincinnati-based P&G wanted to give JC&M an established brand, a pattern it has followed in the past with new agencies, the company said.

Benton & Bowles remains a major P&G agency handling such leading brands as Bounce, Charmin, Crest, Ivory Snow, Pampers, Scope and others.

For JC&M, which is projecting billings of $200 million for this year, getting into the privileged P&G stable ends a four-year quest. One year after Case & McGrath merged with the shop run by former BBDO president and creative director Jim Jordan, "We felt we were of a caliber and a quality where we could handle Procter &

Toy account stays in L.A.

Tyco opts for B&J

By JAMES P. FORKAN

Tyco Industries, a Moorestown, N.J.-based toy marketer, is heading for its fourth agency change in nine years, as Bozell & Jacobs/Pacific is named to replace Scott Lancaster Mills Atha, both Los Angeles.

Billings for the marketer of toy electric trains and auto racing sets were estimated by various sources as within the $6 million-to-$11 million range.

The toy marketer had begun its agency review in March, after having fired Scott Lancaster (AA, March 21). Tyco executives maintained the change was being made because it had "expanded beyond its traditional business and required an agency to handle its new growth," while agency ceo Steve Scott blamed "sharp differences" over creative strategy as the key reason.

Robert Lurie, Tyco's vp-advertising and communications, indicated he had considered "several agencies in New York, the Midwest and Los Angeles," though he named none of the other finalists.

The decisive factor in B&J's selection seemed to have been Cy Schneider, the agency's chairman, who had worked on the Mattel Toys account from 1954 until 1978 while at Ogilvy & Mather and, before that, Carson/Roberts. Mr. Schneider will "personally oversee" the Tyco account, both companies said, with the agency now

Cigar sales decline across board during 1984

By JOHN C. MAXWELL JR.

In 1984, the cigar industry reversed the previous year's unit gain, with all three categories showing declines. The large category fell a slight 2.4%, while smaller cigar sales were down 20% in units. Little cigars (cigarillos) posted a 7.5% unit decline.

Dollar sales, however, improved for two out of three categories, with the greatest increase coming from large cigars, up 2.2%. It should be noted that some of the growth was attributable to price increases.

Swisher this year took the No. 1 position from Consolidated, with 26.3% of the large-cigar market. Consolidated moved into second place with 24.2% of the market, while General Cigar retained its third-place position despite a decline in market share from 18.9% to 17.8%.

In the little-cigar category, Consolidated closed the gap on No. 1 R.J. Reynolds, moving up 12 percentage points. Reynolds lost some share, but managed to retain the lead position, while third-place Lorillard was about flat for the year.

In terms of pricing, there was an increase in the sales of mid and premium-price cigars, now accounting for 55.1% and 37.9%, respectively, of the total market. Cigars priced at 8¢ or less have fallen to 7% of total sales.

As noted above, removals of large cigars posted a decline in units, something that has been occurring for quite some time now.

Total taxable removals of large cigars, which include small cigars or cigarillos, were down 3.9% year-to-year. Total unit sales of large cigars were 3,427 million units versus 3,567 million in 1983. It should be noted, however, that the actual sales decline at the consumer level may not be as heavy as indicated by the government taxable removal numbers. In 1983, a cigar company closed a bonded warehouse, which meant it had to pay taxes on all inventories immediately. This continued until 1984, when the company opened a new bonded warehouse, causing an immediate decline in taxable removals as some of the inventory was put on bond and no longer taxed until actually removed.

The cigar industry hopes to partially stem its decline with a continuation of its national advertising campaign. In the past, the campaign has promoted the cigar as a symbol of success and masculine achievement. Unlike the previous campaign, however, the newer ads will promote cigars as a form of relaxation. The campaign is entitled "Relax, have a cigar." Men traditionally begin smoking cigars when they hit 35 to 45, and as more baby-boomers enter "the cigar years" they are trying cigars for the first time.

This influx of first timers should help cigar sales.

The antitobacco propaganda surrounding smokeless tobacco and cigarets has not really affected this group. Dollar sales should continue to rise, both as a result of pricing and unit sales, despite a decline in units. As we become a generally more affluent society, more and more people are trading up to premium-price cigars, the only growth category in terms of total sales dollars. On the flip side of the coin, cigars, particularly little cigars or cigarillos, also are being perceived by some as an economical alternative to other forms of tobacco. In 1984, the average price of a cigar was 20¢.

Many in the industry believe the decline in cigars has bottomed out, and should stabilize over the next few years. The 1985 outlook is for the industry to be flat to down slightly.#

Mr. Maxwell is with Furmann Selz Moger Dietz & Birney Inc., New York.

Cigar market shares

Although unit sales declined for all three categories of the $705 million cigar market last year, dollar sales improved for large and small cigars. Swisher captured the large-cigar segment with a 26.3% share, while Consolidated closed the gap on R.J. Reynolds in the little-cigar category. The industry hopes to light up sales with a new ad campaign pitching cigars as a form of relaxation. Large and small cigars are combined in this table for industry reporting purposes. *Source: John C. Maxwell.*

New theme from s&l's: Trust us

By JANET MEYERS

WASHINGTON—The financial panic that infected Ohio and Maryland savings institutions is spawning a revision by financial institutions in their advertising. The thrust is switching from traditional services to reassuring customers.

With tv news cameras panning across long lines of irate customers demanding to withdraw their nest eggs, savings & loans are trying to win back the public's shaken confidence.

"Confidence" is the new buzzword at the Foundation for Savings Institutions, the trade association representing federally insured s&ls. FSI next month will start a tv blitz emphasizing federal deposit insurance (AA, May 23).

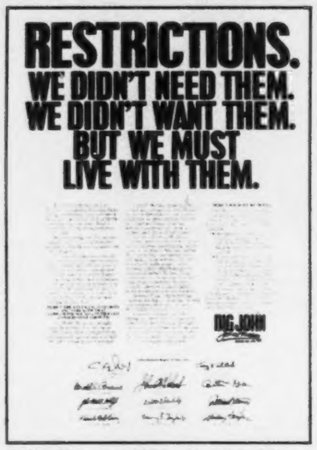
The association, which represents 2,000 s&ls, is buying $2 million of network news time over 60 days, starting June 2, to offset the imagery damage inflicted by the failures of three privately insured institutions and the continuing shaky status of others undergoing financial reorganization.

FSI's tv ads zero in on the U.S. Capitol as a symbol of permanence and federal solidity. The Federal Savings & Loan Insurance Corp. logo, which resembles a building cornerstone, also appears prominently, especially in FSI's page ads for *USA Today* (AA, May 27).

"I wish we could put a stamp on it—'new and improved,'" FSI president Mike Stevenson said of the FSLIC logo.

FSI's 30-second tv spot underlines U.S.-insured security, saying FSLIC "has the full faith and credit of the United States government standing behind it. Your money is safe. Not only because it's insured but because of who insures it." Backer & Spielvogel, New York, handles the campaign.

Banks and s&ls here and in Maryland are using their own tactics for stressing their strength and federal protection.



RESTRICTIONS.
WE DIDN'T NEED THEM.
WE DIDN'T WANT THEM.
BUT WE MUST
LIVE WITH THEM.

John Hanson S&L, the third-largest privately insured s&l in Maryland, produced an ad resembling the Declaration of Independence soon after the crisis in that state. Weitzman Dym, Greenbelt, Md., handles.

Soon after Maryland imposed a $1,000-a-month withdrawal limit at privately insured s&ls, Beltsville-based John Hanson Savings & Loan, the third-largest privately insured s&l in the state, ran a page ad signed by its board.

The ad was designed to resemble the Declaration of Independence and was headlined "Restrictions. We didn't need them. . .but we must live with them."

Future ads for John Hanson will stress that "we've been strong all along," said advertising director Stuart Clode.

If Hanson gets federal approval to be covered by FSLIC, its new campaign will emphasize an "additional layer of security is afforded by the federal insurance" and customers "can rely on our stability," Mr. Clode said.

Weitzman Dym, Greenbelt, Md., handles Hanson's advertising.

In the District of Columbia, Washington Federal Savings & Loan's ads show a "security blanket" made from the FSLIC logo.

Other s&ls and banks are featuring the word "federal" prominently in their advertising, emphasizing the U.S. government backing of all deposits and securities up to $100,000.

Washington Federal foresaw problems with "over-all image" last year, said Thomas Riley, senior vp and corporate secretary. Initially, it dropped the words "savings & loan" from its letterhead and advertising, replacing them with the slogan "Banking with confidence."

The s&l handles its advertising in-house.

It was the problems in Maryland that moved FSI into a new direction in its advertising, turning away from promoting "products," such as Individual Retirement Accounts, and embracing a confidence theme.

Mr. Stevenson said he had hoped in March that "Ohio might be just a fluke," but events proved him wrong. After two s&ls insured by the privately owned Maryland Savings Share Insurance Corp. went into conservatorship in early May, Mr. Stevenson realized something had to be done quickly.

"Let's face it, our customer base is not the most sophisticated investor," he said. "In monitoring the situation, our research showed panic was on the horizon."

The American Banking Assn., however, plans no special advertising, noting that its research says consumers are confident if financial institutions have FSLIC or FDIC (Federal Deposit Insurance Corp.) emblems on the door.

Most Maryland s&ls have applied for federal backing. Privately insured s&ls in other states—Massachusetts, North Carolina and Oklahoma—also are seeking federal insurance and plan to focus on that new affiliation in advertising.

"We'll get ad campaigns about federal insurance to the point of boring people to death," said Kevin O'Keefe, president of Gilbert Sandler & Associates, Baltimore, which handled advertising for the now defunct MSSIC.#

Burroughs Wellcome, with its successful Actifed, is shaking up the fight for space in the home medicine cabinet.

By NANCY GIGES

Much as Johnson & Johnson's Tylenol nonaspirin analgesic swept aside old aspirin pain killers in the 1970s, Burroughs Wellcome has rushed to market leadership in the $750 million cold-remedy category.

Long known as a marketer of prescription drugs, Burroughs has dislodged faltering Dristan to capture close to 20% of the market with its brands, Actifed and Sudafed. Just 10 years ago, Dristan alone claimed a 22% share of the cold-remedy market; today, it claims about 7%.

Even more remarkable, Burroughs made its big move into the over-the-counter cold-remedy market during some of the category's leanest years. Starting last year with Actifed and following this year with Sudafed, the Research Triangle Park, N.C.-based company began putting heavy media dollars behind the two brands. This year, the company invested an estimated $12 million each in measured media to promote the cold remedies via Rumrill-Hoyt, New York.

They appear to have hit the market right on the nose.

For some years now, makers of cold remedies have been complaining—with some embarrassment—of a relatively low incidence of colds, flu and other respiratory diseases. This year, when areas all across the country began reporting more such ailments, especially the flu, the same marketers knew they had a chance for good gains despite heavy competition in the category. (Based upon laboratory diagnoses, the incidence of flu during the past cold and flu season was about 2½ times what it was in 1982, according to the federal government's Centers for Disease Control, Atlanta.)

Unit sales of cold remedies rose about 8% over-all, compared with a normal 1% to 2%. The January/February period was unusually strong, with 10% gains. Marketers also were pleased that the kinds of illness going around produced a variety of symptoms and encouraged consumers to purchase multisymptom products.

In the cold-remedy category, where the biggest brands usually hold less than a 15% market share, a greater incidence of illness alone does not guarantee success. Every year, several new entries and line extensions join this category as well as the separate $300 million cough segment.

In this regard, the winter of 1984-85 has been good not only for newcomers to the over-the-counter category, such as Actifed and Sudafed, but also for some brands banking on rejuvenation—such as SmithKline Beckman's Contac. Bristol-Myers, New York, and Schering-Plough, Kenilworth, N.J., also said they were pleased with the performances of their cold-remedy products this season.

"We are very satisfied with our growth and with our new ad campaign," said Victor Galef, vp-marketing, SmithKline Beckman, Philadelphia. "We experienced period-to-period growth of significance that we haven't seen for some time."

In addition to shifting to a more upbeat ad campaign for Contac, SmithKline introduced another cold remedy, called Congestac. Although not expected to grow into a major brand, Mr. Galef said it obtained a respectable share. The Contac campaign by BBDO, New York, features singing and dancing, essentially depicting "wellness" instead of illness.

Leading players

Backed by major ad campaigns and prescription-only pedigrees, Actifed and Sudafed have moved to positions of market leadership in the crowded ranks of over-the-counter cold remedies. Marketers report unit sales of cold remedies rose about 8% over-all during the recent flu season, a big increase compared with the normal 1%-2% rise. *Source: Advertising Age.*

Manufacturer	Brand	Share (%)	Agency
Burroughs Wellcome	Actifed	10	Rumrill-Hoyt
SmithKline Beckman	Contac	10	BBDO
Richardson-Vicks	NyQuil	10	Benton & Bowles
Burroughs Wellcome	Sudafed	9	Rumrill-Hoyt
American Home Products	Dristan	7	William Esty Co.
Miles Laboratories	Alka-Seltzer Plus	6	Wells, Rich, Greene
Bristol-Myers	Comtrex	5	Laurence, Charles & Free
Schering Corp.	Drixoral	5	(no consumer ads)
Johnson & Johnson	Co-Tylenol	3	Saatchi & Saatchi Compton
Procter & Gamble	Head & Chest	2	Leo Burnett USA

Actifed, which soared to compete among the category leaders a year ago when the company began advertising the former prescription-only product, continued to perform well. The brand is tied with Richardson-Vicks' NyQuil and Contac to lead the category, each with about a 10% market share. (NyQuil is the only liquid among the cold-remedy leaders.)

Just behind the leaders, at 9%, is Burroughs' Sudafed, which made its move when the company increased its marketing investment in the product this year.

Burroughs continued to use former astronaut Wally Schirra in advertising for Actifed. The astronaut explains in tv commercials that "in zero gravities, sinuses don't drain and noses don't run, so cold tablets really have to work." He says Actifed worked for him. "No wonder it was the cold tablet specified most by doctors for 10 years before becoming available over the counter." For Sudafed, Burroughs simply hammered home the message that it doesn't make you drowsy and "goes to work in just 22 minutes."

While not especially creative, these were new claims to the category, one source noted.

R-V maintained its NyQuil business with new executions of the campaign that shows NyQuil users resting peacefully while those trying other brands toss and turn through the night. Benton & Bowles, New York, handles.

The conversion from prescription to otc sales, which requires Food & Drug Administration approval, is not always as easy as Burroughs makes it appear.

Schering-Plough, which had a string of successful conversions under its belt in other drug categories, moved Drixoral into the otc market in the fall of 1982 with the hope of leading the category. Executives predicted that Drixoral would upset the whole market even without any consumer advertising. Drixoral certainly has attained a respectable market share at 5%, but is not pushing the market leaders now. The brand's share goes as high as 13% in drug outlets but falls dramatically in food outlets, which account for somewhat more than half of total category sales.

Howard Schwartz, senior brand manager, Schering's otc products, said the company is "looking seriously" at consumer advertising to boost the brand's share.

"We are very happy with the results we've achieved," said Mr. Schwartz. "To get that sort of share without any advertising is remarkable. But because of the size of the category and the noise level, we have to take a close look at consumer advertising."

Another struggling brand is Procter & Gamble's Head & Chest, whose 2% share of last year weakened even more this season. A spokesman said the company still is learning about the category. Pharmacraft's effort to enter the category with Cold Factor 12, a liquid 12-hour remedy, also had a dismal showing, and there are reports that the brand will be dropped.

While a 7% market share would be sweet music to most product managers, it's painful to executives at American Home Products, whose Dristan dominated the cold-remedy category during the 1960s and 1970s. Newer entries and upgrading of claims for old ones have cut into this brand's share heavily. While AHP has added the new entries to its comparative advertising in making superiority claims for Dristan, the company has stuck to its story of offering more ingredients than other brands. William Esty Co., New York, handles. AHP declined to comment.

Other brands in the middle of the fray include Miles Laboratories' Alka-Seltzer Plus with a 6.5% share, Bristol-Myers' Comtrex with a 5.5% share and Johnson & Johnson's Co-Tylenol with a 3% market share.

But as consumer interest in self-medication continues, remedies such as Actifed, Sudafed and Drixoral may have a decided advantage. Not only do they build upon their strengths as former prescription-only drugs, they come into the market with positive backing from doctors, pharmacists and health-care professionals. In an already crowded category, that may be the best prescription for success.#

NU probes media planning

EVANSTON, ILL.—Northwestern University will sponsor a two-day symposium June 26 and 27 entitled "New Directions in Media Planning."

The conference is open to media planners and other advertising professionals. It is being organized by the advertising department in NU's Medill School of Journalism.

Conference fee is $175, including seminars and meals. For more information, call (312) 491-2060.#

More selling opportunities for Less than you'd expect.

The Journal of Accountancy's 270,000 paid subscribers can dramatically improve your bottom line... without bending your budget out of shape.

In the public sector, their product/service decision-making clout is demonstrated by the fact that 93% of our subscribers are owners, partners, or principals. What's more, they have enormous product/service influence over their clients, who number 100-200 each. How's that for multiplying your selling opportunities. With no additional advertising investment.

In the private sector, 65% of the Journal's subscribers have product/service selection clout to go with their CEO/top management titles.

All this fire power for less than you'd expect. The Journal has by far the lowest CPM in the accounting field. Without the astronomical page rates of the general business publications.

So, why not call Dick Flynn today at (212) 575-6286.

This data has been provided by Media Records for exclusive publication in Advertising Age and may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Reporting Service, Total Advertising data shown has been supplied by the publisher to Media Records and included in this compilation. All publisher supplied figures are converted to MRCS/SAU inches by Media Records. These newspapers are indicated with an asterisk (*).

REPORTING METHODOLOGY

Media Records continues to measure in linage but due to the introduction of the SAU 6 column format Media Records has designed and developed a methodology with the approval of our subscribers, the INAME Measurements Committee, The ANPA/NAB Working Committee, The AAAA Newspaper Committee, and other industry groups.

The approved methodology is titled The Media Records Conversion System (MRCS) and is based upon the printed page area of each product of the newspaper and is a five step approach as follows:

1. Measure Printed Page
   Width and Depth in Inches
2. Determine Square Inches of Page
   Multiply Width by Depth Inches
3. Determine the Number of SAU Inches of Page
   Divide the Square Inches by 2.0625 (SAU Inches)
4. Measure the Total Lines of the Page
   Multiply Column Depth Agate Lines by the Number of Columns on the Page
5. Determine the Factor for Converting Measured Lines to Reported SAU Inches
   Divide the Total Lines of Page by the Number of MRCS SAU Inches of the Page

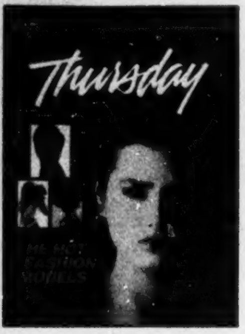
In the news

The Continental touch



Moving into the elite ranks of modeling isn't easy. A European tour is nearly as de rigueur for young models today as it once was for emerging socialites, and only a few escape the trek. Agencies, model editors and photographers have cut a handful of classic beauties and exotic faces from the pack and put them in line as successors to the throne of superstardom. *See Page 5.*

On hold

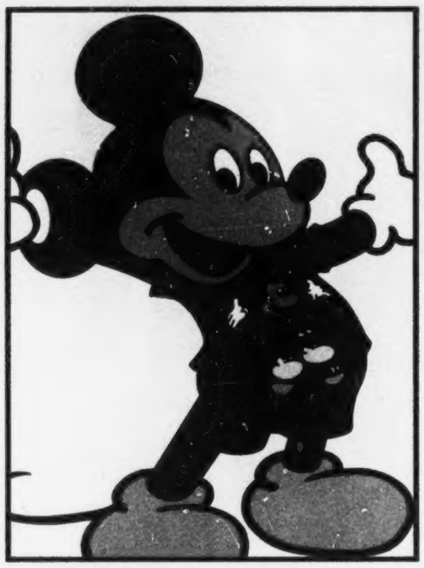
Twin Cities ad executive Gene Okerlund went to the mat to promote the World Wrestling Federation—and got stomped in the back by 320-lb. Hulk Hogan for his efforts. Proving that pro wrestling wasn't a safe place for a 42-year-old adman in black tights, Mr. Okerlund returned to his job as WWF announcer, where he is known as "Mean Gene Okerlund," a man who wears black suits, interviews sweating behemoths and earns more than $100,000 a year. *See Page 6.*

Diet Sun shine

Grey Advertising faced no easy task in creating commercials for General Foods' new Diet Sun powdered soft drink. Though it is a drink mix, Diet Sun essentially competes with other refreshment beverages in general. Agency executives developed a theme—"It's a 10"—hoping the number would suggest a range of meanings. "A delicious ambiguity" is how Richard Karp, exec vp-creative director, describes it. *See Page 37.*

Special Report

Licensing



Licensing is gaining prominence as a marketing tool. Some licenses that have found long-lived success and others that are getting started are profiled in Special Report, *starting on Page 15.*

Presstime

'U.S. News' reviews shops

New York—*U.S. News & World Report* is conducting an agency review for its $1.5 million trade advertising account, now at Foote, Cone & Belding. The incumbent, which has had the account nearly three years, is participating in the review. The weekly expects to introduce a new campaign in the fall.

Western eyes Chiat, others

Los Angeles—Western Airlines is talking to Chiat/Day; Foote, Cone & Belding, and Dailey & Associates, plus several other agencies, in a review of its approximately $20 million account. The business currently is at Doyle Dane Bernbach/West. Western was dissatisfied with the fall campaign DDB created, reliable sources say.

Swensen in 'Goonies'

New York—Warner Bros.' "The Goonies," a Steven Spielberg film to bow June 7 (AA, May 9, *et seq.*), includes product placement for Swensen's Ice Cream Co. and Yamaha Motor Corp. USA, via Krown Inc., Beverly Hills.

Praising Pioneer spirit

Long Beach, Cal.—Pioneer Electronics (USA) breaks a $9 million corporate-image campaign June 17 on MTV: Music Television. Themed "Catch the spirit of a true pioneer," the spots also will run on network and spot tv and in movie theaters. Five testimonial print ads, themed "I'm a pioneer and I'm proud of it," support in July consumer magazines. The campaign is the first work for Pioneer from Dancer Fitzgerald Sample, Torrance (AA, March 18).

Toshiba teases for CES

Wayne, N.J.—Toshiba America this week broke a $10 million effort for its videocassette recorder line with teaser tv spots in Chicago during the Consumer Electronics Show. Toshiba introduced its first VHS-format machines at the show. Calet, Hirsch & Spector, New York, handles.

CBS seeks FCC aid

New York—CBS Inc. has asked the Federal Communications Commission to reject Ted Turner's proposed $5.4 billion bid for the company. CBS claims the merger would be financially devastating to the network. Separately, the CBS affiliates advisory board and nearly 100 affiliates have filed their own petitions with the FCC, which mostly echoed CBS' position.

Viacom still wants WACCI

Las Vegas—Sources at Viacom International attending the National Cable Television Assn. convention here say the New York-based company is considering sweetening its $700 million bid for Warner Amex Cable Communications Inc. Such a move would follow the $750 million joint offer by Time Inc., New York, and TeleCommunications Inc., Englewood, Colo., the country's two largest cable system operators (AA, May 30, *et seq.*). Sources also say officials at Showtime/Movie Channel—which is owned by Viacom, WACCI and Warner Communications—are worried a Time/TCI buyout would hurt the

Black glass, cafe-style windows studded with reproductions of A&P's successive logos front the company's "futurestore" in Allendale, N.J.

No gray areas in A&P future

By Judann Dagnoli

The bold design of A&P's prototype "futurestore" in Allendale, N.J., is drawing raves—and greenbacks—from grocery shoppers.

"When I come in here, I'm on sensory overload," one customer said recently. "It's like Christmas shopping at Bloomingdale's. My rods and cones go crazy."

Dusting off its old image, the Great Atlantic & Pacific Tea Co. has used an ultramodern style and contrasting black-and-white color scheme in its store of the future, and it already has paid off in the present. Sales have doubled, according to Michael Rourke, vp-marketing and corporate affairs.

The futurestore, with a facade of black glass cafe windows, seems incongruous in this snug New Jersey community. The store's tunnel-like entry gives way to a deceptively minimalist interior. Stark graphics, the use of only two contrasting colors and an unusually spacious layout give grocery shopping the feel of an odyssey.

Design

The aisles are few: Attention is drawn to freestanding displays labeled with enormous pictographs—cutout representations of merchandise—all, of course, in black-and-white. The store directory, in luminous ebony, lists foodstuffs and their locations alphabetically. The mirrored courtesy desk also serves as a kiosk, flashing blue neon messages to customers.

Individual departments are stressed. Attention is flagged to the deli department by its black-and-white canopy. The eye is drawn to the produce department by oversize black representations of bananas, grapes and artichokes. Likewise, the meat department sports graphics of pigs; the frozen-food department, huge ice-cream cones.

The futurestore seems a radical departure for the 125-year-old A&P, which long has been considered behind the times by other retail food chains. The Montvale, N.J.-based company, however, struggling to recover from heavy financial losses in the 1970s, is putting on a new face for the '80s. Mr. Rourke sees the futurestore as a logical progression for the company.

"It's a contemporary look, but the black-and-white maintains the traditional feel of A&P," he says. "The colors reflect back to the turn of the century, when black-and-white graphics were often used."

This blend of modern and traditional is the result of a three-year joint effort by the company's property development department and the Manhattan industrial design company, Robert P. Gersin Associates. The cost, Mr. Rourke maintains, is "proprietary information."

The store is attracting a more eclectic shopper than average. Scattered among the standard canned goods, dairy products and the company's hallmark coffee, one finds fresh floral arrangements, wicker furniture, tureens of hot soup, a salad bar, live lobsters and made-to-order pizza. The concept, says Mr. Rourke, is "a boutique atmosphere.

"We are envisioning the future look of our superstores," he states. And the wave of the future, as the company sees it, is specialty products and services. The futurestore capitalizes on that trend by incorporating "many little stores in one big store." Each A&P branch will carry different products, the offerings to be determined by demographics.

The futurestore in a suburban upper-middle-class community therefore will cater to more yuppie tastes than would a contemporary in a low-income environment. The main unifying element will be the color scheme, which A&P hopes to make its trademark.

Plans call for 60 futurestores by 1989, depending on customer reaction. So far, Mr. Rourke claims the reaction is overwhelmingly positive—and he has the receipts to prove it.#

Licensing

Starring on marketing team

By Joanne Y. Cleaver

Unless you've been locked in a consumer time capsule, you'll recognize such licensed properties as Mickey Mouse, Snoopy, Gloria Vanderbilt, the New York Mets, Garfield, Coke and Care Bears.

Before the year is out, you likely will be familiar with Mirthworms, United States Basketball League, Henri Mouse, Harve Benard, Stompers, SweetSea, Kindles, Shagg E. Dawg and—no kidding—Runny Nose.

New launches such as these are crowding the licensing seas, but instead of smooth sailing, they're likely to find turbulent waters in the 1980s. Industry insiders are unanimous in their opinion that a shakeout is under way. The licensing field is crowded in most categories, including toys and children's items, designers and entertainment. Only corporate licensing still is gaining momentum, industry observers say.

Even as the stars continue to rise and fall, licensing is becoming entrenched as a marketing tool. Competition is forcing marketers to develop sophisticated plans for advertising and to sell whole licensing programs, rather than single-shot products.

Licensing is not new. In 1904, Brown Shoe Co. purchased rights to use the name of Buster Brown, a popular turn-of-the-century comic strip character, to promote its line of children's shoes at the St. Louis World's Fair. The 1930s saw the inception of such classics as Mickey Mouse, Donald Duck and other Disney properties, and a handful of marketers and entertainers lent their names to others' products.

But in those days, the creator or owner of the licensed property considered it a fair trade when he granted the licensee permission to apply the image or design to the licensee's product. The creator got free publicity and wider recognition of his property; the licensee was able to benefit from the presumed

(Continued on Page 16)

Starring

(Continued from Page 15)

popularity of the property and take sales and market share from competitors with generic products.

In the 1950s and 1960s, licensing started to emerge as a stronger marketing tool, but it wasn't until the late 1970s that it mushroomed, thanks to a sugary-sweet character born to be licensed.

"Strawberry Shortcake really broke the barrier," says Michael Sisson, a licensing consultant and president of Sisson Associates, New York. "Then other manufacturers looked at what Strawberry Shortcake had done and said, 'If they can do it, I can too.'"

With that realization came another revelation—licenses could be money makers. Licensers that had been granting permission for others to use their properties without a fee no longer were satisfied with the intangible good will brought by the exposure. They wanted cash—and they got it. Virtually overnight, properties were transformed from marketing afterthoughts to prime prospects for marketing in their own right, says Arnold Bolka, publisher of "The Licensing Letter," a Scottsdale, Ariz.-based trade newsletter.

In 1977, licensing was a $4 billion industry in the U.S.; last year, retail sales exploded to an estimated $40 billion—50% more than in 1983, according to "The Licensing Letter." In 1985, sales are expected to increase another 50%. By 1990, Mr. Bolka predicts total retail sales for licensed merchandise will reach $75 billion.

Such growth indicates licensing has infiltrated virtually every type of product category. Clothes and accessories claim 38% of all licensing sales, with toys and games second at 19%, as tracked by "The Licensing Letter" 1984 yearend industry survey. The paper goods category follows with 12% and gifts and novelties with 11%.

Despite their enthusiasm, survey respondents agree the growth can't last forever. Most say sales of licensed products will even out during the remainder of the decade. However, the respondents—all licensers—also say sales of their own products will increase at least 40% this year.

Therein lies the dilemma for today's licenser and licensee. Unarguably, licensing is here to stay. What isn't known is how the long-haul survivors will meet that demand.

Some basic rules of licensing have been broken already. Historically, licensed concepts evolved from a variety of sources—books, comic strips, entertainment media, people, sports teams, name brands or thin air.

In 1977, Strawberry Shortcake broke that mold. The licensing property was a pioneer effort of Those Characters From Cleveland, now a division of American Greetings. The company drew a character using all the qualities a specially commissioned survey found were most appealing to young girls. Most other properties have stemmed from popular demand, as in a winning sports team, or from the pens of designers, such as Charles Schulz, who created the Peanuts characters.

However, since about 1981, power and influence in the licensing industry have been shifting from the creators to the marketers. Two camps are gaining control—toy companies and retail management. The net effect is "fewer properties will control more of the market," says Murray Altschuler, president of the Licensing Industry Assn., New York.

Retailers have only so much space and often use that space for boutiques, in which all products with a given license are displayed together. But retailers face an even greater dilemma in predicting consumer tastes.

"Management at the retail level will become much more involved in philosophical licensing decisions," Mr. Altschuler says. "Up until now, all the decisions were being made by the buyer. But licensing is a very important percentage of retail goods sold, so it behooves management to consider it in their strategic planning." Consequently, licensing now has its own trade journals, all of which are crowded with ads and articles extolling the ad plans and budgets of various properties.

"Licensers are having meetings with large retailers before they even launch their programs," says Milton Schulman, editor of The Licensing Book, a New York-based trade publication. "The retailers are looking for key elements before they commit—exposure to the age groups, a major toy company [as a licensee] if it's in the child's area—to create a major advertising effort to pull the products along."

The toy category tends to be in the forefront of changes in the developing and licensing of properties. More than half of all toys sold last year were licensed in some way, estimates Frank Reyson, editor of New York-based *Playthings.*

The growing importance of corporate licensing could have a calming effect on the industry. Having spent years building up good will and recognition, corporations are very careful about how they license their trademarks, industry consultants say.

Corporations won't put up with slapdash applications of their logo on just any product, says Steven Levitt, president of Marketing Evaluations/TVQ, Port Washington, N.Y. The "marriage" of product and license has to make sense, and that attitude is expected to keep corporate license growth gradual and steady.

"It's silly to take Noxzema and put it on something that makes no sense—like a wastepaper basket. But they should be very interested in beach towels, because Noxzema is used for sunburn," he says.

Almost everyone agrees the corporate category will be the next big growth area in licensing. More difficult to discern are the product categories and sources of properties that are being overlooked. Housewares and food are categories that haven't been swamped by licenses.

Personality and life style concepts—exemplified in the success of products affiliated with ABC-TV's nighttime soap opera "Dynasty" and the belated entrance of "Dallas" as a licenser—could take off in the next couple of years, says Pat Upton, president of New York-based Pat Upton & Associates and author of the book "Make Millions in the Licensing Business" (Monarch Press, New York, 1985). Institutions such as museums and special interest groups such as the National Audubon Society could be next in line to try to cash in on their concepts and designs.

Regardless of the category, product or type of property, licensing quickly is becoming ingrained in both the habits of marketers and the expectations of consumers.

"The licensed property today has become the brand name," says Nancy Bailey, president of Nancy Bailey Associates, Miami, Fla. "Companies are known not for themselves, but for the property."

Second 100 chart 26.7% ad growth

By R. CRAIG ENDICOTT

The nation's second 100 leading national advertisers continued to cut a deep swath through U.S. media activity by spending $2.78 billion in measured media in 1984, up 26.7% from 1983.

Those advertisers, ranked from 101 to 200 in this report on the basis of measured spending in nine advertising media, opened with No. 101 Matsushita Electric Corp. of America, spending $42.6 million, and ended with No. 200 Avon Products, spending $19.8 million.

The sheer volume of advertising that runs deeper than the 100 leading advertisers—the 100 are covered on an annual basis by ADVERTISING AGE—prompted a deeper probe into the advertising community this year and resulted in this special report.

(The 30th annual 100 leaders report will be issued Sept. 19. For the companies to be profiled in that issue, see Page 8.)

The nine-media totals of the second 100 leaders represent 11.2% of total national spending in these media, up from 10.3% in 1983.

As a composite group, the second 100 leaders contributed 5.6% of total national newspaper spending; 9% of magazine spending; 6.2% network cable; 17.1% spot tv; 11.2% network tv; 13.7% spot radio; 10.7% network radio; 4.9% outdoor, and 12.4% farm publications.

The biggest increase in traditional media among the second 100 was in magazines, with aggregate spending increasing 36% to $439.5 million in 1984.

Network cable, as might be expected, was the year-to-year growth winner with an increase of 100% to $24.4 million.

The big spending, however, was in network tv and spot tv, with network increasing 26.6% to $951.4 million, and spot tv increasing 26.7% to $931.8 million. National newspaper increased 5.4% to $166.9 million; spot radio went up 38% to $163.9 million; outdoor increased 16% to $41.9 million; farm publications improved 12.1% to $22.3 million, and network radio dropped 11.3% to $33.7 million.

The companies that begin and end the list are symbolic of the breadth of the marketing drama being played out among the second 100.

Leading National Advertisers
Profiles of companies ranked 101 to 200

Cover graphics by Avalon Studio

Matsushita, the 67-year-old Japanese company that blossomed from a marketer of adapter light sockets to a confident marketer of Panasonic, Technics and Quasar brands, is producing innovative new products that helped the company increase earnings and sales and that demanded an increase in ad spending in 1984 of 49.4% over the previous year.

Avon Products is struggling to find its corporate identity through a more compatible business mix. The door-to-door sales company increased measured spending 11.8% during 1984 in building its first earnings increase in five years.

An increase in advertising was more the rule than the exception among the list. Advertising at only 16 of the second 100 dropped from the previous year. A decline in spending generally was associated with the discontinuation of a heavily advertised product line, the divestiture of a major line of business, or poor sales and earnings performance.

ADVERTISING AGE also made a number of editorial decisions in arriving at the companies profiled. One of the big spenders that showed up on the advertising charts obtained from monitoring services used to rank the companies (see how ADVERTISING AGE got its data on Page 68) was excluded because it was a one-time event. That was the 1984 presidential campaign represented by the Reagan for President Committee, spending $21.9 million, all in network tv. The Reagan camp outspent the Mondale for President Committee by $5.3 million.

Another marketer appearing within the ranks, Paramount International, will be dissolved into U.S. government ad expenditures in the upcoming 100 leaders issue. Paramount was the marketing arm for U.S. government-issued commemorative Olympic coins. It spent $21.3 million in this enterprise, $17.1 million in network tv and $4.2 million in spot tv.

In analyzing the data obtained in this report on the nation's second 100 leading advertisers, the drug and entertainment companies and toiletries and cosmetics companies were more advertising driven than other categories.

Thompson Medical Co. had a 20.7% advertising-to-U.S. sales percentage; Block Drug, 19.5%; Orion Pictures, 15.9%; Tambrands, 10.8%; Carter-Wallace, 9.5%; Helene Curtis, 9%.

Expansion-minded Ceji-Revell, with advertising equal to 62.4% of its U.S. sales, had the highest percentage on the list among companies whose U.S. sales were known. Jeffrey Martin no doubt had a higher percentage, with $36.8 million in advertising on worldwide sales of $58.5 million (a 62.9%); its U.S. sales were not known. Twenty had ad/sales ratios higher than 3 to 100.

Given the fact that the aggregate measured advertising of all second 100 leading advertisers increased 26.7% from year to year, it was not unusual to find many that boosted their measured spending 50% in

Second

(Continued from Page 1)

1984 over the previous year. Nineteen of the second 100 did this; 10 even hiked their spending 100%.

Ceji-Revell, known for its intricate toy models, entered the play toy business in a big way, transporting its *schtroumpfs* from the playrooms in France to the backyards of the U.S., and in the process increased its 1983 spending by 2,722% in taking year-to-year advertising growth honors among the second 100 leading advertisers.

New acquisitions often meant sizable spending increases. Gaines line of dog food acquired from General Foods pushed Anderson, Clayton & Co.'s ad budget for measured media up 158.6%; Black & Decker Corp. increased advertising 136.2%, most on its own power tool line, as it purchased General Electric's housewares division and Elu tools from Switzerland.

New product introductions also stimulated spending as in the case of Shell Oil Co., its introduction of SU2000 and RU2000 gasoline priming the ad pump by 126.9%; Ciba-Geigy Corp. boosted advertising 100.2% in part to peddle new products, Softcontact lenses and Acutrim 16-hour time release appetite suppressant.

Atlantic Richfield Co. built up its ad budget by 243.1% in measured spending in pushing its petroleum products and service stations nationwide only to undo its marketing shift by ridding itself of nearly 2,000 service stations/AM PM Mini Marts at locations east of the Mississippi in early 1985.

A number of companies faced with declining sales and earnings attempted to revive lost fortunes through advertising. Castle & Cooke boosted its advertising by 203.3% in 1984 as it stressed fresh, packaged and branded products in advertising slugged: "A sunny place called Dole." By its third quarter, it seemed to be recovering when debt restructuring was foisted upon the company and an outside buyer took over.

Advertising often was increased just to stay abreast with the competition, particularly in the computer industry, where reduced sales and lower profit margins are taking their toll. Wang Laboratories increased ad spending 184.4%, NCR Corp., 120.9%; Hewlett-Packard Co., 58.2%; Sharp Electronics Corp., 26.5%.

The breakup of the Bell System produced some big ad spenders. Four former Bell units made the second 100 list.

Sixteen advertisers cut measured spending in 1984, and two reasons stick out: The shelving of a product line, and an over-all corporate loss for the year.

Texas Instruments, for example, canned its heavily advertised TI 99/4A computer in late 1983, and advertising was not picked up elsewhere in the budget as ad spending in 1984 dropped 63.6% for TI, among the 100 leading advertisers in 1983. With the computer games business in a seemingly bottomless depression, Coleco Industries and Atari Corp. pulled out of those businesses; dropped ad spending 53.1% in the case of Coleco and 68.5% at Atari.

Polaroid Corp. faced a similar problem in its instant photography market where intense price competition and low sales cut into earnings and the ad budget, sliced 7.5% from 1983.

A number of players in the wine and spirits industry, reeling under the double whammy of reduced demand and increased public pressure against drunken driving, went low key with their ad budgets in 1984. Brown-Forman Distillers dropped its advertising 13%, but promised to toss $1 million into a public service trade campaign this year. E&J Gallo Winery siphoned off 5.5% of its ad budget from 1983, and G. Heileman Brewing Co. reduced its spending 7.2%.

A luxury car willing to drag its reputation through the mud.

For 1985, the Subaru four door sedan has been completely redesigned.

It's much larger. More luxurious. And one of the most aerodynamic sedans ever built. Which means it not only looks better, it drives better.

The new Subaru.

On the inside, you'll find that meticulous attention has been paid to every appointment and every control. Whether it's the new digital instrument panel with trip computer or optional electric sunroof.

You'll also be comforted to know that the wide plush seats with lumbar support and height adjuster are surrounded by more leg, hip and head room.

And Subaru does not believe passengers in the back seat should take a back seat to comfort. So the rear doors and rear seats were redesigned. Not only to give you plenty of room to stretch out and relax, but so you can get in and out of the car more easily.

And this year, the Subaru Sedan is available with a choice of transmissions and engines. Which means you can tailor your Subaru to fit your specific needs.

For example, you can select a model with multi-point fuel injection or fuel injection and turbo.

Either way, you get more horsepower for even greater performance.

Finally, you can have as much or as little luxury as you desire. The Subaru Sedan comes in four different versions. DL, GL, GL-10 and the RX.

The four wheel drive factor.

Unlike the usual luxury car crowd, the Subaru Sedan comes appointed with either front or "On Demand"™ four wheel drive transmission.

And if you're familiar with the superior road holding ability and crisp handling of front wheel drive, you'll be twice as impressed with "On Demand" four wheel drive.

By flicking a lever or pushing a button "On Demand" four wheel drive sends power to all four wheels. Instantly. Without stopping.

The results are an extra measure of safety and traction on practically any road, in any weather condition.

And to exercise your freedom of choice you can also select our recent innovation: Turbo-Traction.™ It combines the power and performance of turbo charged fuel injection and "On Demand" four wheel drive.

And no car, even the most luxurious can give you that.

The car behind the luxury.

Perhaps the most important feature of this luxury car is that it's a Subaru.

And that means it's one of the most reliable and affordable cars on the road today.

A car that costs little to buy. And little down the road.

A car that holds up mile after mile, year after year. And according to a recent survey by an independent research company, Subaru was ranked second only to Mercedes-Benz in customer satisfaction.

Better than BMW, Audi, Toyota, Mazda, Honda, Nissan, Porsche and any car built by GM, Ford, or Chrysler.

In fact, when you start to think about it, isn't this luxury car beginning to sound more and more like a necessity?

THE 1985 SUBARU.
Inexpensive. And built to stay that way.

Subaru rides crest of Japanese import wave. Agency: Levine, Huntley, Schmidt & Beaver.

Often, reduced ad spending had more to do with the strength of the product "chestnut" built up by advertising in the past. Sony Corp. of America, which cut back 17.8% in advertising in measured media, did most of that in reduced spending for its Walkman radios, which dominate the market.

Pan American World Airways' advertising, which dropped 3.1%, continued to follow a pattern established several years ago: When business activity declines, drop advertising. But today, Pan Am marketing executives are singing another tune with the proposed divestiture of the airline's Pacific routes to United Airlines. Now Pan Am can concentrate on a less than global market, which it predicts will stimulate advertising.

During the time period covered by the profiles, several of the companies were subjects of buyouts. Royal Crown Cos. (which includes Arby's) was purchased by the Posner Group and renamed Chesapeake Financial Corp. Ceji-Revell is a marriage of Revell and the Drancy, France-based Ceji. Castle & Cooke was purchased by Flexi-Van Corp., which pulled it out of economic straits. Shell Oil was bought by Royal Dutch-Shell, which owned two-thirds of the company before tendering the rest beginning last year. Atari Corp. was taken private by Jack Tramiel. Blue Bell Inc. was bought out by its management.

Trouble keeps brewing among the leaders. Geo. A. Hormel & Co. continues to have a running warfare with its unions at its home plant in Minnesota. This may usher in a new era for Hormel, which threatens to head south to Atlanta if things don't get better.

A.H. Robins Co. has had to pay out $314.6 million in damages to users of its Dalkon Shield IUD. Robins marketed the intrauterine device in the early 1970s. Some 3,800 claims still are pending. The company has spent more than $7 million in campaigns since October, 1984, warning women against continued usage of the shield. A team from Burson-Marsteller is handling the campaign.

The Burson-Marsteller heavy-hitters also handled the salmonella troubles besetting Jewel Cos., a new acquisition of American Stores Co.

The disastrous freeze at the end of last year that cut deeply into citrus production in Florida will bring about higher advertising spending in 1985. The reduced supply means higher prices and consumer resistance, and that translates into bigger ad outlays, say officials connected with advertising for the State of Florida, which spent $31 million in advertising to rank 130th in 1984.#

Alberto-Culver Co., Melrose Park, Ill., the 178th largest national advertiser with 1984 measured ad spending increasing 22% over 1983 to $22.9 million, had a strong 1984 spurred on by sales from new business activities.

Total sales for fiscal 1984 were up 11% to $348.6 million, with about 15%, or $52 million, of that total coming from new business—new products, the acquisition of Indola Cosmetics B.V. in the Netherlands and an increase in the number of beauty stores owned by Sally Beauty Co., a division of Alberto-Culver.

The company increased spending (including measured spending) in all advertising and promotion activities during 1984 to $65 million, up 11% from the previous year. About $3 million more went for market research.

Alberto-Culver is popularly known as a consumer haircare and toiletries company, but it is much more. Ten company units deal with consumer and professional goods, food and clothing products, construction maintenance materials and advertising services.

Much of the increase in measured ad spending in 1984 is attributed to backing Alberto Mousse European styling foam, a new product type (introduced to the U.S. by L'Oreal) in the $3 billion U.S. retail haircare market. The product, which had been in use in European hair salons, quickly become one of Alberto-Culver's best sellers. The company also introduced the same type of product for men, Alberto VO5 Mousse for Men. The company spent $5 million in measured advertising, according to Leading National Advertisers, for its largest product outlay in 1984 for women's mousse.

Other Alberto-Culver toiletries division products entering the heavily competitive 1984 haircare market as line extensions were Alberto VO5 shampoo with essence of citrus, for oily hair, and Alberto VO5 shampoo with essence of aloe, for dry or damaged hair. Also new in 1984 were additional formulas of Alberto VO5 shampoo, conditioner and spray for the 50 million U.S. women (60% of the population) with permed or colored hair.

Alberto-Culver's professional division introduced to the salon trade the new foam mousse product lines under the TRESemme label, including TCB mousse, one of the first hair styling foams for black consumers, and TRESemme TRES Gelee gel fixative to capitalize on popular shorter hair styles.

The household/grocery products division in 1984 built up its Mrs. Dash salt-free seasoner franchise by introducing Mrs. Dash steak sauce and Mrs. Dash crispy coating mix, both low-sodium products, and a reformulated Mrs. Dash seasoning with no garlic and 50% less pepper. Spending in measured media as a result increased 40.6% to $4.5 million, according to LNA. Measured spending for the remaining household/grocery products division—including Static Guard antistatic-cling spray, SugarTwin nonsugar sweetener, Baker's Joy antistick oil and flour spray for baking pans—remained unchanged as a whole.

In the international division, Alberto-Culver's major change was the acquisition of Indola. Alberto-Culver markets in more than 100 nations, but the Indola addition makes Europe the international division's No. 1 market.

Overseas product rollouts include the Indola mousse reformulated as a coloring agent, Alberto VO5 styling mousse and Alberto VO5 Alive coloring in the U.K., and styling mousse in Puerto Rico, Australia and Hong Kong.

Fastest growing of Alberto-Culver's 10 divisions is Sally Beauty Co., a chain of self-service wholesale beauty supply outlets located in shopping centers in the South. Since 1980 the number of these cash-and-carry shops catering to barbers and beauticians has grown from 39 to more than 200.

A major change in ad strategy during the year was moving Consort beauty products from wholesale houses into salons and barbershops. Bozell & Jacobs is handling creative work for the new retail promotion of Consort men's haircare products.

Other agency decisions for the year included moving creative for the household/grocery products division to Stern Walter/Earle Ludgin, Chicago. D'Arcy MacManus Masius formerly handled the account. Alberto-Culver also shifted TCB ethnic haircare from Proctor & Gardner Advertising, Chicago, to Uniworld Group, New York.

Alberto-Culver's subsidiary advertising agency, Draper Daniels Media Service, Chicago, continues to handle all media buying and planning for Alberto-Culver in addition to other clients. It is just one of the companies Leonard H. Lavin, chairman-president-ceo, has added to the company since he acquired Alberto-Culver in 1955 when annual sales were $368,000. Since then, Alberto-Culver has grown to include the John A. Frye Shoe Co., Marlborough, Mass., producer of high-quality boots and shoes; Phillippe of California, producer of fine-quality linen and leather handbags; Sally Beauty Co., Denton, Tex., wholesaler of professional beauty products, and Masury-Columbia, supplier of building-maintenance products and services.

American Dairy Assn.

Rosemont, Ill.

RANK 141

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	44.0	34.9	26.1
Net income	N/A	N/A	N/A
Advertising	29.1	23.9	21.7

American Dairy Assn., Rosemont, Ill., the nation's 141st largest advertiser, made its largest ever push to increase consumption of dairy products in 1984 by raising total measured spending to $29.1 million, 21.7% over 1983 levels.

Financed indirectly by dairy farmers' self-imposed assessment of 15-cents per hundredweight of milk produced, enacted in 1984, the ADA boosted total ad spending between 15% and 20% for the year. Although LNA-measured spending was $29.1 million, the ADA says it spent $42 million, a level it hopes to maintain in 1985.

Whether the ADA is able to maintain current spending depends on approval of a national referendum of dairy farmers in July and August to extend the promotional assessment indefinitely. The assessment produced $190 million for local and national advertising as of April 30, 1985. Of that, a third goes to the National Dairy Promotion & Research Board, Washington, and two-thirds to local dairy associations, which fund the ADA.

The ADA is the marketing and advertising arm of the United Dairy Industry Assn., also headquartered in Rosemont, a coalition of 21 member and 33 affiliated dairy farmers. The ADA, the dairy board and the California-Oregon-Washington Milk Advisory Board, in turn, coordinate their national ad efforts.

The bulk of the ADA's spending increases in 1984 were in spot tv for programs featuring cheese, butter and fluid milk in selected markets. The ADA reports spending $20 million in 1984 on spot tv for its "Milk's got more" theme, in addition to $5 million in spot radio. (Measured figures show a drop in spot radio to $3.1 million in 1984 from $4.8 million in 1983.)

The milk program targeted adults, ages 18 to 34, in five new commercials designed to persuade milk drinkers to consume more each day. Children 6 to 12 were targeted in three rock-video format commercials presenting milk as a drink that fits children's life styles. Dance numbers set to popular music showed an older bcy urging young companions to "go for milk."

Cheese starred in four musical commercials with the theme "Make your meals sing with real cheese." Cheese received $7 million for network tv and $3 million for spot tv, the ADA says. "Cheese Jamboree," a fall promotion sponsored by the UDIA, the dairy board and various dairy groups, accounted for $3 million of the ADA's cheese budget. The jamboree theme was picked up by Nabisco Brands in its fall promotion for Premium crackers.

Butter took the spotlight in a new 30-second tv spot and in magazine ads with the theme: "America's coming home to the good taste of butter." The spots and ads showed butter's use in a home-cooked, family reunion meal. The ads reminded consumers of the superior flavor and natural goodness of real butter and were targeted at ages 20 to 49 with better than average incomes.

Butter advertising also is a part of the ADA's "REAL" Seal campaign, a certification program of food packagers, processors and retailers. In 1984, "REAL" Seal was budgeted for $4 million in spot tv and about $3 million in other media—spot radio, outdoor and magazines, the ADA says.

Tv and print ads featuring Vincent Price made up about $3.5 million of total "REAL" Seal spending. The ads reminded viewers that only "real" dairy foods have natural origins. The campaign had seasonal tie-ins with June Dairy Month, promotions for cheese, ice cream, cottage cheese and holiday food preparation.

The ADA also participated in cooperative promotional efforts with major food companies, including Nabisco, Nestle, Libby's, General Foods, Post and Hiram Walker.

In agency changes for 1984, TBWA gained ADA's butter account.

American Stores Co.

Salt Lake City, Utah

RANK 144

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	12,118.8	7,983.7	51.8
Net income	185.5	117.9	57.4
Advertising	28.3	20.2	40.1

The acquisition last year of Jewel Cos. has taught American Stores Co. how to take the bad with the good.

Within a year after acquiring Jewel, the normally low-profile American Stores found itself under intense media scrutiny when milk produced at a plant operated by its new Chicago subsidiary was linked to the largest salmonella outbreak in U.S. history.

The Salt Lake City-based food and drug retailer, known throughout the industry as a tight-lipped company that makes no apologies for its constant pursuit of profits, was forced to change its secretive ways.

James Henson, Jewel's president, went public in tv spots and print ads prepared by a team from Burson-Marsteller, Chicago, to assure consumers that all dairy products had been removed from the 217-store Jewel chain. The chain also contracted with another dairy supplier. Regular dairy product tv ads were yanked and other tv spots were moved away from news programs.

These were not the type of marketing decisions American Stores prefers to make.

The company ranked 144th among U.S. advertisers in 1984, spending $28.3 million in measured advertising. That amount, which represents an increase of 40.1% over 1983, was spent almost entirely on spot tv buys.

The acquisition of the Jewel chain accounted for the bulk of the increase in American Stores' sales. For the 53-week fiscal year that ended Feb. 2, the company reported sales of $12.1 billion, up from $8 billion in the previous year.

Net income was $185.5 million, up 57.3% from fiscal 1984.

To finance the $1.1 billion acquisition of Jewel, which was completed in November, American Stores divested several groups of stores.

In October, it sold 33 Alpha Beta grocery stores in Arizona for about $57 million. In November, it sold 11 Houston Sav-on drugstores for about $14 million.

In December it sold Rea & Derick, a drug chain, for about $90 million, and Jewel's 36.1% equity interest in Mexico's leading retailer, Aurrera, S.A. de C.V., for about $53 million. And in January, American Stores sold 22 Alpha Beta stores in California and related inventory and equipment for about $52 million.

The company also has sold Jewel's White Hen Pantry convenience store division and Park Corp., Jewel's manufacturing subsidiary. After all that activity, American Stores is left with 1,486 stores in 40 states.

The focus of the company's efforts now turns to creating a coast-to-coast drugstore chain, which will operate under the Osco Drug Co. name. This national network will consolidate three existing chains: Osco, Skaggs Drug Centers and Sav-on Drug.

The name change has begun with Skaggs units and when that is completed, Sav-on units will be renamed. As of May 31, there were 106 Skaggs and 176 Sav-on stores.

When the transition is completed—American Stores expects it to be done by yearend—there will be 648 Osco stores in more than 30 states.

The strategy behind the change is to develop a national umbrella from which American Stores can save money on advertising, purchasing and distribution.

The company believes the advantage of advertising the Osco name in conjunction with national name brands will serve as an incentive to manufacturers.

Over the longer term, the company intends to accelerate the development of larger units, both grocery stores and drugstores and combinations of the two.

On July 31, 1984, Thomas Field Jr. resigned as president of American Stores, Alpha Beta Co. and Skaggs Cos. Subsequently, three senior vps were named to a new office of the president: Victor Lund, financial accounting; Alan Stewart, human resouces, and Larry Hodges, merchandising and operations.

In other senior management developments, Joseph Bowman and Richard Gladden were named presidents of Skaggs and Alpha Beta, respectively. Lawrence Rogers was appointed president of Skaggs Alpha Beta, and Richard George, president of Osco Drug, was named to the additional post of president of Sav-on Drugs.

Amoco Corp., Chicago, strengthened its position as a leading U.S. gasoline marketer in 1984 while simultaneously taking steps to streamline other operations by spinning off money-losing mining operations.

The nation's fifth largest oil company, which this year changed its corporate name from Standard Oil Co. (Indiana), spent $20.0 million in measured media advertising last year, a 39.6% increase from 1983, ranking it 194th among U.S. advertisers.

Amoco earned a record $2.2 billion in 1984, a 17% increase from 1983, despite continuing erosion in oil-industry prices. Those earnings came from total revenues of $29 billion, a 2% drop.

Worldwide earnings from Amoco Oil Co.'s refining, marketing and transportation activities were $123 million in 1984, more than quadrupling the $28 million earned a year earlier. The increase was partially because of a $53 million gain from the sale of Australian refining and marketing operations to a unit of British Petroleum.

Heavy competitive pressures from excess refining capacity and lower prices, however, caused a severe downturn in first-quarter 1985 earnings for the company's refining and marketing operations. The unit earned only $2 million in the quarter, compared with $22 million a year earlier. Earnings from U.S. oil exploration and production fell 16% to $243 million, while foreign activities in the same sector dropped 20% to $189 million in the quarter. Earnings from chemical operations dipped 17% to $49 million.

In part to offset impending hard times for gasoline marketers, Amoco continued to reduce the number of its low-volume service stations in its 33-state marketing area, while expanding the number of metropolitan Certicare auto-service centers by 25% to 500.

The company distributes petroleum products to 15,700 service stations, 4,400 of which it owns or leases. The total number of stations was reduced last year by 2,300. Most current outlets are operated by independent dealers.

In January, Amoco Oil will streamline over-all U.S. marketing operations by closing three regional and five district offices and creating East and West zones to replace several regional marketing entities.

The company's gasoline market share in its metropolitan retail areas increased to 14.4% in 1984 from 13.3% a year earlier, and it claims a leading 11.7% market share in the 33-state region, including Midwest, East and Southeast markets.

Amoco used direct-mail advertising to reach 7 million prospects in 1984, leading to an 800,000 expansion of its credit-card base. D'Arcy MacManus Masius, Chicago, has been Amoco Oil's agency of record for 30 years, and despite an informal review of other agencies last spring, marketing officials there insist no agency change is imminent.

A major yearlong tv and radio campaign using the tag line, "Your car knows" began in April.

D'Arcy's estimated $20 million in Amoco Oil advertising makes up the bulk of Amoco Corp.'s ad budget, and includes ads for gasoline, service stations, tires, batteries and accessories.

Amoco does almost no corporate advertising, except for a short-term campaign apprising customers and shareholders of its name change. The company's chemicals division received less than $1 million in measured media advertising support last year.

After selling its foreign oil interests to Standard Oil Co. (New Jersey)—now Exxon Corp.—in 1932, the company in the past two decades has begun quietly rebuilding its overseas oil business. Last year, for example, it acquired drilling rights for Burundi, Mozambique and Tanzania.

The company's unprofitable Cyprus Minerals Co. division will be spun off to Amoco shareholders July 1 in a tax-free distribution.

Anderson, Clayton & Co. took another step last month in bolstering its prosperous grocery products business by merging its Chiffon and Seven Seas brands into the newly formed Gaines Foods division.

The Houston-based company was the 171st largest U.S. advertiser in 1984 with total measured spending of $23.4 million, $19.1 million of which went to support Gaines and Gravy Train dog food brands acquired from General Foods in 1984. In 1983, Anderson, Clayton spent only $9.1 million in measured advertising, largely on its Igloo coolers and Seven Seas salad dressings.

The move to bring Chiffon and Seven Seas under the new grocery products umbrella bearing the Gaines Foods moniker consolidates all Anderson, Clayton's grocery products into a single unit. In 1984, Anderson, Clayton did not allocate monies for Chiffon in measured media, but backed Seven Seas with $2.4 million, nearly all in magazines, down 57.1% from 1983, and still short of the $3.5 million spent in 1982. Chiffon has received very little media support in the past few years.

By contrast, out of the $19.1 million in media spent by the Gaines division, $8.1 million went for network tv, $8.4 million for spot tv and $2.3 million for magazines. Gaines, while a division of General Foods in 1983, spent $9.9 million in measured media. Anderson, Clayton purchased Gaines, which had sales of about $300 million, on June 5, 1984, for $158 million cash.

As a result of moving Chiffon and Seven Seas to Gaines, the company split Gaines marketing into two groups: Foods, headed by Alan R. Koss, handling Chiffon and Seven Seas, and dog foods, headed by Bruce B. Bramen. Additional directors for dog foods include William C. Storey, logistics; Ralph D. Vogt, technical research, and Nancy Wong, marketing.

Both marketing groups report to Ralph L. Cobb, Gaines' president. Ernest E. Steinle directs sales for both divisions.

Gaines Foods, White Plains, N.Y., announced in late April, 1985, a switch in agencies for Gaines Burgers, Top Choice, Puppy Choice and Prime Variety soft-moist dog foods from Young & Rubicam, New York, to Benton & Bowles, New York. The change took effect in May, giving Benton & Bowles all Gaines dog food brands. The agency already handled Gravy Train and Cycle brand dog foods.

Y&R had been the agency for Gaines Burgers since the brand's inception in 1962 and for Top Choice over most of that brand's 19-year history. Benton & Bowles has been a Gaines agency for more than 30 years.

Anderson, Clayton recorded net income for the nine months ended March 31, 1985, of $13.1 million on sales of $1.39 billion. Sales for the fiscal year ended June 30, 1984, were $1.52 billion, up 9.6%, with net income of $38.5 million, up 78%.

In May, the company took a $10.8 million charge against third-quarter net income because of steep losses by its Ranger Insurance Co. affiliate. The charge resulted from increasing reserves for reinsurance losses due to heavy claims, lower interest income and a price war in commercial property and casualty insurance. Ranger had net losses in fiscal 1984 and 1983.

Considering Anderson, Clayton's recent problems in insurance and materials handling equipment, it is not surprising a pattern has developed of attempts to acquire profitable grocery product lines. In 1983, for example, the company bid $490 million for Norton Simon Inc., owner of Hunt-Wesson Foods and United Can. The bid failed when Norton Simon accepted an offer from Esmark, which later was acquired by Beatrice Cos.

In 1977, Anderson, Clayton bid on Gerber Products Co., a year after making a bid for Stokely-Van Camp. Both bids were rejected.

With Gaines firmly in hand, however, Anderson, Clayton executives say Gaines' experienced management and direct sales force fulfills a "real need" as it pursues the grocery products market.

Atari Corp.
Sunnyvale, Cal.

RANK
186

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	N/A	N/A	N/A
Net income	N/A	N/A	N/A
Advertising	21.2	67.6	-68.6

Marketing and advertising in 1985 and beyond at Atari Corp. almost certainly will hinge on a key product, the 520ST home computer, designed to compete with Apple Computer's Macintosh at a third of the price. The Sunnyvale, Cal., marketer was the 186th largest U.S. advertiser in 1984 with $21.2 million in measured spending, off 68.5% from 1983.

Lately, Atari is producing as many questions as answers about its future in the troubled home computer market, following the announcement that the 520ST will not be available in the U.S. until July, 1985, three months later than originally intended.

The 520ST has the fancy graphics and easy-to-use features of a Macintosh, but it costs about $800, compared with the Macintosh, which goes for more than $2,000.

The new Atari unit is among the most highly touted machines. The product kicked off in Europe last month in order to test the waters in that less competitive market and build marketing foundation, a pattern Jack Tramiel, chairman, set while chief of Commodore International. U.S. distribution is expected to be in ComputerLand stores where the 520ST will compete directly with the more expensive IBM and Apple models.

Unlike Macintosh, the 520ST works in color, and analysts say it could be the machine that makes consumers excited about home computers again. Analysts say the low-end home computer market could use some help, especially after IBM's cancelation in 1985 of its PCjr.

Atari has a 16% share of the $6 billion home computer market dominated by Commodore (33%). Other leading players in the market are Tandy Corp.'s Radio Shack (18%) and Apple Computer (16%).

Strong sales of the 520ST could provide a much-needed boost in Atari's finances, which have been poor in recent years. While results of financial performance are not available from the privately held company, Mr. Tramiel has admitted to securities analysts that sales in Atari's current line are "very,

very slow."

The company's XE mass-market product retailing for $149 has not been doing well, in fact, it may be phased out as the market builds for the 520ST.

Mr. Tramiel bought Atari from Warner Communications in 1984 after his ouster as ceo of Commodore International Ltd., West Chester, Pa. Warner retained a 32% stake in Atari, in a deal that involved no cash. Under Mr. Tramiel's guidance, however, Atari is being transformed into a company that barely resembles the former Warner unit.

Under Warner in 1983, $67.0 million in measured media was spent on Atari products. The major difference in spending in 1984 was in computer games and cartridges, which dropped from $49.5 million to $9.3 million in 1984, reflecting the depressed video games market. Most of the spending in both years was for network tv.

Mr. Tramiel has lured several key executives away from Commodore, and he is attempting to overhaul Atari's product line, which includes the Atari 600, Atari 800 and 800XL computers targeted at the low end of the market, educational and game software, and video systems that plug into the computers.

Network tv got $18 million of Atari's total measured spending in 1984; $5.7 million of the tv spending went for its combined video system and software, and $3.9 million for software. Atari software and game cartridges figured heavily in 1984 spending. Atari also spent about $1 million for spot tv and $2 million for magazines.

A vast restructuring at Atlantic Richfield Co. in 1985, which involves a plan to sell or dispose of 2,000 service stations east of the Mississippi River, may dramatically change Arco's marketing efforts. Los Angeles-based Arco, the 170th largest U.S. advertiser in 1984, had total measured spending of $23.5 million, an increase of 243% over 1983.

As the nation's sixth largest oil company, Arco will own about 800 service stations and operate 1,200 leased dealer stations in the West after the restructuring, eliminating about 1,150 Arco-owned service stations and 870 dealer-owned and independent stations in the East. In addition, the company is attempting to sell its Philadelphia refinery, a sale that may be complicated by an overabundance of refining capacity in the U.S., where more than 100 refineries have been closed in the past five years.

Company executives say it is too early to determine the effect restructuring may have on ad spending. But in effect, it reverses the strategy that peaked in 1984 of building national brand recognition for Arco's gasoline and retail network.

In light of the changes, it is doubtful Arco will come close to maintaining its 1984 ad levels simply because of its greatly decreased market presence. For example, the company controls 7% of the retail gasoline market in New York state, 7% in New Jersey and 11% in Connecticut.

In addition, 1984 represented a break with ad spending patterns of previous years. Arco's 1984 measured spending for general petroleum product promotion included $10 million in network tv, an increase of 55 times over measured network tv spending of $182,000 in 1983.

Large spending increases also were measured in 1984 for spot tv ads featuring Arco gasoline and service stations, an increase of 155% to $10.4 million. Of the 1984 measured spending totals, $4.3 million was spot tv for dealer's service promotion, with an additional $4.3 million in spot tv for Arco's AM PM Mini Markets, and $1.2 million for MP&G Tune Up Centers.

For comparison, the largest measured spending categories in 1983 were $1.7 million in spot tv for gasoline and $1.2 million in measured spot tv for AM PM Mini-Markets.

The restructuring, analysts say, is intended to reduce Arco's overcapacity in gasoline refining and marketing, which had been eroding profit margins, and to rechannel company resources away from failed diversification efforts to improve both the bottom line and returns to shareholders. By allowing stock market values to rise to levels that more closely reflect the actual value of its assets, Arco becomes a less likely target for takeover, Wall Street analysts say.

News of the restructuring took the oil industry by surprise because, despite declining earnings, Atlantic Richfield was in sound financial shape. The company in 1984 recorded its second consecutive year of falling profits and revenues. Operating revenues totaled $24.6 billion, a decrease of 1% from 1983 and 6% from 1982. Net income in 1984 was $567 million, a decrease of 63% from 1983.

Net income in 1984, however, was affected by a $785 million writedown of Arco's remaining metals business and Anaconda Minerals Co. operations. Excluding the writedown, net income would have been $1.39 billion, a 12% decline from 1983.

In its restructuring, Atlantic Richfield Corp. is to undergo radical surgery in 1985, cutting away unprofitable mining and metals operations and stripping the company to its basics in oil and gas properties in Alaska, the Gulf of Mexico and western Texas.

As part of the plan, Arco announced plans to spend $4 billion through the end of 1986 on stock repurchases, stripped nearly $1 billion from planned exploration in 1985, and took $1.3 billion in 1985 writeoffs. The company also sold its huge Anaconda mining division, which lost $642 million between 1982 and 1984.

The $1.3 billion writedown includes divestiture of the gasoline stations and certain refining and petrochemicals operations, in addition to exploration property, and costs related to reducing its number of employes by 5,000 from the current figure of 39,500.

Sales	2,086.1	2,122.1	-1.7
Operating profits	213.9	286.7	-25.4
Advertising	19.8	17.8	11.5

Although highly diversified Avon Products did not have the total sales it was calling for in 1984, the 200th largest U.S. advertiser in 1984 with measured media expenditures of $19.8 million, up 11.5% from 1983, did generate its first earnings increase in five years and is taking steps to develop a more compatible business mix.

Total 1984 revenues of $3.14 billion were less than 1% above the 1983 figure. But 1984 net earnings of $181.7 million were up 5%, the first such increase since 1979 and said to be about what management expected.

Avon, New York, is more than just a cosmetic company and far more than the popular picture of doorstep vending. It is a diversified international company with six areas of business, broadly described as cosmetics, fashion jewelry, apparel, healthcare products, specialty chemicals and home healthcare supplies.

It is this same diversity, though, that is seen by some observers as a problem as well as a boon—a problem when it has Avon selling Tiffany's fine jewelry and disparate products such as jelly beans; a boon when it brings to Avon a profit-making division such as the new Foster Medical division, which sells and rents medical equipment and supplies for home use, and a chief executive such as Hicks Waldron.

Mr. Waldron, Avon's chairman-ceo, came to the company in 1983 from R.J. Reynolds Industries where he was chairman-ceo of subsidiary Heublein Inc. as well as a Reynold's exec vp. In his view, Avon needs a lot more strategic planning: "We have to acquire and enter growth businesses because there is a significant gap between our corporate financial objectives and what we can realistically expect from our current businesses."

At the same time, Mr. Waldron says bolstering performance of Avon's U.S. beauty business is the company's No. 1 short-term priority. Some industry observers would agree, including Diane Mustain, who follows Avon for Duff & Phelps securities analyst:

"Supposedly Avon was undervalued in its important skincare area, and they realize this has been their best area. And they have been overpriced in their gift and decorative area, which is not so strong for them. They sold Tiffany because it was not their main marketing area. It was a misfit. Maybe they will sell their gift and decorative areas, too. Fashion jewelry also is questionable."

Like many of its fellow U.S. businesses, Avon has been adding and subtracting from its corporate corpus in recent years to get the right, profit-turning mix. In 1982, for $711.5 million, it bought Mallinckrodt Inc. of St. Louis, producer of chemicals for the healthcare and food-processing markets.

On May 30, 1984, Avon merged with Foster Medical Corp. In October, 1984, Avon sold Tiffany & Co. for $135.5 million in a leveraged buyout by Tiffany's management.

Advancing its main cosmetic and personal-care line, Avon introduced multiple new products this year, including Pure Care Line for sensitive skincare and makeup; Age Protection System, a broad-spectrum sun screen that contains a new ingredient; the Imari fragrance line, and the Colorsparks youth makeup line (both scheduled for September). New marketing approaches are expected to be a part of Avon's new product emphasis this year, including the use of a toll-free number in tv advertising.

Striking a balance may be needed in the new-product process.

"Avon has to rebuild consumer loyalty, making fewer changes in the product line. Let customers know they can expect to find some of the same old reliable products," Ms. Mustain says.

In addition to its U.S. sales, Avon does business in Canada, Mexico and the rest of Latin America, Europe, Africa, Asia and Australia. International operating profits were up 11%, although local currency sales increases of 1% in Europe and 6% in the Pacific turned into sales decreases when converted to dollars.

Avon now markets about 700 products in the U.S. and a less varied array in some overseas areas. Its 1984 worldwide budget in a varied menu of media and nonmedia advertising is up 27% to $23 million in 1984.

Always critical to its success has been its army of door-to-door vendors. Avon would like to have 600,000 of these field sales reps, but reportedly hasn't been able to hire more than 400,000 because of some familiar realities of 1984 life: The demand for higher pay and for fulltime work with benefits, and the movement of more women into the workplace. To counter this problem, Avon is said to be hiking representative pay. Avon's selling mode continues to be a problem in some overseas areas, particularly

Source: Leading National Advertisers (farm publications not included)

Northern Europe, where doorstep selling is not socially acceptable.

Avon markets its six lines of products and services through four main divisions:

Avon's beauty products division recorded 69% of the company's 1984 sales while experiencing a 1% dip in its divisional sales, compared with 1983. Of these sales, 22% are fragrances and bath products; 23% are makeup and skincare; 6% men's toiletries; 7% personal care, children's, and teen products, and 11%, fashion jewelry. Sales and operating profits rose 5% at the Mallinckrodt division that sells healthcare products. Foster Medical sales contributed only 3% of Avon's total, but its sales were up 25% and operating profits 73%. The fashion division, which primarily markets clothing by mail order, had increased sales of 29%, but operating profits dropped 75%, primarily because of capital investments and unexpectedly high order fulfillment costs.

BellSouth Corp.

Atlanta

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	9,519.0	10,724.0	N/A
Net income	1,257.0	1,372.0	N/A
Advertising	22.3	N/A	N/A

BellSouth Corp., Atlanta, is the 180th largest national advertiser, with $22.3 million in total measured ad spending in 1984, and constitutes the postdivestiture grouping of telephone companies providing Bell service from the Atlantic seaboard to Louisiana and from the Ohio River to the Gulf of Mexico.

Total revenues in 1984 were $9.5 billion, down 11% from predivestiture level in 1983, and net income was $1.26 billion, off 8% from 1983. Revenues dropped more than the company predicted and net income fell less than expected. Like all of the seven new regional Bell corporations, BellSouth consists of a corporate holding company, the telephone operating companies and additional subsidiaries.

BellSouth's two operating companies, Southern Bell and South Central Bell, are its biggest money makers, toting up more than 95% of corporate 1984 revenues. Viewed from another perspective, about 90% of BellSouth's 1984 revenues came from communications services and the balance from directory advertising and publishing, collection services, and renting its telecommunications shared network.

Advertising is handled separately for each of the operating companies and for BellSouth corporate, the latter totalling $4 million in measured and unmeasured spending, up 53.9%.

With assets of $23.7 billion and 13.6 million access lines, BellSouth is the largest of the seven new Bell Telephone regional companies. It is the 38th largest U.S. corporation in assets and 15th in net profits, according to *Fortune 500*.

A battery of new services is prime marketing material for BellSouth in 1984-85. Transtext, a new videotex system tested in Atlanta, lets residential subscribers with only a touchtone phone and standard tv set remotely control their home utility usage and take part in a range of other services such as electronic shopping, home banking, news and educational services, and household security.

On trial marketwide in Orlando, Fla., is the new TouchStar service, an enhanced type of custom-calling (also offered by Pennsylvania Bell) that gives customers eight special options. Among them: Block unwanted calls; redial busy numbers; choose calls the customer wants and selectively forward to another number; automatically make call traces; give an individualized ring to identify calls from specific numbers.

Both South Central Bell and Southern are offering two special services: MegaLink for high-speed simultaneous transmission of voice, data, facsimile and graphics; and SynchroNet for instantaneously transmitting digital data from one site to another. Working with Knight-Ridder Newspapers and AT&T in Miami, Southern Bell offered a "first" in its PulseLink service, which simultaneously carries voice and data on the same circuit, giving the customer both news and other information.

Working toward the modernization of its whole communications system, BellSouth has put the priority stamp on developing new fiber optic technologies, because the fiber cables carry higher signal loads on much smaller cables, cost less, reduce maintenance and eliminate the problems of electrical interference.

In the matter of giving federal court-mandated equal access to all common carriers—AT&T and its competitors for long-distance service—BellSouth is making progress. The divestiture decree requires that 33% of Bell's customers must have equal access by September, 1985, and a majority by September, 1986. BellSouth expects to give access to 54% by September, 1985. Specifically, two units, Southern Bell and South Central Bell, have taken steps to make it easier for customers to sign up a long-distance carrier by sending out a ballot listing the choices. Customers previously received information about the available choices but had to take other measures than a simple ballot to sign up.

With the fast growth of the Sunbelt, BellSouth sees a golden franchise for itself. While its two phone companies cover only about 47% of the land area in their region, they serve 70% of the nine-state population, including most of the South's fastest-growing metropolitan areas (229 other telephone companies serve the remaining territory).

The forerunner to BellSouth started as a single company 104 years ago and was later split into two enterprises, Southern Bell and South Central Bell. It now has a single corporate overseer again. Southern Bell does business in Florida, Georgia, North Carolina and South Carolina. South Central Bell serves Alabama, Kentucky, Louisiana, Mississippi and Tennessee.

BellSouth is organized into a parent holding company, two operating companies and three principal subsidiaries. The latter include BellSouth Advanced Systems, which markets phone equipment and services; BellSouth Advertising & Publishing Corp., which sells Yellow Pages advertising, and publishes 513 phone books in BellSouth territory, directories for rival phone companies in the Southeast U.S., and other specialized directories in the national market; and BellSouth Mobility, the cellular phone service operator in Miami, New Orleans, Atlanta and Louisville. By the end of 1985 it expects to be on-line with cellular in West Palm Beach, Orlando, Jacksonville, Nashville, Memphis, Chattanooga, Baton Rouge and Birmingham.

Home appliances	461.0	165.5	178.0
Professional tools	246.0	203.3	21.0
Service	93.0	87.7	6.0

Like a powerlifter preparing for a big heft, Black & Decker Corp. is positioning itself for growth by using its muscle and strategy.

The Towson, Md., company had impressive returns in 1984, accompanied by measured advertising spending of $29.5 million in 1984, ranking it the 138th largest national advertiser. Measured spending was up 136.2% over 1983.

Net earnings for the year leaped 116% to $95.4 million, following an almost $77 million loss for 1982. Total revenues rose 31%, to more than $1.5 billion in 1984. And for the first six months ended March 31, 1985, of the current fiscal year, revenues were up 34% to $906 million, although earnings fell 12% to $43.8 million.

Strategy at Black & Decker includes two main steps: Acquisition and innovation.

The company began its move in 1982 to concentrate on electrical appliances with the sale of its McCulloch chain saw business, a division in which losses had been mounting—after-tax losses in 1981 were $6.2 million, and in 1982, $23.3 million. By 1983, most of the assets of McCulloch had been sold.

During 1983, Black & Decker completed a worldwide corporate restructuring plan. Included were manufacturing reorganization (mostly in Europe), internal finance changes and management restructuring. In April, 1984, the company took a giant step forward by acquiring the General Electric housewares division for about $300 million. Included in this product group are toasters, ovens and appliances for beverage-making, food processing, personal care and garment care.

Other recent acquisitions also are expected to strengthen Black & Decker, each in a specific area:

Zenses, a German company acquired in 1983, produces power tool accessories that Black & Decker can use to broaden its markets. The purchase of Bayerisch Boherwerke (BBW) now allows Black & Decker to manufacture drill bits. Wanting to enter the fast-growing hobby tool market (20% to 30% annual growth rate), it purchased in 1984 the German Minicraft company, a hobby and precision-tool maker.

Buying some assets of Elu, a Swiss maker of quality power tools for the professional, Black & Decker can market routers and stationary miter saws, formerly a gap in the Black & Decker product line.

Most recently, the company made a strategic move in buying the assets of two "down under" appliance makers, Rank Electric Housewares Pty Ltd., Australia, and Rank Appliances New Zealand Ltd., both owned by Britain's Rank Organisation PLC. The new companies will give Black & Decker experience in manufacturing 240-volt electrical goods, because that is the standard service voltage in Australia and New Zealand. It is also standard in Europe, where Black & Decker plans major marketing.

Innovation is making the heart of this company beat faster today. Even without counting the former GE appliances, about one-third of 1984 sales came from products developed since 1979. Innovation is creating new products, reducing costs *and* producing profits.

Examples of Black & Decker innovation are the new lighter, smaller M47 tools and the cordless appliances. The tools' motor is only 1¾ ins. in diameter—25% smaller than standard, but delivering comparable power.

Cordless design, Black & Decker says, is an evolving technology. The company is working with battery makers toward improved designs. The goal is to produce and market tools and appliances that can be used widely by the homeowner and hobbyist, but also by the professional.

To support these production and marketing programs for its bigger household product line, Black & Decker entered fiscal 1985 saying it would launch "an unprecedented national advertising program" using print advertising to reach virtually every American household.

One source puts the total at $50 million. The stakes are high enough to warrant the cost. In 1983, GE estimated the year's total sales at $470 million for the housewares being sold to Black & Decker. And the Rank purchase may add $50 million to B&D houseware revenues.

Black & Decker wants its logo squarely on the new products it is promoting. By 1987, it will have replaced GE's monogram with its newly redesigned orange hexagonal logo, and the same changes will occur on other newly acquired product lines, although probably not on the Swiss Elu tools. Much of Elu's value to Black & Decker depends on its reputation in Europe.

To highlight the changes in its business, the company is dropping the "Manufacturing" tag in its name for a more streamlined corporate title—Black & Decker Corp.

Black & Decker operates in six product groups: consumer power tools, consumer accessories, outdoor, household, professional and service. The first four, grouped under the heading consumer products, make up 78% of Black & Decker's sales. Professional products account for 16%, and service (repair and maintenance of B&D products) accounts for 6%.

Advertising	30.9	24.2	27.7
Division sales			
Dental	159.4	155.2	2.8
Consumer prods.	43.6	31.7	37.6
Pharmaceutical	35.3	32.1	10.0

Block Drug Co., which continued aggressive expansion of its products through internal development and acquisition, was the nation's 132nd leading advertiser in 1984 with measured spending of $30.9 million, up 27% over 1983.

The Jersey City, N.J.-based company is positioning itself in high growth areas of the hotly competitive consumer products arena, in addition to increased marketing emphasis on its successful dental care, oral hygiene and ethical pharmaceutical products.

Net income increased 12% to $23.9 million for fiscal 1984, ended March 31, 1984, on sales of $238 million, up 9% over 1983. Net income for the three quarters ended Dec. 31, 1984, was up 10% to $19.5 million on net sales of $188 million, up 6% from the corresponding period.

One of Block's most aggressive marketing thrusts in 1984 was $3.7 million in spending on network and spot tv for two products that it purchased from Flushco Inc., Passaic, N.J., including 2000 Flushes and Rainbowl 2000.

Block's entry in this $240 million automatic toilet bowl cleaner business has tough competition. R.T. French Co.'s Bully received $4.6 million in measured network and spot tv in 1984. Drackett's Vanish Bowl Brite received $4 million in measured network in 1984.

Bully and Vanish each hold more than 20% market shares, with most other brands trailing far behind.

The market does have strong smaller brands, however, such as Knomark's Ty-D-bol Double Action with $561,000 in measured spot tv in 1984. But there is room for growth in the automatic bowl cleaner segment, with projections that the category soon may top $350 million at retail.

Another key innovation in the company's proprietary consumer products was the introduction of Efficol Cough Whip. Measured media for Efficol in 1984 was $2.9 million, of which $2.3 million was network tv, and the rest spot tv and magazine.

Such spending is far behind the $11 million in spot tv A.H. Robins Co. spent for its Robitussin line of cough medicines. Robitussin advanced its leading market share in cough preparations in 1984 to 27.5%. Richardson-Vicks currently controls about 20% of the $300 million market for cough syrups, including its Formula 44D, the top-selling individual brand.

Block continued in 1984 with heavy network and spot tv support of its leading dental products, including its Polident line, which received $6.6 million in measured spending, $4.8 million of which was for Polident tablets, and $1.7 million for Polident Smokers denture cleaner.

This represented an increase of 22% for the line, and a 118% increase for the tablets over 1983 measured expenditures.

Unlike other Polident products, however, measured spending for the smokers denture cleaner dropped 53% in 1984. Smokers Polident has come up against heavy competition in the $100 million-plus category from Warner Lambert's Efferdent, with $7.2 million in measured tv spending, and Carter-Wallace's Pearl Drops Smokers tooth polish, with $4.5 million in measured spending, which was mostly in network tv.

Poligrip regular denture adhesive got $3.36 million in measured spending, up 3.4%, and the line of Dentu-Creme denture cleanser and toothpaste dropped 11.6% to $3.5 million.

Block's biggest advertised item is Tegrin medicated shampoo, which received $5 million in measured media, split between network and spot tv, down 6.6% from 1983. By 1987, shampoos could account for nearly one-third of total sales in the haircare product category, which by then is predicted to exceed $3.4 billion.

In the haircare products category, Tegrin will face heavy competition from Procter & Gamble, which already has a 22% share of the market with its Head & Shoulders, Prell and Pert brands.

Over-all, Block's outlays for network tv were up 25% in 1984, and spot tv, 37%.

Management in 1984 took Blue Bell Inc. private as the company continued to fight a sluggish market, particularly for its Wrangler Brand division.

Product diversity has been Blue Bell's chief antidote for the slack in blue jean sales particularly affecting European operations where four plants were closed in 1984.

Greensboro, N.C.-based Blue Bell, the 187th largest advertiser with 1984 measured spending of $21.1 million, up 17.9% from 1983, makes products ranging from coveralls to bikinis, designer jeans to mountain gear. The company's marketing tactic is to play off media advertising with strong promotional activities.

Blue Bell is the No. 2 jeans marketer through its Wrangler Brands lines, a step ahead of BF Corp.'s Lee brand, but behind leader Levi Strauss & Co. More than half of Blue Bell revenues traditionally come from the Wrangler division, and about two-thirds of Wrangler still is jeans sales.

Sales in the Wrangler group in 1984 were expected to remain static, according to industry analysts. Blue Bell, which has shown virtually no movement in sales since 1979, is estimated to have recorded revenues of $1.2 billion in 1984.

During mid-1984, Levi Strauss presented its new $36 million jeans ad program, including highly stylized tv commercials that transported the viewer into a trend-setting world. Taking the lead, Wrangler dropped its Western-style commercials in the fall to pick up on an Indiana Jones theme telling viewers to "Live it to the limit in Wrangler." All network tv spending at Blue Bell supported Wrangler products and represented 57.8% of the company's total media tag.

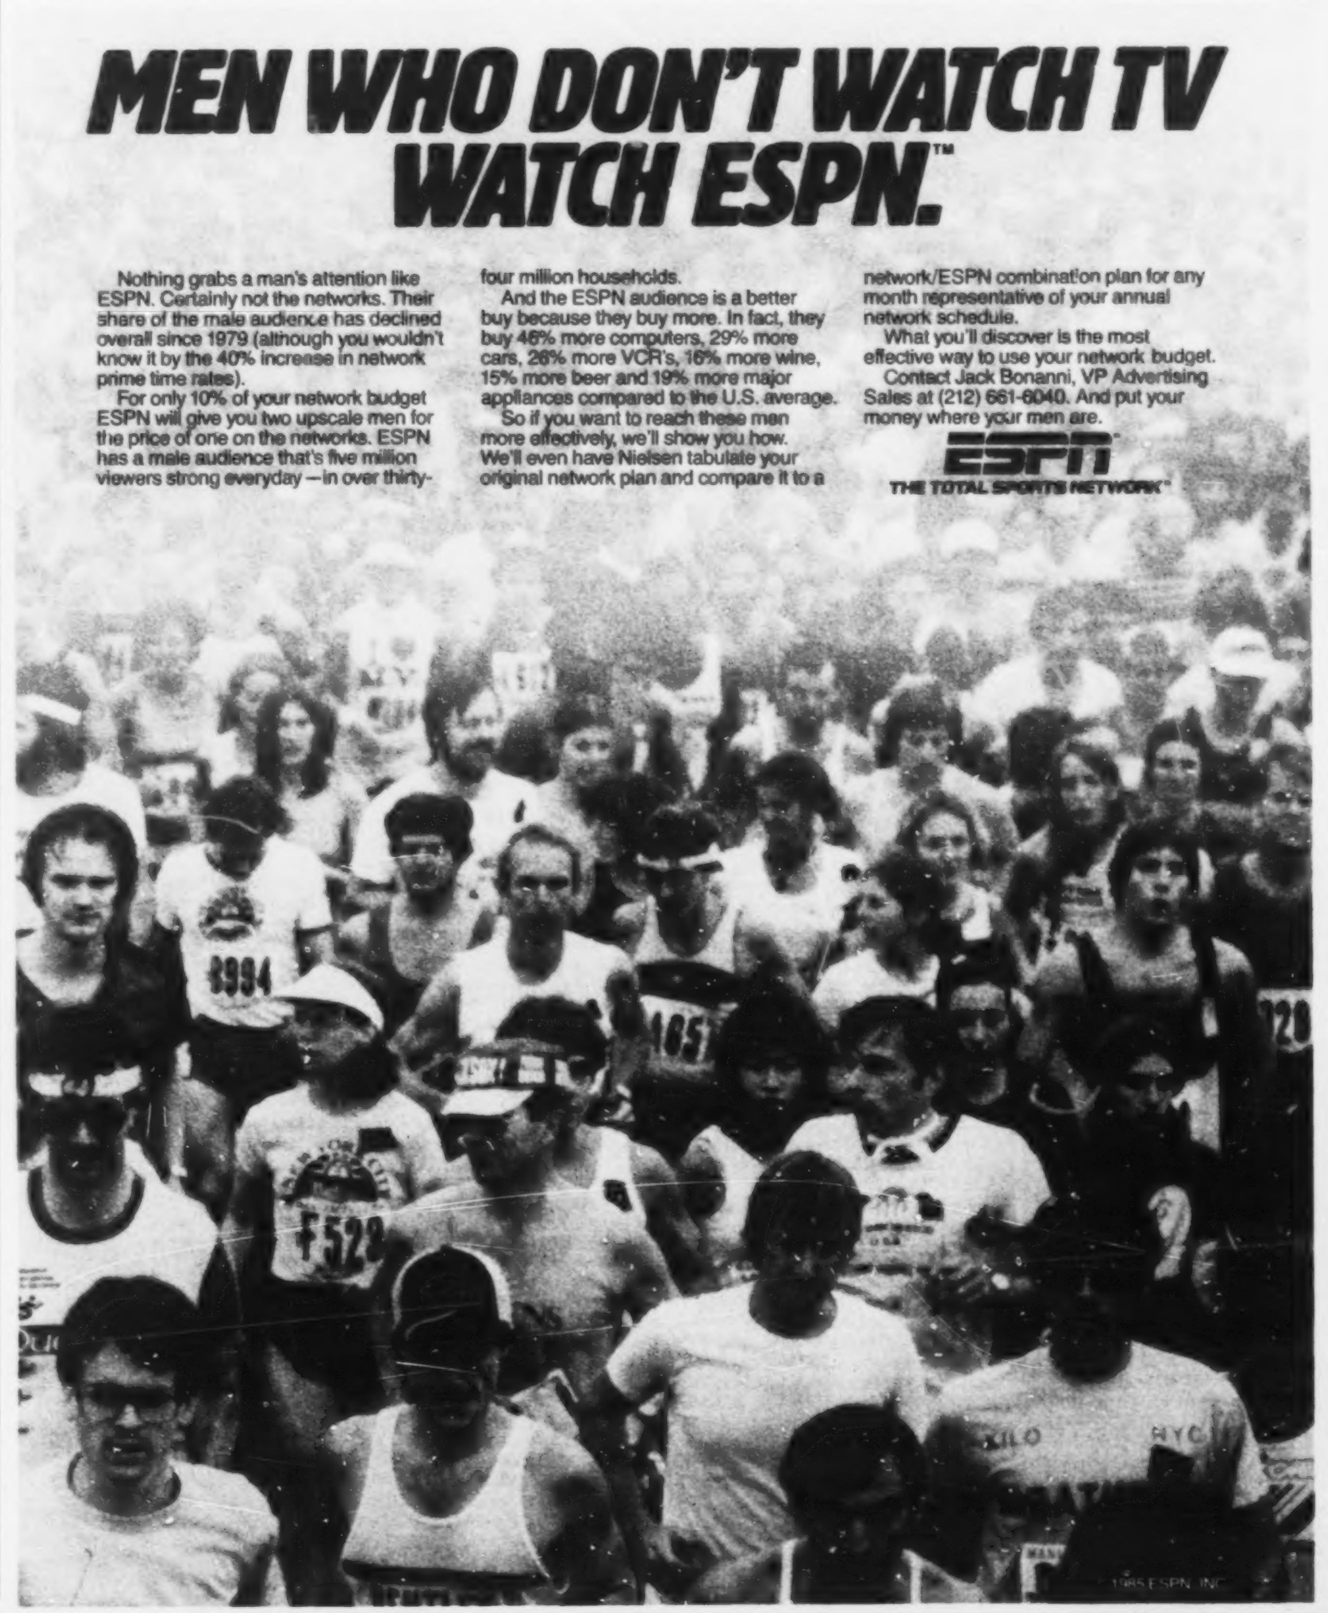
Wrangler Brand division covers the waterfront with Rustler, a mass-market brand carried in discount outlets; Maverick, an alternative brand for the small independent retailer; Sedgefield, sold in upper-tier outlets, and Wrangler, which comes in many types.

Jantzen, another division, is a devotee of mixing media advertising and special event promotion. Its two divisions, men's and misses, are both promoting vigorously this spring and summer. Men's bikini swim trunks provided heavy co-op dollars for retailers in 26 U.S. cities to support spot tv. Sponsor advertisers such as Kamen Airway snorkel equipment, Nikon cameras, Heuer Swiss underwater watches and Dacor underwater gear tied in to promotional efforts.

A sweepstakes run in each of the markets from November, 1984, to mid-June, 1985, brought Jantzen men's division a 20% sales increase for the period, the company says.

Jantzen men's division also is conducting the National Fast-Serve Challenge to boost tennis wear sales in which customers compete for prizes in stores equipped with "Radar" fast-serve guns. Other sponsors include American Airlines, Donnay rackets, Converse Shoes, *Tennis* magazine and Wailea Resort in Hawaii.

Major promotion for Jantzen's misses division in the first half of 1985



MEN WHO DON'T WATCH TV WATCH ESPN.™

Nothing grabs a man's attention like ESPN. Certainly not the networks. Their share of the male audience has declined overall since 1979 (although you wouldn't know it by the 40% increase in network prime time rates).

For only 10% of your network budget ESPN will give you two upscale men for the price of one on the networks. ESPN has a male audience that's five million viewers strong everyday—in over thirty-four million households.

And the ESPN audience is a better buy because they buy more. In fact, they buy 46% more computers, 29% more cars, 26% more VCR's, 16% more wine, 15% more beer and 19% more major appliances compared to the U.S. average.

So if you want to reach these men more effectively, we'll show you how. We'll even have Nielsen tabulate your original network plan and compare it to a network/ESPN combination plan for any month representative of your annual network schedule.

What you'll discover is the most effective way to use your network budget.

Contact Jack Bonanni, VP Advertising Sales at (212) 661-6040. And put your money where your men are.

ESPN
THE TOTAL SPORTS NETWORK™

1985 ESPN, INC.

is the "Come alive in Jantzen" advertising that includes a three-pronged, 10-week blitz, depicting six female swimsuited models. Circulars were first stuffed in store billings followed by two weeks of 30-second tv commercials showing models "coming alive from the direct mail pieces." Four weeks of outdoor boards capped the promo, concluding May 30.

Jantzen estimates it hyped sales 30% to 35%. Among media, Jantzen favors long-reach general magazines geared to a young, trendy audience, sports enthusiast titles, outdoor and newspaper co-op—misses spent about $1.2 million in the latter in 1984.

Blue Bell underwent a radical change in 1984, when its management took it private in a leveraged buyout. In a major staff change, David Boyd came from McCann-Erickson to become vp-mktg for Wrangler Brand.

The Blue Bell umbrella also encompasses JanSport, maker of sportswear; Red Kap Industries, maker of Red Kap uniforms sold to and rented out by laundries in particular, and Big Ben by Wrangler, which markets jeans to mass retailers.

Blue Cross & Blue Shield Assns. RANK 198
Chicago

($ figures – 000,000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	40.0	37.6	6.2
Net income	2.1	1.2	79.0
Advertising	0.02	0.01	94.0

The Blue Cross & Blue Shield Assns., Chicago, was the 198th largest advertiser in 1984, spending $19.9 million in measured ad spending, up 94% from 1983. Spot tv accounted for $8.3 million and network tv $3.8 million, mainly to encourage membership in local plans.

The jump in media spending is partly the result of stepped up joint ad efforts. Blue Cross & Blue Shield Assns. joined together in September, 1984, with local Blue Cross & Blue Shield plans to launch advertising bearing their first cooperative ad theme "Carry the caring card." The theme is being used in national and local advertising. In May, 1985, the national association and local plans broke a new campaign on "Managing the new healthcare," a series of educational print and tv ads targeted at presenting issues and options in healthcare to business decision-makers.

Blue Cross & Blue Shield Assns. are the names and symbols used by the 88 local, nonprofit community service organizations called Blue Cross & Blue Shield Plans, which contract with hospitals, physicians and healthcare organizations to provide prepaid healthcare to subscribers in the $400 billion health care industry.

Although they formed an association, sharing administrative costs and offices, Blue Cross & Blue Shield on the local level sometimes separate legal entities. The association is a nationwide federation of locally governed, autonomous corporations, each operating under state law as a nonprofit service organization. The association is needed, among other reasons, to create and place national advertising, and to coordinate insurance coverage in cases where group membership in the local plans crosses regional boundaries.

There are 66 Blue Cross and 66 Blue Shield plans nationwide, but because some are joint plans, the association is made up of 88 units. It is these local plans that footed the bill for national advertising in 1984 through contributions based on subscription volume. Each plan pays for its own local advertising. While the ad spending was allocated primarily to spot and network tv, local plans in 1984 also spent a measured total of $5.7 million for spot radio, up 63% over 1983, while the national association spent $1.1 million for network radio. There were no measured expenditures for network radio in 1983.

Blue Cross plans were founded primarily to cover hospital expenses, but in recent years have expanded coverage into outpatient care, other institutional services and homecare. Blue Shield plans were established primarily to cover physicians' services, although they too have expanded into other benefits, such as dental, vision and outpatient care.

The nationwide subscription income for the 88 plans in 1984 was $39.9 billion, up 6% over 1983. Claims expense in 1984 was $35.7 billion, an increase of 3% over the previous year. Operating expenses increased marginally. Net income was $2.69 billion, up 44% over 1983 income. A large portion of net income is used as a reserve against claims.

Reasons for the improved bottom line in 1984 were marketing efforts by Blue Cross & Blue Shield to promote membership in programs designed to control claims expense. In recent years, the national association has created various plans that encourage greater use of hospital outpatient services, preferred provider arrangements (PPAs) and health maintenance organizations.

PPAs provide incentives, by paying 100% of costs, for subscribers who use hospitals deemed by local Blue Cross plans to be cost-effective. Subscribers could pay up to 20% of costs when using nonpreferred hospitals. The first PPA contract was signed in 1982; however, most PPA activity took place in 1984. Thirty Blue Cross plans now have preferred provider arrangements.

Much of Blue Cross & Blue Shield's local advertising focused in 1984 on encouraging greater use of HMOs, which provide prepaid medical care for all health needs, including routine doctor visits. A total of 66 HMOs now are available through 45 Blue Cross & Blue Shield plans.

BMW of North America RANK 155
Montvale, N.J.

($ figures – 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	N/A	5,025.4	N/A
Net income	N/A	N/A	N/A
Advertising	25.3	17.5	44.9

BMW of North America spent $25.3 million in 1984 in measured media advertising for automobiles and motorcycles, making the Montvale, N.J.-based company the 155th largest national advertiser.

The rise in unit sales accompanied the 44.9% increase in measured ad spending from 1983. Sales climbed from 59,200 units in 1983 to 70,898 in 1984. A 14% increase anticipated for 1985 will put annual sales at or exceeding the 80,000 mark for BMW, which is fast becoming a symbol of "attainment" for many young professionals willing to pay between $16,430 and $41,315 for the satisfaction of arriving automotively.

While sales have increased an impressive 400% in its decade of marketing in the U.S., BMW probably has captured a share of the mind that is totally out of proportion to its share of market.

BMW's share of the luxury performance market, shared with Mercedes, Audi, Jaguar, Saab, Volvo and Porsche is 18%.

Importer BMW of North America is one of 17 foreign subsidiaries of parent company Bavarian Motor Works or Bayerische Motoren Werke AG in Munich. The U.S. is now the best foreign market for BMW. U.S. unit sales of 60,000 for 1983, for example, compared with 33,100 in France, 25,200 in the U.K., 14,800 in the Netherlands, 29,800 in Italy and 11,000 in Switzerland.

Marketing strategy for BMW in the U.S. has centered on "The ultimate driving machine" theme developed by BMW in the mid-1970s. Campaign emphasis is twofold: BMW is an alternative to the superficial opulence of large, so-called luxury cars, seeking coexistence with other expensive performance makes.

From BMW Munich's 17 models in four series, BMW Montvale sells seven models for U.S. consumers. Fewer models are available in the U.S. because of U.S. government mechanical regulations and BMW's own limited distribution capabilities. The motorcycle array is seven models of the eight produced in Germany, excluding only the smallest.

During 1985, auto marketing emphasis is shifting more to models priced about $25,000, according to Gunter Kramer, chairman-president, BMW of North America. BMW set the precedent for that shift by placing heavy advertising in 1984 on the less-pricey cars, such as the two-door 325e, a $20,970 car at retail that attracted $5.5 million in media spending in magazines and network and spot tv—the media mix for virtually all BMW cars.

That media allotment, however, was the second highest among the BMW cars, as the biggest expenditure of $6.8 million went for the 735i, a pricey four-door retailing at $36,800.

Prices for the more expensive models are increasing slightly. Prices of the less costly cars will stay the same, except that some formerly optional equipment is now standard.

The 535i four-door sedan has increased 2% to $30,760 in 1985; the 735i is up 1% to $36,880; the 635si is up 1% to $41,315. Prices are the same for the two-door 318i at $16,430, the four-door 528e at $24,565, and the two-door 325e.

Motorcycle prices range from $3,700 to $7,500.

A new car model scheduled for the first half of 1985 is the 524td, with six-cylinder turbocharge diesel power.

U.S. sales now account for about half the production capacity of 160,000-plus at the BMW factories in West Germany. BMW has set up major facilities across the U.S. and runs dealer services out of seven regional offices in Montvale; Atlanta; Reston, Va.; Chicago; Dallas; Los Angeles, and San Francisco. It distributes parts from centers in California, New Jersey and Texas.

RANK 145
Borden
New York

($ figures – 000,000)

Worldwide	1984	1983	% chg
Sales	4,568.0	4,264.8	7.1
Net income	191.4	189.1	1.2
U.S.			
Sales	3,837.1	3,539.8	8.4
Operating profits	155.0	149.4	3.8
Advertising	28.1	23.7	18.4

Borden, which is focusing on reducing marketing expenses, was the 145th largest U.S. advertiser in 1984, with $28.1 million in measured spending, up 18.4% over 1983.

The Columbus, O.-based company, with executive offices in New York, in 1984 announced its plan to pursue distinctive patentable processes and products that would provide more marketing lead time.

Borden spent $252 million in 1984 on advertising and promotion, largely unmeasured media, an increase of 15% over 1983. Of the total, the company says advertising in all forms amounted to $65 million in 1984, up 12% over 1983.

Borden had net income in 1984 of $191 million, an increase of 1.2% over the previous year, on net revenue of $4.57 billion, up 7.1%. First-quarter 1985 profit rose 2.6% to $34.8 million on sales of $1.08 billion, a decline of 0.7% compared with the same period in 1984.

Most of the 1984 spending was for Borden's consumer products division, which brought in 64% of total sales, but spent 90% of the ad and promotion budget, nearly $228 million.

Borden's consumer products division is made up of two units, snacks/dairy foods and grocery/specialty products. Snacks/dairy accounted for 45% of the division's $220 million in 1984 operating income, with grocery and specialty products accounting for 55%.

Dairy is the largest unit accounting for nearly $1.2 billion in 1984 sales, and the unit is expected to increase in importance. In 1984, for the first time in 20 years, per capita consumption of whole milk increased, reflecting growth in the number of children aged 7 to 12. That age group is expected to increase 1% a year through 1995.

Grocery and specialty products is where Borden is throwing its heaviest ad weight. Items such as Cracker Jack popping corn in 1984 received $1.7 million in network tv and $865,000 in magazine.

Sugar-free beverage mixes received heavy spending in 1984 for network and spot tv, including Lite-Line with $2.6 million, and Wyler's, with $1.6 million. In frozen desserts, Borden put $2.6 million in magazines to promote its new ice cream made with its Eagle brand sweetened condensed milk. The company is testing flavored milk and other products in aseptic packaging.

In snack foods, Borden is No. 2 nationally, but still has only one-fourth of the dollar sales of Dallas-based Frito-Lay. Borden reaches 73% of the U.S. population with products under seven brand names. Borden's $376 million in snack food sales in 1984 is up 120% since 1979 and accounts for 12% of the consumer products division sales, compared with 7% in 1979.

On this front, Borden is on the attack. An example is Borden's Cottage Fries, similar to Frito-Lay's O'Grady's potato chips, both introduced in 1984. Although Borden's ad spending for Cottage Fries is a fraction of Frito-Lay's for O'Grady's, the products are generating similar sales even though Borden's has yet to reach the national distribution level of Frito-Lay.

Cottage Fries are expected to reach $100 million in annual sales in 1985. Borden also hopes to expand the market in 1985 with a companion product, Home Fries. Borden's Wise brand potato chips reached $100 million in sales in 1984.

Pasta is Borden's smallest, but fastest growing consumer product category, with No. 3 position and 11.9% market share under Creamette and Luxury brands. Borden trails Hershey Foods Corp.'s (American Beauty) 17.2%, and CPC International's (Mueller) 15.5%, but its pasta sales are gaining, having jumped 195% to $95.9 million since introduction in 1979.

Borden's home and professional products, including Elmer's adhesives, Krylon spray paints, car-care products, such as Rally and Rain Dance car waxes, among others, have boosted sales 220% since 1980 to $164 million in 1984.

Borden named Romeo J. Ventres, an exec vp-president of its chemical division, as new president and chief operating officer succeeding Eugene J. Sullivan, who remains as chairman-ceo. This places Mr. Ventres in line to become the next chairman.

Advertising expenditures at Brown-Forman Distillers Corp. continued to slip in 1984 as the Louisville, Ky.-based marketer of wine and distilled spirits fought slackening demand and a rising tide of antidrinking measures concerning the legal drinking age and drunken driving that are now before state legislatures.

The company that markets the nation's No. 1 Canadian whisky and No. 2 bourbon expects to face yet another barrier to its business growth later this year when a federal excise tax will be placed on distilled spirits.

Brown-Forman, ranked 116th in measured media ad expenditures in 1984 with $34.7 million, off 13% from the previous year, has been showing sales and earnings stability in the first three quarters of its current fiscal year.

Earnings for the nine-month period were $65.2 million, up 9.2% over the comparable period in 1984, on sales of $943.5 million, up 9.4%. A historical reading of the fourth quarter would bring sales of $1.2 billion, about 4.4% more than fiscal 1984. Net income should increase over the $73.6 million reported in fiscal 1984, a 23% decline from fiscal 1983 when net income was $95.2 million.

Brown-Forman is fine-tuning its marketing strategy to weather the 19% increase in excise tax on distilled spirits that takes effect Sept. 30, thereby increasing the average price of a bottle about 30¢. Company chairman-ceo W. L. Lyons Brown Jr. has noted that industrywide sales probably will drop 5% below the decline already predicted for 1986.

He has said the company will increase marketing investments with emphasis on the months before Oct. 1, and "after that date we will continue to enhance our aggressive programs . . . supplemented by a major public education campaign by DISCUS." (DISCUS is a trade organization, Distilled Spirits Council of the United States.) Mr. Brown says B-F is willing to invest $1 million in the trade effort.

Traditionally, B-F concentrates on supporting brands with attractive returns and the potential to increase market share because of weakened consumer demand for wine and spirits and heavy price discounting. The company is beginning to "look harder at directing its efforts toward markets which offer better possibilities for long-term profit growth," Mr. Brown says.

B-F's sales leader is its Canadian Mist whisky, ranked No. 4 by *Impact*, a newsletter that monitors the industry. That ranking translates to $351.9 million in retail sales. Canadian Mist is one of the few top brands of any liquor marketer to have shown steady growth in case depletions in the past three years. Canadian Mist had measured advertising of $4.9 million in 1984, down 24.6% from 1983.

The No. 6 ranked brand nationally according to *Impact* is the company's Jack Daniel's bourbon with case depletions of 3.7 million in 1984, off 1.6% from 1983. Advertising decreased 30.4% to $3.5 million for Jack Daniel's.

B-F's Early Times bourbon ranks 20th with 1.9 million case depletions for a 0.3% increase over 1983. Early Times attracted $353,600 in measured ad spending, down 70.9% from 1983. The company's last brand in the top 50 in the country is Southern Comfort cordial, whose case depletions of 1.2 million were up 0.8% in 1984 over 1983. Ad spending dropped 55.6% for the product to $1.7 million.

B-F, in translating case depletions into brand shares, in 1984 shows B-F brands as a whole increased the company's market share from 7.4% to 7.7%. Among individual brands, Canadian Mist increased its market share from 16.5% to 17.8% for Canadians; Jack Daniel's Black and Early Times increased their bourbon shares from 16.0% and 7.8%, respectively, to 16.6% and 8.3% in 1984.

Other brands and year-to-year changes in market shares: Old Forester from 2.2% to 2.3% among bourbons; Usher's from 2.6% to 2.9% among scotches; Southern Comfort from 7.1% to 6.9% and Bok from 2.1% to 2.2% in the liqueurs/cordial segment; Old Bushmills from 27.6% to 28.0% in Irish segment; Korbel from 5.5% to 4.7% and Martell from 3.4% to 3.9% in brandies; Pepe Lopez from 4.2% to 4.0% in tequilas.

A breakdown of B-F wine and liquor sales show American spirits contributing 35% of total sales, or $403.8 million; imported spirits contributing 22% or $249 million, and wines and specialties (includes Southern Comfort and Korbel), 21% of the total or $243.1 million. Advertising was de-emphasized for the two big wine brands, Cella, the second largest selling imported table wine, and Bolla, the fifth. Measured media advertising dropped 73.8% to $2 million.

In the face of declining demand, B-F has initiated modest price increases. Price hikes come at a time when five of B-F's top 10 distributors have experienced flat sales in 1983 and 1984, a composite decline of 2% in gross profits and a net profit drop of 19%, Mr. Brown told delegates at an April meeting of the Wine and Spirits Wholesalers of America.

B-F took steps in 1983 to soften its reliance on distilled spirits by acquiring Lenox Inc., known for its fine china tableware. Lenox, which contributes sales of more than $250 million annually, had measured media spending of $5 million, up 12.3% from 1983.

Outthink.

Why do some of America's best-managed companies come to a marketing communications agency in Westport, Connecticut (when they could pick and choose from just about any agency in New York, Los Angeles, Chicago, Dallas or *wherever*)?

Because that agency delivers *consistently* superior results, and does so by outthinking (not outspending) its clients' competitors.

Outthinking is only the beginning at Promotion Development Corporation. We translate our strategic thinking into hard-hitting executions with on-time, on-budget performance in:

☐ Consumer & Business-Directed Sales Promotion Campaigns
☐ Direct Response Programs
☐ Audio-Visual Presentations
☐ Field Marketing & Sales Force Motivation
☐ Collateral Material Development

The PDC Case History Series, an ongoing program of valuable special reports, can tell you something about how outthinking allows us to outcreate, out-write, outdesign, outproduce and, ultimately, *outperform* the competition.

The most recent special report in this valuable series tells how we helped the makers of Ecotrin capitalize on a major marketing opportunity.

A call to Sam Stryker, PDC's Senior Vice President – Business Development, will bring you a copy of this valuable document. And we'll also send you a copy of our PDC brochure detailing the Five-Phase process we use to help implement winning programs for Citicorp, General Foods, Duracell, Parker Brothers, MCI Communications and other major American corporations.

PDC. The marketing communications agency where outthinking the competition is only the beginning....

We help you outthink the competition.

Beverages/foods	485.5	381.0	27.5
Health/hygiene	87.1	87.1	0.0

For the past five years, Cadbury Schweppes has been looking inward, making capital improvements, modernizing plant operations and consolidating product lines in its confectionery and beverage divisions.

But 1984 signaled the start of a search for new marketing niches by the company, which is ranked 183rd among advertisers in measured media for 1984.

The Stamford, Conn.-based North American unit of Cadbury Schweppes Plc Ltd., London, spent $22.0 million in measured advertising, an increase of 11.6% over 1983.

Half of the company's outlay was for network tv for established products includign Cadbury Candy, Peter Paul Mounds, Almond Joy and York Peppermint Patties.

Cadbury Schweppes U.S. group had total sales in 1984 of $669.4 million, up from $516.3 million (U.S.$1.3774 37M £1 was the average annual exchange rate applied to both years), and trading profits of $50.8 million compared with $37 million in 1983. The U.S. group made up nearly a quarter of the parent's sales in 1984.

Cadbury Schweppes, whose divisions Peter Paul Cadbury, Duffy-Mott, Rose/Holland House and Schweppes USA, slug it out for brand dominance against names such as Canada Dry, Hershey Chocolate Co. and Mars in particular, is revamping its market strategies to increase market share in more targeted confectionery and beverage markets.

Examples of this strategy include introduction in 1982 of seasonal products, such as Creme Eggs, now the top-selling novelty Easter item at nearly 50 million units a year, and Mini Eggs. In 1984, Peter Paul Cadbury tested Wispa in upstate New York and parts of New England.

Wispa is an aerated chocolate bar introduced with success in the U.K. in 1984.

Ad spending for Wispa totaled $321,000 for spot tv ads featuring Buck Henry. The brand may roll out nationally as early as mid-1986. Peter Paul Cadbury also launched Fudge in the U.S. market in 1984, a popular brand in the U.K.

In beverages, Schweppes concentrated on replacing several of its independent bottling facilities in 1984 to improve production and distribution. Schweppes, which had measured ad spending of $4.4 million in 1984, mostly in spot tv, faces a tough challenge in the soft drink/mixer business from competitor Seagram mixers, a 2-year-old line marketed under a licensing agreement by Premium Beverages, Greenwich, Conn., which is a subsidiary of Coca-Cola Bottling Co. of New York.

Canada Dry has about 33% of the 390 million-case annual mixer business, which includes ginger ale, tonic water, club soda and seltzer.

Schweppes is estimated to have about 11% of the market, but is losing ground to Seagram.

Seagram, with main distribution in the western and eastern U.S., has an estimated 6% market share that continues to grow as the brand reaches national distribution.

Duffy-Mott, acquired in 1982, had measured spending of $3.5 million in 1984, mostly spot tv for Mott's apple juice, Mott's applesauce and Clamato, using a generic theme of "Mott's Appeal."

Following an agency switch in 1984 from Ted Bates Advertising, New York to Scali, McCabe, Sloves, New York, the division is developing a new theme and ad campaign.

Duffy-Mott U.S. product introductions in 1984 include single-serving asceptic containers of Mott's juices in four flavors.

The division also introduced apple-blended juices in 32-oz. and 64-oz. glass containers.

Rose/Holland House continued seeking new markets in 1984 through print media educational ads emphasizing everyday uses of Rose's lime juice, using the theme: "The uncommon denominator."

Measured spending totaled $300,000. Holland House Cooking Wine, introduced in 1984, will receive increased emphasis in 1985.

Health care	152.3	134.6	13.2
Deodorants	101.7	96.7	4.6
Consumer prods.	69.1	58.6	18.0

Carter-Wallace, New York, which funneled most of its increased advertising spending into its Arrid product line in 1984, ranked 165th among U.S. advertisers in 1984 with measured media spending of $23.8 million, up 32.9% from 1983.

Most of the measured spending increase was attributed to a 19% increase in network tv, which brought that media total to $17 million, $11.7 million of which was used to back Carter Products division's Arrid antiperspirants and deodorants.

Carter-Wallace says Arrid has been the top-selling antiperspirant deodorant brand in the U.S. for the past three years. Arrid is believed to account for an estimated 12% unit sales of the domestic antiperspirant and deodorant market in 1984 and 1983.

Arrid antiperspirants continued steady growth in sales and product variety in 1984. A key factor was strong consumer demand for Arrid Extra Dry baby fresh scents. Arrid Extra Dry deodorants in 1984 were backed by measured expenditures of $6 million in network tv and $800,000 in spot tv.

The Arrid line also stengthened its leadership position among aerosol antiperspirant deodorants, while broadening its respective shares of the markets for solids, roll-ons and creams. Carter Products division backed Arrid Extra Dry solid with $4.5 million in measured network tv spending and Arrid Double X solid with $1.1 million in measured network tv.

Network tv also was used in the 1984 introduction of Pearl Drops Smokers tooth polish, with $3.6 million in measured network tv and $800,000 in spot tv. The product received nearly 18% of Carter-Wallace's 1984 measured advertising. Distribution of improved Pearl Drops with fluorride began in March, 1984, with $400,000 in measured spending, divided 60-40 between magazine and network tv.

Receiving $1 million in measured network tv was the Nair line of depilatories, which became the depilatory segment market leader in 1984. Nair products received another $500,000 in magazine spending, which included ads for a Nair sweepstakes in 1984.

The largest measured expenditure for spot tv was $1.6 million for Mischief Body Spray deodorant. The Mischief brand also was backed by magazine ads during 1984, including a premium offer.

Carter-Wallace more than doubled magazine advertising in 1984 to $2.3 million from 1983. The largest measured expenditure was $300,000 for seasonal ads for Block Out suntan products.

The company introduced Block Out waterproof clear lotion sunblock suntan lotion in 1984.

Carter Products division also reported substantial sales increases for Sea & Ski suntan products, introducing Sea & Ski aloe vera formula lotion. Sea & Ski products received $500,000 in measured network tv and $200,000 each in spot tv and magazine advertising.

A product to watch in 1985 is Rigident, a denture adhesive powder popular in the West and acquired in 1984 by Carter Products division from Wickman Pharmaceutical Co. Promotion and distribution efforts are expected to broaden market penetration nationally.

Carter-Wallace sales in the fiscal year ending March 31, 1985, were $348 million, up 8% over its 1983 sales. Net income was $20.7 million in fiscal 1985, up 12% over the previous year.

The company's major business segments account roughly for the following proportions of annual sales: Consumer products, 43%; healthcare products, 39%; international subsidiaries and branches, 18%.

Carter-Wallace manufactures consumer products at its New York-based Carter Products division; diagnostic specialties, proprietary drugs and prescription pharmaceuticals at its Cranbury, N.J.-based Wallace Laboratories and Wampole Laboratories divisions, and pet products at its Lambert Kay division in Cranbury.

In August, 1984, John Bridgen was named president of Wampole Laboratories division.

Castle & Cooke
San Francisco

RANK
167

($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	1,520.1	1,361.5	11.6
Net income	-76.7	-49.7	54.4
U.S.			
Sales	1,220.0	1,106.0	10.3
Operating profits	13.0	3.0	333.3
Advertising	23.7	7.8	203.3

The nation's 167th largest advertiser in 1984, Castle & Cooke, which began phasing out low-return commodities operations in favor of more profitable fresh, packaged and branded products in 1984, jumped from the 281st ad position in 1983 by spending $23.7 million in measured media, a 203.3% increase.

The San Francisco-based company, producer of such brand names as Dole and part owner of A&W Brands, entered 1985 in such poor financial condition it required a bailout via a merger with Flexi-Van Corp., a New York-based transportation equipment leasing company.

The company in the current fiscal year reported a net loss of $48.6 million for the three quarters ended March 23, 1985, compared with net income of $6 million for the similar period a year earlier.

The third quarter represented a marginal return to profitability, with net income from operations of $9 million, supplemented with $6.3 million net gain from the sale of assets. The company took a net loss of $76.6 million for fiscal 1984 ended June 16, 1984.

The proposed merger needs to be approved by regulatory agencies and shareholders from both companies this summer.

Castle & Cooke's financial troubles are the result of a string of economic factors, including the strong dollar, which hurt earnings on international operations, and problems with the company's branded fresh fruit and vegetable products.

Castle & Cooke's financial situation came to a boil when it was forced in March, 1985, to seek agreements with lenders on restructuring $260 million in private, unsecured debt.

David H. Murdock, chairman-ceo of Flexi-Van Corp., proposed a loan that was contingent upon Mr. Murdock serving as chairman-ceo of the newly merged company and on members of the board of Flexi-Van constituting a majority of the merged company's board of directors. C&C's president-ceo, Robert D. Cook, who speaks favorably of the offer, would be president-chief operating officer of the merged company.

The proposed merger remained had threatened, however, by a possible hostile takeover attempt by an investor group headed by Minneapolis financier Irwin L. Jacobs. The Jacobs groups acquired 14.1% of C&C's 25.7 million outstanding common shares by late May. But Mr. Murdock stepped in again, agreeing to buy the Jacobs group stock for about $57 million. He also received assurance from the group that it would not buy securities of C&C or Flexi-Van for five years.

There was a bright spot in Castle & Cooke's performance—the package goods segment—led by product additions to the Dole brands. In 1984, Castle & Cooke introduced Fruit 'N Juice bars. Advertising for Fruit 'N Juice bars now makes up the single largest category of measured spending, with $2.6 million in spot tv, $1.7 million in network, $1.1 million in magazine and $700,000 in network radio.

The largest jump in measured ad spending in 1984 was a 76% increase in outlays for spot tv, using the ad theme: "A sunny place called Dole," expanding the Dole trademark to cover such new products as a chilled pineapple breakfast juice; Dole Whip, a soft-serve dessert for food service, and Dole Fruit Sorbet, a blend of fruit, juice and sweeteners.

The ad campaign also boosted network tv spending, with measured outlays of $5.6 million, a 74% increase over 1983 spending.

Castle & Cooke has made an effort during the past year to dispose of certain fresh vegetable operations. On April 10, 1985, the company sold its mushroom businesses on the West Coast to Mushroom King, Santa Rosa, Cal. Terms of the sale were not announced.

In early 1985, Castle & Cooke agreed to sell its Bumble Bee Seafoods division to a group of investors, including four key managers: Patrick W. Rose, James T. McCarthy, Ernest W. Peterson and H. Kenneth Branson. Terms involve an initial payment of $40 million cash.

Bumble Bee is a $200 million producer and marketer canned tuna, salmon and other seafood products with headquarters in San Diego.

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	N/A	N/A	N/A
Net income	N/A	N/A	N/A
Advertising	24.8	33.2	-25.3

Revitalizing through new advertising strategy and product changes marks the current operations of Chesapeake Financial Corp., Miami Beach, Fla. This 158th largest national advertiser, which incorporates both Arby's Inc. and Royal Crown Cola Co., dropped 25.3% in measured national advertising spending, to $24.8 million in 1984.

Total revenues and profits are not reported by Chesapeake, which is privately held, but Arby's reports its revenues were $765 million in 1984.

In 1983, Chesapeake Financial's predecessor, Royal Crown Cos., predicted total Arby's revenues of more than $1 billion annually within five years. In 1983, then publicly held Royal Crown had net income of about $15 million on revenues of $491 million from its four Royal Crown divisions.

Chesapeake Financial Corp. is the product of negotiations between Peachtree Corp., an Atlanta, Ga., group including Royal Crown executive leadership, and the Victor Posner Group, a Miami financial-development organization. The Posner Group, early in 1984, took over Royal Crown.

The corporation now consists of Arby's Inc., Atlanta; Royal Crown Cola Co., Rolling Meadows, Ill.; Adams Packing Assn., a citrus-juice-products segment based in Auburndale, Fla., and a home furnishing segment that includes several companies—Frederick Cooper Lamps Co., Chicago; Couroc of Monterey Inc., Monterey, Cal. (serving trays); Athens Furniture Inc., Athens, Tenn. (bedroom and occasional furniture); National Picture & Frame Co., Greenwood, Miss. (decorative pictures and framing), and Hoyne Industries Inc., Chicago (mirrors).

Only the Arby's and Royal Crown units currently are significant advertisers.

Adams Packing spent $91,800 for spot tv to advertise its Adams and Texsun citrus juice brands in 1983, but the heavy freezes in December, 1983, in Texas and Florida had an adverse impact on the company and there was no measured advertising in 1984

Arby's measured advertising in 1984 was down 8.5% from 1983, to $13 million. Over-all, Royal Crown brands dropped 34% in ad expenditures for 1984, to a little more than $10 million. Some individual Royal Crown brands were up. Diet Rite salt-free cola quadrupled its advertising, going to $3.8 million in 1984 from $999,300 in 1983. Royal Crown Cola was up 2% to $4.1 million, and Nehi fruit-flavored pops jumped to a little more than $102,000 from no spending in 1983. But there was a big drop in ad spending for the RC100 line—only $522,300 in 1984 compared with $4.7 million in 1983.

A number of new marketing moves in 1984 were begun by Arby's, and it is embarking on a number of others in 1985. Arby's, which comprises 1,600 stores in 50 states, Canada and the Far East (200 company-owned and 1,400 franchised), has continued menu expansion and stressed quality in its advertising.

Additions to the Arby's breakfast line were the Croissant Basket Program, featuring both plain croissants and meat and cheese-stuffed. Last fall came the Super-Stuffed Potato. Arby's marketing premise was not to copy existing potato dishes but to match the quality of Arby's existing beef dishes with a bigger and fresher stuffed potato. Promotion was via an award-winning dancing-potato tv commercial created by Grey Advertising, New York.

Arby's is refocusing on its basic roast beef line in a campaign scheduled to break this July. According to Arby's president Robert McDowell, the 1984 program of product diversification was preliminary to this year's program for getting back to reinstating the excellence of Arby's roast beef product.

Biggest news for Royal Crown marketing efforts in a long time is its new full-assault campaign, priced at $10 million, to win new cola drinkers to Royal Crown cola—some perhaps former Coke drinkers unwilling to go to Pepsi.

RC has had some satisfactory results with its various brands recently, but it still has only an estimated 2.5% of the market, compared with a reported 22% for Coke and 19% for Pepsi-Cola. RC's market share is said to have dropped from 4.3% in 1980, but Royal Crown says its Diet Rite line "has had significant growth in the face of the introduction of diet Coke. Since its reformulation, [revenue for] the [Diet Rite] brand is up in the area of 25%." Royal Crown is the acknowledged pioneer in diet cola beverages, having introduced the first low-calorie cola, Diet Rite, in 1962; the first caffeine-free cola, RC100, in 1980, and the first salt-free, Diet Rite Salt-Free, in 1982.

The new ad campaign by Dancer Fitzgerald Sample which broke recently, tells viewers in a series of 10, 20 and 30-second tv commercials that "some people will go out of their way for the taste of RC." In this campaign, Royal Crown is making its first use of network and cable tv to air its message. Advertising sources say Royal Crown also will increase significantly its ad spending for Diet Rite and Nehi in 1985.

The actions prompting Chevron to acquire Gulf Corp. in March, 1984, thereby becoming the largest U.S. gasoline marketer, reflect the dramatic changes sweeping the oil industry. Chevron ranked 149th among the nation's advertisers in 1984.

The acquisition, coming on the heels of Texaco's move to acquire Getty Oil and Mobil's buyout of Superior Oil Co., Houston, reflects a trend among oil companies to increase proven oil reserves through acquisition and at the same time make themselves less vulnerable to hostile takeover attempts by incurring huge debt. Undervalued stock has made the oil companies open to corporate raiders.

The $13.3 billion Gulf acquisition in March, 1984, the largest in U.S. history, besides boosting Chevron's retail power, builds up the company's strength, particularly in the sunbelt.

San Francisco-based Chevron, which changed its name in mid-1984 from Standard Oil Co. of California, had total measured spending (including Gulf's from May 1, 1984) of $27.0 million, an increase of 36.3% over 1983.

Excluding measured ad spending contributed by Gulf, Chevron's real spending increased in 1984 to $22.3 million, 11% over 1983 levels.

The majority of Chevron's 1984 measured spending was for its gasoline and service stations, with $4.3 million in spot tv for the company's "Yes" campaign, emphasizing gasoline quality, convenience and modern station facilities. Chevron continued as a heavy user of spot tv, particularly for its Ortho brand products (fertilizers and insecticides), with $6.6 million in measured spending, a 51% increase over 1983.

A major development in 1984 was the kickoff of a $500 million retail gasoline station modernization program to upgrade hundreds of stations and build new ones in growth areas. The program includes installation of computerized communications, accounting and inventory control that will improve Chevron's marketing network.

Nationwide, Chevron installed more than 600 integrated retail consumer systems in 1984 and plans to install 1,400 more during the next few years. Depending on the demographics of an area, the automated stations will offer self-serve and/or full-service gasoline, service bays, food marts and car washes.

The upgrade program is part of an aggressive plan to improve volume sales in the company's 11,000 retail service stations in 40 states and the District of Columbia. For the year, Chevron reported a 10% increase in sales of gasoline over 1983, compared with an estimated average industry improvement of 2.5%. Chevron is one of the leading marketers on the West Coast and in the Southeast. Domestic sales in 1984 were about 6% of total U.S. consumption. Worldwide sales, including Gulf from May 1, 1984, and affiliates represented about 5% of the free world's consumption.

Like Chevron, Gulf also is modernizing its retail operations, going to fewer, higher-volume stations. In 1984, Gulf was one of the top four marketers in 25 of 35 U.S. metropolitan areas.

Just how Gulf and Chevron's marketing operations will mesh on consolidation will not be known until the Federal Trade Commission permits the companies to share market information and join in formulating strategies.

Chevron Corp. posted net income in 1984 (including Gulf from May 1) of $1.53 billion, down 4% from 1983. Operating revenues in 1984 totaled $27.8 billion, down 2% from the previous year. Chevron recorded first-quarter net income of $354 million, down 6.3% from the first quarter of 1983. Revenues rose 73.0% in the first quarter to $12.6 billion, adding revenues from the Gulf unit. Excluding Gulf's results, Chevron's revenues fell about 5% to $6.9 billion.

Because Chevron borrowed heavily to purchase Gulf, the company plans to reduce its debt through divestiture of certain Chevron and Gulf assets. Early in 1984, Chevron sold its refining and marketing operations in Europe to Texaco, including 2,800 service stations and a 68% interest in a Netherland's refinery.

In May, 1985, Chevron agreed to sell 49% of Gulf Canada's operations (with option to buy an additional 11%) for about $2.49 billion to the Reichmann family of Toronto, which controls Olympia & York Developments Ltd., a Toronto company with considerable real estate holdings in the U.S. and Canada.

Chevron also agreed to sell the Gulf Oil Co. building in Pittsburgh to AGV Enterprises of New York. The company previously announced it would transfer Gulf headquarters to San Francisco. Currently, 600 Gulf employes remain in Pittsburgh.

RANK 114

Ciba-Geigy Corp.

Ardsley, N.Y.

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	N/A	5,800.0	N/A
Net income	N/A	N/A	N/A
Advertising	35.3	17.6	100.2

Ciba-Geigy Corp. in 1984 more than doubled its measured national advertising expenditures, catapulting it to 114th largest national advertiser from 186th in 1983. Spending was $35.3 million, up 100.2% from the previous year.

Ciba-Geigy Corp., Ardsley, N.Y., is the U.S. arm of Ciba-Geigy Ltd., the Basel, Switzerland, chemical giant that had total revenues of $6.4 billion worldwide in fiscal 1984, 10% more than 1983.

First-half 1985 revenues for the parent rose 18% to $3.9 billion over the year-earlier period.

The U.S. branch had 1984 U.S. revenues of about $1.9 billion, the lion's share of the returns, about $1.29 billion, coming from sales of fertilizers, insecticides and herbicides by its chemicals division. About $575 million came from pharmaceuticals.

Pharmaceuticals are 30% of Ciba-Geigy Ltd.'s worldwide business; agricultural chemicals and products, 24%; plastics, 20%; dyes, 15%, and a variety of consumer products, 11%.

The biggest media spending change in the year was for network tv, soaring 229%. Heavy spending in this medium was for Acutrim appetite suppressant and the new Softcolor soft contact lenses. Network tv totals were $18.3 million in 1984.

Farm publication spending was up 18.4% to $6.63 million to promote Ciba-Geigy's broad range of farm products.

Spot radio increased 21.7% to $643,200. Not used in 1983 but added in 1984 were modest amounts for network radio and network cable.

A major change for Ciba-Geigy in 1985 was the sale for $200 million of its Airwick Industries division to Reckitt & Colman, a British producer of food and other consumer products. Airwick had revenues of $180 million in 1983, off 28.6% from 1983. Its products include Airwick air fresheners, Binaca breath freshener, Chore Boy scouring pads, Drain Power drain cleaner, Carpet Fresh, Glamorene and Spray 'N Vac carpet products.

During 1984, several new health and diet products came to the U.S. market. Early in the year the company introduced a new weight-loss entry, Acutrim 16-hour time release, that gained a 12.7% share of the $200 million diet-aid market by midsummer. This compares with the 52.8% share of category leader, Dexatrim, produced by Thompson Medical Co. Dexatrim, however, dropped in market share from 60% in 1983. All of Thompson's diet aids combined have nearly 64% of the market. Thompson countered the erosion in its Dexatrim market share by introducing a version of the product formulated to last 15 hours.

Other products introduced by Ciba-Geigy during the year included:

- Slow FE, a once-a-day iron supplement, allowing slower absorption to avoid some of the less desirable effects of dietary iron, was introduced with advertising assigned to Sudler & Hennessey, New York.
- A transdermal product as yet unnamed for treating menopausal symptoms was assigned to Dugan/Farley Communications, Montvale, N.J., for advertising.
- Proflex brand of ibuprofen, the nonaspirin pain reliever, which Ciba-Geigy bought from International Laboratories.

A major marketing area for Ciba-Geigy in recent years has been its Vision Care soft contact lens business. It had captured 5% of the market from 1980 to early 1984 when it introduced its tinted Softcolors contacts in blue, green, aqua or amber.

To extend the reach and frequency of its color magazine advertising, Ciba-Geigy scheduled a $10 million radio campaign, handled by its agency for Softcolor, Bowles/Hanlon Advertising, Atlanta.

Ciba-Geigy, like other companies dealing in chemicals generally and pharmaceuticals specifically, has had some difficulties recently with government bureaus and citizen groups concerned about toxicity, side effects and environmental problems.

Questions by the Public Citizens Health Research Group raised about two of its arthritis and gout medications, Butazolidin brand of phenylbutazone and Tendril brand of oxylphenbutazone, originally threatened to ban the products from the market.

The U.S. Department of Health & Human Services finally ordered revised labeling instead to deal with the concern.

The Environmental Protection Agency banned Ciba-Geigy's Larvadex insecticide, fed to chickens to prevent the spread of Asian flu. Tests have shown it damages rabbit fetuses. The EPA took its action because of the possibility that Larvadex residues might remain in eggs and chickens sold for food.

During 1984, the Ciba-Geigy agricultural division moved its $2 million account from Dancer Fitzgerald Sample/Wegener Agricultural Group, New York, to Ketchum Advertising, San Francisco.

In September the company moved its $2.5 million Acutrim account from Sudler & Hennessey Consumer Group, New York, to Ally & Gargano, New York.

RANK 126

Citicorp

New York

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	6,619.0	5,883.0	12.5
Net income	890.0	860.0	3.5
Advertising	32.0	15.8	103.0

Citicorp, New York, continued its aggressive expansion in 1984, seeking an increasingly larger share of the U.S. and international financial services market through new products and acquisitions. Citicorp also has made no secret of its desire to engage in interstate banking.

Citicorp, the nation's 126th largest advertiser in 1984, had $31.9 million in measured spending, up 103% over 1983. Nearly $20 million in measured spending was for spot tv for consumer-oriented, individual banking services group, which includes Citibank N.A., Diners Club, Citicorp Savings and Citicorp Person-to-Person.

Citicorp, which has three core business groups—individual, institutional and investment banking—had earnings in 1984 of $890 million, up 3% over 1983, on revenues of $6.62 billion, up 8% over 1983. Growth in earnings was lower than expected as a result of acquisitions, including the purchase of savings and loan associations in Florida and Illinois in 1984 and a number of Diners Club franchises around the world. Increasing activity in international markets also was a drag on corporate performance.

By far the largest measured spending was for a widening array of services through Citicorp's individual bank group. By yearend, the individual bank had developed relationships with one in every seven, or 12 million, households in the U.S.

This is the arena where Citicorp fights it out with American Express and other major banks over market-driven financial products, such as bank cards, travelers checks, loans, insurance and investment-type services.

Citicorp is the largest issuer of bank credit cards in the U.S. through Citibank Visa, Citibank MasterCard and Citibank Preferred Visa. In 1984, Citicorp had more than 16 million active card accounts, 13 million of which were in the U.S. Increased advertising and market spending produced 3 million new members for the year.

By comparison, there are 20 million members worldwide, 13 million of which are in the U.S., holding the American Express card, which is not a bank-issued card.

Measured spending for Citibank consumer services jumped from $930,300 in 1983 to $5.8 million in 1984—nearly $3.7 million for spot tv and $1.9 million for magazine. Citibank also spent a measured $9.5 million on spot tv promoting itself and its banking services. Over-all, measured spending for Citibank rose to $18.9 million, up 72% over 1983.

Measured spending for Diners Club credit card services ballooned from $1.6 million in 1983 to $7.4 million in 1984. Spending was $3 million each for network and spot tv, $1.3 million in magazines and the remainder outdoor.

In April, 1985, Diners Club launched a $17 million campaign in print and network tv promoting the club's introduction of charge-card and travelers check services, targeted at business users.

In this area, Diners Club will compete heavily with American Express, which spent more than $16 million to advertise its travelers checks in 1984, compared with $2.6 million by Citicorp. Another competitor is BankAmerica, the second largest U.S. bank, which claims a 10% to 15% share of the travelers check market. Chicago-based Diners Club has 5 million members worldwide.

The increased advertising for Citicorp services is the result of a corporate strategy that focuses not only on expanding Citibank's array of customer services but also building its market through acquisition.

The company acquired Citicorp Savings of Florida and Illinois in 1984, and in April, 1985, gained approval from the Maryland state legislature to establish 20 full-service branches within the next two years. In return, Citicorp promised to invest $25 million in the state and create at least 1,000 new jobs. In addition, Citicorp is lobbying for a regional banking bill that may set the pattern for a network of interstate banks.

Some of Citicorp's aggressive behavior may be traced to its new boss, John S. Reed, formerly vice-chairman in charge of individual banking, who was elected chairman in August, 1984, following retirement of Walter B. Wriston. Mr. Wriston was chairman for 17 years.

Division sales			
Toys	676.3	192.6	251.2
Electronics	98.6	403.9	-75.6

Not even record sales from the success of Cabbage Patch Kids toys and accessories were enough to pull Coleco Industries into the black in 1984 after cancelation of its Adam family computer and writedowns on inventory.

The diminished importance of consumer electronics already is having a significant impact on sales, advertising and marketing in 1985 as toy products gain greater emphasis at West Hartford, Conn.-based Coleco, rated the 184th largest advertiser in measured media spending in 1984.

As a result of Adam's failure, Coleco sliced its ad spending in 1984 to $21.7 million, 53.1% below the previous year.

For the year, Coleco took a net loss of $79.8 million on net sales of $774.9 million, compared with a net loss of $7.4 million on sales of $596.5 million in 1983.

Dumping Adam cost Coleco $118.6 million in inventory sold at fire-sale prices and in other writedowns. Coleco also took big writedowns on its inventory of ColecoVision products, which it intends to sell off during 1985, thus eliminating its key product offerings in the depressed home computer and videogame markets. Coleco, like competitors Atari Corp. and Commodore International, suffered from the collapse of the videogame market and saturation in the home computer market in 1984.

Net sales of Coleco's consumer electronics division dropped 76% to $98.6 million for the year, creating an operating loss of $140 million. In the same period, sales from its toy division increased 251% to $676.3 million, creating an operating profit of $208.6 million.

Coleco's concentration on toy products, led by Cabbage Patch Kids, promises a healthier bottom line. Shipments in the first quarter of 1985 exceeded $150 million in CPK products, more than double sales for the line in 1984. Although net sales overall for the 1985 first quarter rose only 4%, to $194 million, net earnings (including tax loss carryovers) were $27.4 million, an 84% improvement over the same quarter in 1984. Wall Street analysts say Coleco is expected to post solid earnings for the rest of 1985.

The year 1985 may mark Coleco's biggest expansion of the CPK line, with introductions including CPK Playmates, limited edition products, such as CPK Twins, World Travelers, collectible Koosas Playmates, Playmates accessories, "purebred" Show Ponies with registration certificates and a variety of new CPK play accessories and clothing.

Coleco also is looking for new markets on boys' toys with its Sectaurs, Warriors of Symbion action figure line, which began shipping in March. Sectaurs is Coleco's first introduction in the male action figure category, which generated industrywide sales of $800 million in 1984, and may top $1 billion in 1985, according to analysts.

Sectaurs, however, will be hotly contested by Hasbro Bradley, which leads the market with its TransFormers robots and vehicles. TransFormers in 1984 was the leading boy's toy with sales of $105 million. The line is expected to exceed sales of $200 million in 1985. Possibly just as strong in 1985 is Hasbro's longstanding G.I. Joe line.

The marketing shift away from consumer electronics will have a major impact on ad spending at Coleco, which placed $19.4 million behind its consumer electronics in 1984, nearly $12 million of which was for Adam.

This year, the big ad and promotional campaigns are expected for Sectaurs and Cabbage Patch Kids. Cabbage Patch Kids received $6.2 million in measured spending in 1984, $5.9 million of which was for spot tv.

Licensing ventures may play an important role in the success of Cabbage Patch Kids and Sectaurs, however, as 50% of all toys on the market are licensed items. Coleco executives say a network prime-time cartoon special is in the works featuring the Koosas, the Cabbage Patch Kids' pets. ABC aired the first Cabbage Patch Kids animated special in 1984 during the Christmas season.

An animated Sectaurs cartoon series is scheduled for October prime time syndication. Sectaurs already has been featured in the first of a series of comic books published by Marvel Comics Group and is scheduled for a two-hour action tv special in the fall.

But possibly the most important factors that favor Coleco's long-term marketing strategy are demographics that indicate the number of children younger than 5 by 1990 will rise by 10.3% over 1982 levels, with half the babies being the first child. Marketing statistics show that parents and grandparents tend to spend substantially more on toys for the firstborn.

Coleco, like fellow competitors Atari and Commodore, underwent top management change when the company appointed J. Brian Clarke as president-chief operating officer earlier this month.

An exec vp since 1981 and formerly head of Coleco's Canadian toy company, he is the first Coleco president who has not been a member of the founding Greenberg family. With his appointment, Arnold C. Greenberg stepped up from president-ceo to chairman-ceo, and Leonard E. Greenberg moved from chairman to the executive committee.

Advertising	34.2	33.9	1.1

Commodore International, the 118th largest U.S. advertiser in 1984 with $34.2 million in measured media spending, made several critical changes during the year—a new president, new products and new agency—in an attempt to boost its fortunes, which continue to sag into 1985.

The Bahamas-based company with executive offices in West Chester, Pa., appointed Marshall F. Smith in February, 1984, as president-ceo, following the ouster of president, Jack Tramiel. The executive move was seen by analysts as a turning point in company fortunes.

Mr. Smith was a guiding force in developing the new Commodore 128 home computer, which is pegging the maintenance if not growth of its home computer market share on the 128 that shipped in May, 1985. Commodore machines currently account for about 33% of the U.S. home computer market, ahead of Tandy Corp.'s Radio Shack (18%), Apple Computer (16%) and Atari Corp. (16%).

The enthusiasm over the 128, however, needs to translate to the bottom line. Commodore posted a loss of $20.8 million in the fiscal third quarter ended March 31, 1985. Three-quarter cumulatives for net sales were $751.2 million compared with $966.9 million for the similar period a year earlier. The company announced it is expecting a loss for the fiscal year ending June 30, 1985, but will return to profitability by the fall.

The 128 is seen as a long overdue, more powerful extension of the Commodore line. The 128 was created to help bridge a critical gap between the saturated low-end home computer market and the market for upper-end home computers, such as the Apple IIc. It is being advertised as a "major breakthrough" with all the power of the Apple IIc and IBM PCjr but at half the price.

Commodore is positioning the 128 at a price point of $300, about midway between Atari and Apple home computers.

The standard 128 random access memory with expanding capabilities to 512K, color-monitor, and software compatability with the Commodore 64 should appeal to 64 owners who want to upgrade at a reasonable price. Analysts say this pricing level also provides sufficient profit margin to keep Commodore's base of mass merchants happy.

The 64, like most other home computers, has fallen from favor in recent times with retailers as a result of shrinking margins and declining demand. Commodore, however, is seen to have benefited in 1985 from the withdrawal of the IBM PCjr and problems with product introductions at Atari Corp., owned by Mr. Tramiel. In July, 1984, he bought the home computer and home videogame division bearing the Atari logo from Warner Communications.

Commodore needs a breakthrough in the low-end market to maintain the momentum generated by its successes in that market segment. As a result of more specific targeting, Commodore began cutting back in 1984 on mass media advertising for the 64. Total measured network tv spending was $22.4 million, a decrease of 16% from 1983.

Commodore also announced plans for a fall, 1985, introduction of the long-awaited Amiga computer, a machine that sports fancy graphics and easy-to-use features of such upper-end

products as the Apple Macintosh, but at a lower cost, from $1,000 to $1,500. The pricing, if at the lower end, would pit the Amiga directly against Atari's new 520ST, which will begin U.S. distribution this summer. The 520ST will retail for $800.

Commodore acquired Amiga Corp. in fall, 1984, primarily to bolster r&d. Amiga was working with Atari at the time it was picked up by Commodore, and the incident has been one of several to spark suits and countersuits between the two computer giants.

ConAgra

RANK
140

Omaha, Neb.

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	3,301.5	2,308.9	43.0
Net income	62.6	50.4	29.0
Advertising	29.2	16.6	76.1

ConAgra, an international agribusiness corporation with headquarters in Omaha, Neb., is committed to basic agriculture, but has begun to march into food marketing and merchandising.

For fiscal 1984, ended May, 1984, ConAgra produced revenue of $3.3 billion, up 43% from 1983, and net income of $62.6 million, up 31%. For the first nine months of fiscal 1985, through February, 1985, the increases are even sharper: Sales revenues rose 82% from the year-earlier period to $4.11 billion; net income was up 54% to $66.1 million.

ConAgra ranks 121st in size among the *Fortune* 500 industrials, and for 1984 is the 140th largest national advertiser. Its measured ad total made a steep climb of 76.1%, reaching $29.2 million in 1984.

ConAgra, which operates across the entire food chain, has three major segments—agriculture, grain and food. Its products and services range from hoof to household goods, from fertilizer to frozen premium-grade dinners, with an added array including herbicides, international grain shipping, fabrics, country general stores, pet supplies, flour and more.

Operating across the whole agricultural spectrum has its benefits. For example, anticipated low hog prices in 1985 will increase raw materials costs at ConAgra's Armour division, worth $2 billion in sales in 1984, but ConAgra's integrated poultry processors will benefit because historically reduced hog supplies have meant strong poultry prices.

Today in the U.S., ConAgra is the No. 1 company in frozen prepared foods, fresh poultry, prepared and packaged shrimp and catfish, flour milling, distribution of agricultural chemicals, and grain merchandising (among publicly held companies), and it is one of the leaders in branded processed meats.

In its new corporate strategy, announced in 1984, ConAgra intends to increase its marketing presence in the food business, from crop fields to store shelves. ConAgra, which bought the Armour Food Co. in 1983, is furthering its new marketing directions by backing the Armour label with substantial ad spending, $18 million this year.

For frozen dinners, Armour measured advertising is up 128%, to $13.8 million in 1984. Spending for the Banquet frozen entree line rose 44% in 1984, to $3.1 million. The popular Banquet Hot Bites chicken received more than an 11-fold increase, soaring to $7.7 million in 1984. The Armour processed meats (ham, turkey, franks, etc.) also were given good support, rising 44% to $3.1 million in 1984.

In its market-aggressive mood, ConAgra introduced 24 new products in 1984, mostly foods but including the Snoopy Santa and Snoopy Candy Cane pet toys of its ConAgra Pet Products Co.

The ConAgra Restaurant Company's 60 Taco Plaza Mexican fast food restaurants (58 franchised) continued unprofitable in 1984, but the company is planning a new restaurant concept, Taco Plaza Cafe.

During the year, ConAgra also acquired 17 new companies and divested its Pet Foods Division in Rolla, Mo.; several flour mills in Utah and Montana; distribution facilities in three California cities; 21 farm stores in Canada, and 23 building supply centers in five states.

Advertising	33.3	25.1	32.4
Division sales			
Beauty/hair care	291.6	215.4	35.4
Sealing/adhesives	38.8	27.8	39.6

Helene Curtis Industries, in tangling with competitors in 1984 for a greater share of the market for shampoos, conditioners and other personal care products, increased its measured ad spending 32.4% to $33.3 million.

The Chicago-based company, ranked 120th among U.S. advertisers in 1984 on the basis of its measured spending, put most of its emphasis on its new Atune brand shampoo and conditioner launched in summer of 1984.

The product is formulated for consumers whose hair is colored, permanently waved or damaged. Total measured spending in 1984 for Atune was $5.3 million—$4.3 million of which was network tv and $1 million magazine. The campaign, bearing an estimated $15 million advertising and promotional budget, continues in 1985.

Analysts say Atune has picked up less than 1% of the market share in its niche as a result of stiff competition. The brand competes with Procter & Gamble's new Lilt shampoo and conditioner, which takes its name from the well-established Lilt line of home permanents. Another competitor is Perma Soft shampoo by La Maur, Minneapolis, which has gained an estimated 2.2% market share since introduction early in 1984.

The need to advertise and promote personal care products heavily in 1984 as a result of increased competition and new product offerings by competitors dampened profit margins in 1984. Net earnings tumbled in the year ended Feb. 28, 1985, to $2.7 million, compared with net earnings of $10.4 million in 1983. Total revenues for the year were up 12% to $370.3 million.

Although sales in Helene Curtis' consumer products division increased for the year, the division's contribution to earnings actually declined from a year earlier because of higher marketing costs. Both the Suave and Finesse brands were up in terms of dollar sales, while the new Atune brand did not grow as rapidly as expected, executives at the company say.

Spending for Finesse products in 1984 increased to $20.3 million for the year, up 10% over 1983. Spending for Suave products increased 14% to $7.6 million in 1984. More than 90% of measured spending for both product lines was for network tv.

Suave, a line of lower-priced shampoos and conditioners, has an estimated 7% share of the $1.3 billion U.S. shampoo market. Finesse shampoo, a higher-priced line, maintains market share in the 3% to 4% range, although Finesse conditioner is estimated to have an 11% share of a $700 million market.

Line extensions for both Suave and Finesse brands continued early in 1985 with Finesse mousse, Curtis' third entry into the rapidly expanding category, which could exceed $100 million in retail sales in 1985. In 1984, the company introduced La Forme mousse for salon use, and Suave mousse for the mass merchandise market. Also in 1985, Curtis introduced Suave Soft Highlights shampoo and conditioner.

International sales increased in the fiscal year primarily as a result of successful introduction of Finesse products in Canada and Sweden in 1984. The company's industrial coatings division, Protective Treatments Inc., reported increased profits over 1983, because of a continued economic recovery in the automotive market.

Helene Curtis also moved late in 1984 into a newly renovated headquarters building near Chicago's Merchandise Mart.

In April, 1985, Klein/Richardson, Beverly Hills, Cal., was assigned the national business of Helene Curtis Beauty Distribution division.

Department stores	1,547.8	1,438.9	7.6
Specialty merch.	770.0	672.1	14.6

Dayton-Hudson Corp., whose discount store business continues to wag the tail of the Minneapolis-based retailer, ranked as the nation's 106th largest advertiser in 1984 on measured media spending of $37.9 million, a 25.1% increase from 1983 when it held the 120th spot.

Dayton-Hudson earned net income of $259.3 million in fiscal 1984, ending February 2, 1985, up 6% from the year earlier, on revenues of $8 billion, a 15% increase. Growth came mostly from improved performance at two of its discount retail chains, Target and Mervyn's, while general department store profits were down.

The company's business consists exclusively of retail operations, of which the flagship is 36-store Dayton-Hudson Department Store Co. Detroit-based Hudson and Minneapolis-based Dayton saw reduced operating profits last year, mostly because of lower margins and merchandise consolidation resulting from the merger of the two retail units. They produced 1984 revenues of $1.4 billion, up 12%. Operating profit, however, declined 31% to $107 million.

Dayton sold two smaller chains—John A. Brown and Diamond's—because of what it called geographic and strategic disadvantages, leaving combined Dayton-Hudson with 20 Hudson's and 16 Dayton's stores, all in the Midwest.

Mervyn's, perhaps the company's most promising new venture, is a 126-store Southwestern chain now in nine states that offers discounted private label and brand-name clothing. Seventeen new stores were opened in 1984, including eight in Houston and one in Dallas, part of the chain's new South Central territory. Current expansion plans call for 21 more openings this year, including 13 in that region. The company plans for Mervyn's to become a national chain.

Mervyn's had $223 million in operating profit, a 21% increase, on revenues of $2.1 billion, up 27%.

The company also operates 215 Target discount stores in 22 states. The fast-growing segment saw 1984 revenues climb 14%, to $3.6 billion, while operating profits grew 33%, to $236 million. Target introduced an "Honors" line of private-label sportswear last year, but sees its biggest growth potential in sales of electronics and toys, where the chain has implemented an "everyday low price" strategy. Target plans to open 13 new stores in 1985, including five in Los Angeles.

Combined, Target and Mervyn's now contribute 71% of corporate revenues, up from 52% in 1979, and constitute 74% of operating profit, up from 53%. In contrast, the department store unit's contribution to corporate revenues declined from 35% to 19%, and its percentage of operating profits dropped from 38% to 17%, respectively, since 1979.

The company's specialty merchandising division includes B. Dalton Booksellers' 729 stores, the 22-store Pickwick Discount Bookstores in Columbus, O., Denver and Minneapolis/St. Paul, and Lechmere, a hardlines retailer in New England.

B. Dalton's revenues were up 10% in 1984. to $490 million, while operating profits declined 6%. The chain began a "Best Value" discount pricing strategy, offering 20% to 40% discounts on 10 best-selling books. It also has expanded space devoted to computer software and will expand to more than 20 stores from test sites a "store-within-a-store" software category. Pickwick opened 18 new stores last year, while Lechmere added two outlets.

Last year, the company closed Plums, a four-store experiment in off-price retailing, because of lower-than-expected returns on investment. The company said this termination had an insignificant impact on its earnings, but its costs were reflected in 1983 results.

In personnel changes, Boake Sells was promoted from vice-chairman to president of the company in July, 1984, succeeding Kenneth Macke, who became chairman and retained his title as ceo. Gerald Gallagher replaced Mr. Sells as vice-chairman from his role as vice-chairman of Mervyn's.

The company had a 12.1% return on investment last year, down from 13% in 1983. Dayton-Hudson expects each store to achieve a 14% return within five years of startup operations.

DeBeers Consolidated Mines
London
RANK 169

($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	1,613.0	1,590.0	1.4
Net income	166.0	500.0	-66.8
Advertising	23.7	21.2	12.0

DeBeers Consolidated Mines Ltd., Kimberley, South Africa, the 169th largest U.S. advertiser, increased measured ad spending 5.9% in 1984 to $23.7 million in its continuing effort to create additional demand for diamonds in the U.S., the world's biggest gem diamond market.

DeBeers, which controls four-fifths of the world's trade in rough diamonds through its London-based subsidiary, Central Selling Organisation, backed its total U.S. marketing and promotional effort with $34 million. Of the measured amount, about 55% went into print and 45% to tv.

DeBeers' marketing strategy is geared to five marketing categories for gem diamonds in the U.S. where jewelry sales were $7.7 billion on 15.6 million pieces of jewelry in 1984, an 18.1% increase in value over $6.5 billion on 14.4 million pieces in 1983.

The categories and their assigned weights in terms of total ad spending: 30% were traditional quality gifts; 25%, diamonds of one carat or more; 20%, diamond anniversary rings; 13%, diamonds for men; 12%, diamond engagement rings. These weights are based on percentages supplied by NW Ayer, New York, DeBeers' U.S. advertising and promotion agency for the past 46 years.

The primary marketing shift in 1984 was a 50% increase in outlays for print advertising targeted at men. The men's category now receives about half the ad weight of gift diamonds, but its proportion is expected to grow with the category in 1985.

DeBeers boosted print spending over-all in 1984 by 11% over 1983 to $13.1 million. The men's print campaign, "Diamonds for Men," launched in 1980, has been credited with revolutionizing a previously untapped market. In 1984, DeBeers continued its strategy of male personality endorsements. Pro golfer Ben Crenshaw was presenter of a line of sports-oriented tie tacks. Male spokesmen in the past have included Australian tennis player John Newcombe and pro golfer Arnold Palmer.

In 1985, DeBeers is touting its men's theme "Gift of Success" in addition to themes added in 1984, including "Diamonds from a woman to a man." The print lineup for 1985 includes design collection ads, "The Man's Diamond," and the "State of the Art" campaign, a three-page magazine insert launched in February, 1985, and designed to show a wide variety of jewelry and accessories.

The company also has a 16-page color brochure for men. Ads for men's jewelry were national but skewed to the South, Southwest and West, where attitudes are less conservative about men's jewelry.

DeBeers spent $9.1 million on net-

Hanes Printables
Providing Leadership With The Right Combination

For the quality imprinted sportswear you need to make the most of your promotion and incentive investments — come to Hanes Printables. Whether it's your brand promotions, corporate identity programs, awards, incentives or point of purchase premiums, we have the right portfolio of quality sportswear that opens up exciting new opportunities, and is backed by the security and outstanding leadership that only our famous high quality brand can provide.

An effective imprinted sportswear investment requires sportswear with the right combination of styles and colors to get your name out in front of the crowd and keep it there. From standard-weights to heavyweights, from basic T-shirts to the American Sportswear Classics Sportshirt, we have the right shirt to fit your needs.

And because Hanes offers a selection of brilliant basic and pacesetting fashion colors in the finest colorfast dyes, you can depend on reliable consistent colors order after order. The key to our success is the unmatched quality of our product line that is compounded year after year.

Plus, the Hanes brand name earns you even greater dividends with consumers through the well-recognized high quality image already established for you.

All these product benefits are backed by a staff of professionals to assist you in planning your imprinted sportswear promotions and programs. With our proven combination you can bank on Hanes Printables — where leadership earns interest every day.

work and $1.4 million on spot tv in 1984 for its other diamond categories. Creative themes for tv emphasized romance, beauty and fashion. Anniversary rings in 1984 showed a mother and daughter admiring mom's new anniversary ring. In 1985, the scene shifts to a couple celebrating their anniversary in a hotel. A "skywriting" diamond gift ad introduced in May, 1985, shows messages of love written in skywriting, fireworks and on outdoor boards before the presentation of a diamond. Fashion was featured in 1984 in ads showing a sleek panther with cutaways to women wearing diamonds.

In February, 1985, DeBeers introduced "Splinters of Stars," a series of vignettes showing beautiful women wearing larger stones.

Buy quality was the message of a DeBeers print campaign for diamonds in 1984. The company continued its parallel ad placement strategy, where DeBeers buys a full-page ad that discusses diamond quality and arranges with a diamond jewelry marketer to buy adjoining space to showcase its jewelry products.

In 1985, print ads will discuss the four Cs of buying a diamond—color, cut, clarity and carats. DeBeers expanded its cooperative ad program with independent retail jewelers in 1984 to include 50% of the U.S. market, primarily the South, Southwest and West, spending about $1.5 million. The co-op program, which has been tested since 1981, is an effort to encourage greater use of DeBeers national themes in spot tv, local magazines, radio and newspapers.

Markets for precious gems and metals have been relatively stable in recent years. DeBeers had net operating income of $338.8 million in 1984, down 22% from 1983 operating income of $434.8 million. Revenues in 1984 were $1.61 billion, up 1% from revenues of $1.59 billion in 1983. Operating income was affected by fluctuations in foreign exchange rates.

DeBeers Central Selling Organisation seeks to support gem prices by regulating the flow of diamonds to the market. It maintains relationships with other international producers, primarily Botswana and the Soviet Union. DeBeers buys all rough diamonds, and these nations compete only in polished stones. In 1984, the market for polished stones was upset when the Soviets began selling large numbers of cheap polished stones on the Antwerp market.

A potential problem for DeBeers is its huge mining operation in South West Africa (Namibia), a territory that is seeking independence from South Africa.

These problems are now the concern of Julian Ogilvie Thompson, 51, who was appointed chairman of DeBeers Consolidated Mines in February. Mr. Thompson replaced Harry Frederick Oppenheimer, 76, whose family has controlled DeBeers for generations. Mr. Oppenheimer is one of South Africa's most prominent business executives and reputedly one of the world's 10 richest individuals.

El Pollo Loco	4,712.0	N/A	N/A
Distribution	63.6	54.7	16.3

Facing increased competition in the $45 billion purchase-meal industry, Denny's Inc., taken private this January in a leveraged buyout, is aggressively expanding through acquisition and store conversion, and for the first time in 15 years, the company is back in the franchising business.

Denny's is now owned by a group comprised of 50 from existing management at the time of the buyout, and investors put together by Merrill Lynch Capital Markets. Essentially, management has remained intact.

Denny's was the 168th largest national advertiser in 1984, with $23.7 million in total measured spending, up 6% from 1983. The bulk of the ad spending increase is accounted for by a 25% hike to $15.2 million in measured spending for network tv for Denny's restaurants. Spot tv for Denny's fell 32% to $3 million. Spot tv also fell 23% for Winchell's Donut Shops, owned by Denny's Inc.

Since 1978, Denny's has pursued an aggressive policy of expansion through new openings and acquisition. In fiscal 1984, 95 Denny's were added to the chain, mainly through purchase of existing restaurants and conversion to Denny's. The most recent market share data rank Denny's No. 8 among the top 10 restaurant chains with a 2.1% share of industry sales.

In October, 1983, the chain acquired El Pollo Loco, a quick service charbroiled chicken chain. On acquisition, El Pollo had 20 locations, but Denny's announced plans to open about 22 more in selected areas of the Southwest.

Chicken restaurants hold a 10% market share nationwide of the purchase meal industry, and with gains of nearly 20% per year, they had the second largest, year-to-year gains in sales in 1983, the most recent year for which statistics are available.

Record sales, operating income and earnings were reported by Denny's for the fiscal year ended June 30, 1984. Net income was $44.7 million, up 11% over 1983. Revenues were $1.21 billion, up 15%. For the first half ended Dec. 28, 1984, net income was $39.6 million, up 63% over the same period a year earlier. Revenues for the two quarters were $645 million, up 5% over 1983.

Denny's Inc. operated 1,132 Denny's restaurants as of the close of the 1984 fiscal year, 36 of which were franchises, although the company announced in April, 1985, it intended to build up its franchise business. The company operated 865 doughnut houses under the Winchell's trademark.

Denny's restaurants accounted for about $960 million in total revenues and $94 million of operating income in fiscal 1984. Winchell's division accounted for $182 million in total revenues, and $14.7 million in operating income for the year.

Two hostile takeover attempts, a proxy fight (an attempt by Roy E. Disney Jr., now board vice-chairman, to block greenmail payments) and a resulting turnover in top management helped Walt Disney Productions create its own national entertainment in achieving record revenues and income.

As the nation's 192nd largest advertiser, the Burbank, Cal., studio spent $20.2 million in measured advertising in 1984, up 46.9% from the previous year.

The company's new management guided the company to net income of $97.8 million, up 5%, on sales of $1.7 billion in fiscal 1984, up 27%. Six months into the new fiscal year, Disney had net income of $67.2 million, up 67%, on record revenues of $878 million, an increase of 24%.

Disney's new executives attribute the gains to a dramatic turnaround in the filmed entertainment segment. These execs are quite familiar with the film industry: Michael D. Eisner, elected chairman-ceo, was president-chief operating officer of Paramount Pictures Corp.; Frank G. Wells, elected president-chief operating officer, was vice-chairman of Warner Bros.

In March, 1984, the movie "Splash" helped launch the company's Touchstone films label. An advertising investment of more than $2.5 million, mostly in spot tv, paid off by establishing a Disney record of $69 million in box office revenues in initial domestic release.

Touchstone's second release, "Country," starring Academy Award winner Jessica Lange and playwright/actor Sam Shephard helped establish the new management's "new priorities," including "using the industry's finest writing, directing and producing talent."

In their first year, the priorities seem to be working. Filmed entertainment revenues increased 48% to $244.6 million, reversing a drop in revenues recorded in 1983. Similarly, operating income for the division increased 107% to $2.2 million, reversing 1983's disastrous showing, a slide of 270% from 1982.

Disney executives consider the company's film library a major asset and plan to release film reissues of each, along with a stated goal of 10 to 12 Touchstone productions a year. Ad support for such releases as "Pinocchio" and "The Jungle Book" topped $4.9 million.

But executives say Touchstone was formed to develop a new image because the Disney name had a negative connotation among teen agers who might say, "Hey, that's a Disney movie."

Teen agers have become a major movie market, so Touchstone was formed.

Another large part of filmed entertainment's success stems from the first-time profitability of the 1.4 million-subscriber Disney Channel. The channel takes 40% of its programing from the Disney Library. Another 40% is original programing, higher than all other pay cable services. Disney spent $2.4 million advertising the cable channel.

Disney's largest single source of revenues is its entertainment and recreation segment. Walt Disney World, Disneyland and Tokyo Disneyland had combined revenues of $1.1 billion in 1984, up 6%.

Advertising expenditures for the U.S. parks reached nearly $5 million, mostly in spot tv. The parks received national publicity during the 30th anniversary of Disneyland, including coverage on "Good Morning America," "Today," "Donahue" and "Merv Griffin." NBC presented a two-hour special, "Disneyland's 30th Anniversary," in February 1985.

But the company received other publicity as well.

In 1984, Disney purchased Arvida Corp., a Florida-based real estate development company for $200 million in stock—partially, in an attempt to block a takeover bid by Saul Steinberg.

The attempt failed, resulting in nearly a $71-a-share greenmail payment to Mr. Steinberg and finally in a restructuring of the board of directors.

With this purchase Disney entered the property development market. Ad expenditures barely topped $320,000, but Disney has plans for many Arvida holdings throughout the Southeast, including expanded shopping malls, new corporate offices and more planned communities.

Other plans include the possibility of selling pavilions in Disneyland and Walt Disney World, with the option of leasing the space back, in an attempt to boost earnings.

Dow Chemical Co.
Midland, Mich.

RANK 109

($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	11,418.0	10,951.0	4.3
Net income	585.0	334.0	75.1
U.S.			
Sales	5,293.0	5,225.0	1.3
Operating profits	379.0	219.0	73.1
Advertising	36.9	27.8	33.0

Dow Chemical Co., Midland, Mich., the second largest U.S. producer of chemicals after Du Pont, continued on the acquisition trail in 1985 that will extend its business franchise further into household products and pharmaceuticals.

Sales in 1984 were up 4% to $11.42 billion, with 1984 net income sharply higher at $585 million, an increase of 75% over the previous year. Dow is the 109th largest national advertiser, with 1984 measured media spending of $36.9 million, 33% ahead of 1983.

Dow acquired in January, 1985, the Texize division of Morton Thiokol, Chicago, for about $300 million. Texize had sales in 1984 of $259 million, up 13% from 1983, and profits rose 4% to $27 million. Texize household brands include Fantastik, Spray 'n Wash, Yes, Glass Plus, KZr, Vivid and Spray 'n Starch.

In the first quarter of 1985, Dow bought entry into the huge Japanese market by acquiring about 20% of Funai Pharmaceuticals. Market watchers also are looking at a possible linkup between Dow and Upjohn.

To package this new activity, Dow launched a new corporate ad program, themed "Dow lets you do great things."

Created by D'Arcy MacManus Masius, Bloomfield Hills, Mich., the campaign was released in Dow manufacturing cities this spring, to be followed by a national launching this fall.

The Texize addition more than doubles the $1.7 billion in revenues currently generated by Dow's consumer specialties group. Revenues of the other three segments in 1984 were: Basic chemicals, $5.34 billion; basic plastics, $1.7 billion, and industrial specialties (proprietary and other special formulations of plastics and chemicals), $2.6 billion.

A harder push for ad promotion on Dow consumer products began in 1984. Spending in six measured media increased 38% to $29.9 million in 1984 to advertise the company's most heavily produced brands, including Dow bathroom cleaner, Handi-Wrap, Saran Wrap and Ziploc bags.

Bathroom cleaner spending increased to $9.2 million in 1984 from $1.6 million in 1983. Handi-Wrap spending jumped 61% to $5.3 million; Saran Wrap dropped 50% to $1.9 million.

Ziploc bag spending was up 5% to $13.6 million. Network tv took the lion's share at $22.7 million, and magazines, $6.02 million.

Although Ziploc spending was down 8.8% to $11 million in 1984 in network tv, magazine spending for Ziploc bags increased 124% to $8.5 million.

In its emerging heavy-industrial changes, Dow is moving to produce materials that will have applications in products where consumer growth rate is 10% to 15% annually, compared with basic chemicals' flat performance.

As if to capsule its new directions, Dow abandoned the natural brine deposits in Midland, which gave the company its start.

A client speaks to his agency about newspapers in general an one newspaper in particular.

For our advertising investment, we expect ads to work hard by using each medium in the most creative, compelling way. And we want our agency to make an informed judgment on the ways that the editorial environment of the medium enhances our message.

When the medium is newspaper, that judgment should be based on reporting excellence and graphic presentation, as well as quality demographics.

In Metro New York, one newspaper is an outstanding example of the "environmental enhancement" I'm referring to: The Record. Its readers across affluent Bergen and Passaic counties in New Jersey have the second highest median household income in America, according to Scarborough. And it gives them award-winning reporting in full color, using more color than almost every other newspaper in the country. I'm particularly impressed by the way four-color ads look in The Record.

Simply stated, The Record combines my kind of audience with my kind of impact.

That's the kind of added value—"environmental enhancement"—I want in my media plan. Let's contact The Record's National Advertising Manager, Jonathan Theophilakos, at (201) 646-4257. And let's put The Record's added value to work. It will make us both look good.

The Record
We cover your world. All of it.

The world's largest oil company, Exxon Corp., continued scaling back refining and marketing operations and selling unprofitable operating units in 1984 as it aggressively countered difficult economic conditions forcing a restructuring of the oil industry. Exxon's success, however, is measurable in record earnings for the year despite intense competition in the markets for oil, natural gas and chemicals.

New York-based Exxon was the 153rd largest U.S. advertiser in 1984 with total measured spending of $25.6 million, up less than 1% from 1983.

Motor oil was one category in 1984, however, where Exxon substantially increased its measured ad spending compared with 1983. National rollout of Exxon Uni-Flo 10W-30, a high-performance motor oil for cars and light trucks, spurred an increase in measured spending to nearly $6 million in 1984, up from less than $500,000 1983. Spending was divided 70% spot tv, 29% magazine and 1% outdoor.

The majority of Exxon's measured spending, $11.7 million, was allocated to spot tv for gasoline products, a 4% increase over 1983.

Exxon's net income in 1984 was up 12% to $5.5 billion. Sales and operating revenues for 1984 were $95 billion, up 3% from 1983. Improved earnings, for the most part, were the result of efficiency measures and greater production of crude oil and natural gas at the well. Profits from oil exploration and production in 1984—where the real money always has been made—were up 17% to $4.8 billion. In the first quarter of 1985, they were up 4.4% over 1984 levels.

Profits tumbled 10% for the first quarter of 1985, although per-share earnings fell just 2.3% as a result of stock repurchases. Revenue dropped 7.2% for the year to $23.1 billion. The results reflected slower economic growth, industry overcapacity in downstream operations and a strong U.S. dollar.

Excess industry capacity in refining and marketing continues to squeeze profit margins. That trend picked up strength during the second half of 1984 when the industry began drawing on stocks of crude oil accumulated earlier in the year, combined with a slowing of the U.S. economy. (Fears of attack on shipping in the Persian Gulf caused a buildup of crude in the spring of 1984.) Profits for Exxon's downstream operations in 1984 fell 68% below 1983 levels to $357 million. For the first quarter of 1985, worldwide refining and marketing earnings dropped 84%.

Because most analysts are predicting about 1% growth a year in demand for oil, Exxon has taken drastic steps to cut back on its refining and marketing operations. Consequently, Exxon is shrinking. As it scales back operations, it is improving the efficiency of its core business in oil, natural resources, chemicals, electrical equipment, refining and marketing.

Since 1979, when the Organization of Petroleum Exporting Countries doubled the price of a barrel of oil, Exxon has scaled back refining capacity by 30%, selling or closing 14 refineries. In 1984, Exxon closed its refinery on the Caribbean island of Aruba.

Without further reductions in refining and marketing capacity, however, limited growth in demand will not permit the oil industry to grow out of its problems in the foreseeable future, Exxon executives say. As a result, the company continues to upgrade its retail outlets by consolidating volume in fewer and larger sites. In 1983, Exxon withdrew from portions of five states where it was not able to compete effectively, selling about 800 stations in parts of New England, Kentucky and Ohio.

Since 1979, the company has cut 2,000 low-volume service station units, 25% of its worldwide chain, and at the same time increased gasoline volume sold per station by an average of 30%. It has been redesigning the appearance of the stations, completing 7,500 since 1981.

In addition, Exxon is divesting unprofitable business units. In January, 1985, Olivetti agreed to acquire the non-U.S. assets of Exxon Office Systems. A month later, a similar agreement was made with Lanier Business Products covering U.S. operations. Measured advertising for Exxon office systems in 1984 totaled $1.9 million, a 44% drop from 1983.

The selling of its office systems unit marked the end of a hard-fought battle to gain increased market share for its Vydec, Qyx and Quip products. Exxon is believed to have sunk hundreds of millions of dollars into the office systems venture, taking a loss of about $30 million on the sale.

But dumping the office systems unit fits with Exxon's over-all strategy, as outlined by chairman Clifton C. Garvin: "Our goal is clear: To be the most efficient competitor in each of our businesses—in oil and gas, in chemical, and in every other activity."

The line of succession at Exxon was firmed up in May, 1985, when Lawrence G. Rawl was elected president succeeding Howard C. Kauffmann, who retired. Mr. Garvin is expected to retire in 1986 when he reaches 65.

ending in February. Federal Express recorded net income of $34.2 million, off 60%, on revenues of $1.438 billion, up 40%.

Income was hurt by startup costs of Federal Express' electronic ZapMail service, but income also benefited from the sale of some of the company's smaller Dassault aircraft used in feeder line service and from a $6.5 million tax credit.

New for Federal Express this year were ZapMail, a modest but strategic move into foreign express service and the addition of order expediters.

Heaviest ad spending was for ZapMail, which at $14.2 million got more than 40% of the total, and for the fast delivery service, which still gets the biggest piece of the ad pie, $19.5 million in measured spending.

ZapMail, introduced in July, 1984, is a fast-delivery service that electronically transmits letters and documents over terrestrial telephone and satellite transmission circuits. Standard delivery time is two hours and can be cut to one hour if transmission is directly from sender to recipient instead of via a Federal Express Business Service Center. The company has some 300 of these walk-in centers, each offering a full range of Federal Express services.

At the heart of ZapMail is facsimile transmission equipment developed by NEC Electronics and so far, exclusive with Federal Express. The company says it has orders for 6,000 of these sending/receiving systems for placement at customer locations and have installed nearly 700. Charges are by monthly lease fees and a per-page tariff.

ZapMail has not come cheaply for Federal Express. So far in fiscal 1985, it has cost the company $90 million in pretax operating losses. Also, Federal Express has run into competition from MCI Mail, Western Union Easy Link and facsimile equipment makers including Xerox and Panafax.

Heaviest measured advertising for ZapMail has been tv, both network and spot, which totaled about $12 million for the year.

Federal Express made numerous other technical, logistic and equipment changes during the year. It is now using DADS (Digitally Assisted Dispatch System), a hand-held electronic instrument that receives and records dispatch information even when the driver is not in the van.

Also, Federal Express is improving its electronic COSMOS system for finding a customer's shipment anywhere in transit; buying 11 big McDonnell Douglas and Boeing jets and 30 smaller Cessna turboprops for feeder line service; expanding its Superhub facilities at Memphis International Airport, and planning to expand the concept of regional sorting—instead of feeding every piece through the Memphis Superhub—by emulating the Newark, N.J., Metroplex Center in Boston, Chicago, Oakland and Los Angeles.

Federal Express expects that by June, 1985, about 25% of its volume will go directly through such regional sorting centers instead of all funneling through Memphis. Annual package volume jumped to 67 million pieces in 1984, compared with 43 million in 1983 and 32 million in 1982.

Looking to expand beyond the U.S., the company in 1984 acquired Gelco Express International, a worldwide courier service, and will fold it into the Federal Express organization and identity.

Federated Department Stores

Cincinnati

RANK 135

($ figures = 000,000)

Worldwide/U.S.	**1984**	**1983**	**% chg**
Sales	9,672.3	8,689.6	11.4
Net income	329.3	338.3	-2.7
Advertising	30.3	28.4	6.7
Division sales			
Department stores	6,566.6	5,970.3	10.0
Mass merchandising	1,059.9	991.1	7.0
Supermarkets	1,711.3	1,473.7	16.2
Other	334.5	254.5	31.5

Federated Department Stores, Cincinnati, the 135th largest U.S. advertiser with measured media spending in 1984 of $30.3 million, made new and revised growth strategies in the face of mounting price competition and softening consumer demand.

Federated units also attempted to stimulate sluggish consumer demand through advertising, increasing the measured total by 6.7%.

Most of 1984's spending increases resulted from a 7% increase in spot tv to $26.2 million. Federated divisions used spot tv for the bulk of advertising, supplemented by small measured spending in magazine, newspaper and spot radio.

Increased advertising, however, failed to offset decreasing margins, affected by an overly aggressive inventory buildup in the department store segment that led to extensive merchandise markdowns, further dampening profits.

Net earnings for the fiscal year ended Feb. 2, 1985, were $286.7 million, excluding the sale of equity interests in two shopping centers, an 8% decrease from 1983, also excluding unusual items. Sales for the year were $9.67 billion, an increase of 11.3% over the previous year.

The same sales-earnings pattern carried over into the first quarter of the current fiscal year. Sales rose about 8% to $2.17 billion from the year earlier, but earnings of $706.6 million increased only 4.2%. As a result of weak earnings, Moody's Investors Service in May, 1985, reduced the senior debt rating of Federated to double A-2 from triple-A.

Moody's analysts say Federated has been "slow in reacting to merchandising changes in department and specialty-store retailing" and has allowed a portion of its customer base to slip away. Moody's expects the retailer's profitability to improve as it installs cost-containment and computerization systems, disposes of unprofitable divisions and changes inventories.

In 1984, Federated began implementing strategic changes in its department store segment with the aim of improving return on investment through increased market share.

New store openings and remodeling for more efficient use of merchandising space were keys to growth for the year, with the opening of 45 new stores.

Federated store divisions include Abraham & Straus, Bloomingdale's, Bullock's, Burdines, Filene's, Filene's Basement, Foley's, Gold Circle Goldsmith's, Lazarus, I. Magnin, MainStreet, Ralph's grocery, Rich's, Richway, Sanger Harris/Levy's, Shillito-Rikes stores and The Children's Place.

Significant 1984 investments included big outlays for MainStreet, a new family department store for moderate-income customers, which opened Nov. 1, 1984, with three stores in Chicago. Six more MainStreet stores are scheduled to open in 1985-86.

Substantial funds also were spent in 1984 to continue Bloomingdale's national growth, now totaling six stores, including an opening in Miami, and remodeling of the Manhattan flagship. In March, 1985, Federated disposed of Boston Stores, which included eight units in Wisconsin, for $80 million to P.A. Bergner Co., Peoria, Ill.

Federated announced plans to spend $649 million through 1989 on new stores, down from $971 million in 1980-84. Of this total, 41% is planned for department stores, 7% mass merchandising stores, 14% supermarkets and 38% other stores. As Federated opens new outlets, its five-year growth strategy has been to gradually expand from its base in upscale department stores into mass merchandising, grocery and other forms of retail.

Net sales from department stores have fallen from 72.5% of total sales in 1980 to 67.9% of total in 1984. During the same period, net sales from mass merchandising, supermarket and other retail outlets increased from 27.5% to 32.1%, a net change of 4.6% with each 1% of net sales in 1984 worth $96.7 million.

Department stores continued to contribute the majority share of operating profits, however—89.3% ($619.8 million) in 1984 compared with 8% ($73.9 million) for all other retail outlets. Operating profits from other retail units were offset by the cost of expansion and startups.

Tires auto parts	3,569.0	[illegible]	6.4
Diversified prods	432.0	[illegible]	38.1

Firestone Tire & Rubber Co., Akron, in a major marketing change in 1984, is pushing to develop a nationwide chain of MasterCare service centers for complete auto servicing to complement tire sales.

Firestone, the 199th largest national advertiser, looked to be on its way to securing acceptance of its new retail centers by Jan. 31, 1985, the end of its first quarter of fiscal 1985. Operating income from tire and automotive-service retailing activities in the U.S. totaled $3 billion in the quarter, compared with a loss of $3 million a year earlier.

Total net income for the company was down 19% to $17 million, and net sales were off 3.7% to $903 million primarily because of depressed international conditions.

For fiscal 1984, ended Oct. 31, 1984, net income was $102 million, down 8.1%, on revenues of $4 billion, up 9% from the previous year. Advertising expenditures, signaling the new MasterCare program, jumped 70.5% to $19.9 million in 1984. Of that total, about $15 million was for Firestone's auto centers, quadrupling 1983's spending of $3.7 million. The company's only network tv spending in 1984 was for auto centers—$12.2 million, the largest network tv campaign in the company's history.

Other Firestone 1984 advertising was a good deal smaller, by comparison, including $2.2 million for auto tires, up 75%, and $1.25 million for truck tires, 10 times 1983's spending. Battery spending, however, was off 65% to $307,200.

Firestone believes that its centers will build tire sales, an area in which it is in good shape competitively.

With its Firestone, Dayton, Road King brand tires and many private labels, it is one of the five largest tire makers in the world, and the second largest in North America with 17% share of the U.S. and Canadian markets. Goodyear is first with about 30%. It's the largest supplier to Ford and a principal source for General Motors, Deere & Co. and other agricultural implement makers.

To further cut inefficiency and assure better profitability, Firestone has sold rubber plantations, closed tire manufacturing plants and sold its auto passenger-restraint and foam products businesses because of their ties to the auto-production industry that made return on investment too long term.

The kinds of businesses it has kept are the rubber roofing production because demand for that type of roofing is growing about 20% a year. It also is holding on to those related areas close to its basic tire business—steel wheels, air-bag suspension, synthetic rubber and tire cord.

At work on the tire-auto store project for about three years, Firestone has made numerous market research findings that helped boost its MasterCare launch. The total U.S. auto services market is worth $65 billion annually, increasing at a rate of $3 billion to $4 billion a year; the average car owner visits an auto service center 14 times between tire purchases; the average age of cars on the road in the U.S. now is seven years, the highest since World War II, but the number of gas stations and auto dealers with repair shops is dropping.

Convinced by these findings, Firestone has set out to put together its chain, buying 250 of J.C. Penney Co.'s free-standing auto centers when Penney left that field, and revamping many of the existing Firestone-owned and dealer-owned Firestone tire stores.

Firestone is marketing the resulting chain of nearly 1,600 MasterCare Centers by advertising, "Come in America, drive on down to Firestone." Goal of the campaign is to depict the MasterCare center as a place to sell the Firestone stores as a brand.

State of Florida
Tallahassee
RANK 130

($ figures = 000,000)

Worldwide U.S.	1984	1983	% chg
Sales	N/A	N/A	N/A
Net income	N/A	N/A	N/A
Advertising	30.0	N/A	N/A

The State of Florida, ranked the 130th largest national advertiser in 1984, spent $30 million in measured media to promote citrus fruit, scenery, healthy business climate and even specialized technical courses at the Florida Institute of Technology.

The big citrus program is handled by the Florida Citrus Commission, an arm of the State of Florida, and funded by the citrus growers through an excise tax on every box of fruit. The commission gets no other financial support. The 50-year-old commission is responsible for regulation, research and promotion of the Florida citrus industry.

Spending directed by the commission totaled about $26 million in 1984, including $20 million for frozen orange juice, $2.5 million for grapefruit juice, $2.5 million for fresh grapefruit, and $1 million for fresh oranges, tangerines, tangelos and Temple oranges. The great bulk of the spending on orange juice was for tv. About $3 million went for print, including magazine, inserts and newspaper supplements.

Increased spending by the citrus industry is already in the works following the disastrous freeze that blanketed the state earlier this year. The freeze effected higher than usual price hikes, a fact the industry will attempt to offset by pushing product quality.

Florida state advertising for tourists comes in two varieties: Out-of-state to attract tourists, and in-state to convince Floridians of the value of the big tourist influx. Total tourism spending in 1984 was $4.3 million, according to state officials, heavy on spot tv and print, timed for different periods of the year and aimed at various market segments.

The summer campaign is designed to bring in tourists during that slack season and is aimed at 21 markets in the Midwest, Northeast and Southwest. The winter campaign marries familiar theme lines, such as "When you need it bad, we've got it good," with print and tv images that show singles, couples and families laughing in the sand and surf.

Targeted for this advertising are the coldest states of the North, populous parts of the Southwest and Canada. The Florida Commerce Department estimates that at the height of the winter season, 8% of the population of Canada is in Florida.

In-house, Florida's Commerce Department runs a public service campaign to show Floridians how important tourism is to the state. Images in this campaign include the Orange Bowl at night with lights going on one-by-one, signifying arrival of tourists. Another spot used in a commercial paid for by Chevron Corp. and Hertz Corp. shows visitors hugging on arrival in Florida. The spot is distributed by the state's Commerce Department.

Some local Florida communities—such as Palm Beach, Orlando, Miami and Panama City—do their own tourism promotion, paying for it with local option taxes, however, this spending is not covered in the state's measured advertising.

The Commerce Department's Office of Economic Developments spent about $500,000 in 1984 media advertising on its ad campaigns that had

Source: Broadcast Advertisers Reports as supplied to Leading National Advertisers three main themes: Attracting industry in general, assisting Florida industry in its overseas programs and attracting the movie industry.

The U.S. industrial promotion effort is primarily a vertical market print program in major business journals. Its aim is to lure industries in high technology, pharmaceuticals and professionally staffed fields. The movie campaign bears the theme: "Here is Hollywood weather without Hollywood overhead."

Florida's third big area of advertising—education—reflects a demographic change in college and university life. The schools now must compete for students because of the shrunken size of the available student pool and the many appealing specialized programs available to students who are able to be choosy academically and economically.

For the Florida Institute of Technology this means recruitment advertising for two of its programs, flying and ocean diving.

The flying program, at the Melbourne campus, is based on traditional engineering education, leading to degrees ranging from associate (two years) to doctorate. The ocean diving program, at the Jensen Beach campus, is in hands-on applied technology. The degrees range from associate to master's. The institute spends more than $200,000 a year for its recruitment ads in print media, including *Skin Diving* and *Flying* magazines, the *New York Times*, "College Guidance" directory, "Talbot's Guide" and "College Outlook."

E&J Gallo Winery
Modesto, Cal.

RANK 122

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	N/A	675.0	N/A
Net income	N/A	N/A	N/A
Advertising	32.9	34.8	-5.5

E&J Gallo Winery, weathering a flat to poor year for California wine marketers in 1984, lowered its measured media ad spending in 1984 by 5.5% to $32.9 million.

The Modesto, Cal.-based winery, which has developed a business to cater to most wine tastes, ranked as the nation's 122nd advertiser on the basis of its measured spending, a drop from 108th place in 1983.

Revenues for the privately held Gallo are estimated at $673 million. Gallo is now the largest selling single brand category in the wine and distilled spirits field, based on total dollar volume, number of cases shipped and market share.

Included under this family name is Carlo Rossi wine, E&J California brandy, Andre champagne, a number of novelty wines such as Boone's Farm and Thunderbird, vermouth and liqueur.

The newest addition, Bartles & Jaymes wine cooler, is improbably advertised in a recently introduced tv commercial showing two rustics on a porch.

Gallo's major advertising theme, "All the Best. From Ernest and Julio Gallo," covers a range of wines, including the Gallo branded and the Gallo varietal wines labeled "From the cellars of Ernest and Julio Gallo." This includes such varieties as Chenin Blanc, Ruby Cabernet and Gewurztraminer.

Gallo introduced the Carlo Rossi brand, separately labeled, when it elevated the quality image of the Gallo line to the "Cellars" label and needed a lower price brand to fill the void. Now the company offers wines at three levels: The lower and medium priced jugs and the more costly varietals.

Gallo branding on more expensive varietal line is not a first for the Gallos. Reportedly, they were inspired by the Italian Swiss Colony (now Colony) wine operations in offering a broad range in a popularly priced line, but they began offering in the 1940s more costly varietals.

Today, according to *Impact*, the wine and spirits newsletter, the three Gallo still table wine brands have a 1984 combined U.S. market segment of 36%—up nearly a full market share from 1983. Included in this total is a 17.8% share of the market for the generic Gallo brand including Hearty Burgundy and Chablis Blanc, 16% for Carlo Rossi, the fastest growing brand at Gallo, and 2.2% for Gallo Varietals. Almaden is third with 9.4% of the market.

A first for Gallo was the introduction in 1984 of its first dated varietal wine, a 1982 Cabernet Sauvignon.

Gallo brand media ad spending was down 37%, to $16.4 million in 1984. Of the 1984 total, $16.2 million was network tv.

Andre brand spending, all for network tv, more than doubled, rising to $6.9 million in 1984 from $3.35 million in 1983.

The 1985 Ad Dollar Summary lists 35,000 Brands and how much they spent in 7 Media.

You can't buy this complete listing anywhere else.

These are the official industry figures. If you want to know who's spending what on advertising, BAR/LNA's Ad Dollar Summary is the reference tool you need.

Because only in this one volume will you find a complete summary of ad dollars from the PIB Magazine and Newspaper Supplement Service, from BAR's Broadcast Services and from the LNA Outdoor Advertising Service.

These are the very same figures LNA prepares for major media organizations like MPA, TVB, RAB, and OAAA. They're used by leading advertisers and their agencies. The trade journals also turn to LNA for media data.

The 1985 Volume now includes cable TV. The Ad Dollar Summary tells you how much each of 35,000 brands is spending in consumer magazines, newspaper supplements, network and spot television, network radio, outdoor advertising, and now, for the first time, in cable TV.

Brands are listed in alphabetical order along with their parent company identifications and the media used.

And that's not all. For the first time we've added listings that show the top 100 companies ranked by expenditures in each of the media.

Top 1000 Companies by total ad dollars. The Ad Dollar Summary includes other vital reference data.

For instance, there's a convenient listing of Top 1000 Companies ranked in order of total media expenditures and broken out in each of the seven media.

There's also a section in the year-end edition showing the top 10 brands in 275 product categories, with a category total.

Year-End 1984 Edition on sale now. If you didn't subscribe to the last year's Ad Dollar Summary, now is your chance to order the entire year found-up in one conveniently bound edition for just $150.00.

Multi-Media Services from BAR/LNA. The Ad Dollar Summary is just one of the Multi-Media reports we offer, and the only one available without subscribing to the full service. Our full-service subscribers receive two additional reports which complement the Ad Dollar Summary with more detailed analyses:

- Company/Brand—an alphabetical listing of companies and how much is spent on each brand in seven media.
- Class/Brand—compares competitive brands within 275 product categories. This enables you to see not only how much each brand spent in specific media, but also who the major spenders are in each category.

For more information about our other media analysis services, including on-line programs and customized reports, just check the box in the adjacent column.

Hallmark Cards

RANK 102

Kansas City, Mo.

($ figures - 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	1,500.0	N/A	N/A
Net income	N/A	N/A	N/A
Advertising	40.3	21.1	91.4

Hallmark Cards, Kansas City, Mo., which terms its principal field of business "social expression," ranked as the 102nd largest advertiser in 1984 with measured media spending of $40.3 million, a 91.4% increase over 1983.

Big changes at privately held Hallmark, which had total revenues of an estimated $1.5 billion in 1984, colored the company's advertising picture during 1984. In its dramatic boost of expenditures, the amount for network tv rose nearly 50% to $27.8 million; spending for print rose sharply to more than $11 million in 1984 from only $508,800 in the previous year.

In a major agency shift, Hallmark removed its more than $40 million ad account from Young & Rubicam in May, 1984, because it perceived a conflict between its own needs and those of American Telephone & Telegraph, whose $25 million account Y&R won in early 1984. Hallmark said the conflict came because it and AT&T both required "highly motivational" advertising and promoted themselves as "the best way to share love and affection." Hallmark turned over its account to Ogilvy & Mather, New York.

The company's two card brands, Hallmark and Ambassador, control 40% of the U.S. greeting card market, followed by American Greetings Corp., Cleveland, and Gibson Greetings Cards Inc., Cincinnati, acquired by Walt Disney Productions in early 1984. Hallmark brand cards reach the public through 22,000 retail outlets, half of them gift and stationery shops, and the rest department and drugstores. About 250 of the shops are Hallmark-owned.

The Ambassador line, started in 1959, is sold through 15,000 chain groceries and other mass-market outlets. A separate staff produces and markets Ambassador cards, which Hallmark describes as the third biggest greeting card seller with annual sales exceeding $250 million.

Hallmark's answer to this is a market-expanding multifold strategy: new licensed doll and cartoon characters, toys and gifts that can be marketed in tie-ins with cards, acquisitions of new companies, and investment in other industries.

Yet, a Hallmark spokesman stresses that the company is not veering from its main business: "A lot of media attention has focused on our acquisitions," he says, "but diversification is not where our energies are being spent. Social expression is still 90% of Hallmark."

Social expression was at the core of the company's reorganization in November, 1984, when it created a Social Expression Group to combine marketing and administration of all products in this category into one major management unit. Group vp Robert L. Stark, promoted to senior vp, directs the group.

Advanced card technology also shows Hallmark's continuing emphasis on its main business. A microchip gave Hallmark a new musical card in 1983. Further refinement produced a harmony musical card, first available for Christmas, 1984. In 1983, the company first used lasers to create intricate card designs, and in 1984 developed its "Perspectives" series of six cards bearing 3-D holograms.

Scheduled for completion in late 1985 is the new 170,000-sq.-ft. Technology & Innovation Center, where Hallmark plans for its artists, engineers, technicians and scientists to work together.

In content, Hallmark's cards in 1984 began reflecting sociological changes in U.S. society through its "new relationships" approach—cards for single parents, for homes with an absent father or a step-parent, a Mother's Day greeting that regards a mother not exclusively as a female parent but as someone who cares for children.

New products for 1984, created by the Hallmark Properties subsidiary, are story and doll characters Rainbow Brite and Rose-Petal Place. Mattel Inc. is licensed to make the doll versions. For 1985, there are Hugga Bunch, licensed to General Mills Toy Group, and new photo albums, paper partyware, gift wraps and fancy bags for wine, cookies or jewelry.

News of major acquisitions has come frequently the past few years from Hallmark's Crown Center headquarters, and 1984 was no exception. In March, 1984, Hallmark acquired a British maker of greeting cards and stationery, W.N. Sharpe Holdings, Bradford, England, for $52 million. In August, 1984, Hallmark bought Binney & Smith, Easton, Pa., the Crayola crayon maker, for $203 million. And Feb. 1, 1985, the company paid $50 million to take 30% equity in the textbook publisher and broadcaster SFM Cos. (formerly Scott Foresman & Co.), Glenview, Ill.

Over the years Hallmark has developed or acquired a number of companies, each with a distinctive line, including: Springbok, jigsaw puzzles (1967); Trifari, Krussman & Fishel, fashion jewelry, New York (1975); Charles D. Burnes Co., quality photo frames, Boston (1979); Litho-Krome, color printing, Columbus, Ga. (1979); and Heartline, its own designer-marketer of gifts, mostly plush toys (1983). The Hallmark International segment markets Hallmark products in 122 countries worldwide.

Hallmark employees own one-third of the company, with the remainder controlled by the Hall family. The late Joyce C. Hall at the age of 18 came to Kansas City from Nebraska 75 years ago to sell picture post cards. He stayed to found Hallmark Cards on Jan. 20, 1910. His son, Donald J. Hall, heads the company as chairman.

Hattori Corp. of America

RANK 112

New York

($ figures - 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	N/A	N/A	N/A
Net income	N/A	N/A	N/A
Advertising	35.6	27.3	30.5

Hattori Corp. of America, New York, marketer of Seiko, Lorus and Pulsar watches, is the 112th largest advertiser in the U.S., spending 45%, or $9.5 million, of its total measured ad spending in 1984 on spot tv for Seiko watches.

Hattori is a subsidiary of the far-flung Hattori-Seiko Co. Ltd., one of the last family-run industrial empires in Japan. Hattori spent $35.6 million in measured ad spending in 1984, up 30.5% from the previous year. Because most companies in the group are private, including the U.S. subsidiary, consolidated financial results are not disclosed.

Analysts estimate total sales for the entire Hattori-Seiko group, in the fiscal year that ended March 31, 1984, were between $2.5 billion and $3 billion. The group is made up of five companies marketing a variety of watches, clocks, computer peripherals, electronic and high-tech products.

Seiko Time Corp., the New York-based subsidiary that imports and markets Seiko brand watches and clocks, is the flagship of U.S. operations. Other Hattori U.S. subsidiaries are Lorus and Pulsar, both of which market watches and clocks under the same brand names. They, too, are heavy users of spot tv.

In 1984, Lorus spent $3.6 million, 100% of its measured ad budget, on spot tv. Pulsar spent $4.3 million on spot tv for the year, 89% of its measured spending, with an additional $529,000 for magazine.

In terms of brand share, however, by far the most important subsidiary is Seiko. Of the 130 million watches sold in the U.S. each year, Seiko brand holds estimated market share of 2.5% in units.

It is the brand leader among watches priced $125 to $300. Worldwide, Hattori Seiko's has a 12% dollar volume market share. But demand for watches, after tremendous growth through the 1970s, is growing in the 1980s at a rate of only 4% a year. Robert Pliskin, president of Seiko Time, says U.S. net sales of Seiko timepieces in 1984 increased 12%.

Ads for the Seiko brand in 1984 featured two themes: Impeccable quality and beautiful styling. Seiko's longstanding tag line, "Someday all watches will be made this way," gave way late in the year to "Man invented time, Seiko perfected it." The reason for the switch was that Seiko's earlier prediction virtually came true, with other marketers introducing lower-priced knockoffs, Mr. Pliskin says.

Tv spots for Seiko continued focusing exclusively on the product in 1984. Two commercials introduced late in the year illustrate the advertising approach. In an ad slugged "red dot," the screen is filled with a red dot that gradually recedes to become the red indicator on an alarm wristwatch. Another spot, "geometric design," shows the individual pieces of a watchband joining together, emphasizing the geometric styling of the watch.

Print executions are spinoffs of tv ads. In 1984, Seiko spent a measured $2.1 million on magazine. Although newspaper spending figures were not available, Mr. Pliskin indicates newspaper spending for Seiko products increased about 50% in 1984. Measured newspaper spending in 1983 for Seiko, Pulsar and Lorus brands was $8.7 million.

G. Heileman Brewing Co.

RANK 176

La Crosse, Wis.

($ figures - 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	1,341.5	1,325.6	1.2
Net income	45.8	57.0	-19.6
Advertising	23.0	24.8	-7.2

A major realignment of G. Heileman Brewing Co.'s marketing strategy, based on brand acquisitions and heightened price competition in the beverage industry, added up to a rough year in 1984 for the La Crosse, Wis., company.

Earnings declined 20% to $45.8 million on sales of $1.3 billion. But Heileman is brewing up trouble for competitors with a new ad campaign for Old Style, its lead brand with national market share estimated at 2.8%, and aggressive marketing of newly acquired beverage, baked goods and snack food items.

Heileman was the 176th largest national advertiser in 1984 with $22 million in total measured spending, down 7.2% from 1983.

Old Style continued in 1984 to receive the largest single share of Heileman's measured brand advertising, with spot tv topping $4.7 million, and network and outdoor each at $600,000. Old Style lager beer received 87% of the brand's measured ad spending, and Old Style Light received the remainder.

Old Style's new campaign, created by newly hired Ogilvy & Mather, San Francisco, introduced in November, represents a return to beer advertising focusing on the product as "hero." Previously, Old Style ads stressed its brewing process. The new theme, "Brewed with water from when the earth was pure," still stresses Heileman's brewing process, but the creative strikes a sharp contrast with the fun-filled, people-oriented tv genre made popular by Miller Brewing Co. and Anheuser-Busch.

A strong brand identity is important for Old Style, which is aggressively seeking new markets as a means of improving brand share and becoming a national brand. In 1984, Old Style expanded into the southeastern U.S., in addition to certain Texas and Oklahoma markets, following the 1983 acquisition of Pabst Brewing Co. breweries in Perry, Ga., and Portland, Ore., and the Olympia Brewing facility in San Antonio.

In 1984 and early 1985, Heileman attempted to acquire Pabst Brewing Co., a move that was blocked by federal injunction after a lawsuit alleging unfair competition by Stroh Brewery, Detroit, and C. Schmidt & Sons, Philadelphia. Subsequently, S&P Co., owned by Paul Kalmanovitz, gained control of Pabst.

The only Heileman brand receiving relatively large measured network tv spending in 1984 was Colt 45, the nation's second-best selling malt liquor behind Stroh's Schlitz malt liquor. Receiving $1.4 million in network tv and $400,000 in spot tv, Colt 45 continued with its "Dynamite Taste" theme.

Acquired brands and new products will play an increasingly important role in Heileman's advertising through the 1980s. For example, Henry Weinhard beer in 1984 received $1.6 million in humorous spot tv commercials aimed at persuading West Coast consumers to "switch to Henry's." Rainier, the best-selling beer in Washington and Montana, received measured spending of $1.4 million in spot tv, promoting the "Mountain Fresh Rainier" theme.

Heileman also introduced in April, 1984, low-alcohol brands for Old Style, Blatz, Black Label, Schmidt, Lone Star and Rainier. Other new products include Country Cooler wine cooler in four flavors, September, 1984; Black Label 11/11 malt liquor, October, 1984; and Presidente Pilsner beer (imported from Dominican Republic), August, 1984.

Heileman is introducing in 1985 several flavored mineral waters, La Croix sparkling citrus and strawberry coolers. It also is test marketing the draft distribution of Mission Springs chablis, burgundy, rose and rhine wines.

Heileman is diversifying into baked goods and snack foods with the 1984 acquisition of trademarks, trade names and customer lists. Bake-Rite Baking Co., including the Mrs. Carter's family of products, joined Heileman Baking Co. in 1984. Heileman Baking sells a complete line of baked goods through a wholesale distribution system of 700 routes.

Bake-Rite's snack foods division in April, 1984, purchased Mrs. Howe's Chips, Milwaukee, adding to its Barrel O'Fun and Red Seal brands.

Agency changes in 1984 and early 1985 included Old Style and Special Export brands to Ogilvy & Mather, San Francisco, and Blatz brands to W.B. Doner & Co., Baltimore. O&M was selected for Heileman's leading Old Style brand because the company was pleased with its clever ads for Henry Weinhard Private Reserve.

Hewlett-Packard Co., thriving on the heavy competition in the computer/electronics industry, backed its products with $23.2 million in measured ad spending in 1984 as the company achieved a 54% increase in net earnings on a 28% increase in sales.

Palo Alto, Cal.-based Hewlett-Packard, the 172nd largest advertiser, created a new all-corporate divisional structure and marketing system in 1984, renewing its commitment to advertising, the measured portion of which increased 58.2% over 1983.

Sales, which have tripled since 1978, rose to $6.04 billion in 1984, while net earnings shot up to $665 million. The latter figure includes a one-time increase of $118 million caused by a change in government tax regulations covering overseas operations.

Hewlett-Packard has produced such financial returns on product innovation. The company, which introduced the first scientific hand-held calculator in 1972, has just stepped out with its new leaner-meaner marketing physique, one eye on the competition at home, including IBM, and one eye to the Far East.

During 1984, measured advertising increased across the board, up 50% for magazines, up 124% for spot tv, from zero to $2.4 million for network tv, and a first-time cable expenditure for HP of $110,500.

Other advertising indicators tell the same story. Total corporate spending for advertising, including a variety of marketing and promotional costs in addition to media advertising, rose 64.5% from 1983 to $153 million in 1984. The $93 million in 1983 was up 27% from 1982. Total media costs, including measured media plus substantial outlays for promoting to the technical and professional audiences, exceeded $40 million in 1984, according to HP.

HP buys coverages in a variety of outlets, including the broadest possible array of trade and professional journals, which are not monitored in measured spending totals by ADVERTISING AGE, enthusiast books, consumer magazines and prime-time tv.

HP says it is becoming convinced its prime computer market is the more sophisticated, more professional user. For example, introducing a new personal computer, the HP 150 in 1983, Hewlett-Packard gave it greater "user friendliness" for the business office by adding CRT Touchscreen control and supported the upgraded model, renamed HP Touchscreen, with heavy tv spending plus space in computer enthusiast magazines, news and business magazines, and newspapers.

The results were not what HP had hoped for, perhaps because content was too broad. HP as a result moved the account in late 1984 from J. Walter Thompson USA to Leo Burnett Co.

Under Hewlett-Packard's marketing reorganization, four former product sectors oriented to groupings of hardware were removed. In their place are three business sectors oriented to integrating systems of related instruments, computers and accessories, as indicated in joint consultation between customer and Hewlett-Packard's marketing team.

The new marketing group, called marketing and international, now works with the three new business sectors: Components, measurement and design system; information systems and networks, and manufacturing, medical and analytical systems.

As further testimony to the new emphasis on HP marketing, the percentage of net sales devoted to marketing has climbed steadily, reaching 17.6% in 1984, while the percentages to cost of product and r&d have remained static since 1982.

The company has given heavy advertising support to a number of the computer-segment products, including both tv and print for the 110 Portable, which is compatible with IBM, and the HP Touchscreen, still selling behind the IBM PC and the Apple brands.

Major print spending backs other, more technical Hewlett-Packard personal computers and the innovative new fast printers, ThinkJet and LaserJet.

Geo. A. Hormel & Co., beset with union troubles and rising pork prices, turned in a lackluster performance in 1984 while kicking up its measured media ad spending 27.4%. Ad spending levels elevated the Austin, Minn.-based meat processor nine places to become the nation's 161st largest advertiser.

Measured media spending hit $24.4 million in 1984. When including unmeasured advertising, the company's total marketing budget is expected to reach $52 million in 1985. The company splits that budget between BBDO and Chuck Ruhr Advertising, both Minneapolis.

Hormel turned in 1984 net earnings of $29.5 million, up 5.7%, on sales of $1.5 billion, up 7%—results falling short of corporate expectations. For the first half of its fiscal 1985, Hormel posted sales of $710.8 million, up 2.3% over the same period in 1984. The company has earned $15.2 million thus far in 1985, down 9% from $16.7 million last year.

During 1984, Hormel's spot radio spending jumped 128.7% to $4.9 million in 1984. The company spent 61.6% more on spot tv ($5.5 million), 41% more on network radio ($2.0 million) and 7.5% more on magazines ($4.7 million) in 1984 than in 1983.

Last year, Hormel bought Dold Foods, a Wichita, Kan.-based ham and bacon processor, and Aunt Yvonne's, a Fort Dodge, Ia.-based frozen foods company. Hormel was unsuccessful in a bid to buy Esmark's Swift & Co. unit, later swallowed in the Beatrice-Esmark merger. Hormel holds the top spot in the canned meat catagory, followed closely by Armour-Star meats and Libby, MacNeill, Libby. Hormel trails Armour-Star in the canned sausage and the potted meat categories.

In 1985, the company's Dinty Moore Stew and Spam luncheon meat will be given contemporary looks. The Dinty Moore character already has been redesigned. The product has been repositioned as a hearty meal for children. The company ran a promotion asking children to send in package labels to receive stickers of Dinty Moore and his Forestland Pals.

Preparing for Spam's 50th year on the market, BBDO designed a sweepstakes and recipe tips campaign aimed at moving the canned pork product from the lunch slot into the main meal category. Radio spots feature consumers being fooled by hors d'oeuvres and casseroles made with Spam. Consumers admit the food is "good."

In 1984, Hormel added Light & Lean Ham, with 60 calories a serving; Wrangler Smoked Bacon, a double smoked, thick-sliced product; Frank 'n Stuff hot dogs with a tunnel of chili inside; Old Smokehouse barbecue sauce, and Great Beginnings canned meat chunks in gravy.

Keeping the new product momentum going, the company has introduced in 1985 Broiled & Browned pork sausage, the company's first meat for the microwave market. To soften its reliance on the volatile pork market, Hormel introduced in January its Gold'n Lite breaded vegetables and Cheese frozen snacks, Chunky Chili with homemade texture and Catfish Bobbers bite-size nuggets of deep-fried, frozen catfish.

Hormel's labor problems began in October, 1983, when the company tried to impose a 23% wage cut at its Austin plant. Hormel needed the cuts, it said, to remain competitive when red meat consumption was down and nonunion companies were cutting into market share. While other Hormel plants accepted the cuts, the main plant in Austin would not.

Employes retaliated with pickets and a campaign aimed at arousing public pressure against Hormel and its major banker, First Bank System of Minneapolis.

Hormel, in this atmosphere of growing tension, for the first time in its 93-year history, held its annual stockholders meeting outside of Austin, selecting Atlanta. Hormel president-ceo Richard L. Knowlton told stockholders he may have to move the company's headquarters out of its, and his, hometown to remain competitive. Hormel reportedly pays the highest wage and benefits costs in the industry: $21 per employe per hour.

The company was unable to negotiate the wage cuts, so rate will remain in place until September, 1986, when the union contract expires.

Transportation	698.2	637.5	9.6

Household International top management, occupied with streamlining operations by restructuring the company's merchandising and manufacturing divisions in 1984, has spent recent months engaged in a legal battle over measures adopted to protect the diversified company, which recorded its best year ever, from being a takeover target.

The Prospect Heights, Ill.-based conglomerate was the 124th largest U.S. advertiser in 1984 with total measured spending of $32.4 million, a 32% increase from the previous year. With a beefed-up ad budget, the company placed more emphasis on tv, raising its network tv spending 64%, spot tv 59% and network cable 131%.

The antitakeover measure passed by the board without shareholder vote is on appeal before the Delaware Supreme Court. The suit has to do with a board member's objection that the board action—to allow shareholders to buy a new preferred stock if anyone buys 20% or more of the company's outstanding shares—abrogates a shareholder's fundamental right to sell his stock when he wants.

The restructuring helped Household International report improved results in merchandising and manufacturing, along with record results at its growing financial services and transportation divisions. Over-all, net income was up 13% to $234 million on a net sales gain of 5% to $8.32 billion for the fiscal year ended Dec. 31.

Restructuring moves in the merchandising division included the closing of unprofitable retail outlets and the divestiture of all furniture store operations, completed in December. The furniture retail outlets sold included Colby's in Chicago, Huffman-Koos in New Jersey, Barker Brothers in Los Angeles and American Furniture in El Paso, Tex.

During the past two years, Household closed 173 T.G.& Y. general retail stores and upgraded many others in an attempt to reduce costs and increase productivity within the chain. At yearend, the company was operating 743 T.G.& Y. stores in 26 states, with a concentration in the Gulf Coast region. The general retail segment posted income of $19.1 million for the year, compared with $5.3 million in 1983.

After a major price war in its Southern California market eroded its income base, Vons Grocery Co. pushed ahead with efforts to find a new niche and avoid future price battles. Vons, which operates 176 supermarkets in California and Las Vegas, is seeking to appeal to busy two-income families by opening new stores as "value centers" —37,000-to-40,000-sq.-ft. units combining food and drugstores. In selected locations, these larger stores make an even stronger appeal to yuppies by adding specialty departments such as delicatessens, bakeries and pharmacies.

Household also revamped its consumer products manufacturing business by consolidating production at some plants, closing others and introducing several new products. Backed by more than $2 million in network and spot tv, via BBDO/Chicago, Thermos introduced Coffee Butler—a stylish insulated carafe that will keep coffee hot for hours. Another new application of Thermos' insulation technology is Koolaroo, a portable cooler with side pockets to hold sunglasses, books and the like. National campaigns for both products were launched in the spring by BBDO, which Household International retained in April to handle its $1.5 million corporate ad program.

The largest portion of Household's ad monies was spent on Minneapolis-based National Car Rental System, whose record year in 1984 the company attributes to greatly increased air travel since the deregulation of the airline industry. National's advertising, handled by Campbell-Ewald, Warren, Mich., has shifted from predominantly print to more than half in tv.

The third-ranked car rental company, behind Hertz and Avis, National has been driving for a larger share of the weekend and vacation auto rental market. One tactic it has used is promotional tie-ins with vacation destinations such as Walt Disney World. To lessen its dependence on the cyclical air travel industry, almost all of the 109 new units National has opened since 1982 have been off-airport locations.

Household Finance Corp. has accelerated its move into the consumer banking category by acquiring savings and loan associations in Ohio, Illinois and Maryland. HFC has announced it intends to pursue acquisitions of other s&ls as well as "nonbank" banks. At yearend, HFC operated 45 Household Bank branches, including 10 Household Finance units that were converted to banks in 1984.

HFC's consumer lending operations will be marketed more extensively in 1985, including revolving credit and lending financing and variable rate financing. In early 1985, HFC expanded its international operations by acquiring an Australian consumer finance business, a move that added 75 offices to Household's 97 existing offices in that country.

Although Household International reduced ad spending for its financial services division from more than $5 million in 1983 to slightly more than $1 million last year, Household Finance Corp.'s income rose 4% to an alltime high of $153.3 million.

Jerry's Restaurants rises, falls and rises

Jerome Lederer founded and lent his name to today's Jerry's Restaurants, run by Jerrico Inc., Lexington, Ky., the nation's 193rd largest advertiser.

Mr. Lederer started his chain—then called White Taverns—in Shelbyville, Tenn., in 1925 and by the early 1940s had built the chain to 13 outlets stretching from Kentucky to New York. Plagued by food shortages during World War II, only three remained by the end of the war.

Mr. Lederer began to rebuild in 1946 with help from Warren W. Rosenthal, who in 1963, purchased Mr. Lederer's interest in the company, and then took it public in 1969.#

Imasco U.S.A.

Rocky Mount, N.C.

RANK 123

($ figures = 000,000)

U.S.			
Sales	1,900.8	1,706.2	11.4
Operating profits	N/A	N/A	N/A
Advertising	32.6	19.1	70.2

Imasco USA, the nation's 123rd largest advertiser, plowed $32.6 million in measured advertising into its marketing efforts to do its best at making the so-called "burger wars" a four-way race.

Rocky Mount, N.C.-based Imasco increased its advertising 70.2% over 1983 primarily to back its Hardee's Drive In Restaurants. It made its first network tv buys for Hardee's in 1984 with $7 million in measured spending. The burger chain spent an additional $18.5 million in measured spot tv, about the same level as 1983.

However, Imasco's Hardee's unit still trails measured network tv spending of the big three burger chains—McDonald's, Pillsbury's Burger King and Wendy's International—by a substantial margin.

McDonald's spent $162.5 million on network in 1984; Burger King, $51.3 million, and Wendy's, $34.7 million. Network spending by the three leading chains was up 84% in 1984 to a combined total of $248.5 million.

The largest dollar increase came from McDonald's, which doubled its network spending in 1984, making it one of the largest network advertisers.

Imasco moved its account and total measured spending in 1984 of $32.4 million to Ogilvy & Mather from Benton & Bowles, both of New York. The $700 million fast food chain is launching a new ad effort to kick off this summer.

Building restaurant traffic has become an important priority for the 2,200-plus Hardee's chain. Hardee's recently cut a deal with another Imasco unit, People's Drug, the nation's 10th largest drug chain with more than 600 units, to unveil "experimental" Hardee's in two People's outlets in Virginia and Maryland. The deal offers dual benefits for Hardee's and People's Drug.

Peoples' receives a franchise fee from Hardee's, and Hardee's eliminates the cost of constructing free-standing units. As an added plus, Hardee's is positioned to capture some of People's customer base.

A decision to expand the alliance is set for July, 1985. Hardee's has been aggressively expanding its units since acquisition in 1982 of Burger Chef Systems. About 200 Burger Chef restaurants converted to Hardee's in fiscal 1984, and another 33 will switch in fiscal 1985.

Through fiscal 1985, about 150 Burger Chefs will either close or become independent.

For fiscal 1984, the company opened 85 company-owned Hardee's and 154 franchised units. In fiscal 1985, the company has plans for another 65 company-owned restaurants and 150 franchised restaurants.

Imasco USA also operates Shoppers Drug Mart, the UCS Group, a chain of 457 tobacco and gift shops, and Tinder Box, a 200-unit chain of tobacco-gift shops.

Imasco USA's operating earnings for the year ended March 31, 1985, were $82.9 million, up 10% over fiscal 1984. Revenues were $2.19 billion, up 15% over fiscal 1984.

Made in U.S.A.

Jerrico Inc., the Lexington, Ky., parent of the Long John Silver fast food restaurant chain, is the nation's 193rd largest advertiser with measured ad expenditures of $20.2 million in 1984, up 10.6% from 1983.

Though the company did well enough in 1984, management has initiated a wide-ranging revamp, perhaps clued to the axiom that in fast food the treasure goes to those who appear to be fastest and slickest.

Jerrico's fiscal 1984, ended June 30, 1984, had total revenues of $496.5 million, up 9.3% in fiscal 1983. Total revenues for the nine months ended March 31, 1985, were $378.7 million, up 3.3% from the year earlier period.

Net earnings for fiscal 1984 were $20.4 million, down 4.1% from fiscal 1983. Net earnings for the nine months ended March 31, 1985, were $14.7 million, an increase of 8.3% from the similar nine months a year earlier.

Total ad expenditures for 1985 are scheduled to top $22 million.

In addition to the Long John Silver Seafood Shoppes, Jerrico also is the parent of Jerry's Restaurants, a regional coffee shop chain. Jerrico has corporate-owned and franchised units for both restaurant chains. It runs a motel, the Gantry Inn, Jackson, Tenn., near Nashville, and sells food, supplies and equipment to its franchisees.

Jerrico has performed well over-all this year. That performance can be traced to average sales per company-operated Long John Silver unit that were up 2.5% to $458,600 in 1984. But management is not satisfied with the returns. Average earnings for its own company-operated Long John Silvers dropped 6% to $72,000 in 1984, following a year-to-year drop of 15% from 1982 to 1983. Jerrico cites several reasons: Higher fish costs, "unsuccessful marketing" against fast food competition with "lower protein costs," and depressed economies in some areas where Long John Silver does business.

Such performance is unacceptable to Jerrico, which has been "used to tremendous growth in its Long John Silver unit," according to a company spokesman, since the restaurants were opened 15 years ago.

To get itself moving more effectively, Jerrico this year engaged in some corporate aerobics and introduced new dishes in both Long John Silver and Jerry's; picked a new agency, Foot Cone & Belding, Chicago, for new marketing strategies; redesigned its Long John Silver buildings; outfitted employes in new uniforms; introduced new state-of-the-art computer technology for vat cooking, and renewed consideration of launching a national chain of full-service Italian restaurants.

Menu firsts for Long John Silver are: Nonfried dishes such as three Chillers seafood salad plates; a breaded fish alternative to the chain's traditional batter-fried, and lemon meringue pie. Early in 1985, Long John Silver introduced Kitchen-Breaded fish and bigger french fries and in April rolled out all-white meat chicken nuggets.

Jerry's bill of fare is lightening and freshening with a new large Mexican salad, a seafood salad, seafood croissants and Apple Ole dessert, an open-face apple pie a la mode with shredded cheese.

Jerrico's employes are wearing new, brighter uniforms and are learning their skills through nine new training films. While still "Cape Cod" in flavor, the Long John Silver buildings are getting new designs, including a "lighter, brighter" feeling, multiple pickup points instead of a single cafeteria line and for many of the restaurants, a relocation of the present display cooking to the back of the building, out of sight. Other remodelings will assure faster movement of customers to boost per-restaurant income.

Jerrico Inc. moved in late fiscal 1984 toward new marketing strategies to continue protecting its dominance in fast food seafood. Aiming at increasing traffic by 5% in company-operated Long John Silvers, Jerrico introduced a value-added promotion campaign, "Freebee the Fish," intended to increase sales of seafood items by offering a free fish filet with any nonfish meal instead of discounting the fish, and hired Foote, Cone & Belding to handle advertising and promotion supporting the new thrust.

Jerrico is pushing hard to expand the Long John Silver chain, and according to a company spokesman, is "on target with remodeling plans and experiencing some real sales gains."

In mid-1984 there were 1,358 Long John Silver Seafood Shoppes in 36 of the continental U.S. states. Foreign operations—solely franchised units in Canada and the Far East—produce less than 1% of Jerrico's total revenues.

Of these U.S. outlets, 814 were company-owned, 544 franchised. The announced expansion goal for fiscal 1985 was 50 new company-operated units, but at the end of nine months, Long John Silver had only added seven company units. Development plans were revised downward to 25 company-owned in fiscal 1985 and 60 in 1986.

There are 72 Jerry's Restaurants, 42 company-owned and 30 franchised, in Illinois, Indiana, Ohio, Kentucky, Tennessee and Florida. Emphasis is on upgrading existing units in the system, an outgrowth of an earlier chain started in 1925 in Shelbyville, Tenn., by its namesake, Jerome Lederer. The restaurants then were named White Taverns, which were in the mode of White Castles, serving 5¢ hamburgers to customers behind an eight-stool counter.

Food stores	14,473.0	13,931.0	3.9
Drug stores	859.0	789.0	8.8
Convenience stores	311.0	260.0	19.6
Other	280.0	256.0	9.4

A diversified approach to the food and drug retail business has led Kroger Co. to significantly improved earnings in the past year.

The Cincinnati-based company has taken a variety of approaches to its competition in markets from Minneapolis to Houston, waging price wars in some cities, opening grocery warehouse stores in others and playing hardball in negotiations with labor unions in a few, all the while maintaining slow growth in ad spending.

In the 1984 fiscal year, which ended Dec. 29, Kroger ranked 175th among U.S. advertisers, spending $22.9 million. That amount marked a 4.6% increase over the previous year. About 98% of Kroger Co.'s measured ad spending is allocated for spot tv.

In 1983, Kroger spent $246,000 in magazines and $680,000 on outdoor, and $85,000 on cable buys. In 1984, it put $11,000 into cable and $5,800 in magazines and $259,000 outdoor. The company did increase its spot tv spending 15.8% to $22.7 million.

In fiscal 1984, the company, which has 2,379 food, drug and convenience stores, reported earnings of $156.6 million, an increase of 23.3% over 1983 on over-all corporate sales of $15.9 billion, a 4.5% gain over the previous year. Performance improved in the first quarter of this year, when net income jumped 68% to $31.4 million on sales of $3.82 billion, up 5.2%.

In February, the company reasserted its commitment to the food and drug retail business by agreeing to purchase Hook Drugs of Indianapolis, a 302-store chain, for $161 million in cash and stock. Hook earned $8.1 million on sales of $351 million in 1984. Kroger projects profits of $12.6 million on sales of $493 million by 1987 for Hook.

The Kroger Food Stores chain was the company's most volatile in 1984. Despite the closing of 156 stores, either because they were unprofitable or because the company could not negotiate acceptable union contracts, Kroger Food Store sales reached $11.3 billion in 1984, 1.6% higher than in 1983. Early in the year, Kroger pulled out of the Pittsburgh market, closing 43 locations. Kroger has waged costly price wars in Memphis and Indianapolis, where discount retailers have moved in on its turf. In Cleveland, Kroger has opened four of its own warehouse grocery operations.

The best known marketing ploy Kroger has used is the development of 24-hour "super stores," which average only 45,000 sq. ft. but carry everything from frozen food to flowers.

Kroger operates 227 grocery stores in Arizona, California, Colorado, Kansas, Missouri and Oklahoma under the name Dillon Supermarkets. Sales from Dillon food stores rose to $3 billion in 1984.

Dillon Cos. also operates 443 convenience stores in seven states after the midyear acquisition of the 86-unit Tom Thumb chain in western Florida and southern Alabama from Junior Foods, Crestview, Fla. The company's convenience stores in Kansas, Nebraska and Iowa carry the name Kwik Shop, in New Orleans Time Saver and in northern California Quik Stop.

SupeRx drugstore sales rose 8.8% in 1984 to $860 million, spurred on by the chain's new drug-convenience store concept. SupeRx is adding a limited assortment of convenience foods to its larger stores, while in new and remodeled facilities, hundreds of grocery items are being offered in addition to the usual drugstore fare.

Kroger expects to open 48 new food stores and remodel another 146 in 1985. The majority of the new stores will be combination food-drugstores, averaging nearly 47,000 sq. ft. The company also expects to open 43 new convenience stores and remodel 46 others, open 24 new SupeRx Drug Stores and remodel about the same number.

All this growth will be backed by the company's ongoing corporate advertising campaign, which is themed "Feel the difference" and emphasizes the stores' convenience, value and service.

Estee Lauder Inc.
New York

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	N/A	N/A	N/A
Net income	N/A	N/A	N/A
Advertising	39.6	31.6	25.4

The latest wrinkle in marketing at Estee Lauder Inc., the nation's 103rd largest advertiser in 1984 with $39.6 million in measured ad spending, up 25.4% from 1983, is skincare supplies for men. At the same time, the company is introducing a variety of products for women, created to control the effects of sun and aging.

Four separate marketing divisions comprise Estee Lauder: Aramis, Clinique, Estee Lauder and Prescriptives. Each has overlapping product lines.

The Estee Lauder division opened a new market in May, 1985, with the launch of Lauder for Men, its first products geared to attract some of the $1 billion-plus men's grooming market. Lauder for Men includes a fragrance collection and a line of skincare items, including cleansing bar, face scrub, comfort lotion, antiperspirant, spray talc and skin repair complex. Ad themes emphasize the masculinity of the supplies, "scent matters" for fragrance items, and "serious treatment for men" for skincare items.

Although the Lauder for Men products compete directly against Aramis and Clinique products for men, the division is targeting women as its primary customers. The line is being sold through Estee Lauder cosmetics counters in boutiques and department stores, and through direct mail.

But the Lauder division is a few years behind intracompany rival Clinique, which introduced its Clinique for Men in 1976 and now offers 19 men's grooming products.

In 1984, Clinique continued expanding its men's line with the introduction of Tailoring for Men, the only fragrance item in its men's line. Clinique continued its consumer ad series in 1984 emphasizing a three-step skincare regimen: Cleansing, exfoliating and lubrication. The division concentrated on extending its line of men's grooming aids, adding two haircare products and a stick antiperspirant-deodorant.

Clinique relied almost exclusively on print in 1984 with measured magazine spending of nearly $6 million. Magazine spending in 1984 for the four divisions of Estee Lauder jumped 34% to $15.6 million.

Aramis chose to create a new image for its Aramis 900 line of men's fragrance and toiletries in 1984. The theme: "Tradition with a dash of the unexpected." Spot tv for Aramis cologne, fragrances and toiletries accounted for nearly $4 million in measured spending. Newspaper and magazine accounted for about $1 million in measured totals.

Aramis also expanded its hot-selling Maltplexx brand of products. Introduced in 1983 as Maltplexx hair gel, the line was expanded in 1984 to include hair conditioner, shampoo and, more recently, shave cream.

In women's products, the Estee Lauder division in 1985 introduced new makeups, skin treatments and lotions containing sunscreen agents aimed at preventing premature aging. Among the lead items for spring, 1985, is Estee Lauder Sportwear Tinted Day Creme. Analysts say 15% of the manufacturers' usage of sunscreen agents is now going into products other than those used for suntanning.

Not surprisingly, advances in age controlling lotions and creams received the greatest emphasis in 1984 measured spending by Estee Lauder Inc. Spot tv played an important role in several key areas with measured spending of $19.9 million, 53% of the company's $39.6 million in total measured spending.

Possibly the most heavily advertised product was Estee Lauder Night Repair, introduced in 1982, with $3.2 million in measured spot tv and $1.2 million in magazine advertising. The division also promoted its Swiss Age Controlling Skin Care program, which includes Swiss Performing Extract and Night Repair. These products received a good share of the division's $6.7 million in measured spot tv for multiproduct advertising.

Sunscreen and aftersun products also received increased emphasis in 1984 at Clinique with introduction of EYE Zone Sunblock crayon and After Sun balm with aloe.

Among Estee Lauder Inc.'s products in 1984, perfumes and fragrances received the greatest individual and over-all emphasis. Measured spending in 1984 for White Linen perfume, for example, was $3.8 million in spot tv and $1.2 million in magazine.

Although executives at Estee Lauder Inc. say sales are up dramatically over 1983, the private company declined to provide revenues and earnings.

Lucky Stores
Dublin, Cal.

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	9,236.5	8,388.2	10.1
Net income	94.6	105.4	-10.2
Advertising	23.1	23.4	-1.3

Lucky Stores, the nation's third largest food retailer, was the 174th largest national advertiser in 1984 with $23.1 million in measured media spending, down 1.3% from 1983.

The Dublin, Cal.-based company, whose 1,590 stores at the end of 1984 placed it behind leading retailer Safeway Stores and Kroger Co., funneled 87.7%, or $20.2 million, of its measured media into spot tv and $2.8 million in spot radio. The tv outlay increased 5% over the previous year. The reason for the companywide drop in spending lay with spot radio, down 31.9% from 1983.

Lucky's advertising spending is likely to have increased in the first quarter of 1985. A war waged among food stores in the southern California area, Lucky's primary market, has been played out in newspaper ads and supported in other media. Lucky's, Ralph's and Von's all are firing shots on spot tv and spot radio at each others' low prices.

Likewise, Lucky continues to push its Five Star Meat ad program on spot tv in its markets centered around Southern California, Chicago, Phoenix and central Florida that show Lucky butchers rejecting hogs because their flanks do not bear the five stars connoting top quality.

Developments in the California market, where Lucky food stores generally have been considered the low-price leader and where the company has its heaviest business concentration, continued to be both bane and boon to Lucky Stores.

The company's first quarter, ending in May, 1985, showed some improvement in financial results over 1984. However, earnings, which increased 12% to $24 million, were hurt by slow sales gains for food stores and Gemco units, which the company credits to intense competition. Sales for the quarter were up 5% to $2.3 billion, from the comparable period in 1984.

Meanwhile, Lucky's specialty stores, auto parts units and newly acquired Minnesota Fabrics stores helped boost the earnings performance. Minnesota Fabrics was purchased Feb. 5, 1985, by a subsidiary of Lucky for $42 million. The company operates more than 100 retail fabric stores in the northeastern and north central part of the country.

In fiscal 1985, ended Feb. 3, the company reported net earnings of $94.6 million, off 10.2% from the previous year, on sales of $9.24 million, down 5.2%. Earnings for the year, too, were affected by Gemco, whose pretax earnings were down 52% primarily because of an 11-week strike in Southern California and disappointing holiday sales. Gemco stores are so-called membership food/department stores in which customers pay a yearly fee to take advantage of discount prices.

Lucky Stores is divided into food stores, which contributed $119.8 million in pretax earnings on $6.21 billion in sales; Gemco stores, which produced $22.8 million in pretax earnings on revenues of $2.33 billion, and specialty stores, which contributed pretax earnings of $30.8 million on sales of $703.7 million. Specialty stores, which included Yellow Front fabric stores and automotive stores in 1984, had the best profitability, accounting for 7.6% of sales but 17.8% of pretax earnings corporatewide.

Food store earnings during 1984 increased substantially because of strong sales and improved gross margins, despite the strike of Gemco stores.

Most of Lucky's advertising is in the food stores division bearing such regional titles as Lucky, Eagle, Food Basket and Kash n' Karry. Food stores recorded measured spending in 1984 of $9.7 million or 42% of the company total. Food store advertising dropped about 29% from the previous year.

This division also has gone through the greatest change this year. Lucky has sold 17 Eagle stores in and around Chicago, and 22 Eagle stores in Houston, in effect pulling out of that market. Part of the reason for the sale is to divert capital expenditures needed to build up these properties into more likely targets, probably closer to Lucky's home base in California.

The supermarket chain has scheduled a $1 billion capital expenditure program for the next five years to finance remodelings and increase use of new technology. The company is spending $215 million this year to upgrade stores.

The Gemco unit attracted the second largest ad expenditure, $5.5 million, in 1984, down 9% from the previous year. Virtually all advertising is in spot tv.

The auto-parts stores—Honey's and Kragen—attracted $1.6 million in 1985, up 45% from the previous year. In March, 1985, Lucky sold 77 of its automotive stores in Tennessee, Texas and Oklahoma, primarily because they were too far from the Phoenix distribution center.

A number of ad agency changes occurred during 1984 or early 1985. The Phoenix-based auto division switched its account to Bernstein-Rein Advertising, Kansas City, Mo., from Kenneth C. Smith & Associates, La Jolla, Cal. Eagle Food Centers in Rock Island, Ill., tapped Ogilvy & Mather for broadcast placement and special projects that previously were handled in-house. The Buena Park, Cal.-based Gemco named DYR, Los Angeles, as its first agency. DYR works with the chain's in-house agency, LuGem Advertising.

Aggressive marketing in 1984 for two restaurant chains owned by Marriott Corp., the 190th largest advertiser with measured media of $20.8 million, signaled a renewed emphasis on restaurant operations among Marriott's

Hewlett-Packard: From Disney to the Olympics

In 1939, one of the first customers of Hewlett-Packard, then just formed by William Hewlett and David Packard, was Walt Disney Studios. Disney bought one of HP's first products, an audio oscillator, to make the sound track of the revolutionary classical music animated film "Fantasia."

In 1984, one of the better-known HP customers was the U.S. Olympic Committee, which used donated Hewlett-Packard instruments to test for drug use by athletes at the Summer Olympic Games in Los Angeles.#

GOOD GOT BETTER.
THEN IT GOT GREAT!

From an advertiser's point of view, good got great when all accredited CMESat program series for health-care specialists converted to videotape distribution as the primary means of reaching viewers in each specialty.

Just as each of our series was developed on the highly successful EyeSat® model to produce CME television programs of undisputed quality, the problems associated with our broadcast-based distribution system have been overcome by re-shaping the system to match its reach-oriented Canadian prototype. That Canadian prototype puts the reach of each CMESat program *above every professional journal serving its specialty as well as all other forms of continuing education*—annual meetings, symposia, foreign medical journals, audio tapes and other audio-visual services.

Delivering the Incomparable Reach You Need

When good got great, it brought with it eight kinds of results-oriented opportunities to put you in meaningful contact with specialists in the health-care professions through our:

- special videotape launches for each health-care specialty we serve
- 24 yearly accredited programs on videotape
- opportunities for new-product launches
- additional videotape programs (up to 12 annually)
- weekly television programs broadcast across the U.S.
- printed program index
- prime-time television programs
- residence-oriented mailing lists.

Of course, all advertising on CMESat programs is agency commissionable.

Now's the Time to Act

The following program series will be test-marketed and/or launched in videotape form by mid-summer:

- CardioSat (cardiology)
- EyeSat (ophthalmology)
- MedSat (internal medicine)
- SurgSat (general surgery)
- OrthoSat (orthopaedics)
- AnesthSat (anesthesiology)
- DentSat (dentistry)
- PedSat (pediatrics)

When good got great at CMESat, we began to deliver the incomparable reach you need. But, you can begin to take advantage of that reach only by advertising on one of our regular, accredited videotape program series. That's a *pre-requisite* for taking advantage of the other seven advertising vehicles our programs can deliver.

And, with only 60 minutes of time available yearly on each specialty series, we suggest you not hesitate too long. Some sponsors already have bought 60 seconds per program in several of our series. At that rate, each series will be able to accommodate only *a total of 10 advertisers*.

We're very excited about the new CMESat programs and hope you are, too. When you're ready to find out more about the extraordinary advertising opportunities associated with our programs, please call or write to arrange a no-obligation presentation:

CMESat™
Continuing Education for Health-Care Professionals

three primary businesses: Lodging, food service and restaurants.

Media expenditures, which increased 26.5% over 1983, emphasized spot tv, particularly among Marriott's two restaurant chains. Roy Rogers Family Restaurants received $8.1 million backing in that medium, and Bob's Big Boy Coffee Shops got $3.5 million. Over-all, spot tv spending increased 22% for the Washington-based company.

Although restaurant operations in 1984 produced only 22% of Marriott's total sales and 23% of operating income, they accounted for the majority of measured ad spending.

Marriott has big plans for Roy Rogers, the fast-food chain based in mid-Atlantic and Northeast markets, and Bob's Big Boy, which has 871 franchise outlets in the U.S. and abroad. Roy Rogers in 1984 focused advertising on introduction of a breakfast menu, fried chicken and hot-topped potatoes. That division benefited from a 1982 acquisition of Gino's restaurants for $112.7 million, which was primarily to obtain prime sites for conversion into Roy Rogers restaurants. Thirty-one new units were opened in 1984.

An unusual campaign to develop a new image for the Bob's Big Boy franchise system began in 1984 with ads asking patrons to vote on whether the famous "Big Boy" sign should "stay or go." The key was to draw attention to refurbished restaurants, a new menu that included a breakfast bar and other changes. The company announced this May that it received 3.2 million votes (87%) in favor of keeping the image, and 500,000 against. Marriott and Bob's Big Boy franchises are planning a major ad campaign for 1986.

Marriott Corp. recorded strong growth and profitability during the year. Net income in 1984 was up 21.3% to $139.7 million on sales of $3.52 billion, up 19.5%. Marriott sales and profits have doubled since 1980. First-quarter results in 1985 showed continued strength in the three primary businesses. Corporate sales for the quarter ended March 22 rose to $874.2 million, an 18% increase over the year-earlier period, and net income jumped 20% to $27.7 million.

While Marriott Corp. is mainly known for its 142 full-service hotels and resorts, which accounted for nearly half its 1984 revenues, the year marked a transition in its lodging business. Marriott began by setting a goal of 20% growth annually through the 1990s based on development of specialized products, including Marriott Suites, all-suite upscale hotels; a network of convention hotels, and Marriott Courtyard, moderate-price lodgings. Marriott Courtyard is scheduled to be a national chain of 50,000-rooms by the early 1990s.

In addition to the 13 Marriott hotels completed in 1984 (more than 5,000 rooms), the chain plans to complete five "mega" convention hotels, totaling 7,400 rooms, during the next four years. Marriott plans to grow into a 100,000-room chain by 1990 from its current base of 60,000 rooms.

Measured advertising for lodgings in 1984 was $1.9 million, mostly in magazine spending, an increase for the category of 2% over 1983.

Marriott began test marketing vacation ownership resorts with the April, 1984, acquisition of the American Resorts Group, a time-share developer. The first project is a 122-unit resort on Hilton Head Island, S.C. Marriott also is developing lifecare retirement communities, with the initial community planned for opening in 1987 in suburban Washington.

Marriott's contract food service operations in 1984 accounted for 32% of corporate sales and 28% of operating income. This was aided by the acquisitions early in 1985 of Gladieux Corp. and Service Systems Corp., consisting of diversified contract food companies, for $64.4 million cash. Combined sales and operating income for the two in 1984 were $419.5 million and $15.2 million, respectively.

Marriott also sold its Marriott's Great America theme park in Gurnee, Ill., for $114.5 million to Bally Mfg. Co., while its Santa Clara, Cal., theme park, land and improvements are in the process of being sold for about $100 million. Marriott is disposing of theme parks, dinner houses and Mexican restaurants for a total of more than $310 million.

Jeffrey Martin Inc.

Union, N.J.

RANK 110

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	58.5	65.9	-11.2
Net income	5.7	8.1	-29.7
Advertising	36.8	46.0	-20.1

Jeffrey Martin Inc. in 1984 continued its policy of reviving time-honored products that other marketers may find expendable, backing them with $36.8 million in measured media advertising in becoming the 110th largest U.S. advertiser.

The Union, N.J., company picked up the $8.5 million tradition-bound mouthwash Lavoris from Richardson-Vicks in July, 1984, and is attempting to rejuvenate the brand through network and spot tv advertising.

Those two media are typical buys at Jeffrey Martin, known for its purchase of broadcast advertising in late-night slots and other economical forms of advertising.

Lavoris was backed with $2 million in media advertising in the limited period the company handled Lavoris.

While the company says Lavoris sales are showing strength, expenses associated with heavy advertising of Jeffrey Martin products and increased competition are proving costly. For the nine-month period ended April 30, 1985, net income was $3.9 million, down 20.5% from the similar period a year earlier. Net sales were $49.8 million, up 7.7%.

Losses were associated with heavy costs of advertising, according to the company.

The loss builds on a similar drop in income and revenue in 1984. Net income in fiscal 1984, for example, was $5.7 million, off 29.7% from the year earlier, on revenues of $58.5 million, off 11.2%.

Topol smoker's tooth polish and Bantron smoking deterrent tablets were particularly affected by encroachment from competitors, the company says. Topol felt pressure from Block Drug's Polident, Warner-Lambert's Efferdent and Carter-Wallace's Pearl Drops. Bantron sales declined partly because of competition from a new prescription smoking deterrent product.

Topol smoker's tooth polish, which is available in mint, fluoride and gel formulas, represents the largest contributor to the company's domestic sales volume. Jeffrey Martin backed Topol with $11.7 million in spending or 32% of its total advertising, although the outlay was down 32.7% from 1983 spending. Some $4 million of that decline came out of network radio.

A shift in spending for Topol from network radio to network tv was typical of Jeffrey Martin products taken as a whole. Jeffrey Martin, the nation's leading network radio advertiser in 1983, shifted its weight in media in 1984, dropping network radio spending 58.8% to $9 million and increasing network tv 39.6% to $21.5 million. Spot tv, the only other media receiving significant ad dollars, was $7.1 million, down 22.7% from 1983.

Jeffrey Martin's second leading product, Doans, the backache remedy, received $7.6 million in support, up 8.5% from 1983. Doans, in pill and spray form, experienced only a modest increase in sales in fiscal 1984. The spray was introduced nationally during the year. Company officials are encouraged by its initial response.

Ayds reducing candy was backed with $7.2 million, up 41.7%. Most of the remaining products, however, experienced declines in ad spending: Cuticura medicated soap at $3.7 million was down 24%; Pursettes premenstrual tablets dropped to $28,600 from $2.3 million in 1983; Bantron stop smoking tablets at $1.8 million was down 37.4%. Jeffrey Martin did not advertise seven products in 1984 that it advertised in 1983. None of these, however, received significant spending in 1983.

Benton & Bowles became the first agency of record for Jeffrey Martin during 1985 and will handle advertising for Ayds appetite suppressant candy, Compoz nighttime sleep aid and Porcelana fade cream.

MasterCard International

New York

RANK 147

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	N/A	N/A	N/A
Net income	N/A	N/A	N/A
Advertising	27.8	18.9	47.1

MasterCard International, New York, the nation's 147th largest advertiser, spent about 70% of its $27.8 million measured advertising budget on network tv in 1984, building on its long-standing image campaign as well as showing creative uses for the card and services.

MasterCard's 1984 measured ad spending was up 47.1% from 1983.

MasterCard, which is a member-supported credit association with a membership of 27,000 financial institutions, introduced in early 1985 its silver corporate card and a worldwide travel voucher and began testing so-called "smart" cards with microchips, all of which should build ad spending in 1985. MasterCard reported total ad spending in 1984 of $35.5 million, a figure including unmeasured advertising costs.

With measured network spending in 1984 pegged at $19 million, up 27% from 1983, MasterCard broadened its "so worldly, so welcome" theme, introduced in 1981, with spots featuring actor James Coburn, actress Shari Belafonte Harper and other celebrities using the card for exotic vacations and purchases. Spot tv use of the campaign in 1984 also jumped 41% to $4.9 million, about 18% of total measured '84 outlays.

In March, 1985, MasterCard began adding a touch of warmth and humor to the commercials, showing interaction between celebrities and everyday card users. The purpose is to show that the card is used by everyone, not just the stars. One spot has model Christie Brinkley in a chance department store meeting with a woman, dressed in the same outfit, who also is making a purchase with MasterCard.

MasterCard's theme is growing in the same directions through innovative print advertising. MasterCard spent $3.5 million in 1984, about 12% of total measured spending, on magazine ads to introduce a series of new and enhanced products and services. The general goals are to attract business and affluent users and to expand the association's retail merchant coverage.

This strategy is best shown by the newest addition to the MasterCard family, the silver-colored corporate card, unveiled late in 1984 for rollout in 1985. The corporate card, like the gold, credit and debit cards, allows the issuing financial institution to place its logo prominently on the face. The card also carries a revolving line of credit. The product was designed to help banks control and evaluate the $85 billion their customers spend each year on travel and entertainment.

Tracking travel and entertainment expenditures also was the reason for the 1984 development of MasterCard's Worldwide Travel Voucher. The voucher, being rolled out in 1985, is used by the American Society of Travel Agents as its exclusive product and service provider. The travel voucher acts as proof of payment for various ground services—car, restaurant and hotel—and will be accepted and processed the same as credit card transactions.

MasterCard's print advertising for 1984 also focused on MasterCard Travelers Cheques, introduced in 1982, and on the gold card, introduced in 1981. The travelers checks featured actor Pierce Brosnan in print ads and 10-second tv spots, using the theme "double take," meaning take both the card and the checks. The '85 Travelers Cheque theme is: "No matter where you go, MasterCard Travelers Cheques are accepted and refundable."

The gold card continued in 1984 using the more image-oriented "the ultimate recognition from your banker" theme. MasterCard also is testing a variety of services, including "smart cards."

MasterCard's electronic services group continued to expand services available to financial institutions and retail merchants in 1984. Merchant coverage grew to 4.3 million outlets in 165 countries and territories worldwide, an increase of 9.3% over 1983. Gross volume on card purchases increased 26.7% over 1983 to $62.6 billion in 1984. Card users increased 18.4% to 103 million in 1984.

These statistics pit MasterCard neck in neck with Visa International,

Source: Radio Advertising Bureau

which had 114.7 million users billing $82.24 billion in 1984. American Express had 20.2 million members billing $47.6 billion at year-end. MasterCard's Automated Point-of-sale Program (MAPP) became operational during the second quarter of 1984. Based on an agreement with Tymshare Inc., a leading supplier of point-of-sale services, MAPP supports electronic cash register interfaces, dial-up and polled terminals. By yearend, 80 U.S. financial institutions had joined MAPP, and 11 million transactions a month were being processed through 23,000 participating terminals.

Another 1984 development was Banknet, a telecommunications network that allows for transmission of authorizations, settlement, point-of-sale and other types of information in self-contained electronic packets. MasterCard has placed packet switching centers in New York, Atlanta, Cleveland, St. Louis and San Francisco, to facilitate remote, instantaneous rerouting of data.

By the end of 1984, 36 financial institutions were using Banknet, and 52 were in various stages of installation. MAPP, Banknet and other electronic services primarily are advertised through trade publications.

With the development of Banknet, MAPP and sophisticated automated teller machine-type networks, MasterCard is poised for growth through the 1980s in the electronic payments industry. Expansion of services and products through better technology has been the key to MasterCard's operating strategy since Russell E. Hogg left American Express in 1980 and took over as president-ceo.

Operating profits	N/A	N/A	N/A
Advertising	0.043	0.028	49.4

Matsushita Electric Corp. of America, the 101st largest U.S. advertiser in 1984 with measured ad spending of $42.6 million, up 49.4% from 1983, is out to fool its own product users in 1985 with the creation of zap-proof commercials for spot and network tv.

While color tvs and video-oriented items head the list of new and enhanced products to be advertised in 1985 by the Secaucus, N.J.-based company, corporate entity of Panasonic and Quasar divisions, Matsushita is attempting to field its own zap-proof tv spots, perhaps on those products.

Marketing executives say Matsushita supplies 20% of all videocassette recorders (vcrs) sold in the U.S., thereby adding to the zap problem. If Matsushita can circumvent the problem, it will enhance its own heavy spending in spot tv, which in 1984 was up 63% over 1983 to $13.8 million. Vcr owners zap commercials by fast-forwarding the taped program when the commercials appear.

Panasonic Co., the consumer electronics division, is planning innovative spot tv for lead product introductions: OmniMovie, an all-in-one video camera; VHS hi-fi, and a stereo color tv. The three products will receive the bulk of spot tv spending, mainly in spring and fall of 1985. Last year, OmniVision accounted for $5.4 million in measured spot tv, featuring baseball star Reggie Jackson as spokesman.

Based on the theme, "OmniMovie Magic Moments," 1985 tv spots show total freedom of the product. In one, a child visiting Universal Studios is caught on film watching "Conan" fight a fire-breathing dragon. The VHS hi-fi spots feature true-to-life sound, with one spot showing a woman watching a horror movie, except the hi-fi sound makes her think she's in one. Theme for the stereo color tv, "so life-like, you'll think you're a part of the action," focuses on the quality picture, showing spacecraft and other things coming out of the tv. Color tv in 1984 received $1.5 million in spot tv and $500,000 in print, with anticipated increases in 1985.

Panasonic in 1985 is promoting portable audio items with tv spots targeted at younger viewers, to air on video programs. Featured are Sound Band, a mini fm receiver; Sound Card, an ultra-thin am/fm radio, and Sound-To-Go, a small radio cassette recorder. Ad theme for portable audio in 1985 is "changing from school to cool." In 1984, "Doctor of the Future" educated preppies on being cool. In 1985, "Hair Cut" shows a boy having his head shaved in a strip to fit a 2-in. radio headband.

Quasar continues basing ads around the theme: "Out of our minds—into your hands," introduced in the fall of 1984. The division's flagship product, set for June introduction, is Delta, a cable-ready, stereo-capable color receiver/monitor with 26-in. screen. Quasar expects to begin shipping a prototype, portable VHS camera/recorder called "VHS Movie" in July, in addition to a variety of home and kitchen appliances.

Delta and other new products are being introduced with three-page inserts in slick consumer magazines, scheduled for late spring and fall.

In 1985 once again, magazine ads will account for the bulk of spending by Quasar, Panasonic and branded products, including Technics. In 1984, Panasonic spent $3.4 million on print ads for its hand-held, portable video system.

Magazine also accounts for the most measured spending by Panasonic Industrial Co., a separate division, which markets cameras, copiers and office automation equipment.

Magazine spending for video/audio equipment, home appliances, communication and industrial equipment, energy and kitchen-related products, and electronic components, all of which are produced and/or marketed by Matsushita's 11 U.S. divisions, jumped 61% to $18.7 million in 1984.

Now celebrating its 25th anniversary of doing business in the U.S., Matsushita is fast becoming a marketing powerhouse. It is the largest marketer of consumer electronics and electronic products in Japan.

The international economic recovery, while weaker than that of the U.S., is beginning to show some bright spots, particularly in industries such as electronics. The slogan, "Action '86," picked in 1984 to signal Matsushita's push for electronics of the future, never seemed more appropriate.

May Department Stores Co., St. Louis, which had record earnings and sales in 1984 as it continued to emphasize its discount retail units, was the 185th largest advertiser in measured media, spending $21.6 million in 1984.

The most significant change in measured spending—which increased 50.6% for all media from 1983—was an outlay of $5.7 million in spot tv for Payless Shoe Source, the single largest expenditure. Payless in 1983 had no measured spending for spot tv and only $232,000 in magazine.

The second largest expenditure backed Venture stores, which had

measured spot tv spending of $3.5 million. There was no spot tv spending monitored for Venture in 1983.

These expenditures account for much of the increased spending in 1984, and parallel key areas of growth in May's mix of retail outlets. May is after a greater share of the discount retail market, pitting it increasingly against Detroit-based K mart Corp., the nation's second largest retailer.

Of May's five-year compounded growth in operating earnings, Venture contributed 43.5%, Volume Shoes 22.4%, department stores 8.3%, and real estate 9.6%. In 1984, Volume Shoes' operating earnings increased 31.9% over 1983, Venture increased 14.3%, department stores increased 10.5% and real estate 12.3%.

In 1984, May was the 16th largest local tv advertiser, spending $18.6 million on spot tv, an increase of 24% over 1983. K mart in 1984 was the 25th largest spot tv advertiser, spending $14 million. Sears, Roebuck & Co. was the sixth largest local tv advertiser and the largest retail spender in 1984 with spot tv outlays of $26 million.

The May unit with the fastest growth is Volume, which added a net 273 Payless outlets in 1984 and announced plans for a net 200 new stores in 1985. Volume's 1984-88 plan calls for gross capital investment of $500 million to add a net 1,000 stores. It had 1,663 outlets operating in early 1985.

Venture opened six stores in 1984 and plans to open five in 1985 for a total of 62. Expansion in 1984-88 calls for 32 new stores at a cost of $175 million.

Venture and Volume earnings continued to outperform those of the May's 11 department store companies, which include 145 units nationwide, including May Co., Hecht's, Famous-Barr and Kaufmann's, among others.

Better performance for the discount retail outlets is because of expansion and improved return on sales. Volume set a sales record of $543.4 million in 1984, up 27.8% over 1983, with earnings of $77.6 million, up 31%. It is one of the fastest growing retail chains in the U.S. Venture sales were a record $915 million in 1984, up 17.6% from 1983, with earnings of $49.8 million, up 14.3%.

May's corporate earnings were a record $214 million for the year ended Feb. 2, 1985, an increase of 14.5% over the previous year. Sales in 1984 were $4.7 billion, up 13.7%.

Despite growth in the discount segment, the department store units continued to generate the bulk of sales and earnings. Department store units brought in a record $3.2 billion in 1984, up 8.9% over 1983, with operating earnings of $338.1 million, up 10.5%.

The 1984-88 plan for growth in the department store segment calls for $300 million in capital outlays for 24 new department stores. An additional $200 million is being allocated for remodeling and expansion of existing units.

May is working to improve productivity in retail units through programs that reallocate space and programs that trim space in older stores. For example, in 1984, the company eliminated 2.7 million in square footage, reducing operating costs and adding revenues through leasing much of the vacated space.

MCI Communications Corp.

Washington

RANK 111

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	1,959.3	1,073.2	29.0
Net income	59.2	170.8	-71.0
Advertising	36.1	34.6	4.2

MCI Communications Corp., the 111th largest national advertiser in 1984, depends heavily on advertising as part of its marketing strategies as it butts heads with AT&T. For 1984, total ad expenditures were up 4.2% over 1983, to $36.1 million.

Washington-based MCI in 1984 had total revenue of $1.96 billion, up 29% from 1983. Net income, at $59.2 million, was down 71%.

During 1984 the company switched to a calendar year, and in the new first quarter, ended March, 1985, income had made a sharp increase, more than sixfold, to $40.4 million from $5.9 million in the same quarter of 1984. First-quarter 1985 sales rose 20%, to $570.6 million, in the quarter ended March, 1984.

MCI serves its 2.4 million customers through four operating units: MCI Telecommunications, the MCI long-distance phone service; MCI International, the international long-distance service (including telex, leased-cable, and cablegram services); MCI Air-signal, the cellular phone, paging and message services, and MCI Mail, a high-speed electronic and printed paper message service in the U.S. and paper messages overseas.

Biggest current marketing development for MCI is the spread, this year, of Dial 1 service, aftr the beginning of Dial 1 in Charleston, W. Va. and its rollout in other cities across the U.S. In this development, long fought for by MCI and other fellow common carriers, the long-distance caller on a non-AT&T service no longer needs to enter an access number and authorization code.

In other new marketing pluses, MCI has discontinued its monthly fees. It now gives free service calls to its own operators (like AT&T) and charges 10% less than AT&T for its long-distance information service. Another marketing offer gives 60 free minutes of calling time to new customers.

A major breakthrough in attracting new customers came in 1984 with the opening of MCI International service to 18 countries that send and receive more than 50% of all international phone calls. By the end of 1985, the company expects to be serving 80% of that international market. For this service, MCI says it charges 30% less than AT&T.

Another MCI marketing nicety for 1984 is its provision for letting subscribers charge calls through their Sears, Roebuck & Co., American Express or Amway credit cards.

The promotional mountain that MCI and the other common carriers must climb in competition with AT&T is formidable—the phone giant has about 80% to 86% of the market, MCI 5% to 6% and Sprint about 4%.

For this promotional climb, MCI continues countering with a heavy ad budget. Included in its expenditures for 1984 were $32.8 million for spot tv, up 30% from 1983, and $2.5 million for magazine spending, up 37%.

MCI ad spending to advertise in the hotly contested long-distance field totaled $32.3 million in 1984, up 15%. Spending for MCI Mail was off 24%, to $2.9 million in 1984.

While MCI has not won in all of the campaigns it has waged, it has enjoyed some successes. Its electronic mail service via computer or telex machine—has not made profits nor has its cellular phone service now in 15 cities. And its May, 1985, award of $113.4 million in the long-standing damage suit against AT&T was far less than the $5.8 billion it had sought.

But on June 1, in response to efforts by MCI and other common carriers, the Federal Communications Commission ruled an end to the practice of automatically awarding to AT&T long distance all those subscribers who had not specifically chosen AT&T as their long-distance carrier. Under the new FCC ruling, the no-choosers would be awarded to the other carriers in the same percentage as those who *had* made choices. This could mean thousands of new subscribers for MCI.

Meanwhile, AT&T is fighting back with its own $40 million advertising campaign. It also will spend millions to replace its present more technologically limited and expensive copper-cable transmission system with the same fiber-optic transmission links that are a competitive edge for MCI and the other carriers. As the old Mississippi showboat captain used to say, "Ladies and gentlemen, this is only the beginning!"

65.5 percent of Japan's international business leaders read the Asahi Shimbun*

Competing in Japan's market can be unbelievably tough. Especially if you don't know how to get in touch with the right kind of people.

The Asahi Shimbun is one of Japan's most widely read newspapers, reaching more of Japan's decision makers than any other Japanese daily.

According to a 1982 survey the majority of Japan's Diet members, bank executives, and international business managers read the Asahi Shimbun*—every single day.

If you've got a message for Japan, say it in the Asahi Shimbun. You'll reach the people who count.

It pays to advertise in Japan's most influential newspaper

RANK 131

Mennen Co.

Morristown, N.J.

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	150.0	N/A	N/A
Net income	N/A	N/A	N/A
Advertising	31.0	27.2	13.7

Mennen Co., Morristown, N.J., seeking to build revenues estimated at $150 million in 1984, went outside its health and beauty aids field early this year to acquire a company requiring similar distribution patterns.

Mennen, ranked as the 131st largest national advertiser with $31 million in measured media in 1984, up 13.7% from 1983, spent largely on network tv —$26.3 million, up 4%. It funneled $1.6 million into spot tv, up from $103,700; $2.45 million into magazines, up 64%, and $609,300 into network cable, up 67.8%.

Innovation remains the key to the privately held company's marketing strategy in its drive to improve its share in the competitive health and beauty aids field and has taken on new dimension in 1985 through the acquisition of Paper Art Co., Indianapolis.

The acquisition was labeled by Mennen's chairman-ceo, L. Donald Horne, "as the first step in implementing . . . a more aggressive marketing strategy to broaden participation in consumer markets . . . this paves the way toward more acquisitions."

Paper Art Co. produces a line of paper tableware and decorative paper products, marketing the items through party departments and specialty stores. Mennen will broaden distribution of the paper products through food stores, drugstores and other mass-merchandising outlets. Paper Art, with sales of $30 million in 1984, will remain an autonomous operation, Mennen says.

Mennen's main product continues to be fragrances: Men's after-shave articles, antiperspirants and products for the care of skin, hair and feet. In this highly competitive field, product introductions and restaging are essentials.

The company in March, 1984, introduced Real antiperspirant, a soft paste concentrate delivered through a porous top. Budgeted for this new product, in a campaign by SSC&B Inc., New York, was $8 million via print and tv.

Antiperspirants/deodorants are a $1 billion-plus market. In the 1983-84 period, Procter & Gamble brands have commanded about 20% of the market; Gillette (Right Guard) about 20%; Carter-Wallace (Arrid) about 10-14%; Mitchum and Unilever (Impulse) each about 3%. Mennen's Lady Speed Stick brand had 1.2% of the market.

Industry sources put Mennen's Speed Stick and Real antiperspirant/deodorant line in fourth place behind Procter & Gamble's Secret and Sure, first and second respectively, and Carter-Wallace's Arrid, third, but ahead of Bristol-Myer's Ban line in fifth place.

Mennen boosted advertising spending for the Speed Stick and Real products 26%, to $18.6 million in 1984. Spending in 1984 was about $900,000 in print and the balance in network and spot tv.

Spending for the Baby Magic line of four products dropped about 7% to $2.14 million in 1984.

In a packaging refinement to capitalize on another specialized market segment, Mennen in 1984 added ridged sidewalls and a snap-on cap to its Smooth Legs shaving lotion to give women who shave in the shower an easier-handling, tighter closing package.

Ad agency changes were a significant factor for Mennen in the past year. In March, 1984, Mennen switched the advertising for its Baby Magic line ($2 million in magazines and tv in 1984) to Campbell-Ewald from Grey Advertising. A month later, it also moved Mennen Skin Bracer and the national introduction of Real to Campbell-Ewald. It also moved about $20 million in billings for Speed Stick and Lady Speed Stick and Afta aftershave lotion to McCann-Erickson, New York, from SSC&B, New York.

Mennen runs its group of 14 subsidiaries throughout the U.S. and world from its Morristown headquarters, where a major building expansion is under way.

RANK 107

Mercedes-Benz of North America

Montvale, N.J.

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	4,100	N/A	N/A
Net income	N/A	354.0	N/A
Advertising	37.9	39.0	-2.8

Mercedes-Benz of North America, Montvale, N.J., the sales subsidiary of Daimler-Benz AG of Stuttgart, West Germany, ranked 107th among advertisers in measured media in 1984 while recording estimated sales of $4.1 billion, up an estimated 10%.

Total measured ad spending of $37.9 million was 2.8% less than the 1983 level, dropping the privately held auto marketing subsidiary from its former 103rd slot.

Spot radio was the biggest gainer among media categories, increasing 10% to about $2.4 million. The big decrease in spending was in spot tv, dropping from $2.3 million in 1983 to $500,000.

The U.S., with total sales of 79,222 in 1984, is the biggest export market for Daimler-Benz AG, which produced 478,300 cars in 1984. U.S. auto sales represented $2.8 million of total revenues, the remaining $1.3 billion attributed to Daimler-Benz's sales from its U.S.-assembled diesel trucks and its Portland, Ore.-based Freightliner division.

Mercedes-Benz in 1984 held a healthy 20% to 23% market share of the luxury-performance category, virtually dominated by imports that included Audi, Jaguar, Saab, BMW, Volvo and Porsche. The company now offers this demanding clientele five basic Mercedes models in 11 styles.

Biggest ad support for the year was given to the new compact 190, backed by measured spending of more than $13 million. Also well backed was the larger 300D, receiving about $3 million in print and tv support. Healthy sales figures for these models are significant in light of the ad support. Both are the line's biggest sellers—23.013 for the 190 in 1984 and 33,552 for the four versions of the 300D. Totals for the models and their percentages of full Mercedes North American sales for 1984 are:

Model 190D, 5,309 sold for 6.7% of total sales; 190E, 17,704, 22.4%; 240D model, nominal sales, (phased out); 300D, 16,659, 21%; 300CD, 1,559, 1.9%; 300TD, 2,465, 3.1%; 300SD, 12,889, 16.3%; 380SE, 7,135, 9%; 500SEL, 4,557, 5.8%; 500SEC, 1,651, 2.1%; 380SL, 9,288, 11.7%.

Mercedes-Benz AG, 99 years in the business and selling in 170 countries, is well tuned to the various demographic characteristics of its marketplace, particularly the U.S.

The company divides the 50 states into seven sales zones: New York, serving the Northeast; Washington, the Middle Atlantic; Jacksonville, Fla., the Southeast; Chicago, the Midwest; Houston, the Southwest; Los Angeles, the southern Southwest and Arizona, and San Francisco, northern California.

Percentages of total U.S. sales by geographic zones include New York, 21.2%; Washington, 14%; Jacksonville, 12.7%; Chicago, 10.7%; Houston, 12.7%; San Francisco, 10.6%; Los Angeles, 18.1%.

A prime selling point added in the past two years is the emergency service offer for drivers stranded by car trouble. Mercedes can provide this service through its 412 U.S. full-line dealerships and service-only centers. The company ships parts from depots in or near Somerset, N.J.; Baltimore; Jacksonville; Chicago, and Los Angeles.

In addition to Mercedes-Benz of North America, the German parent company operates three other entities in the U.S.: Daimler-Benz of North America Holding Co., New York, a business-administration organization; Mercedes-Benz Credit Corp., Norwalk, Conn., and Freightliner Corp., Portland, Ore., a producer and marketer of medium and heavy-duty trucks and utility vehicles.

Daimler-Benz in 1969 made its first move toward a U.S. truck-marketing presence. An internal marketing study led it to start importing Mercedes diesel trucks from Germany. In 1981, Daimler-Benz bought the Freightliner Corp. truck builder started in 1939 as part of the Consolidated Freightways trucking line. In 1982, Daimler-Benz consolidated all its North American truck operations under the Freightline aegis.

Freightliner in 1984 sold 17,597 Class 8 (heavy-duty) cargo trucks. Advertising in 1984 for Freightliner totaled about $160,000, primarily in trucking magazines but also some in outdoor media.

More selling opportunities for Less than you'd expect.

The Journal of Accountancy's 270,000 paid subscribers can dramatically improve your bottom line... without bending your budget out of shape.

In the public sector, their product/service decision-making clout is demonstrated by the fact that 93% of our subscribers are owners, partners, or principals. What's more, they have enormous product/service influence over their clients, who number 100-200 each. How's that for multiplying your selling opportunities. With no additional advertising investment.

In the private sector, 65% of the Journal's subscribers have product/service selection clout to go with their CEO/top management titles.

All this fire power for less than you'd expect. The Journal has by far the lowest CPM in the accounting field. Without the astronomical page rates of the general business publications.

So, why not call Dick Flynn today at (212) 575-6286.

Miami. Buy It Like a Native.

[illegible] whether you try [illegible] Or like a native who [illegible]

Because no one knows which [illegible] city better than the local retailers who [illegible] there each and every day. They know which media their customers believe in, which media people turn to when they're ready to buy.

Burdines. Winn-Dixie. J.C. Penney. Publix. Sears. Shell's City Liquors. Jordan Marsh. These local retailers and many more know from proven day-after-day, first-hand experience that nothing sells the upscale Miami Hispanic Market like Diario Las Américas.

So if you really want to sell your product or service in Miami, here are two words of free advice: Buy Diario.

Diario Las Américas
The Spanish-language Daily Newspaper
Founded July 4, 1953

Diario Las Américas
2900 N.W. 39th Street
Miami, Florida 33142-5193
(305) [illegible]

Represented nationally by Cresmer, Woodward, O'Mara & Ormsbee, Inc. (CWO&O).

Medium-duty diesel trucks bearing the Mercedes-Benz marque are manufactured in Germany, assembled in Hampton, Va., and distributed nationwide by Freightliner. Total 1984 sales of these Class 6/7 trucks were about 3,000. Freightliner claims a 4.5% share of the U.S. class 6/7 diesel market of 53,724 units, compared with 40.9% for International and 27.3% for Chevrolet.

Beginning this year Schmitt Engineering, Milwaukee, is handling marketing of the Mercedes Unimog, a short-wheel-base universal implement carrier that powers more than 100 different attachments used in construction, agriculture and road work.

Operating profits	N/A	N/A	N/A
Advertising	29.8	20.8	43.3

Box office bombs in the first half of fiscal 1985 have soured the celebratory mood at MGM/UA Entertainment Co., Culver City, Cal., which last year observed its 60th anniversary.

For the first half of the 1985 fiscal year, the company posted $80.5 million in net losses, compared with $43.4 million earned in 1984's first half. Though potential hit movies have either just been released or are yet to come, the danger zone is by no means passed.

MGM/UA spent $29.8 million in measured advertising last year, a 43.3% increase in measured ad spending from 1983, and one that earns the company the 137th spot among national advertisers.

MGM/UA used network cable for the first time, which compensated in part for a two-thirds reduction in magazine spending and a 16% drop in network tv advertising.

The company earned a declining though respectable $34.7 million in net income for the fiscal year ended Aug. 31, 1984, on operating revenues of $706.9 million, down 2.2%. Although steady revenue increases have continued in home video, pay tv, tv distribution and film laboratory segments, the company has seen a steady and precipitous decline in theatrical film and tv program revenues since 1982.

MGM/UA chairman Frank Rothman attributed the first-half 1985 earnings decline to continued weak performance by the company's theatrical releases, despite increases in revenues from home video, film laboratory and tv programing divisions.

In a move that puzzled Hollywood executives, MGM/UA earlier this year sought to divide itself again, following the 1982 merger of the studios after financial difficulties. Alan Ladd Jr., a former president of 20th Century-Fox Film Corp. and founder of the Ladd Co., in January was named president of United Artists Corp., while former MGM/UA vice-chairman Frank Yablans was made head of MGM Films.

In March, Mr. Ladd was elevated again to the new post of president-chief operating officer at the parent company after the departure of Mr. Yablans, whose shift to MGM seemed to bode ill for his MGM/UA career. And more recently, Mr. Rothman announced that MGM/UA may sell one of its two studios.

Amid this corporate chaos comes an already beleaguered studio plagued by the unpopularity of many of its more ambitious movie projects.

The studio took writedowns on four recent releases, including "Mrs. Soffel," "Garbo Talks," "The Aviator" and "The Pope of Greenwich Village," and its only network tv series productions, "Jessie" and "Paper Dolls," were canceled by ABC-TV midway through their first season.

The company spent $2 million in measured media during 1984—via agency Wells, Rich, Greene, Los Angeles—to promote "Greenwich Village," and it spent $2.7 million on "Red Dawn" and $2.5 million on "Teachers," the latter a box office flop.

On the bright side, early grosses are encouraging for MGM/UA's 14th James Bond film, "A View to a Kill." And "2010," the sequel to "2001: A Space Odyssey" that the company called its "Christmas present to audiences everywhere," grossed $41 million after its release last December. The latter film cost $25 million to produce. Future projects include other sequels of successful films, among them "Rocky IV" starring Sylvester Stallone and "Poltergeist II: The Other Side."

In April, MGM/UA purchased the 15% stock it did not already own in its MGM/UA Home Entertainment Group, formed in 1982 to distribute theatrical films to the pay tv, home video and other markets. The company released 96 new videocassette titles during fiscal 1984. Aside from the two tv series canceled by ABC, MGM/UA produces first-run syndication episodes of "Fame," a musical drama, and "Kids Inc.," a children's variety show.

Tv program operating revenues in fiscal 1984 were $67 million, down 30%, while revenues from theatrical film distribution were down 15%, to $220.2 million. Tv distribution sales, however, were up 28% to $185.2 million, while home video and pay tv revenues reached $44.7 million, an 18% increase.

At fiscal yearend 1984, the company employed 2,600 workers.

When you care enough to send the very best

Rejecting the advice of most advertising "experts" of the day that nobody looked for brand names when buying greeting cards, Hallmark Cards founder Joyce C. Hall in 1928 wrote his own first ad, for publication in the *Ladies' Home Journal*, then went on to sponsor a popular radio program featuring Tony Wons reading verses.

Both were successful and led to a long-term advertising commitment expressed ultimately in the Hallmark Hall of Fame and today's greatly expanded print and tv campaigns.#

Monsanto Co.

RANK 191

St. Louis

($ figures = 000,000)

	1984	1983	% chg

Agricultural prods.	1,256.0	1,167.0	7.7
Fibers	1,194.0	1,170.0	2.1
Polymer prods.	1,877.0	1,830.0	2.6
Other	2,364.0	2,132.0	10.9

Monsanto Co. continued positioning itself in 1984 to break into new markets in agriculture, healthcare, and engineered products and materials as time runs short on patents for its two leading products, Lasso and Roundup herbicides.

The St. Louis-based marketer of chemicals, plastics, fibers and various industrial products was the nation's 191st largest advertiser for the year, boosting total measured spending 14% to $20.6 million.

Monsanto's U.S. patents covering Lasso herbicide and its use expire in 1986 and 1987, while the U.S. patents covering Roundup herbicide and its use expire in 1991 and 2000. To prepare for the anticipated competition, Monsanto is developing improved products, which are now in advanced stages of the regulatory process. The company also is turning its vast technological resources to the job of creating new products in several key areas.

Emphasis is being placed on growth areas, such as agriculture, nutrition and healthcare, through biotechnology and genetic engineering. The company gradually is placing less emphasis on commodity products, such as fibers and chemicals, and more on value-added specialty products, such as genetically improved products, such as seeds, and engineered products.

Monsanto, the nation's No. 1 farm advertiser, increased measured spending of its most important proprietary products, Lasso and Roundup herbicides, among other products for agriculture, by 9% in 1984 to nearly $9 million. The ads appeared mainly in farm trade publications. In addition, Monsanto increased spot tv spending 47% to $4.4 million for Lasso and Roundup.

Sales of herbicides and other agricultural chemicals in 1984 increased 8% to $1.25 billion, accounting for about 20% of Monsanto's $6.7 billion in total revenue for the year, which was up 6%. Net income for 1984 was $439 million, up 9% over 1983. Monsanto's total sales divided roughly into eight categories: Agricultural, 20%; construction and home furnishings products (mostly fiber products), 19%; capital equipment, 13%; pharmaceuticals and personal products, 13%; products used in manufacture of motor vehicles, 9%; apparel, 7%; chemicals and hydrocarbons, 7%; other markets, 12%.

Measured ad spending for Monsanto's broad range of fiber products increased 10% in 1984 to $5.5 million, mostly for magazine.

U.S. sales of $4.5 billion accounted for 67% of Monsanto's total income in 1984, while international sales of $2.2 billion accounted for 33% of revenues.

Profits from sales of herbicides in 1985 may be squeezed by a worsening farm economy. Monsanto's first-quarter profits tumbled 50% to $87 million, compared with the same period in 1983. Operating profits from pesticide operations were down 21% to $121 million. With a strong dollar continuing to hurt U.S. agricultural exports and expectations of surplus crops in 1985, the prospects for 1986 herbicide sales also appear weak.

National Distillers & Chemical Corp.

RANK 139

New York

($ figures = 000,000)

	1984	1983	% chg
Worldwide			
Sales	2,244.9	1,948.5	15.2
Net income	51.4	66.7	-22.9
U.S.			
Sales	2,182.7	1,885.9	15.7
Operating profits	N/A	N/A	N/A
Advertising	29.2	26.0	12.4

National Distillers & Chemical Corp., ranked the 139th largest advertiser in 1984, is battening down for the "Prohibition-type" climate emerging in the U.S. by decreasing marketing expenses while concentrating on major brands with a proven track record.

The New York-based company during 1984 increased measured media advertising 12.4% over 1983 to $29.2 million as it recorded net income of $51.4 million, down 22.9% from the previous year, on net sales of $2.25 billion, up 15.2%.

Sales and profits from the spirits and wines division declined in 1984 because of reduced volume of shipments, a less profitable mix of product sold and higher advertising and merchandising costs.

The company attributes the decline in spirits shipments to public attitude concerning perceived alcohol abuse, and reduced wine sales to encroachment by foreign wines benefiting from the strong U.S. dollar.

The company, rather down on the industry's future, reports, "There will not appear to be any significant improvement in profitability for distilled spirits operations in the immediate future" because of the social concern over alcohol abuse and the increase in the federal excise tax on distilled spirits to take effect Sept. 30. The excise tax, the first increase in 30 years, will add about 30 cents to the cost of a 750ml of distilled spirits.

The spirits and wine sector at National Distillers in 1984 accounted for $27.7 million in operating income, or 15.3% of the company total, on sales of $648.8 million, 28.9% of the total. Petrochemicals, oleochemicals and energy are the remaining divisions.

Not much change occurred in the first quarter ended March 31. National Distillers suffered a 45.6% decline in net income from the prior year to $19.9 million on a 3.2% decline in net sales to $574.2 million, results that prompted Drummond C. Bell, chairman-ceo, to relate today's social and legislative climate to the "dim dark days of Prohibition" when National Distillers was formed "against all odds."

However, the losses were suffered on the chemical side, rather than distilled spirits where profits were up because of a decrease in marketing expenses and improved volume and profitability for the DeKuyper line of cordials.

National Distillers places most of its distilled spirits advertising in magazines (43% of all advertising) and outdoor (20% of all advertising). Its Almaden wine adds a twist to the media mix by allocating most of its brand spending to network tv (17% of total advertising) and network radio (11%). The company also carries out aggressive point-of-sale advertising to support its products.

National Distillers has seven products ranked among the top 50 distilled spirits brands in the country, according to market rankings by John C. Maxwell Jr., Laidlaw Ansbacher, New York. Windsor Supreme heads the company list, ranking No. 6 nationally in 1984, up two notches from 1983. Windsor Supreme, a Canadian whisky, had a case sales increase of 8%. Ad support of $6.3 million—the most for any company distilled spirit—was up only slightly from 1983. Windsor was the subject of a multi-million-dollar ad campaign in 1984 that continues into 1985 that ties the product to the rugged Canadian Rockies.

Gilbey's gin, the top American-made gin, dropped a slot to No. 13 on the basis of a 4.8% drop in case sales. Gilbey's was supported with $4.8 million, down 5.9% from 1983. No. 16 Kamchatka vodka, which receives only modest ad support, fell two ranks on the basis of a decline of 2.9% in case sales. Advertising likewise dropped 16.2% to $320,300.

Old Grand-Dad bourbon rose one rank to No. 31 in 1984 on a 2% increase in case sales and Old Crow dropped three places to No. 32 with a decline of 10.3% in case sales. Old Grand-Dad advertising dropped 14.9% to $4 million, and another bourbon, Old Crow, received minimal ad support of $284,400, up from only $9,100 in 1983.

Almaden wine, the nation's third largest table wine with 10.3 million cases, was the only wine producer that grew, albeit 0.1%, in the top 10 in 1984, according to *Impact*, the wine-industry newsletter. Cause for the growth was its introduction of Golden Chablis. Almaden got a hefty $8.8 million in ad support during the year, up 46.7% from 1983. Only No. 1 Gallo and Carlo Rossi surpass Almaden in case depletions with 20 million and 17.7 million, respectively.

The only other distilled spirits brand receiving sizable support was DeKuyper cordials and liqueurs, $1.2 million, virtually the same as in 1983. DeKuyper posted a 40% sales increase, primarily because of one line, its Original Apple Barrel schnapps. Sales of the brand line have risen from 30,000 in 1983, the introductory year, to 420,000 in 1984. Original Peachtree schnapps and Mountain Strawberry schnapps are other DeKuyper products with sales strength.

During the year, the company sold Mallinckrodt, St. Louis, to Avon Products. Mallinckrodt produces chemicals for the healthcare and food-processing markets.

Some foreign and/or private companies do not divulge sales or income figures. Where estimates could not be obtained, N/As appear in charts and the boxed information preceding the profiles to indicate "not available."

Advertising	24.2	11.0	120.9

NCR Corp. is trying to spread the message that it is a producer and marketer of integrated information-processing systems, not of individual pieces of computer hardware, through its $24.2 million in measured media advertising.

The Dayton, O.-based company, ranked as the 163rd largest advertiser, had total revenue of $4.1 billion, an increase of 9% over 1983. Net income increased by 19% to 2.6 million in 1984. But for the first quarter of 1985, ending March 31, revenue dropped 4%, to $445 million from first quarter, 1984, and income fell 4% to $43.6 million. Sales suffered primarily from exchange rate translations. NCR in 1984 generated 47% of its operating income and 45% of its revenues from abroad.

The vigorous new marketing stance can be seen in the 120.9% increase in measured spending from 1983. Not all of NCR's individual products are marketed to consumers, but the corporation's approach to developing integrated systems of equipment does affect its full line, including personal computers, retail merchandising systems and office automation.

Three new personal computer products introduced by NCR this spring show the company's strong commitment to its personal computers as a basic product line for future marketing. NCR quotes studies showing that U.S. personal computer shipments, valued at $8 billion in 1984, will top $28 billion by 1989.

While NCR's new products are called "personal computers," they are microcomputers designed for use in the business environment, not the home. NCR is aiming at the business and professional market and knows it will not be an easy market to expand in primarily because of the dominance of IBM. IBM has 70% of the mainframe computer market and holds about 28% of the microcomputer market, followed by Apple with 13.8%; Commodore, 6.7%; Hewlett-Packard, 5.8%, and Tandy, 5.5%.

Among new products, NCR's PC8 is a high-end personal computer that is used as a stand-alone personal computer or a multiuser computer for as many as 16 operators with a price range of between $3,800 and $5,500.

The NCR PC6, a modular computer that can process information 38% faster than its competitors, according to NCR, competes with personal computers such as the IBM PC/XT. Pricing starts at about $2,600.

Retail Personal Computer is basically a personal computer with inventory control and related point-of-sale systems. It is priced at between $4,300 and $8,700. NCR also has personal computers priced about $2,000.

Reasons for the subtantial increase in measured media in 1984 were the addition of new category advertising in 1984, including $3.3 million for NCR computer systems, $8.04 million for personal computers, $7 million for the PC4 computer system, and $1.9 million for Tower computer system.

In systems or products advertised in both years, the product, as opposed to system, getting the most spending was the NCR Mentor at $445,000, up from $178,700 in 1983. Spending for the company's business computer systems as a class, was down sharply to $152,000 in 1984 from $8.1 million in 1983 as the company opted for "systems" spending. Corporate general promotion advertising rose 27% in 1984, to $3.31 million.

By media, the heaviest outlay went for network tv, up 68% to $17.3 million, as comedian Dom DeLuise plugged the personal computer. Quantum leaps were made in spending for magazine space, increasing by seven times to $4.1 million in 1984, and for spot tv, soaring to $2.8 million in 1984 from just $87,000 in 1983.

NCR's marketing strategy for its new computer products is to offer them for the broadest possible applications with designs that address the largest possible selection of software.

Computer technology, NCR says, is everywhere now, and that is where NCR Corp. is headed with its products and marketing programs.

Cresting a wave of consumer enthusiasm in the electronics business, North American Philips Corp., New York, earned record sales and net income in fiscal 1984. Now the company hopes to capitalize on its relationship with N.V. Philips of the Netherlands by integrating the parent company's production of color tv sets and related consumer products.

North American Philips, the 136th largest advertiser, spent nearly $30 million in measured advertising during 1984, a 9.8% increase over 1983. However, unmeasured advertising builds total ad spending to $44.9 million, according to the company, representing a 5.6% increase over 1983.

Noteworthy media shifts include a trebling of magazine advertising and a sixfold increase in spot radio. At the same time, North American Philips reduced slightly the level of network and spot tv buys for its many brands.

The company earned record net income of $130.5 million, up 36% from 1983, on record net sales of $4.3 billion, up 14%.

Consumer electronics products, manufactured under the Magnavox, Philco and Sylvania brand names, accounted for $1.2 billion in sales, making the Knoxville, Tenn.-based NAP Consumer Electronics Corp. the largest division in the company, constituting 29% of corporate sales.

The unit earned $11.3 million in 1984 operating income, compared with just $700,000 in 1983 and a $19 million loss the year earlier.

To counter increased price competition from Far East electronics sources, NAP has focused on improved tv chassis designs and increased factory automation as a means for improving profitability. Stereo tv and videocassette recorder products as well as improvements in picture-tube and projection tv systems position the company well for future competition in the segment. The unit earned operating income of $11.3 million.

Philips' Netherlands parent provides research and development capabilities and acts as a supplier to the U.S. company. An agreement forged last summer calls for the eventual integration of product development, engineering and manufacturing for audio and video products of both companies worldwide.

The Magnavox and Sylvania brands each received more than $6 million in measured media support, according to Leading National Advertisers, while the Philco brand received less than $1 million. NAP also offers co-op programs with dealers, although co-op dollars are not included in the measured totals.

Electrical consumer products accounted for $904 million in 1984 sales, a 14% jump due mostly to increased sales of lighting products and Genie garage-door openers. The company's 1983 purchase of Westinghouse's lamp division will result in the consumer introduction of "Westinghouse lamps by Philips" later this year.

Genie, a leader in the garage-door opener industry, increased its market share 28% last year, and introduced new products including metal detectors and expansions in home vacuum

products.

The entire Genie line was supported by nearly $3 million in advertising last year, and more new product introductions are expected through 1985.

Unit sales of Norelco electric shavers increased 10% in 1984 with more than $10 million in measured ad spending, while a new tv spot for the company's Schick electric shavers "contributed importantly" to sales increases, the company said.

Other consumer products marketed by North American Philips include musical instruments sold under the Selmer, Glaesel and Ludwig brands, Norelco coffee makers, hair dryers, thermometers and other appliances, and Anchor Brush Co. toothbrushes and cosmetic packages sold to other companies.

North American Philips also makes diagnostic medical equipment, professional electronics instrumentation products, cable tv system hardware and professional dictation equipment.

The major executive change at the company during 1984 came when Pieter Vink retired as chairman last December, ending a 47-year career with the company and its Dutch parent. He is succeeded by company president Cees Bruynes, who added the chairman's title.

Fifty-eight per cent of North American Philips' common stock is held in trust by the Connecticut National Bank for N.V. Philips of the Netherlands. The trust was established during World War II to protect from seizure the assets of the American company.

The Dutch company's r&d budget—$1 billion in 1984—has led to the adoption by North American Philips of such products as Norelco razors and the Philips Compact Disc audio system.

Evolution in the Northeast to a service-oriented economy is the keystone of marketing efforts at NYNEX Corp., comprised of two main operating divisions, New York Telephone and New England Telephone & Telegraph.

New York City-based NYNEX, one of seven regional holding companies created in 1984 by the breakup of American Telephone & Telegraph, ranked the 197th leading advertiser based on measured media spending of $20 million.

The company devoted 73% of its measured spending to spot tv, almost $10 million promoting services of the two main subsidiaries, and another $4.7 million for business systems, information resources, and NYNEX mobile communications divisions.

NYNEX recorded strong earnings in its first year of $986.4 million on revenue of $9.5 billion. The company expects to build on those results by fall, 1985, with the addition of new services targeted at the telecommunications needs of large companies—where the company makes most of its profits.

Moves include introducing a packet switching network for sending high-speed computer data, direct digital connection for digital private branch exchanges, high-speed digital private line service in selected areas, a high-speed switched data transmission service, and new features on Centrex service.

These services are in addition to advertising and marketing developed in 1984 to attract business and residential users, and to stimulate increased use of the telephone network.

But in attempting to provide better service for business customers, NYNEX is facing market erosion from an unlikely competitor—AT&T. The competition surfaced this spring when AT&T Communications, the long-distance unit of AT&T, cut in on NYNEX "jurisdiction" to link up with Merrill Lynch & Co. in Manhattan. The service will bypass the local switching network, thereby saving Merrill Lynch from paying access charges to New York Telephone for long distance service.

Although AT&T executives say they do not seek to bypass regional phone companies, circumstances in the regulation and pricing of telephone services caused New York Telephone to turn down the Merrill Lynch account as unprofitable. Other direct linkups are being planned with several large New York corporations by AT&T.

One NYNEX source complains the company still is not free to compete on an equal footing with some service providers. Regulatory restrictions make the AT&T encroachment that much more worrisome for NYNEX, because such restrictions have meant that business service in effect subsidizes residential service.

Tv spots in 1984 covered the gamut of themes, including corporate identity, end-user and business-related campaigns. "New York lives on New York Telephone" was the general theme for tv and radio spots focusing on efforts to upgrade the telephone system through fiber optics, digital services and value campaigns discussing rate charges. "Be street smart" by using public phones was the theme of a tv and radio campaign.

Both New York and New England telephone companies engaged in heavy spot tv promoting telephone use by groups of all ages. Selected ads featured calls from a mother of the bride and from children at camp. New England telephone also focused heavily on value-oriented campaigns.

End-user and business-oriented advertising made up the bulk of $3.8 million in total measured spending for magazines. NYNEX started 1984 with a print-media corporate identity theme: "Tough demands breed tough minds." In 1985, the theme became "It pays to know us," as NYNEX focused on the better value of its services compared with AT&T and other providers.

NYNEX divisions in 1985 continue focusing on services, such as mobile communications (cellular radio), with a "Think of us as your mobile phone company" campaign theme.

NYNEX created a business information services group in 1984, promoted heavily on spot tv, to help business customers make sense of a bewildering array of equipment and service choices. A humorous "Alexander Graham NYNEX" theme explains the development of integrated voice and data systems and the availability of NYNEX "advisers" who can help with sales, service, installation and repair.

NYNEX Information Resources Co. received almost $3 million for the year in measured spot tv, and $276,000 in print, mainly to promote NYNEX Yellow Page ads to consumers, business-to-business and Hispanic markets. One ad theme, "Just looking," shows silly situations that are avoided by using Yellow Pages, including a couple "just looking" at a menu while sitting in a restaurant.

The primary focus of Yellow Page ads in 1985 is the end-user (business and consumer), with the theme: "It's a very important part of your life." The marketing strategy is to create a desire among end-users to use the product, thereby bringing in advertisers.

Another important development in 1984 was the opening of two Datago retail stores, which marks the entry of NYNEX in the business of selling office automation equipment.

Sales	126.3	123.0	2.7
Operating profits	N/A	N/A	N/A
Advertising	20.1	15.8	26.7

Orion Pictures Corp., Los Angeles, the 195th largest advertiser with measured spending of $20.1 million in 1984, began enjoying the success of recent film releases and a tv series as its fiscal 1985 drew to a close.

Its slate of commercially successful new products augurs well for the company, which for fiscal 1985, ended Feb. 28, earned $6.6 million, a nearly 10% decline from the previous year, on revenues of $223 million, a 44% increase.

Substantial improvements in fourth-quarter 1985 earnings—directly traced to the box office popularity of Orion releases such as "Amadeus" and "The Terminator" in theaters and of the company's "Cagney & Lacey" CBS-TV series—carried over to the first quarter of the current fiscal year, however.

Orion earned net income of $2.8 million, a 141% leap, in the last three months ending Feb. 28, on revenues of $68.8 million, a 102% jump over the similar period in 1984.

Orion's measured spending in 1984 represented a 26.7% increase over 1983. Of that total, the company boosted magazine spending 59% to $760,800 and lowered network cable buys 55% to $82,600.

The company spent $2.3 million through December, 1984, promoting "The Terminator," a box office smash starring Arnold Schwarzenegger that as of Feb. 28 had earned $40 million in domestic theatrical rentals.

Orion backed Francis Coppola's "The Cotton Club," released in December, 1984, with $3.7 million in its first several weeks at theaters. But cost overruns and production delays led to a write-down on Orion's fourth-quarter 1985 balance sheet, partially offsetting gains from "The Terminator" and "Amadeus." The latter film received $440,000 in December support but went on to earn $49.8 million in box office rentals as of June 6 and sweep this year's Academy Awards with Oscars for best picture, best actor, best director, best adapted screenplay and others.

More recently, Orion's "Code of Silence," an action-adventure film starring Chuck Norris, topped movie grosses with $18 million in only five weeks of release. "Desperately Seeking Susan," an April Orion release starring Madonna has as of June 6 earned $22.4 million.

Other 1984 releases included Woody Allen's "The Purple Rose of Cairo" and John Schlesinger's "The Falcon and the Snowman."

The company releases an average of 12 to 16 films a year. It planned to distribute 14 films in fiscal 1985, compared with 12 released a year earlier.

Like many other film producers and distributors, Orion's strategy involves "preselling" rights for subsidiary distribution and exhibition before the film has been completed. For example, exclusive and nonexclusive licensing arrangements with Time Inc.'s Home Box Office grant it pay-cable privileges, deals for home-video, cable and broadcast tv rights, which help to minimize capital risk. With that strategy, a film conceivably could earn a profit before its initial theatrical release. Orion also seeks outside investor capital to limit its financial burden in film projects.

The company's only current first-run tv project, "Cagney & Lacey," was resurrected by CBS in an unusual move after its first-season cancelation in 1983. It stars Sharon Gless and Tyne Daly as a pair of police detectives. The series' popularity continues, and Orion may realize significant profits from syndication once enough episodes have aired to ensure its commercial viability.

Orion also holds syndication rights for 1960s series including "The Addams Family," "The Avengers," "Green Acres" and "Mr. Ed." In addition, it syndicates a half-hour version of NBC-TV's "Saturday Night" and has earned royalties from a revamped "Hollywood Squares" show, which aired for 14 years until its cancelation in 1981. Orion co-produced the latter series when the company was known as Filmways Inc., which was changed to Orion in 1982.

Pacific Telesis Group, formed by the merger of one of the Bell System's largest and one of its smallest companies after AT&T's divestiture in December, 1983, has diversified while pulling a few marketing surprises such as winning new subscribers with boxes of chocolates.

The San Francisco-based Pacific Telesis—made up of Pacific Bell and Nevada Bell—had total measured advertising of $22.2 million in 1984, ranking it the 181st largest national advertiser.

Pacific Telesis, known by the diminutive PacTel, turned in results in 1984 off slightly from 1983, figures difficult to evaluate because they were consolidated under the AT&T umbrella in the comparable year.

PacTel had revenues of $7.8 billion in 1984, down 3.8% from 1983; net income was down 2.2% to $829 million. For the first quarter of 1985, revenues were up 10.5% to $2.1 billion and net income climbed 13.6% to $223.5 million.

Population of the California-Nevada PacTel area is 22 million. Most of it is in populous California, requiring stepped-up servicing. For example, PacTel sees a big market ahead in servicing many of the 3.5 million users of personal computers in the state, a number it expects to balloon to 16 million by 1990.

Nevada Bell is a marketing challenge because of the scattered population and heavy competition from independent phone companies. Nevada Bell, which heavily promotes its services through local media, recently offered subscribers a free box of locally popular Ethel M chocolates if they signed up for two or more custom calling services.

Nevada Bell competes with 10 other phone companies in Nevada and is 85% concentrated in the area around Reno-Sparks-Carson City.

Aiming to add muscle to its marketing, PacTel units acquired two companies in May, 1985. PacTel Info Systems agreed to buy Byte Shops Northwest of Portland, Ore., which has eight computer retail stores and two sales divisions in Washington and Oregon. PacTel will sell its business phone systems through the stores.

Also in May, PacTel contracted to buy for $431 million Communications Industries, Dallas, a specialist company involved in cellular telephone paging systems.

Suggestions were made by industry watchers that a prime target of PacTel's purchase of the Dallas company was the energetic management team, whose chairman-ceo Clayton E. Niles was a pioneer in the paging business.

PacTel has developed two types of advertising—usage and testimonial—aimed at business, using the campaign theme "The most successful business calls are personal," and at consumers, "Don't drift away."

By media, spending was highest for spot tv, $17.5 million, and magazine, $4.1 million. Pacific Bell spent $12.4 million, all on spot tv, for general system promotion and $2.5 million to sell its Yellow Pages, also on spot tv. PacTel did its corporate image-building advertising in magazines at a cost of $2.9 million.

In addition to the two phone companies, PacTel includes a separate white pages and Yellow Pages publisher, Pacific Bell Directory, and seven component companies: PacTel Mobile Cos. is a cellular phone group consisting of two companies, PacTel Mobile Access, serving California cities, and PacTel Mobil Services, operating in selected markets, including Dallas, Houston, San Francisco and metropolitan New York.

PacTel Communications Systems markets telecommunications and data systems to businesses. PacTel Info Systems supplies microcomputers, software and training programs to business.

Pacific Telesis International markets telecommunications systems outside North America. PacTel Finance and PacTel Properties, provide international services to PacTel.

World services	380.6	342.2	11.3

In the midst of paring down worldwide operations to concentrate on core markets, Pan American World Airways, New York, the nation's 148th largest advertiser in 1984, is seeking to emerge as a leaner, marketing-oriented competitor.

Despite a 3.1% decline from 1983 to $27.6 million in total measured ad expenditures in 1984, Pan Am ad executives say there will be dramatic increases in print, spot tv and spot radio over the next few years. Pan Am is a big spender in newspapers nationwide, contributing $19 million to that medium in both 1983 and 1984.

Over-all ad spending (including unmeasured advertising) has been on the decline for several years. It dipped to $59 million in 1984, off 24.4% from the previous two years.

By casting aside its far-flung routes, Pan Am is bailing itself out of a deepening financial hole and freeing resources to concentrate on marketing its trans-Atlantic routes, which offer the prospect of profitability and growth. Pan American World Airways agreed in April to sell its Pacific division, with 18 jets and landing rights in 13 Asian and South Pacific cities, to UAL Inc.'s United Airlines, Elk Grove Village, Ill., for $750 million.

If regulatory agencies in the U.S. and overseas approve the deal, the sale will lop off a substantial portion of Pan Am's international destinations. The justice department, in a preliminary opinion, has said the sale may violate antitrust laws by harming competition primarily between the U.S., Japan and Hong Kong. The matter continues under the jurisdiction of an administrative law judge.

In addition, there are indications that Pan Am and United may dovetail domestic and European schedules. The two airlines already have some linkage through combined frequent flier programs.

Just how all of this will affect advertising and marketing at Pan Am remains unclear. Pan Am will shift its ad focus to its trans-Atlantic, Latin American and domestic routes.

Pan Am plans in 1985-86 to continue its year-round advertising emphasis on business travelers with seasonal emphasis on leisure travel. The over-all ad theme for both passenger groups will remain: "You can't beat the experience." In 1985, Pan Am also is introducing a new ad theme, "Pan Am in the '80s. We've got what it takes."

In 1984, Pan Am introduced Clipper Class service, primarily for business passengers, featuring six-abreast (instead of eight) seating, and more head and leg room. It introduced its refitted fleet of Boeing 747s with a "Million Dollar Baby" print campaign running from October, 1984, through March, 1985. Such close attention to the needs of business passengers has its rewards: Pan Am in 1984 signed on 100,000 frequent travelers to the ranks of WorldPass, its frequent flier program.

Source: Broadcast Advertisers Reports as supplied to Leading National Advertisers Inc.
NOTE: Only 24 of the second 100 leading national advertisers used network radio in 1984.

A portion of the business-oriented advertising is reflected in the $19 million Pan Am says it spent on newspapers in 1984, the same spending level as 1983. Measured magazine spending for the year increased 26% over 1983 levels, to about $3.9 million. Outdoor was an important element in 1984, rising 34% to a measured $2.3 million over 1983.

Marketing and advertising at Pan Am increasingly is focusing on better service and quality. Since 1982, Pan Am has been restructuring its domestic route system to feed traffic from U.S. interior cities to coastal gateways—and from there to international routes. Likewise, a similar feeder system was created overseas through hub cities Tokyo, Frankfurt and London.

As part of the restructuring, Pan Am Corp., a holding company, was formed in September to separate Pan American World Airways from Pan Am World Services, a contract services company. The creation of a holding company permits greater financing flexibility.

In 1985, Pan Am Corp. is entering the final phase of its restructuring, focusing on cost containment through negotiations with labor unions and improved service to its newly limited core destinations. Pan Am again is expanding regular European service, adding short and long-haul flights to, within and from the Continent.

The carrier is using its improved route structure to market services to business and leisure travelers: In May, it began a five-week, $400,000 print campaign to promote its newly expanded presence at Dulles International, Washington. Page ads using the theme, "The most nonstops to Europe," appeared in local newspapers, and tv spots were planned for summer 1985. Spot tv buys in 1984 were hard hit by Pan Am's media cutbacks, dropping 66% from 1983 to $800,000.

For Pan Am, the return to profitability will depend on a host of factors, the divestiture being important in the short-term, analysts say. Pan Am has been weakened by heavy operating losses in previous years, totaling $1.4 billion from 1980 to 1984. The sale of its Pacific division will provide a much-needed cash infusion and eliminate the need to update its aging Pacific fleet.

But the road back promises to be a rocky one. Because of a monthlong strike by the Transport Workers Union in the first quarter of 1985, Pan Am Corp. is expected to lose money for the year. The quarterly loss was $140 million, about twice the size of its first-quarter loss in 1983. Although major concessions were obtained from the union, the strike sent many passengers to competitors.

In personnel changes at Pan Am, Gerald L. Gitner, 39, chairman of Pan Am World Services, was elected in April, 1985, to the additional posts of president-ceo, succeeding John J. Casey, who is retiring. Mr. Gitner continues as vice-chairman of Pan American World Airways and Pan Am Corp.

Polaroid Corp.

Cambridge, Mass

RANK 129

($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	1,271.5	1,254.5	1.4
Net income	25.7	49.7	-48.3
U.S.			
Sales	743.5	730.1	1.8
Operating profits	28.5	55.0	-48.2
Advertising	31.3	33.8	-7.5

Measured media spending at Polaroid Corp., reflecting the anemic consumer market for instant photography, dropped 7.4% to $31.3 million in 1984 as the Cambridge, Mass.-based company took steps to rejuvenate its advertising in switching its 30-year-old U.S. consumer account to Ally & Gargano.

Earnings at Polaroid, the 129th largest advertiser, fell far short of company objectives: Net earnings were $25.7 million, down 48% from 1983, and worldwide sales were $1.27 billion, up only 1.6%. Heated price competition for products such as Polaroid Supercolor videocassettes dampened sales and earnings in 1984.

Although Polaroid continued its domination of the market for instant cameras and film, selling nearly 3.6 million cameras in 1984, off 5.6% from unit sales in 1983, annual unit sales of instant cameras have fallen dramatically from their peak of 9.4 million units in 1979. Analysts attribute the problem to the saturated market for instant cameras and consumer preference for better-quality photographs from 35mm cameras.

Polaroid, in an attempt to rejuvenate the ailing market with new creative, switched its account from Doyle Dane Bernbach to Ally & Gargano, both New York agencies. DDB continues to hold the account for Polaroid's growing line of industrial and professional products.

Falling sales have not halted the flow of new and improved products. In May, 1985, Polaroid introduced a high-quality instant developing color film that the company plans to incorporate into several new cameras. The film, still in the developmental stage, will be the backbone of a new generation in instant products due in the marketplace in early 1986.

In spring, 1985, Polaroid launched a campaign aimed primarily at business users for its new magnetic floppy diskettes, using the theme "Polaroid gets the data back." A new service by Polaroid can recover data from damaged, soiled, dog-eared diskettes. Polaroid hopes to corner a substantial share of the 600 million U.S. market for diskettes, which is dominated by 3M and Verbatim. Verbatim Corp. reached agreement in March, 1985, with Eastman Kodak Co., Polaroid's archrival, for a $174.9 million buyout. Verbatim has an estimated 18% of the floppy disc market. Both Kodak and Polaroid are high on the floppy diskettes business because the product increasingly will be used to store photographic images.

In 1984, Polaroid introduced a variety of new instant cameras equipped with integrated circuitry, which assures fast, automatic flash recharge.

Polaroid is changing the way it targets spending for its cameras and film. Traditionally, ads have been directed at broad-based audiences, but in 1984, Polaroid began selectively targeting ads at more specific groups, such as new parents, young households with children, Hispanics, technology-related uses, small business people, and other specialized market segments.

Consequently, measured ad spending in 1984 for Polaroid cameras and film in general circulation and specialized magazines increased 31% to $6.7 million, and spot tv increased 66% to nearly $3 million. Network tv has been cut 33% to $17.3 million. Polaroid continues to hammer home the message that "Polaroid cameras can do what no other camera can do," that is, deliver high-quality snapshots instantly.

Polaroid's push into business and technical markets was spurred by the introduction late in 1984 of products such as Palette, an electronic computer photo-imaging device, and Graphics Partner, a software enhancement for personal computers.

The new products fit into Polaroid's expanding array of camera and film products with highly specific uses. Among the list of new offerings in 1984 is Polaroid AutoFilms, instant films with larger image areas designed to capture images on computer screens.

Polaroid also introduced the Polaroid VideoPrinter Model 48 color film recorder with a new display system that transforms video signals into 8-by-10 or 4-by-5 instant prints, 8-by-10 overhead transparencies or instant or conventional 35mm slides.

Polaroid broadened its product line for the magnetic recording market in 1984, concentrating on three segments: Flexible diskettes, half-inch videocassettes in VHS and Beta formats, and 8mm home video recording devices. Polaroid's videocassettes are made to its specification by JVC and Sony. And Polaroid is introducing hi-fi videocassettes in 1985.

Polaroid also is committing more dollars to r&d and to acquisitions. In December, Polaroid purchased 11% of National Micronetics, San Diego, a leading manufacturer of recording heads for computer disk drives. The company continued investing resources in fiber optics, photovoltaics, biomedical diagnostics and diversified activities outside photography.

Polaroid also reached agreement in 1984 with Italian fashion house Benetton to produce a collection of sunglasses with Polaroid lenses.

Polaroid is coming up with creative premiums and sales promotions to boost its volume in cameras and film. For example, it teamed up with Trans World Airlines in the fourth quarter of 1984 through Jan. 31, 1985, to provide a 25% discount on fares with proof of purchase of a Polaroid camera or film. Airline analysts estimate more than 400,000 coupons may be redeemed. Pan American World Airways and Northwest Orient have indicated they are honoring the coupons.

Prudential Insurance Co.

RANK 154

Newark, N.J.

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	66,645.0	65,854.0	1.3
Net income	5,984.0	5,113.0	17.3
Advertising	25.4	27.3	-7.1

Prudential Insurance Co. of America, consistently the nation's largest life insurer, spent $25.4 million in measured media in 1984 to rank as the 154th largest advertiser.

Media ad spending, which fell 7.1% from 1983, continues to stress homeowners' insurance products, although ad monies are being spread out to cover more insurance and investment products at Prudential.

Prudential, which has grown to become one of the nation's largest diversified financial services companies, issued a "mission statement" in 1984 supporting that change. It calls for Prudential to be a leader in the financial services industry.

In emphasizing that it is more than an insurance company, the company early in 1984 reorganized its investment operations into a subsidiary corporation, Prudential Investment Corp., which offers financial services through several operating units: Prudential Asset Management Co., which serves institutional investors; Prudential Equity Management Associates, which manages stock market and mutual fund investments, and Prudential Realty Group, which owns and manages commercial real estate including the Crocker Center complex in San Francisco and Gateway Three in Newark, N.J.

In its financial services sector, one of the company's leading ad spenders, Prudential-Bache Securities, ran into problems in 1984 and dropped its measured spending 39.5% to $6.6 million, most in network tv. The stock and bond fund marketer introduced several new products, including the Tax-Exempt Exchangeable Securities for the Port Authority of New York and New Jersey, but revenues of $965 million were flat in 1984 and the company took a $90 million operating loss because of poor stock market conditions.

Life insurance remains its mainstay since its founding in New Jersey in 1873 as "The Widows and Orphans Friendly Society." Though insurance industry market share figures are not yet available for 1984, Prudential ranked first in total life insurance in force among U.S. insurers in 1983 and second in new life insurance sales that year, behind New York Life Insurance Co. Industry observers expect Prudential's 1984 gains will produce similar if not improved results for 1984 when the financial results are available.

Last year, Prudential increased its total assets 15% to $97.5 billion and reached an industry-leading high in life insurance polices in force at more than $66.6 billion.

Homeowners' insurance products during 1984 received about $3.4 million in measured spending in 1984, up 13% from 1983. The company reduced spending in auto insurance advertising, which declined 26.9% to $1.9 million, and life insurance dropped 18.3% to $10.2 million.

Group life and health insurance, sold to employers and large associations, were also major product areas for the company, combining to generate new premiums of about $1.1 billion. Group health insurance accounted for $943 million, up 8% from 1983, and group life $125 million, down 6% because of improved life actuarial results.

FINALLY
A COUPON VEHICLE
WITH REDEEMING
QUALITIES.

the CouponCounter

At last there's a coupon vehicle that offers you efficiency, security and reliability: The Coupon Counter®

The incredible in-store Coupon Counter
The Coupon Counter machine instantly delivers your coupon right inside the store. Which means shoppers don't have to hunt for it through a cluttered newspaper. Or clip it. Or remember to bring it. Your coupon is always right there where decisions are made.

Triples your redemption rates
Our 1984 results prove that shoppers who use the Coupon Counter are three times more likely to redeem your coupon. Which means you get three times the power to stimulate trial. In fact, shoppers are so likely to redeem Coupon Counter coupons, many of our clients tell us they can lower the face amounts and still get impressive results.

Tightens security
With misredemption on the rise, the Coupon Counter offers virtually fool-proof security. Your coupon can only be validated when the shopper enters a personal code.

Delivers demographics
Because every Coupon Counter cardholder is listed in our data bank, we know exactly who redeems your coupon. This vital tracking information is now available for the first time…just ask and find out exactly how our research capabilities can help you.

Join the revolution
If you're not getting these kinds of results from your current coupon vehicle, it's time to try the Coupon Counter. You'll join a long list of top companies who've had remarkable success with us.

Just call 1-617-329-5800.

It could be the most redeeming thing you've done for your couponing effort.

the CouponCounter®

ucts was Pru-Med and other specialized plans designed to contain health costs and encourage lower utilization by consumers.

Prudential introduced a program that lowers premiums for groups of people with healthy life styles and offered an employe consultation service for those about to be hospitalized.

The company also insures one of the nation's largest group plans, the American Assn. of Retired Persons, which generated $613 million in premiums last year from its 3.1 million members.

Among its insurance products, the company also offers a variety of other personal lines of insurance including homeowners', auto and commercial property/casualty insurance and reinsurance.

The company paid out a record-breaking $2.1 billion in dividends to policyholders. As a mutual insurance company, Prudential has no capital stock and is owned and controlled by policyholders, who receive dividends from surplus earnings. The company, which recently studied the feasibility of going public—typically de-mutualizing provides greater access to the capital markets and allows the adoption of holding-company structure—announced in March, 1985, that it had rejected the idea.

Rapid-American Corp.

RANK 128

New York

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	1,815.9	1,491.8	21.7
Net income	-8.4	56.4	-114.8
Advertising	31.3	25.9	20.6

Rapid-American Corp., a conglomerate whose operations encompass such names as Faberge, McGregor, Schenley, McCrory and Botany 500 in its constant reshuffling of properties, backed its products with $31.3 million in 1984, making it the 128th largest national advertiser.

Equally well known for its billionaire financial organizer, chairman, president and ceo, Meshulam Riklis (married to actress Pia Zadora), Rapid-American rid itself of one of its more familiar retail names—Lerner Stores—earlier this year, selling the 796-store chain to Limited Inc., the Columbus, O.-based women's and children's apparel chain.

That sale, the addition of the HRT West Coast discount chain in 1984, the sale of Otasco Inc. in 1984 and acquisition of Faberge Inc. in 1984 through its McGregor Corp. subsidiary are typical of the ebb and flow in the corporate mix at Rapid-America since Mr. Riklis began building Rapid into a conglomerate in 1981.

Its mix of companies in 1984 brought it total revenues of $1.8 billion, a 25% gain over the previous year, but a drop in net income of $8.4 million, down from $56.4 million. The decline in net income was principally because of extraordinary costs in acquiring Faberge, a subsidiary of Rapid's McGregor subsidiary.

The company, which spent 21% more in measured media in 1984 than in 1983, plowed much of the increase into tv, reaching $4.5 million for network in 1984 over no network spending in 1983, and $6 million in spot tv, up from $2.45 million.

Rapid's ad spending in 1984 included expenditures of $9.8 million for the personal-care line of Faberge; $16.6 million for Schenley, and $504,600 for Otasco Inc., a Southeast and Southwest chain of 288 automotive and home accessory stores that Rapid sold in 1984. In 1984, national ad spending for McGregor's was $159,000, off 39%.

Faberge used tv for its personal care line, such as Babe fragrances, Brut products for men and Faberge brand shampoos and deodorants. Total spending of $9.4 million was split $4.9 million for network tv and $4.5 million for spot tv.

Schenley Industries is the heaviest advertiser among the six Rapid business segments. While total expenditures for 1984 were down 9%, to $16.6 million from $18.2 million in 1983, the total number of individual brands advertised increased by 13 in 1984.

Schenley has about a 4.5% share of the distilled spirits market, according to *Impact*, the wine and liquor industry newsletter. Its lead brand is Dewar's White Label scotch whisky, 13th largest selling liquor brand in the U.S. with a 1.5% share of the total liquor market in 1984, up from 1.4% in 1983. Its share of the Scotch category is about 14%. Two other high-ranked Schenley liquors are Old Charter bourbon, No. 44, with 4% of the bourbon market, and MacNaughton Canadian, No. 47, also with 4% of its market segment.

Change has continued to be characteristic of Rapid-American in its relatively short history. McGregor, wholly owned in 1983, became a minority-owned company when Rapid took it public and kept minority interest. McGregor subsequently purchased Faberge, before the rest of the McGregor stock was repurchased by Rapid in March, 1985.

In March, 1984, Rapid's McCrory Corp. segment gained control for $25.8 million of HRT Industries, a western U.S. chain of 33 Zodys self-service discount department stores plus a women's apparel-making subsidiary, Jody-Tootique. Also, in 1984, McCrory sold the Otasco Inc. auto and home supply stores, and in April of this year, McCrory made the Lerner Stores divestiture.

Lerner's bottom line had been suffering since 1982 when it had operating income of $90 million on sales of $717 million. Lerner's subsequently recorded operating income decline of 19% in 1983 and 8.8% in 1984.

McCrory Corp., New York, is the biggest of the Rapid money makers and recently added Stephen L. Pistner as president-ceo. Mr. Pistner resigned from the presidency of Montgomery Ward to join McCrory. The position will pay him $2.5 million annually, including a $4,000 monthly housing allowance.

Mr. Pistner made Dayton-Hudson Corp.'s Target discount stores profitable in 1981, and, in 1983, he converted losses at Mobil Corp.'s Montgomery Ward & Co. subsidiary into a profit.

McCrory Corp. long has been a familiar part of Main St. across the country (37 states and the District of Columbia) with its various store names arrayed across the fronts of variety stores—names such as S.S. Kress, J.J. Newberry, H.L. Green, McLellan and McCrory.

Republic Airlines

RANK 166

Minneapolis

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	1,550.0	1,511.5	2.7
Net income	29.5	-111.0	-126.6
Advertising	23.8	27.1	-12.3

A top management shuffle in late 1983 resulted in changes in pricing, customer incentives and advertising plans in 1984, giving six-year-old Minneapolis-based Republic Airlines its first profitable year in the past four years.

Republic posted $29.5 million in 1984 earnings, up from a $111 million loss the year earlier. Sales for the carrier were up 2.7% in 1984 to $1.55 billion.

Republic maintained its earnings momentum with first-quarter results of $5.3 million compared with $4 million net loss a year earlier, on revenues of $380.9 million, down from $393.6 million in 1984. Traffic during March, 1985, was up on a year-to-year basis, the first rise in 15 months. Also that month, Republic registered a 31.7% increase in revenue passenger miles, third to leader Continental at 69% and Trans World Airlines, 50.6%.

Republic still carries a $650 million debt from the merger of North Central and Southern Airways in 1979 (to form Republic) and the acquisition of Hughes Airwest in the fall of 1980.

In October, 1984, Republic acquired 9.29% of Simmons Airlines, a profitable Michigan-based regional carrier. The acquisition provides additional feeder traffic into Detroit, Republic's largest hub. Remaining hubs are Minneapolis and Memphis, after the airline culled Atlanta and Phoenix in the last quarter. Head-on competition with Delta and Eastern made Atlanta and Phoenix unprofitable because of new cut-rate carriers, according to the airline.

In an effort to cut overhead to reduce the debt, Republic signed agreements with the Air Line Employees Assn. and other unions providing for wage cuts through 1986 for almost all the company's employes. The agreements also included employe stock ownership programs.

The company's measured media spending in 1984 dropped 12.3% from 1983 to $23.8 million, making the carrier the nation's 166th largest advertiser. Most significant were the drops in magazine and network cable advertising.

In 1983, Republic spent $1.8 million in magazines, but only $394,000 for that medium last year. On network cable, *Republic spent $800,000, down* 38.5% from 1983.

The addition of Stephen M. Wolf as Republic's ceo in April sparked a review of Campbell-Mithun, Minneapolis, the carrier's agency for 2½ years. Mr. Wolf had been president of the troubled Continental Airlines until September, 1983. After a six-week review, Dancer Fitzgerald Sample, New York, was named to handle the $30 million account.

Dancer changed Republic's ads from we-get-you-there-type ads typical of the airline industry to a plan aimed at business travelers and other special interest groups.

Republic introduced its Business First Class service last year. The program offers such perks as free drinks, wider seating in the front of the plane and separate check-in facilities to business travelers for only $15 more than regular coach service. In November, Republic's "Perks" campaign broke, aimed at getting business travelers to choose the carrier as their preferred airline for both business and pleasure flights.

The network tv and radio campaign began on Election Night, Nov. 6. Each ad offered a different perk for the business executive, who often dreads traveling. Republic told business travelers, "We make you feel like flying." Republic bought high-ticket airtime, including spots during ABC's "Monday Night Football" and "Good Morning America" and CBS' "60 Minutes."

The $8 million campaign included print, which broke Nov. 7. Individual ads spotlighted each perk and a three-page ad in major newspapers highlighted the whole program.

The airline now does about 55% of its business with the business traveler.

Republic's Frequent Flyer bonus plan was expanded in November to include miles flown on Pan American World Airways. Passengers taking connecting flights on Republic to any of Pan Am's 28 U.S. cities now earn mileage points in the combined program. Foreign visitors arriving in the U.S. on Pan Am are given the added incentive to fly Republic domestically because of the bonus miles they can earn. The program gives Republic wider international visibility, the company says.

Also in November, the company unveiled its new corporate logo and dropped its blue goose logo leftover from original airlines. The new logo is sleek lettering with blue underlining running the length of the plane and gave its 133 planes a new paint job.

As another perk for Midwest business travelers, Republic began mini-shuttle service between Chicago's O'Hare International Airport and Minneapolis-St. Paul International Airport, and between O'Hare and Detroit. Both cities offer the business traveler good connections to other Republic cities.

In September, Republic offered students returning to college a $99 one-way fare good only on Saturdays that month.

Republic also added service last year to Albany, N.Y.; Erie, Pa.; Fort Wayne, Ind.; Hartford, Conn.; Louisville; Oklahoma City; Rochester, N.Y.; Shreveport, La.; South Bend, Ind.; Syracuse, N.Y.; Watertown, Pa., and White Plains, N.Y.

As of April, 1985, Republic serves more than 100 cities on a 90,000-mile route system, including 34 states, Canada and the Cayman Islands in the Caribbean.

Ceji-Revell

RANK 157

Venice, Cal.

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	40.0	N/A	N/A
Net income	N/A	N/A	N/A
Advertising	24.9	0.9	2,722.2

When France's *schtroumpf*-maker joins America's creator of Raygoth Goon of Doom, great things are bound to happen. Ceji-Revell, at the center of this happening, spurred much of it on with measured national ad spending of $24.9 million in 1984.

Venice, Cal.-based Ceji-Revell (former Revell Inc.), the 157th largest advertiser, ranked far above its position in 1983 when the company spent only $687,000 on advertising.

Value of total sales are $40 million for 1984, but income figures are not available for Ceji-Revell, which now is a subsidiary of the largest French toy maker, Compagnie Generale du Jouet, in Drancy, France. The French parent, which is identified by the Ceji, is best known in Europe for its new line of distinctively colored small plastic creatures called *schtroumpfs*. It is owned by La Campagnie Financiere Benjamin et Edmond de Rothschild S.A., Geneva.

With the expanded financial resources of its new ownership and the bigger toy market opening up in the U.S. and abroad, Revell sees big things ahead for its super-precision plastic toys, scale models, and anatomical and machinery models for science and education.

"We intend to commit major resources to product development, tooling and advertising in a manner that will make Ceji-Revell a formidable competitor in the toy industry," says Ceji-Revell president-ceo Sheldon Morick.

Revell believes it is in on a new trend among American youths, who have spurned videogames for toy basics. In a sense, Revell has reversed gears too. In 1983, it began producing toys to complement its mainstay—40 years of producing model kits. "The market for kits," Mr. Morick says, "is $100 million annually. The market for

---

NCR Corp. cashes in

NCR Corp., the first U.S. business equipment marketer to enter its second century, has come a long way since the days it was called the National Cash Register Co. That is what John H. Patterson called the company in 1884 when he bought the National Mfg. Co. and renamed it.

toys is $8 billion."

For 1985, Ceji-Revell has introduced two major new product lines. One is Robotech Robolinks, an integrated system used to assemble robots and their futuristic outer-spatial world in an array of configurations. It's not unlike Lego, the difference being that instead of blocks, the pieces are robots —"the most transformable robots in the galaxy," says Revell literature. The system is based on an animated Robotech tv series and is manufactured in Japan.

The second big introduction for 1985 is Digger Dan, items of which bear the "Property of Digger Dan's Construction Co." slug.

A whole garageful of construction toys is included—a bulldozer, forklift, Jeep, cement mixer, rescue truck, construction site cranes and a self-propelled crane vehicle more than 2 ft. long, and others. Many are either manually operated or battery-powered. Others offer remote control. Battery power, for example, can be used to pump water from the rescue truck trailer and rotate the cement mixer. Even a full-scale bright construction-yellow hard hat is available for the young users.

Revell has other market entries, too. In the Fisher-Price and Playskool tradition is the Growing Ups line of locomotives, whimsical little buses, cranes and other vehicles driven by Mr. Bobbles figures who appear perpetually nonplussed by the toy world around them.

Revell is the world's largest model kit maker, and new products this year for the older Revell customer are kits for building the space shuttle and launching complex; a 1959 Chevrolet Impala convertible; the RMS Lusitania in intricate detail at 1/350th scale, and a 1/16th scale Rolls-Royce Phantom III saloon with steerable front wheels, opening doors, folding hood and tool box.

Revell is spending heavily for advertising now and backed the launch of its new products with heavy outlays in 1984. Biggest spending for a single product was $24.5 million for Digger Dan—$7.9 million for network tv and $16.6 million for spot tv. Measured spending for the new Robolinks in 1984 was just $2,300.

Ceji-Revell, which also carries a line of imported model kits, is linked to other Ceji companies in West Germany, the U.K., Canada, Australia and Hong Kong.

Reynolds Metals Co. — RANK 151
Richmond, Va.

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	3,730.0	2,966.6	25.7
Net income	137.3	-99.1	-238.5
Advertising	26.0	24.2	7.5

Reynolds Metals Co., the nation's leading supplier of aluminum cans and maker of aluminum foils, is caught in a vice between a strong economy and its strong dollar and a flood of imports.

The Richmond, Va.-based company, the 151st leading advertiser with $26 million in measured media in 1984, recorded first-quarter net income of $7 million, down from $22.3 million in the corresponding period in 1984, on revenues of $835.2 million, off 12.9%.

The quarter, ended March 31, reflects the decline in the market that began in 1984's fourth quarter.

The results were caused by an oversupply of metal worldwide that has brought about excessive inventories, depressing the price of ingot and eroding fabricated product prices. The strength of the U.S. dollar further aggravates the problem because it allows more cheaply produced imports to flood the U.S. market. This translated in the first quarter at Reynolds into high inventories. Company aluminum shipments fell 18% in tonnage, and production capacity dropped to 71%. Capacity was 90% a year earlier.

Reynolds, nonetheless, is in a much better position than most aluminum producers because half of its business is in the manufacturing and marketing of finished products, apart from ingot or milled products.Reynolds boosted measured ad spending over-all by 7.5% in 1984, funneling most of the increase into two products—Reynolds plastic wrap and Reynolds wrap. Reynolds wrap got $11.2 million, up 22% from the previous year. Spot tv got 88% of the ad expenditure. Its brand holds a market share of at least 40%, says analyst William Siedenburg at Smith, Barney, noting its contracts for private label and nonbrand marketers boosts the percentage considerably.

Reynolds less dominant plastic wrap received $8.3 million in backing, down 15.5% from 1983. All the expenditure was in spot tv. The only other product receiving strong ad support in measured media was Reynolds oven cooking bags, which got $3.1 million, up from $642,100 in 1983.

Aluminum has 93% of the canned beer and soft drink markets, but less than 50% of the over-all beverage market, allowing substantial room for growth. This area is being addressed through new products introduced in 1984—the 32-oz. "King Kan" and the Trim/Line 200 can.

The company is seeking to further turn away from its reliance on the volatile commodities end of the business. Imported aluminum ingot is now 20% of the domestic market, and in 1984, imports consumed two-thirds of the 8% increase in domestic consumption. The oversupply basically was reflected in fourth-quarter results in which sales dropped 0.8% from the comparable quarter in 1983. Yearend results in 1984 showed net income at $137.3 million, up from a loss of $99.1 million in 1983, on sales of $3.7 billion, up 11.7%. Earnings loss of 1983 was associated with an aftertax writeoff of unprofitable operations and a LIFO inventory gain.

Instead of commodities, Reynolds is placing more emphasis on downstream fabrication, new applications and development of related businesses.

David P. Reynolds will stepdown as ceo but retain his chairmanship at the end of 1985, putting William O. Bourke, president-chief operating officer, in line for ceo succession.

Advertising	35.5	33.8	5.1

A reserve fund of $615 million to cover pending and future claims and expenses relating to the Dalkon Shield birth-control device, which A.H. Robins Co. stopped marketing a decade ago, directed an unwanted spotlight on the pharmaceutical company in 1984 as it turned in an otherwise strong financial performance.

The Richmond, Va.-based company, ranked the 113th largest advertiser in 1984, increased its measured spending 5.1% to $35.5 million, directing some of those ad dollars into network tv, newspapers and magazines to alert women using the Dalkon Shield, or who are unsure of the type of intrauterine device they are using, to call their doctor or clinic.

Cost of this public information campaign has been about $4.5 million, according to a company spokesperson, noting an additional $2.5 million-plus has been spent on legal, medical and fees for pr handled by Burson-Marsteller. The medical fees relate to expenses incurred by users in having the IUD removed. The "alert" campaign began Oct. 29, 1984.

Women using the plastic IUD have said they suffered pelvic disease, difficult pregnancies, spontaneous abortions and other problems. As of the close of 1984, Robins had settled about 8,300 claims, paying out $314.6 million, and faced 3,800 pending claims. Robins stopped marketing the product in 1975 after selling 4.6 million of the intrauterine birth-control shields.

The fund set up for Dalkon cut deep into financial results for 1984, bringing on a loss of $461.6 million in earnings, compared with earnings of $58.2 million in the previous year, on net sales of $631.9 million, up 12%. The company had operating earnings of $128.1 million, up 21% from the previous year.

Robins has maintained steady growth despite the special charges. For the first quarter ended March 31, 1985, net income was $29.97 million, up 88% from the year-earlier period, on sales of $166.4 million, up 6%. A key to the strong performance was strong growth from Micro-K Extencaps, the No. 2 solid potassium chloride supplement in the U.S. Sales of the supplement have leaped sixfold in the past two years.

Robins' leading advertised product line—Robitussin cough medicines, syrups and night relief colds formula —had measured spending of $11.7 million, up 7.3% from 1983. Spot tv claims virtually all Robitussin product advertising. Robitussin holds a leading 27.5% share for cough remedy sales in combined food and drug outlets.

The company maintained its measured support for Z-BEC vitamins and minerals at $6.8 million in 1984, spending largely in spot tv for the vitamin, the top-selling B-complex vitamins with zinc in the U.S.

Spending dropped 12% to $2.2 million for Chap Stick lip balm, the leading lip balm with market share of 56%. Spending for Extend 12 liquid cough medicine dropped 16.6% to $4.2 million, and 7.7% to $4.1 million for Sergeants Sentry flea & tick collar.

Safeway Stores — RANK 160
Oakland, Cal.

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	19,642.2	18,585.2	5.7
Net income	185.0	183.3	0.9
Advertising	24.5	21.2	15.6

Safeway Stores in 1984 used its corporate sponsorship of the Olympic Games in Los Angeles to polish its image and build in-store traffic through store programs tied to the games. Oakland, Cal.-based Safeway was the nation's 160th largest advertiser in 1984 with $24.5 million in total measured spending, up 15.6% from 1983.

Safeway was one of 35 corporate sponsors of the summer and winter Olympic teams, acting as the official supplier for their training tables at the U.S. Olympic complex in Colorado Springs, Colo.

The chain spent a measured $20.3 million on spot tv, up about 4% from 1983, in addition to $1.4 million for magazine, up 49%. The ads were an extension of Safeway's long-standing theme: "America's favorite food store."

Examples of the Olympics tie-ins include ads in major newsweeklies and sport magazines for private label Lucerne ice cream. For every half-gallon purchased, Safeway made a contribution to the U.S. team. Safeway also was involved in a joint promotion with Alcoa, in which Alcoa made donations to the team based on Safeway's collection of recyclable aluminum cans.

For 1985, Safeway is increasing its emphasis on marketing to the changing demographics of its primary markets.

The chain is targeting its growth to Hispanics, working women, single males, the elderly and developing its international business.

Despite changing demographics, the nation's largest food chain has not forgotten that it is primarily a chain of small town, family grocery stores.

Safeway in 1984 had sales of $19.6 billion, up 5.7% over 1983, and net income of $185 million, up only 1% over 1983's record level. Kroger Co., the nation's second largest chain, had sales of $15.9 billion, up about 5% over 1983, and net income of $156 million, up 23% over 1983. Lucky Stores had sales of $9.2 billion in 1984, off 5.2% from 1983, and net earnings in fiscal 1985 of $94.6 million, off 10.2% from the previous year.

In 1984, Safeway opened a net 65 stores, including acquisitions, bringing its store count to 2,571, of which 583 are international.

173

Sandoz
East Hanover, N.J.

($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	2,760.0	N/A	N/A
Net income	N/A	N/A	N/A
Advertising	23.2	22.0	5.8

Sandoz Ltd., Basel, Switzerland, which is putting greater emphasis on marketing ethical drugs, over-the-counter health aids and food products, increased measured advertising by 5.8% in 1984 from 1983 to become the 173rd largest national advertiser.

Ad spending of $23.2 million in 1984 was attributed to the Swiss company's U.S. subsidiary, Sandoz Inc., East Hanover, N.J., which contributed estimated revenues of $1 billion in 1984, up from $848 million in 1983, up 21% from 1982.

The parent revenues of $2.76 billion increased 14% over 1983 as profits rose 28% to $152 million. Sandoz Ltd. ranks as the world's 12th largest pharmaceutical producer in value of sales.

Among the big-budget promoters in measured media was Ex-Lax Pharmaceutical, a New York-based division, which got $6.8 million in 1984, up 6% from the previous year.

Spending of $2.1 million for Gas-X, an Ex-Lax division product, was off less than 1%.

Spending by the Dorsey Laboratories, Lincoln, Neb., to back its big Triaminic line of cold remedies increased 35% to $9.41 million. Magazines were the main media showcase for the Triaminic line, with spending of $4.7 million, but network tv also got $3.8 million.

Ovaltine spending was off 48%, to $1.3 million, while the Eclipse suntan products line, not advertised in 1983, received backing of $982,000.

Among Sandoz' major media vehicles, magazine was up 28% to $7.14 million in 1984, mostly for Ex-Lax and Triaminic, with some also for Calma arthritic pain relief, Dietene, Ovaltine and Densclenz dental cleaner.

Network tv was up 45% to $12.6 million mostly for Gas-X and Ex-Lax, but spot tv was down 45% to $3.33 million.

Sandoz' present broad product line results from two major dynamics confronting the company: Decline in its long-term dye business as a part of that industry's slower performance, and the risk in depending too completely on pharmaceuticals (48% of its business). Growing criticism of health costs, less government support for healthcare payments, an increasing antimedication trend in some sectors of society, greater use of generic drugs and trade protectionism all are making the market increasingly difficult.

An indication of Sandoz' diverse activities is subsidiary Zoecon Corp.'s research to eradicate roaches by using a roach's own hormones to trigger heart attacks because most other killing methods—even radiation—do not stop their development and spread.

Printing/publishing	839.4	685.8	22.4
Pulp/forest prods.	184.5	170.7	8.1

Scott Paper Co. backed a number of products with additional ad spending in 1984 but the Philadelphia-based company, the nation's 143rd largest advertiser in 1984, came out with mixed results.

Scott spent $28.5 million in measured spending in 1984, an over-all increase of 20.7% from 1983, in raising spending for its major brands, but found market share gains in only one, ScotTissue.

Scott buttressed ScotTissue spending with $6.1 million in measured spot tv, up 41% from 1983, and helped beef up its market share from 12% to 14.3% in value-priced category. ScotTissue is holding its own against Procter & Gamble's White Cloud, which had a 7.8% share in 1984 compared with 7.7% in 1983.

Scott backed off its Waldorf brand tissue, however, with no measured spending.

In the higher-quality market, Scott raised spending for Cottonelle to $5.3 million, also in spot tv, up 42%, and slacked off on Soft 'n' Pretty, with $1.8 million in measured tv, down 14%.

Cottonelle lost share, dropping from 5.9% in 1983 to 5.4% in 1984, but is expected to regain share in 1985 as it makes adjustments in manufacturing. P&G's Charmin also lost share in 1984, from 19.7% to 18.7%.

James River Corp. challenged Scott in 1984 by rolling out Northern brand in the northeast where Scott generates some 75% of its consumer product sales. Northern brand has 10.7% of the market, according to a Salomon Bros. analyst.

Scott boosted combined spending 113% for ScotTowels, ScotTowels Junior, Scotties tissue and Scott Family napkins in 1984 to $1.5 million. It expanded on Wash a-bye Baby wipes with $2.2 million in measured tv, up from $219,000 in 1983, the year of introduction.

Scott also pushed higher-priced Baby Fresh wipes, with network tv spending of nearly $4 million, up 16% over 1983.

Job Squad and Viva disposable towels received greater emphasis with combined spot tv of nearly $3 million, up 13% over 1983. Scott is pushing Viva, which dropped from 9.4% to 8.6% share in 1984, in the face of heavy competition from P&G's Bounty and James River's Brawny. In that battle, Brawny gained from 4.5% to 5.3% and Bounty fell from 19.8% to 18.8% in 1984.

Scott Co.'s sales in the first quarter of 1985 were up 1.1%, to $696.2 million, while net income gained 23% to $42.1 million, compared with the same period in 1984. Sales in 1984 were $2.84 billion, up 5% over 1983. Net income was $187 million, up 51% over 1983.

Scott Co. products targeted at consumers had record sales of $1.5 billion in 1984, up 2% over 1983. Scott's two other operating divisions, printing and publishing, and pulp, forest products and minerals, generated revenues of $839 million and $184 million, respectively.

Since 1981, Scott has made strategic capital investments of $924 million in paper production, for raw materials, plant and equipment, and acquisitions of companies in related business areas. The goal has been to refine the company's vertical integration, producing consumer, commercial and industrial paper products at lowest cost. Through 1986, capital expenditures totaling $900 million are planned.

Scott also is buying companies in related product lines, for example, acquiring Sani-Fresh International in 1984 for $38.2 million and up to $20 million more based on projected 1985 earnings.

G.D. Searle & Co.
Skokie, Ill.

($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	1,245.8	946.0	31.7
Net income	161.6	151.2	6.9
U.S.			
Sales	974.6	670.1	45.4
Operating profits	237.2	118.7	99.8
Advertising	39.3	33.5	17.1

The phenomenal success of aspartame, the low-calorie sweetener, and the appointment of Donald Rumsfeld as chairman-ceo dominated news of G.D. Searle & Co. in 1984 and 1985.

The Skokie, Ill.-based company was the nation's 105th largest advertiser in 1984 with $39.3 million in total measured spending, a number sure to increase given the ad support now backing the aspartame brand, NutraSweet.

Searle announced a $40 million campaign in 1984 to create brand awareness for the sweetener, the first ever for a food ingredient that is not sold directly to consumers. Total measured spending for NutraSweet increased 112% in 1984 to $23.5 million, divided $19.7 million into network tv and $3.4 million into magazines.

Second on Searle's list of ad spending was Equal, the consumer product brand containing aspartame, with $8 million in total measured spending, up 51% from 1983. Equal spending was divided $6 million in network tv, $1.5 million in magazine. Equal replaced Cumberland Packing Corp.'s Sweet 'N Low (which contains saccharin) as the No. 1 tabletop sweetener in 1984.

Increased sales of products containing aspartame accounted for Searle's 32% increase in sales for 1984 to $1.25 billion, and a 7% increase in net earnings to $162 million. Sales of NutraSweet and Searle's consumer products increased 60% to $680 million in 1984.

NutraSweet has been a big winner with the soft drink industry. In November, 1984, Coca-Cola USA announced plans to begin using 100% NutraSweet in cans and bottles of diet Coke. The move followed similar announcements by Pepsi-Cola Co. and Seven-Up Co. to replace their current blends of NutraSweet and half saccharin in diet products. The change allows the companies to avoid placing a warning label on products with saccharin that it has been linked to cancer.

The product continued to boost profits in Searle's first quarter of the new fiscal year. Profits jumped 38% to $25.3 million on sales of $337.1 million, an increase of 20% over the same period in 1983. Combined worldwide sales of various forms of aspartame, marketed under four brand names, rose 34% in the first quarter to $176 million. Price breaks to soft drink makers hurt profits in the first quarter, as did the strong dollar and increased spending for r&d.

Soft drink makers have been openly critical of Searle's pricing of aspartame, which is 20 times as expensive as saccharin, and costs 50% more than sugar. PepsiCo has said its new contract for NutraSweet provided for a "major reduction" in costs. Coca-Cola isn't saying whether it received favorable pricing. Coca-Cola also says it has not yet abandoned saccharin, which it still uses in Tab, Sprite and other products. Coca-Cola has indicated the company may even begin using a blend

Source: Institute of Outdoor Advertisers and Outdoor Advertising Assn. of America as supplied to Leading National Advertisers Inc.

that includes cyclamates, if the Food & Drug Administration permits its sale again.

The proportion of Searle's U.S.-international sales is changing as a result of the company's success with NutraSweet and Equal. U.S. sales accounted for 72% of the 1984 total, compared with 55% in 1982.

Searle is trying to lock up the market for aspartame before its patent expires in 1992 or other sweeteners regain popularity. The company is spending $150 million for a new factory, scheduled to begin making NutraSweet in 1985.

In late May, 1985, Searle appointed Mr. Rumsfeld as chairman, succeeding Daniel C. Searle. Mr. Rumsfeld is the first nonfamily member to run the company. There has been speculation that Mr. Rumsfeld, a former U.S. secretary of defense, is considering a bid for national office.

Succeeding Mr. Rumsfeld as president is John E. Robson, formerly exec vp-chief operating officer. Mr. Robson remains chief operating officer. James Denny, senior vp, succeeds Mr. Robson as exec vp.

Advertising	22.1	17.5	26.5

Sharp Electronics Corp. made its strongest bid in 1984 for moderately priced electronic products targeted at the home and office. The Paramus, N.J.-based U.S. subsidiary of Sharp Corp. of Japan had $22.1 million in measured spending for the year, up 26.5% over 1983, making it the 182nd largest U.S. advertiser.

Sharp's heaviest measured spending in 1984 was for a new line of plain paper copiers, introduced early in 1984 with $6.3 million in measured spending: $5.1 million in network tv and $1.1 million in magazine. Ads for the copiers, as with all Sharp products, continue using the theme introduced in 1982, "From sharp minds come Sharp products."

Sharp's copiers are part of a growing line of office automation equipment that includes the PC 5000 personal computer, a line of electronic typewriters and a facsimile system, all introduced in 1984.

The PC 5000 received $3.2 million in measured media, including $2.3 million in tv, and $800,000 in magazine. Sharp's foray into personal computers means it will slug it out with more than 100 companies for the estimated 39% share of the personal computer market not controlled by IBM, Apple, Commodore, Hewlett-Packard and Tandy.

Sharp's office products previously were limited to calculators, of which Sharp controls 35% to 40% of the world market and is second only to Texas Instruments in the U.S. Calculators received $1 million in measured spending in 1984, down from $2.8 million in measured media in 1983. TI only spent half of that on its electronic calculators.

Sharp introduced extensions of its office automation line at the June, 1985, Consumer Electronics Show in Chicago, including Sharp's first console-size copier, model 9500, designed to compete with Xerox, IBM, Honeywell and other marketers of console units.

Sharp's strength in 1984 again was its home entertainment products and appliances, led by Sharp microwaves, which hold a 9% market share. Microwaves received $3.6 million in network tv and about $500,000 in magazine in 1984, up 3%.

Sharp's growing line of tv sets received $1.9 million in measured network and spot tv in 1984, up 73% from 1983. Sharp's videotape players received $673,000 in tv, down from $1.4 million in 1983.

Worldwide sales in 1984 for the fiscal year ended March 31, 1984, were $4.5 billion, up 13% over 1983. Net income was $117 million, a 45% increase over 1983.

U.S. operating income in fiscal 1984 was $1.2 billion, up 29% over 1983. U.S. operating income in 1985 is projected at $1.5 billion. Sharp holds about a 4% market share in tvs and 8% in videotape players in the U.S. market.

In January, 1986, Sharp Electronics will move to its new $37 million headquarters in Mahwah, N.J.

Shell Oil Co.

Houston

RANK 150

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	20,898.0	19,883.0	5.1
Net income	1,772.0	1,633.0	8.5
Advertising	26.5	11.7	126.9

Shell Oil Co., Houston, in the process of being purchased by its largest shareholder, Royal Dutch, made its first foray into branded gasoline in building its measured media advertising to $26.5 million in 1984.

Shell, which ranked as the 150th largest advertiser, offered its first new gas product since 1975—SU2000 for super unleaded gasoline and RU2000 for regular unleaded gasoline.

In doing so, it took the route other gasoline marketers have taken—introducing a high octane product to support higher performance driving—but Shell tagged its products with the SU and RU brands. The octane rating of the product is 92, vs. 91.5 of the regular.

The company backed the new product introduction with most of the $20.5 million in measured spending it allotted for Shell gasoline, an expenditure that dwarfs the $1.3 million Shell spent on gasoline in 1983. Network tv got 47% of the spending and spot radio, 33.9%.

In the campaign, which bore the tag line: "The longer you use it, the better it can be for your engine," Shell wrapped its service station pumps bearing the SU2000 in black and gold graphics and those with RU2000 in a red and white pattern.

The campaign, staged by Ogilvy & Mather/Houston, sent Shell's ad spending for gasoline beyond spending levels of its major competitors and helped give Shell almost a 3% increase in gasoline sales, compared with the industry average of 2.5%.

Shell's $20.3 million ad support for gasoline compared with its competitors: Exxon, $11.7 million on gasoline; Amoco, $10.8 million; Texaco, $3 million for Getty and $7 million behind Texaco gasoline; Atlantic Richfield, $4.3 million for gasoline and $10.3 million for general petroleum promotion.

Gasoline sales remain a small percentage of total sales of Shell Oil, which had sales of $20.9 billion at yearend Dec. 31, up 5.1% from the previous year, and net income of $1.77 billion, up 8.5%.

The oil and gas exploration segment turned in earnings of $1.38 billion, basically unchanged from 1983, as crude oil production was up but average domestic prices down; oil products sector earnings were $223 million, off 6% from the previous year, again reflecting the squeeze on profits caused by high production and low prices; and the chemical products sector had net income of $132 million, up 110%, and largely because of higher operating rates because of a stronger economy and lower feedstock costs.

Shell, whose measured advertising increased 126.9% over 1983, continued its ad spending mix, although shifting percentages in some media. It placed 38% of its measured spending in spot tv, 37.5% in spot radio, 9.6% in farm, 8.6% in magazines, 6.2% in network tv, and small percentages for network cable and outdoor.

During the year, Royal Dutch continued to buy the nearly one-third of Shell Oil it didn't already own. It started out paying $55 a share but has increased that to $60 as various lawsuits attempting to thwart the buyout have raised the ante. The total purchase now is pegged at about $5.67 billion.

Royal Dutch management style is to permit is subsidiaries to operate autonomously.

Unresolved is current litigation in which shareholders, essentially holding out for more money per share, allege that Royal Dutch had inside information about the magnitude of a new oil find made by Shell Oil when Royal Dutch issued the tender offer. Shell answered the accusation, saying the worth of the find quoted by the disgruntled shareholders was grossly exaggerated.

SmithKline Beckman Corp. in 1985 is counting on a new oral anti-arthritis drug to boost its pharmaceutical sales. The Philadelphia-based company was the 142nd leading national advertiser in 1984 with $28.8 million in measured spending, up 20.9% from 1983.

The drug, Ridaura, approved in May by the FDA, is the first oral version of gold salts, which are administered by injection to treat rheumatoid arthritis in adults. The company expects a steady increase in sales of the drug through the 1980s, possibly

reaching $100 million in a few years.

SmithKline could use another profit center as a result of growing competition for Tagamet, its anti-ulcer medication that accounted for most of the $906 million (in 1984) worldwide market for ulcer therapy drugs. The company introduced new dosages of Tagamet in 1984. The drug accounts for about 30% of SmithKline's annual sales and 50% of earnings.

SmithKline's sales for 1984 were $2.95 billion, up 4% over 1983. Net profits in 1984 were up 3% to $500.3 million. Worldwide sales have been affected by the 1983 introduction of Ranitidine, a direct competitor to Tagamet. Worldwide sales were adversely affected by unfavorable exchange rates resulting from a strong U.S. dollar. Sales would have been $75 million higher at 1983 average exchange rates.

SmithKline also faces heavy competition in consumer products for Contac cold remedies. The company undertook a revitalization of the brand in 1984 with a new ad campaign by BBDO Inc.: "We keep America on its feet." Measured spending for Contac was up 11% in 1984 to $14.3 million, with 90% network tv and 10% spot tv. SmithKline also introduced Congestac tablets, a brand extension, in the fall of 1984. Congestac received $2.6 million in measured network spending.

Ad spending for Ecotrin aspirin dropped 8% in 1984 to $5.9 million, mostly for network tv. Measured spending for SmithKline's Sine-Off products increased 30% to $2.8 million, mainly for network tv.

SmithKline Beckman and American Hospital Supply Corp. announced in January, 1985, that they are combining their clinical laboratory businesses in a new company, SmithKline Bio Science Laboratories. The combination involved no cash. Under terms of the agreement, SmithKline owns 72.5% of the new company, and American Hospital Supply 27.5%.

Sony Corp. RANK 125
Park Ridge, N.J.
($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	5,149.2	4,666.3	10.3
Net income	291.6	125.1	133.0
U.S.			
Sales	1,747.8	1,332.7	31.1
Operating profits	N/A	N/A	N/A
Advertising	32.3	39.3	-17.8

Sony Corp. of America, New York, aiming to make a comeback in the home video market as the market has shifted away from its Beta system, has pinned its hopes on an 8mm video camera recorder and videocassette recorder.

Success of the new products set for U.S. debut this year will hinge on the market's willingness to accept the small-scale camera recorders (the size of a paperback) as it once accepted Sony's Betamax before rejecting it for VHS-format products.

Sony, the 125th largest advertiser with measured media spending of $32.3 million, has not lost its market share for its Beta product from want of advertising. Sony spent $9.2 million on Beta products in 1984 in network and spot tv and magazines—the most for any product line—yet product sales remained sluggish especially among the popularly priced models in Europe and Japan.

First-quarter results at Sony indicate revenues from vcrs dropped 25% in the period, putting even greater pressure on the 8mm video camera products to pick up the slack. The products were introduced in the first quarter in Japan where they are now in back order. Total net income was $77.8 million, up 14.8% from the previous year, on vcr sales of $1.33 billion, up 9.4%.

Analysts report that Sony's share of the home video market has declined steadily from 18% in 1981 to 9% in 1984. Sony's troubles stem from consumer preference for the VHS-format products as opposed to Sony's Beta process. The Beta format accounts for about 35% of the world's vcr business. The two formats are incompatible.

Video equipment sales of $2.09 billion in 1984 accounted for 40.6% of corporate sales. Yearend results at Sony were sales of $5.15 billion, up 10.3% from the previous year, and net income of $291.6 million, up 133%.

During 1984, video equipment sales increased 12% over the previous year. The Betamax vcrs, 1-in. vcrs, videotapes and U-matic vcrs are included in this sector, which expanded largely because of sales expansion of video equipment for broadcast and institutional uses.

Sony was to deliver this spring its so-called "Super Slo Mo" for about $270,000. The equipment, consisting of a camera, base station and videotape recorder, was unveiled in ABC's coverage of the Summer Olympics.

Sales of audio equipment during fiscal 1984, including audiotapes, increased 10.4% over fiscal 1983, primarily because of the sales expansion of the Walkman. Walkman sales results, however, lacked strong ad support during the year. Advertising in measured media actually dropped from $5.3 million in 1983 to $148,000 in 1984, accounting for most of the company's total measured media decline of 17.8%.

Tv sets accounted for 23.6% of total net sales, with color tv sets accounting for 19.9% of total net sales, mainly through the acceptance of Trinitron color tvs. The company backed its color tv sets with $5.9 million in measured spending, the same as in 1983. During the Super Bowl in January, Sony introduced the Trinitron XBR high-tech model that is cable and computer-compatible and has stereo capacity with detachable speakers.

The series of 8mm home video products includes a video camera recorder and vcr. The series uses 8mm film and tapes, about half the size of the half-inch format that is the industry standard. The camera recorder weighs 3 lbs. and only records images. Sony is offering a lightweight portable deck for playback.

Sony expects the 8mm products to account for half the market by 1990, however, 8mm products generally have shorter recording times and less clear pictures, and there are few prerecorded movies on 8mm tapes—the reason many vcr owners buy the vcr.

During the year, Sony Corp. of America created Sony U.S. Marketing Group, an umbrella division for Sony Corp. of America's five major marketing companies—Sony Consumer Products Co., Sony Communications Products Co., Sony Broadcast Products Co., Sony Tape Sales Co. and Sony Consumer Service Co.

Sony made a number of agency shifts, opting for Waring & LaRosa, New York, for professional videotapes and floppy discs, and McCann-Erickson, New York, for audio/car stereo, and hi-fi. Both accounts were previously with Ammirati & Puris, New York. Marschalk Co. in New York also obtained the Betamax account, replacing Backer & Spielvogel, New York.

Southland Corp. RANK 108
Dallas
($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	12,105.0	8,805.0	37.5
Net income	160.3	131.8	21.6
Advertising	37.0	27.5	34.6
Division sales			
Retailing	7,707.3	6,820.7	13.0
Gasoline	3,882.0	1,554.7	149.7
Food processing	443.6	395.8	12.1
Other	70.1	32.9	112.9

Southland Corp., a highly vertical retail conglomerate with 7-Eleven convenience stores and Citgo gas stations, increased its measured advertising spending by 34.6% over 1983 to $37.0 million in 1984, making it the nation's 108th largest advertiser. More than half of that expenditure was in spot and network tv.

The Dallas-based company, the nation's sixth largest retailer, backed its 7-Eleven operations with $35.2 million of the total measured ad spending as the convenience store outlets tied into an image-building theme, "America likes the freedom of 7-Eleven," and the corporation's sponsorship of the Summer Olympics in Los Angeles.

The "freedom" theme, introduced late in 1981, is giving way to a new ad theme in 1985: "No one keeps you revvin' like 7-Eleven," a series of humorous tv spots that dramatize fast, friendly, convenient service at the nation's 7,494 7-Eleven stores. The national tv schedule is being supported by radio spots carrying the same theme couched in contemporary, country and rock musical themes.

Southland Corp. increased its 1984 measured network tv spending for 7-Eleven to $8.7 million, 86% more than the previous year. Much of this expenditure reflected Southland's Olympic sponsorship. Spot tv expenditures increased 7% to $14 million. Southland also was a heavy user of spot radio, spending a measured $12.5 million primarily on 7-Eleven, a level that remained unchanged from 1983.

Southland also spent $1.4 million on spot tv for Citgo Gasoline and $600,000 for Chief Auto Parts, a growing convenience store unit that has 337 stores nationwide.

Southland's vertically integrated business—it produces many of the products its stores carry—became even more so in August, 1983, when Southland acquired the refining, marketing and transportation businesses of Cities Service Co., Tulsa, Okla., a wholly owned subsidiary of Occidental Petroleum Corp. The Citgo subsidiary was bought with 9.35 million new shares of common stock and $519 million cash.

Southland in recent years has focused on expanding the number and geographic spread of its retail units, which include 7-Eleven, Quik Mart, Chief Auto Parts, Gristede's (food stores) and Super-7, high-volume gasoline outlets. In addition, Southland has focused on developing support services, such as food and dairy processing, distribution and manufacturing, and gasoline refining and supply.

Gasoline, for example, was available at more than 3,501 7-Eleven, Quik Mart and Super-7 outlets at yearend 1984. Total retail volume reached nearly 2 billion gals. This strengthens Southland's position as the largest independent gasoline retailer in the U.S. But the huge Citgo acquisition has not been easy for Southland Corp.

Although net revenues were up 37.5% to $12.11 billion in 1984, net earnings were up only 21.6% to $160.3 million, largely because Citgo results were hurt by the depressed market for petroleum products. In December, 1984, Southland took steps to limit the effects of the deteriorating market, by forcing a 46% cutback in refining operations and reducing the work force.

First-quarter 1985 results also were poor. Profits fell 93% to $1 million, compared with $14.3 million in the first quarter of 1984.

Revenues declined 3.5% to $2.8 billion in 1984. Over-all, Southland is in good financial shape, and continues to set the pace in the convenience store industry both in the U.S. and abroad.

Southland's international division includes 3,457 7-Eleven and other retail units operated by area licensees and affiliates in 11 countries. Ad spending for international operations is not included in Leading National Advertisers measured figures.

If Southland Corp.'s total measured ad spending continues to grow by about a 26% clip, the company could jump into the 100 leading national advertisers.

Southwestern Bell Corp. aggressively began marketing products and services nationally and overseas in 1984, greatly expanding the profit potential of its service area. The St. Louis-based corporation, one of seven regional holding companies created in 1984 by the breakup of American Telephone & Telegraph, was the 146th leading national advertiser based on measured media spending of $27.9 million.

Southwestern Bell devoted 70% of its measured spending to spot tv, almost $13 million promoting services of Southwestern Bell Telecommunications and another $6.5 million promoting Southwestern Bell Publications, the two main operating subsidiaries.

Southwestern Bell's publishing subsidiary moved into the national market in 1984 with its Silver Pages, a directory product targeted at senior citizens. The directory lists government agencies and corporations providing services, discounts and special offers for seniors on a local and national basis. Comedian Bob Hope is national spokesman for the Silver Pages, which are scheduled for distribution in 110 major cities by the end of 1986.

The publications unit also landed a five-year contract in a joint venture with Volt Information Sciences to generate about $1.1 billion in advertising sales for Telecom Australia, the government-owned telecommunications agency.

Also in 1984, the company created Southwestern Bell Telecom, an equipment vendor outlet, and allotted $516,000 in measured spending for magazine. Former parent AT&T has asked the Justice Department to look into acquisitions by Southwestern Bell's Telecom subsidiary to find out whether the company is involved in the manufacture of telecommunications equipment, which is forbidden by a consent decree.

Southwestern Bell has said its acquisition of some assets of Comcoa Inc. and Electra Co., both makers of telecommunications equipment, are related to marketing and distribution of telephone equipment to business and consumers, not manufacturing.

The phone sales unit sold more than 11,000 systems in 20 states in 1984, generating more than $100 million in revenues.

Southwestern Bell Mobile Systems, a cellular mobile telephone service, also was launched in 1984 with $73,000 measured spending for outdoor. The mobile service was introduced in three cities, and, in 1985, expanded to three additional markets. Southwestern Bell serves Arkansas, Missouri, Oklahoma and Kansas.

Southwestern Bell recorded net income of $883 million on revenues of $7.19 billion. About 91% of 1984 total operating revenue was derived from communications services and the remainder was mostly from classified Yellow Pages directory advertising. About 73% of operating revenues from communications services were attributable to intrastate operations.

Subaru of America

RANK 152

Pennsauken, N.J.

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	1,174.9	1,057.5	11.1
Net income	60.0	49.5	21.2
Advertising	26.0	23.8	9.2

Voluntary restraints are just about the only thing slowing Subaru of America from becoming a dominant force in selected niches of the U.S. market for imported cars. Subaru of America is the U.S. distributor for Fuji Heavy Industries Ltd. of Japan, with total measured ad spending of $25.9 million in 1984, up 9% over 1983.

The Pennsauken, N.J.-based importer, the 152nd largest advertiser, is riding near the crest of a wave of Japanese imports, which have seen significant improvements in market share in recent years. Analysts say Japanese imports are gaining an increasing share of the total import segment, approaching 80%, up from about 45% in 1973.

Subaru's market share of Japanese imports increased to about 8% in 1984 from about 3% in 1973. The Japanese segment is led, in order, by Toyota, Nissan, Honda, Mazda and Subaru. The market segment could change, however, if Fuji Heavy Industries decides to begin assembling small cars in the U.S. jointly with a domestic or Japanese company. Fuji, which has a business relationship with Nissan Motor Co., produces some 600,000 cars annually, exporting 200,000 small cars to the U.S. and about 90,000 to other countries.

In 1978, imports accounted for about 18% of unit sales in the U.S. auto market, according to Value Line. Their share rose to 26% in 1983 and held relatively steady in 1984 because of voluntary restrictions by the Japanese. Although the system of voluntary restraints expired in March, 1985, analysts say the Japanese are not likely to ship more than a 10% increase in 1985, to circumvent enactment of trade restrictions.

Subaru is targeting its market strategy at specific segments, such as passenger cars and trucks with front-wheel drive, and, on demand, front wheel/four-wheel drive.

Subaru passenger cars in 1984 were advertised under the theme "the Subaru difference." Passenger cars received most of the company's ad weight, with $17.6 million in measured media, up 9% over 1983. Media spending for passenger cars was divided 65% network tv, 27% spot tv, 8% magazine. Subaru's GL-10 model received $1.5 million in measured spending, divided 70% magazine, 30% tv.

Next on the list, in terms of measured spending in 1984, were Subaru wagons, with $2.4 million in measured media, divided 48% magazine, 30% network, and 22% spot tv.

In 1985, Subaru's theme becomes "The greater difference," with introduction of 1985 Subaru Coupe.

Subaru had net sales in 1984 of $1.17 billion, up 11% over 1983. Net income, however, was $60 million, up 22% over 1983. *Forbes* ranked Subaru No. 1 in terms of sales growth and profitability in its 37th annual report on autos and trucks.

Apparently, Subaru's marketing emphasis on quality, durability, performance and driveability is bringing strong results in customer satisfaction and in decisions to repurchase. A 1984 survey by J.D. Power & Associates measuring customer satisfaction levels of 31 imported and domestic cars ranked Subaru second only to Mercedes-Benz.

Tambrands Inc.

RANK 127

Lake Success, New York

($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	390.0	346.4	12.6
Net income	58.9	51.1	15.3
U.S.			
Sales	294.5	252.4	16.7
Operating profits	36.7	35.4	3.7
Advertising	31.8	28.0	13.8

Tambrands continues in 1985 to build on its successful transition to a diversified company with the introduction of its first products outside the sanitary protection market, a line of home diagnostics called First Response.

The Lake Success, N.Y.-based company, the nation's 127th largest advertiser in 1984 with $31.8 million in measured spending, introduced the products in April, 1985, into test market in California. The products include an ovulation predictor test and a home pregnancy test. Several other products will be added to the line in 1986.

The pregnancy test will face stiff competition from Johnson & Johnson's Daisy 2 and Advance products, as well as Warner Lambert's e.p.t. and e.p.t. Plus, which accounts for about 50% of sales in the category. The ovulation test is Tambrands' answer to the basal thermometer, which is capable under ideal conditions of recording whether ovulation has occurred through slight temperature variations.

The $250 million home-diagnostics market is a natural for Tambrands, whose Tampax tampons have an estimated 60% market share, or $190 million of the $315 million U.S. tampon market. It is estimated that Johnson & Johnson, Kimberly-Clark and Tambrands each account for 20% to 30% of unit sales for all feminine hygiene products, including sanitary napkins and tampons, and Beatrice and Procter & Gamble account for most of the remainder.

Tambrands' total measured spending in 1984 increased to $31.8 million, up nearly 14% over 1983. Most of the added spending was for brand extensions of the Maxithins line, including Maxithins panty shields, which received $6.7 million in measured spending in 1984, divided roughly $5.2 million in network tv and $1.5 million magazine. Maxithins received $10.7 million in measured network tv in 1984, with an additional $600,000 in spot tv and $3 million in magazines.

Despite sales improvements as a result of higher spending levels, Tambrands reported an 18% decline in earnings to $12.4 million for the first quarter of 1985. The decline resulted from placing $3 million in reserve to cover replacement of Tampax Super Plus tampons. Excluding the charge, net income increased 2%.

A recent study commissioned by Tambrands at Harvard Medical School showed that polyacrylate, a synthetic fiber used in the tampons, was linked to toxic shock syndrome. Tambrands stopped using polyacrylate in February, 1985. The Super Plus brand now contains a fiber blend of cotton, rayon and Aqualon, a material used in tampons mainly sold outside the U.S.

Tampax Tampons are expected to benefit in 1985 from Procter & Gamble's decision to discontinue its Rely tampons brand, whiich has been linked to toxic shock syndrome. P&G took a $75 million write off in abandoning the market. But P&G continues seeking new markets in the feminine hygiene category with Always, a maxi-pad.

Tambrands net sales in 1984 amounted to $390 million, up 12.6% over 1983. Net earnings were $58.9 million, up 15.3% over the previous year.

Foreign sales account for about 40% of Tambrands' total unit sales and about 25% of consolidated net earnings. Tambrands also faces highly competitive conditions in foreign markets.

U.S.			
Sales	N/A	N/A	N/A
Operating profits	N/A	N/A	N/A
Advertising	24.3	18.1	34.2

Texaco, the nation's 162nd largest advertiser, achieved greater access to raw materials through its Getty Oil Co. acquisition in 1984 and advanced its marketing and advertising strategies by reinforcing its image as a major international oil and gas company.

The White Plains, N.Y.-based oil giant, which had 1984 measured advertising expenditures of $24.3 million, up 34.2% from 1983, funneled $11 million of the measured total into spot and network tv to push its new, high-volume System 2000 retail outlets and back its Texaco brands of gasoline and Havoline Supreme motor oils. The tv spending breakdown was almost 50% each for spot and network.

Spot tv focused on brand awareness for the System 2000 stations, emphasizing construction of the outlets mainly in the Northeast, the Sunbelt and the West Coast. By yearend, more than 400 System 2000 stations were operating, averaging sales of more than 170,000 gals. a month each. That compares with Texaco's other company-owned stations, which averaged 86,000 gals. a month.

Gasoline products accounted for the largest portion of measured tv spending, $4.2 million spot and $2.8 million network, using the ad theme: "[Texaco gasoline] knocks out the knocks." Strong emphasis was for Super Unleaded, which increased 32% in sales during 1984.

Network tv expenditures were used to buy time for gas and motor oil products on Bob Hope tv specials. Measured spending for Havoline oil was $1.4 million network and $800,000 spot tv, using a combination of rebates and special case offers designed to promote volume sales.

Havoline motor oil also was the primary focus of magazine advertising, accounting for $1.4 million out of $2.7 million in measured spending companywide. Texaco industrial oil and lubrication products accounted for another $500,000 in measured magazine spending, and corporate identity ads accounted for the rest.

Texaco secured huge U.S. and international crude oil reserves through the $10.2 billion Getty Oil Co. acquisition, and Texaco strengthened its presence in Europe with the acquisition of selected portions of Chevron's European marketing assets. These developments indicate the direction Texaco is headed, in terms of marketing, as it responds to the political, economic and market forces that are reshaping the world's energy economy.

Texaco acquired all of the outstanding common stock of Getty Oil Co. in March, 1984. As part of the deal, Texaco agreed to a Federal Trade Commission order to sell Getty's marketing operations and certain refineries in the Northeast.

On Feb. 4, 1985, Texaco sold Getty Service Stations in the Northeast to Power Test Corp., Plainview, N.Y., for $95 million. Power Test also purchased the rights to use the Getty trade name. Included in the sale were 321 wholly owned service stations, 239 leased stations, and contracts to supply an additional 13,000 stations and nine marketing terminals.

Selling the Getty stations, however, will permit diversion of advertising funds to other Texaco products. Texaco spent a measured $3.5 million on spot tv for Getty gasoline and service stations in 1984.

Ironically, the Getty acquisition puts Texaco back in the Midwest, an area that it backed out of several years earlier because of low profit margins. In 1984, Texaco began converting Midwest Getty stations into Texaco stations. A Texaco executive says the economics have changed this time, however. Texaco recently acquired a Midwest refinery, in addition to Getty marketing terminals, which should improve the efficiency of Texaco's supply lines.

Texaco also sold Getty assets that did not mesh with existing market strategies, including Employers Reinsurance Co. and Entertainment & Sports Programming Network. Coastal Corp., Houston, is in the process of purchasing two oil refineries for an undisclosed sum.

Through May, 1985, Texaco had sold or was in negotiations on sales of Getty properties worth an estimated $2.5 billion. The changes at Texaco are expected to brighten its profit picture. Texaco's net income from worldwide operations through Dec. 31, 1984, was

---

Some foreign and/or private companies do not divulge sales or income figures. Where estimates could not be obtained, N/As appear in charts and the boxed information preceding the profiles to indicate "not available."

$1.07 billion, down from $1.23 billion the preceding year. However, earnings improved through the second quarter of 1985.

Texas Air Corp.

RANK 177

Houston

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	1,371.7	1,246.2	10.1
Net income	50.3	-177.9	120.3
Advertising	22.9	16.6	38.2

When Texas Air Corp.'s Continental Airlines unit was up and flying three days after filing for bankruptcy, industry experts scoffed. But Continental's move showed its determination to once again be considered one of the nation's leading airlines.

Continental spent 1984 methodically scraping its way out of the hole, adding routes, slashing fares and boosting its ad budget that makes its parent, Houston-based Texas Air, the 177th leading national advertiser, up from 191st in 1983.

Texas Air also is parent to New York Airlines and CCS Automation Systems, a Los Angeles-based unit providing computerized reservations, flight planning and other communications and data processing services to a number of commercial carriers.

Despite Continental's past financial failings, Texas Air earned $50.3 million in 1984, compared with a net loss of $177.9 million in 1983. Texas Air's consolidated 1984 revenues were up 9.6% to $1.4 billion.

Continental also earned $50.3 million, its first gain since 1980. New York Air posted a $6.8 million net loss, mostly because of fare wars in some of its key markets, costs associated with re-entering the Boston-New York shuttle markets and a larger marketing budget.

Texas Air's measured ad spending increased 38.2% to $22.9 million in 1984. The company increased spending in spot radio to $7.7 million from $2.5 million in 1983. Significant gains also came from a 107.8% increase in spot tv spending to $2.1 million. Texas Air's largest media expenditure, newspaper advertising, remained stable at $12.4 million.

Both Continental and New York Air boosted their measured media budgets in 1984. Newspapers and spot radio were their media mainstays as they are for most airlines, especially in a climate of quick-changing fares that require immediate media response. Continental spent an estimated $16.2 million and New York Air an estimated $6.7 million in media spending, increases of 38% and 45.7%, respectively, from 1983.

In spot radio, Continental increased its spending to $5.1 million, up from $1.4 million; New York Air spot radio went to $2.6 million from $1.1 million. Estimates in this issue for both airlines for 1984 are based on the same newspaper spending as recorded in 1983. But total spending in newspapers for the two airlines may have increased as much as 40% because of the discount fare wars played out in newspapers during the year. That would put Texas Air spending for that medium at $17 million.

During 1984, Continental's ad campaign, themed "Your money goes farther on Continental," brought protests to the Civil Aeronautics Board from Frontier and Western Airlines. The ads say the same fare on Continental that would get a passenger to New York or Los Angeles would get passengers on those two carriers to a swamp or the desert.

The ads also say a similar fare on United Airlines would only get a passenger to a cornfield, but United didn't file a complaint.

The campaign, running in newspapers and on radio and tv, claimed that what Continental charges to reach certain locations "won't get you very far on other major airlines."

Continental later added a tv, print and radio campaign showing passengers slapping themselves on the forehead when they realized they could have flown Continental. Scali, McCabe, Sloves in Houston handles Continental.

In May, 1985, Continental flew 1.4 billion revenue passenger miles and 2.1 billion available seat miles for a load factor of 68.7%. On a year-to-date comparison, Continental has risen 68% in revenue passenger miles, increased its available seat miles by 68.3%, but its load factor of 63.5% was off 0.5% from the preceding year—a figure affected by a record 16,249 flights.

Continental celebrated its 50th anniversary with events including charity ticket auctions in major cities. In October, it teamed-up with Thrifty Rent-a-Car System with an on-board "Presidential Sweepstakes." Grand prize was one year's use of a Chrysler Fifth Avenue President and First Lady editions, a trip to the presidential inauguration and a one-year Continental Airlines pass.

Also in October, Continental began the first part of its plan to upgrade its fleet, adding 12 new Boeing 737-300's leased from Texas Air. The plan includes an option to add 18 Boeing 737s by March, 1986, also through a lease agreement with its parent.

Continental's increase in passenger traffic has been sparked by a marketing plan that includes lower fares and higher frequency flight service. The carrier introduced nonstop flights between Houston and Salt Lake City and added flights into Cincinnati and Milwaukee.

Continental also added five daily nonstops between Dallas and Houston in July, aimed at undercutting American Airlines' business between the two Texas business hubs. In September, Continental applied for and subsequently received authorization to operate daily, nonstop service between Houston and London.

Continental also applied for and received authority to fly direct from Houston to Tokyo.

New York Air made its big move by starting a New York-Boston shuttle war with Miami-based Eastern Airlines, long the king of the air in that shuttle corridor. New York Air began offering food on shuttle flights to Boston. The carrier offers snacks on its New York-Washington flights, a segment also dominated by Eastern.

New York Air also hit the airwaves with ads aimed at differentiating its shuttle service from Eastern's, but the ads did not mention the other carrier by name. The carrier also used the sides of some New York double-decker buses to shout its shuttle fares. Bloom Agency, New York, handles the account.

Services trade	431.0	440.0	-2.1

At a time when Texas Instruments has run up record earnings, the bottom has dropped out of advertising expenditures at the Dallas-based company, the nation's 159th largest advertiser with total measured media expenditures of $24.8 million in 1984.

Even though the financial picture at TI has brightened, its failures over the past three years were believed to have forced the ouster in May, 1985, of J. Fred Bucy as president and chief executive officer. Replacing him was Jerry R. Junkins. Marketing strategies are not expected to be overhauled because the two have similar styles.

Mr. Junkins was executive vp of data systems, government electronics and industrial controls, the latter two areas being among the company's more profitable businesses.

The computer electronics company had spent $68.3 million in measured advertising in 1983 when the total still included advertising for TI's low-priced 99/4A home computer. The 99/4A went out of production Oct. 31, 1983. TI took a pretax loss of nearly $600 million at the time, and ended 1983 with a total loss of $145 million.

During 1984, network and spot tv spending were off 98% and 85%, respectively, from 1983 levels to a combined measured total of barely $3 million in 1984. In 1983, Texas Instruments spent a measured $18 million each on spot and network tv. Magazine spending also dropped 67% in 1984 to about $4 million.

The spending cuts point up how volatile the home computer market can be. TI's 99/4A, for example, with between 1 million and 1.5 million units sold during its lifetime, in 1983 was the second most widely owned home computer in the U.S. Heated price competition in the low-end market, however, forced TI to abandon the product, taking huge writedowns in 1983 on inventory. TI suffered a rare loss for that year of $145.4 million on sales of $4.58 billion.

Sales and earnings for 1984, however, were another story. Riding high on peak demand for its semiconductors, TI's net sales reached an all-time high of $5.7 billion with net income of $316 million, more than $100 million higher than earnings for any previous year.

Sales and earnings prospects for 1985 are less optimistic, however, because of a softening in demand for semiconductors that started in the second quarter of 1984 and became a virtual recession in the first quarter of 1985.

TI is forecasting a 15% drop to $22 billion for world demand in the semiconductor market in 1985. To help ride out the downturn, TI announced a 2,000-person reduction in its semiconductor work force in December, 1984, shortened workweeks in February, 1985, and expects a further 1,000-person work force reduction in the second quarter of 1985.

Concurrent factors in shaky earnings predictions for TI in 1985 are softness in several key areas where the company is very active, such as oil exploration and government electronics, and the on-going shakeout in the personal computer market.

Although poor retail sales of personal computers have created excess inventories and pricing pressures, TI prepared for the shakeout in 1984 by emphasizing value-added resellers as its main distribution channel for its growing family of Professional Computers.

For 1985, the bulk of TI's advertising will focus on its Business Pro personal computer, which begins shipping sometime in the summer. Ads will be mostly newspaper and magazine. In 1984, TI's Professional Computer line received $2.8 million in magazine spending. TI does not disclose newspaper figures, and measured spending figures for this medium were not available at press time.

The Business Pro's ad campaign, like that of TI's other business computer products, revolves on the concept of identifying a user and showing how the Business Pro has been tailored to his needs through a value-added reseller. Newspaper ads begin with clever headlines, "TI introduces the (Joe Smith, for example) computer system," and go on to explain that the system is perfect for vertical applications in such fields as real estate, medicine and other professions.

Complementing the shift in ad strategy is a sales strategy focusing on value-added retail outlets that are able to assist users in tailoring the system to their applications. As one TI executive put it, the company is selling applications, not hardware.

Although the drop in advertising expenditures for 1984 was partly in response to TI's marketing shift away from the mass market products, TI continues to produce and advertise consumer products. It is the largest supplier of calculators in the U.S., a category that in 1984 received $400,000 in measured spot tv and $200,000 in magazine spending.

TI also produces child learning aids, including Speak & Spell and Speak & Read, which received about $500,000 in measured spot tv in 1984, mostly in the fourth quarter. In early 1985, TI hired Bozell & Jacobs, Dallas, to handle all advertising for its worldwide data systems. McCann-Erickson, Dallas, continues as lead agency, handling all other accounts.

Meal replacements	84.1	32.5	158.8
Appetite suppressants	94.8	86.1	10.2
Other health prods.	27.7	22.1	25.4

Heavy spending for brand extensions by Thompson Medical Co. in the appetite suppressant and nutritional meal replacement category propelled the company to a rank of 104 among U.S. advertisers as New York-based Thompson increased measured ad spending 9.5% in 1984 to $39.3 million.

The greatest increase in measured spending was for the Slim-Fast line of meal replacement products in response to introduction of two new flavors and Slim-Fast nutrition bars. Measured spending for the Slim-Fast line jumped 174% to $11.8 million in 1984. Spending was divided about 65% network tv, 35% spot tv. Ad spending for Slim-Fast is expected to continue rising as Thompson introduces additional brand extensions and continues test marketing Slim-Fast gourmet weight loss meals in 1985.

Drug Store News ranked Slim-Fast 16-oz. chocolate No. 1 in drugstore dollar volume, No. 1 in profits, but only No. 7 in unit sales in 1984 among the 100 top over-the-counter products. The publication ranked Slim-Fast vanilla No. 2 in gross profits, and No. 3 in dollar sales for the category.

The Slim-Fast line accounts for 77% of the market in meal replacement products. Dollar volume sales for Slim-Fast jumped 150% to $84 million in 1984, up from only $5 million in 1982, when Slim-Fast was reformulated and relaunched with intensive advertising.

Competition in the category surfaced in 1984 from the Carnation Do-It-Yourself diet plan, Dietene by Sandoz Co. and various meal replacement products sold door-to-door.

Measured spending for Thompson's appetite suppressants fell 28% in 1984, but figured heavily in the company's media purchases. Thompson controls an estimated 66% of the appetite suppressant market, with category sales of $86 million in 1984, down 10% from 1983.

Drug Store News ranks Dexatrim

Extra Strength, Thompson's flagship appetite control product, No. 17 in dollar sales, No. 21 in profits, and No. 26 in unit movement. Dexatrim captured about 56% of industrywide appetite control sales in 1984. Thompson's other products, Control, Prolamine and Appedrine, accounted for about 10% of the market. Thompson moved into a new market subsegment for long-lasting appetite control with Dexatrim 15-Hour in 1984.

Dexatrim measured spending dropped 35% to $12.7 million, divided 52% network tv, 29% spot tv, and 19% magazine. Over-all, measured spending for Thompson's appetite control products fell 34% to about $15 million. Thompson expects increased competition in the future from competitors such as SmithKline Beckman Corp., with Dietac, and from Ciba-Geigy Corp. with Acutrim.

Thompson is seeking new markets for diet products with test marketing of its Pritikin line of sodium reduced, low-fat food products, which include salad dressings, soups, sauces and rice.

Sales for the fiscal year ended Nov. 30, 1984, advanced 32% over 1983 to $197 million. Net income was up 28% to $21 million over 1983. The sales and earnings figures for 1984 and 1983 were at record levels, up from sales of $90.9 million and net income of $11.6 million in fiscal 1982.

However, first quarter, 1985, net income was down 46% to $3.6 million, compared with the same quarter in 1984. Net sales, which dropped an over-all 31% to $38.4 million, fell 52% in the company's nutritional meal replacement business to $11.9 million, compared with the same quarter a year earlier. Sales of appetite suppressant products also were down 15% to $20.4 million, while sales of other healthcare products were about even. Thompson says inventory adjustments, reduced pricing and lower consumer sales were causes for the slippage.

Second-quarter sales are expected to follow the same downward trend, but the company expects sales to improve somewhat in the second half of 1985. Over-all, Thompson Medical is predicting sales for the year ending Nov. 30, 1985, to be 25% below fiscal 1984. The estimate could be improved by new product introductions and by the success of new marketing programs planned for the second half of 1985.

Transamerica Corp.

San Francisco

RANK 196

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	5,399.0	4,701.0	1.5
Net income	171.5	199.3	-1.4
Advertising	20.0	12.1	64.5
Division sales			
Insurance	3,586.1	3,064.6	1.7
Finance	492.4	455.1	0.9
Manufacturing	401.0	397.2	0.1
Transportation	904.0	695.8	3.0

Earnings from Transamerica Corp.'s property and casualty insurance sector continued to slide in 1984, and the company in the notable pyramid headquarters could not generate enough energy from its other business units to halt a corporatewide drop in net income.

San Francisco-based Transamerica, which increased ad spending 64.5% mostly to build up its insurance services, was the nation's 196th largest advertiser in 1984 with $20.0 million in measured spending.

Insurance advertising, combined with $3.5 million in measured spending for general corporate promotion (up 15%) that included sponsorship of the U.S. Olympic Team, accounted for all of Transamerica's network tv ad spending of $11.6 million, boosting the medium's spending total by 294% on a year-to-year comparison.

The increase in insurance advertising was targeted mostly at Transamerica Occidental Life Insurance Co., which received $3.4 million in measured media, up from about $600,000 in 1983. Ad spending for Occidental was divided evenly between magazine and network tv.

Only $3,100 in measured spending went to boost the depressed property and casualty side, which has recorded operating profit losses of $18 million in 1982, $30.7 million in 1983 and $152.3 million in 1984. The company credits these losses to high claims costs reflected in high settlements and increases in loss reserves, and extensive price competition.

A more competitive rate structure and agent's incentive programs helped boost premium dollars written in the division by 26.8% to $833.1 million in 1984, but they did little to harvest the bottom line.

The company slashed ad spending for its Budget Rent-A-Car unit by 48% in 1984, to $2.5 million. But it increased ad spending for insurance services of all forms to $10.5 million, mostly in measured network tv, up from about $700,000 in 1983.

In terms of insurance in force as of Dec. 31, 1983, the latest figures available, Transamerica Occidental Life Insurance Co. ranks No. 6 with $79 billion, and Transamerica Assurance Co. ranks No. 7 with $77 billion. The companies follow Prudential Insurance Co. of America with $189 billion; New York Life, with $136 billion; Metropolitan Life, with $121 billion; Northwestern Mutual, with $92 billion, and General Reassurance Corp., with $87 billion in force.

Transamerica in 1984 was designated official insurer of the 1984 Olympics. Board member Peter V. Ueberroth was president of the Los Angeles Olympic Organizing Committee and is now commissioner of Major League Baseball.

Transworld Corp.

New York

RANK 156

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	2,002.0	1,899.0	6.0
Net income	115.0	8.0	1,337.5
Advertising	25.1	21.4	17.4

Transworld Corp., which spun off its airline business 16 months ago, has taken a further step to contain its holdings to food and lodging with the proposed sale of its profitable real estate subsidiary.

The subsidiary, Century 21 Real Estate Corp., with 6,500 franchisees selling 500,000 homes (one in every 10) in the U.S. in 1984, also is Transworld's largest advertiser, spending $18.2 million, or 72.5% of the parent's $25.1 million in measured media that ranked Transworld the 156th largest advertiser.

When Transworld chairman L. Edwin Smart announced the possible sale of Century 21 at the annual stockholder's meeting in May, 1985, he said the sale would "simplify our business mix and allow us to concentrate on opportunities in our food and lodging businesses."

The sale of Century 21 would leave Transworld with food service operations, Spartan Food Systems (including Hardee's restaurants and Quincy Steak Houses) and Canteen Corp.; hotel services including Hilton International and Vista International, and assorted food products, Milnot canned milk, Dairy Sweet canned milk and Chilli Man chili.

After the sale of Century 21, Transworld's primary business outside food and lodging would be Dunhill Personnel Agency, with 284 franchised permanent and temporary placement services nationwide.

Food service operations contributed 63% of Transworld's revenues in 1984 and 54% of operating income, while hotels contributed 33.7% of revenues and 36% of total operating income.

Transworld in 1984 reported total net income of $115 million, 91.7% above earnings from continuing operations in 1983, and consolidated operating revenues of $2 billion, up 6%.

Transworld, a mainstay among ADVERTISING AGE's 100 leading media companies because of its heavy support for Trans World Airlines, has pared its advertising in half since spinning off the unprofitable unit in February, 1984. Now, the major products backed by advertising are Century 21, and Hardee's fast-food and Quincy's Steak House restaurants.

Hardees, under the Spartan Foods division, spent all its $2.2 million in measured media on spot radio, the same as in 1983. Spartan Foods owns and operates 287 fast food restaurants as a franchisee of Hardee's Food Systems Inc. and 198 limited table service Quincy's Family Steak Houses—all in 10 states in the Southeast. Quincy's spent $1.5 million in measured media, all in spot radio, up 60% from 1983.

The company's Hilton International operates 89 hotels in 44 countries and provides food service in other locales. The chain reviewed agencies early this year and selected Henderson, Friedlich, Graf & Doyle, New York, to handle the account, which bills an esti-

Triangle Publications 119

Radnor, Pa.

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	N/A	N/A	N/A
Net income	N/A	N/A	N/A
Advertising	33.3	31.5	5.7

A new president, the reintroduction of *Good Food* and movement back into the market for publication distribution marked key changes in 1984 at Triangle Publications, Radnor, Pa., the nation's 119th largest advertiser with measured media spending of $33.3 million.

The privately held company, which publishes *TV Guide, Seventeen* and *Daily Racing Form*, picked William Henrich Jr., 56, as its new president Jan. 1, 1985, to succeed Walter Annenberg, 77. Mr. Annenberg, who assumed the new position of chairman, holds majority interest in Triangle. Mr. Henrich had served as Triangle's outside counsel since 1958 with the law firm of Dilworth, Paxson, Kalish & Kauffman, Philadelphia.

Although it is too soon to tell what effects Mr. Henrich's leadership may have on marketing and advertising at Triangle, it is thought that his appointment represents a continuation of the course charted by Mr. Annenberg. Triangle has been reluctant to make substantial changes in *TV Guide*, fearing to tamper with so large and successful a product. However, the editorial focus gradually has expanded to include topics of tv viewer interest, such as a weekly videocassette recorder report and an "Insider" section of the magazine.

Triangle's total measured ad spending in 1984 was almost entirely for *TV Guide*, by far its largest publication, with circulation of 17,115,233 as of March 27, 1985. Total measured spending for the company represented a 5.7% increase over 1983. The largest single category of measured spending was for *TV Guide* subscriptions, with a $21.6 million outlay for spot tv, a 1% increase over 1983 levels. Next largest categories were network radio, $5.2 million, a 50% increase over 1983, and newspaper, $4.5 million, unchanged from the previous year.

Although revenues and earnings figures by the company's media properties are not publicly available, a company spokesman says *TV Guide* in 1984 passed the $304 million mark in total ad revenue (minus commission and discount). Estimated ad revenue for *Seventeen* in 1984 was $36.8 million. Ad page growth at *TV Guide* was up 4.6% and at *Seventeen*, 13.9%.

The company announced plans to resume publication of *Good Food*, a *TV Guide*-sized monthly, in February, 1986. A prototype issue is planned for September.

Good Food was suspended in April, 1974, after eight issues at a time of increasing publishing costs. It had subscription circulation of 300,000 and about 1 million newsstand circulation at its closure, according to Triangle. Executives at the media company now believe the decision to suspend was "hasty."

Several personnel changes were announced in March, 1985, as a result of the decision to restart *Good Food*. Frank G. Wolf, publisher of *Seventeen*, became group publisher of *Seventeen* and *Good Food*. Ira S. Garey, formerly associate ad director of *Seventeen*, was appointed publisher of *Good Food*. Robert S. Bunge, ad director at *Seventeen*, moved up to publisher of that publication. Arthur Brener, director of advertising and promotion at *TV Guide*, was appointed marketing director at *Good Food*.

Bozell & Jacobs, New York, was assigned to handle *Good Food*. The agency already had the account for *Seventeen*.

The year also marked Triangle's reentrance in the publication distribution business, picking up national newsstand distribution of *Newsweek, Reader's Digest, Soap Opera Digest, Woman's World* and the *Washington Post Weekly*, in addition to *TV Guide* and *Seventeen*.

Sales	775.0	783.4	1.1
Net income	-89.7	-10.6	-946.3
Advertising	33.2	38.0	-12.6

A shakeup at 20th Century-Fox Film Corp., the 121st largest U.S. advertiser in 1984 with $33.2 million in total measured spending, is opening new options for the weakened studio in tv and motion pictures.

One of the emerging scenarios is that Fox could become the tv-movie production arm of its parent company, TCF Holdings, which has indicated a desire to create a "fourth programing entity."

The Los Angeles-based studio, whose measured ad spending dropped 12.6% from 1983, spent about $22 million in 1984 on network tv for its movie releases and $8.7 million in spot tv.

Rupert Murdoch and Marvin Davis, owners of TCF Holdings, made headlines in May, 1985, with an agreement to buy tv stations in New York, Boston, Chicago, Los Angeles, Dallas, Houston and Washington from Metromedia Inc., Secaucus, N.J., at a cost of $2 billion cash and $1.3 billion assumed debt. (Boston station WCVB-TV is to be sold to Hearst Broadcasting Group of Pittsburgh for $450 million.)

If the Metromedia sale is approved by regulatory agencies, the Fox owners would control independent stations in the U.S. reaching about 20% of the nation's 85 million tv households.

The acquisition's effect would be creation of a company with the ability to produce and broadcast its own programing. Mr. Murdoch says he intends to build a fourth programing entity, targeting young, more affluent and sophisticated viewers than ABC, NBC and CBS. He indicates. however, that Fox would be only one of many suppliers of programing.

Although a separate company is expected to be formed for the tv stations, the company will answer to Barry Diller, Fox chairman-ceo, who arrived in October, 1984, after 10 years at Paramount Pictures.

Mr. Diller has made extensive changes in the studio's operating and financial structure since his arrival, particularly in tv production, which contributed 31% of the studio's total revenues for the year ended Aug. 25, 1984, compared with 23% in 1983.

Mr. Diller split 20th Century-Fox Telecommunications into tv syndication and pay tv/home video divisions. Steve Roberts resigned as president, effective July 31, 1985, and Jonathan Dolgen, senior vp, took charge of tv syndication, with Robert Kreek, senior vp, taking charge of pay tv/home video.

To shore up revenues in its tv segment, Fox is rolling out new shows for tv syndication and placing renewed emphasis on current hits, including such shows as the "$100,000 Pyramid" and "Dance Fever."

Fox reported losses of $2 million from continuing operations for the six months ended Feb. 23, 1985, compared with earnings of $38.3 million for the similar period in 1983. For the fiscal year ended Aug. 25, 1984, Fox took a loss of $35.8 million, compared with earnings of $68.6 million in 1983.

Mr. Diller's top priority since coming to Fox has been development of major motion picture projects, searching for blockbusters to follow "Star Wars" and "Return of the Jedi." In October, 1984, he persuaded producer James Brooks, winner of three academy awards for "Terms of Endearment," to come over to Paramount.

The effect a blockbuster can have on ad spending is enormous. In 1983, for example, "Return of the Jedi" received more than $5 million in measured network and spot tv. Nothing produced for 1984 received measured spending close to that. The biggest budgets, each $3.6 million in measured spot and network tv, were for "Revenge of the Nerds" and "Unfaithfully Yours."

Studios traditionally plan their most aggressive marketing campaigns for summer, when box office receipts can account for up to 40% of the industry's annual revenue. Ticket sales for summer, 1984, exceeded $1.3 billion, analysts say.

Fantasy, sci-fi and adventure films are expected to dominate a crowded summer schedule in 1985 as they did in 1984, paced by Columbia's "Ghostbusters," which raked in $190 million between Memorial Day and Labor Day. "Ghostbusters" is being re-released in 1985.

But 1985 did not start with a bang. Box office revenues through May were down for the first time in four years. And before Labor Day, 50 films will be released, which means competition will be heavy.

United Biscuits Ltd., a corporate complex mainly into baking, finds itself at mid-point 1985 in even more of a cookie combat with the newly assembled Goliath created in early June by the merger of Nabisco Brands and R.J. Reynolds Industries.

United Biscuits is the world's largest cookie and cracker producer outside the U.S. Keebler is its U.S. brand with an estimated 12% share of the $4.2 billion U.S. cookie market, ahead of Sunshine Biscuits (American Brands), 8%, and Grandma's (Frito Lay), 7% to 9%, but decidedly behind dominant Nabisco Brands, 40%, whose merger with RJR will allow it to tap greater cash resources. Together RJR and Nabisco have sales exceeding $19 billion.

United Biscuits, based in Isleworth, Middlesex, Greater London, is ranked as the 133rd largest national advertiser in 1984 with $30.7 million in measured advertising, up 35% from 1983.

Keebler drew the big advertising spending, however, to help build its sales in 1984 to $912.3 million, 45.2% of United Biscuits' 1984 total and 21.4% higher than Keebler's sales in 1983. Keebler profit was $43 million, the first decrease in a decade by the cookie maker, falling 22.7% from 1983.

The decline is said to result from stiff price competition and market strategizing over the cookie wars, in addition to Keebler's costs in readying for competition on the West Coast, including its 1982 purchase of a new bakery in Van Nuys, Cal.

Total revenues for the British company in 1984 were $2.02 billion, an increase of 22.3% over 1983, with trading profits (before taxes and other considerations) of $128.4 million, 11.5% over the previous year. (U.S.$1.16= £1 was the exchange rate used in the UB profile. It was the yearend conversion rate used by UB to convert Keebler U.S. sales to pound sterling.)

In early 1984, Keebler expanded its cookie marketing with the introduction of a host of new flavors in the $450 million soft-cookie category, including chewy Soft Batch cookies, chocolate chip, sugar, oatmeal raisin, peanut butter, walnut chocolate chip, fudge almond coconut, mint chocolate chip and peanut butter fudge chocolate chip. More flavors are due. Lined up to do battle with Keebler are a squad of soft cookie brands. Frito-Lay's Grandma's, Procter & Gamble's Duncan Hines, and Nabisco Brands' Almost Home.

Other Keebler product additions for 1984 were the salty snacks called Hearty Krunch Twists, including a new flavor, and a snack called Tato Skins. Keebler's Stone Creek crackers, in cracked wheat, hearty rye and sourdough flavors are available in all Keebler markets. Keebler also produces private label baked goods for Kellogg, McDonald's and other outlets.

Specialty Brands, which markets Spice Island herbs and spices, Marie's salad dressings, a refrigerated product line and Kosciusko gourmet mustard, had sales in 1984 of $85.6 million, off slightly from $85.9 million in 1983. Profit in 1984 also was only slightly changed, but up, to $9.5 million, from $9.4 million in 1983.

During 1984, Specialty sold its Aunt Millie's natural food spaghetti sauce business. The company, which employs 297, grows its own spices and herbs in California and manufactures products in its own Nevada and Illinois plants.

Shaffer Clarke, a small operation with 37 employes, is the U.S. importer/marketer of UB brands, including products such as Wasa brand Swedish crisp breads and Carr crackers from Britain. It sells Apollinaris mineral water from Germany and a separate division imports and sells Oriental foods and specialty frozen meats under several labels: House of Lawrence, Intersales and Kaufco. Shaffer Clarke's several brands of Scandinavian and German crisp breads are the U.S. sales leaders of their category, and Carr's Table Water cracker is the No. 2 imported cracker in U.S. sales. Other imports are tea, jams, rice and cereals. Shaffer Clarke sales totaled $23.3 million in 1984, a 21% rise from 1983. Profit also rose 24% to $2.6 million.

Moving strongly against its cookie competition in 1984, Keebler increased cookie advertising 56%, to $13.2 million in 1984 from $8.4 million. Spending for cookies was all on tv, divided between network, $7.9 million, and spot tv, $5.3 million.

Keebler's 1984 measured advertising for its cracker brands totaled $6.6 million, a contrast to 1983 when there was no media advertising.

The new salty snack Krunch Twists received ad backing of $7.6 million this year, in contrast to just $417,000 in 1983. Of this total, $6.3 million went to network tv and $1.3 million to spot tv.

Keebler's Ready Crust prepared pie crust, which was a new entry in 1983, reached broad distribution in 1984. It received $914,000 in ad backing, down 39% from 1983. All Ready Crust advertising ran in magazines.

Spice Island spending was off for 1984, dropping 17.5% to $2.39 million because of the loss of $697,000 in spending for the departed Aunt Millie's. Ad budgets from Marie's salad dressing were in a dead heat both years—about $1.92 million for both '84 and '83. All Spice Island advertising was in magazines; Marie's ran on spot tv.

Moving to protect its volume leadership position in the bank credit card business, Visa USA in April, 1985, handed over its in-house account to BBDO in New York.

The reason was clear: Visa has about a 42% market share of the $146.5 billion spent with the so-called bank or third-party credit cards in the U.S. and wants to protect and enlarge that franchise. But there is a phalanx of competition, led by MasterCard, with a 28.2% market share, American Express, 26.1%, and Citicorp's Diners Club and Carte Blanche, with 3.9% combined.

Visa, San Francisco, claims a market share of 60% but bases that percentage on a market of only $100 billion.

Visa was the 188th largest national advertiser in 1984, moving up from the 213th position in 1983 with expenditures of $21 million, 47% higher than the previous year.

Visa USA's dollar card volume increased 30% in 1984 to $61.2 billion, which is 70% of the worldwide total for Visa. In number of member-issuing banks, Visa USA increased nearly 8%, climbing to 15,603 in 1984, which represents 93% of the issuing banks worldwide.

Visa USA is the U.S. regional unit of Visa International, one of five such units in the world. An autonomous board governs each of the regionals, which also include Canada, Latin America, Europe-Middle East-Africa, and Asia-Pacific. More than 160 countries are served.

Visa International's worldwide card dollar volume in 1984 increased 28%, moving up to $87 billion in 1983. Payment volume increased 27% in 1984, to more than $93.5 billion. Compared with 1983, other measures of Visa's worldwide performance in 1984 were a 16% increase in the total number of cardholders to 120 million; a 7% increase in the number of issuing bank members, to 16,724; an 11% increase in the number of merchants honoring Visa, to more than 4.3 million.

BBDO got the nod for the $20 million account from a short list of five once the field had been cut from 25. Visa Communications, an in-house agency, had handled the business the past 10 years. With its near 50% increase during 1984 in measured ad spending compared to 1983, Visa appears to have been girding for the card combat that decidedly is coming.

In February, 1984, a hefty kick in the pants was delivered to the card business when Sears, Roebuck & Co., Chicago, announced that it was going to issue its own new general-purpose credit card for purchase at other stores, meal, travel and entertainment outlets. It is Sears' sheer numbers invading the card market that concerns the credit card companies.

Sears says that by the end of 1985 it will begin issuing cards, at first on a pilot-market basis, to its 40 million credit customers. The scale of this entry can be seen in comparison to the other major cards: Nearly 115 million Visa cards, 103 million MasterCards, 20.2 million American Express, and Citicorp's Carte Blanche and Diners Club, 5 million together.

Measured advertising by Visa USA for the Visa charge card was up sharply, to $14 million in 1984 from just $1.2 million in 1983. And while Visa travelers cheque advertising dropped to $505,000 from $12.4 million in 1983, first-time spending was added for the Visa Premium charge card, at $1.7 million, and Visa USA general promotion at $4.6 million.

Visa USA increased its use of magazines for advertising by 48% in 1984 to $6.2 million. And use of network tv rose sharply by 67% to $14.6 million.

New developments by Visa USA in 1984 were the redesign of the Visa Classic charge card and the Visa Premium card. In 1985, the company launched its Visa Travel Voucher, a prepaid payment device assuring guaranteed payment to the recipient. An addition to the Visa USA family in 1984 was International Anasazi, which was acquired to give Visa members access to Anasazi's telecommunications.

AMERICA

JAMES F. BERÉ
1985 National Chairman
U.S. Savings Bonds
Volunteer Committee

Savings Bonds help you as well as your country.

Because U.S. Savings Bonds help your country grow right along with your savings, the 1985 campaign to increase participation in the Payroll Savings Plan is more important than ever.

That's why National Committee Chairman James F. Beré of Borg-Warner Corporation, Treasury Secretary James A. Baker, III and the members of the U.S. Savings Bonds Volunteer Committee are proud to be leading this year's campaign.

Their knowledge, enthusiasm and leadership abilities insure you all the help you'll need to start a successful Payroll Savings Plan for your organization. And if your company already has a plan in place, they can help you find ways to increase participation.

Savings Bonds are the most widely held security in America because security is what they're all about. Savings Bonds provide market-based interest rates supported by a can't lose minimum return level.

Join us and celebrate America. For more information, contact the industry or geographic volunteer listed below. Or call the U.S. Treasury Department Savings Bond representative nearest you.

1985 U.S. SAVINGS BONDS VOLUNTEER COMMITTEE

Volvo Cars N.A., the newly created division of Volvo N.A., both of Rockleigh, N.J., was the 179th largest national advertiser in 1984. The division, which was called Volvo of America and included as subsidiaries all U.S. and Canadian Volvo companies, increased measured media 28.3% to $22.7 million in 1984.

Following a corporate shuffle April 30, 1985, all U.S. and Canadian Volvo companies became operating divisions of Volvo N.A., a corporate umbrella. The move was designed to separate car, truck, bus, industrial equipment and marine divisions, and put them into closer touch with their respective markets.

Advertising levels are not expected to vary as a result of the administrative restructuring. The car division, by far the largest share of U.S. and Canadian operations, again will account in 1985 for the lion's share of Volvo N.A.'s ad spending. In 1984, Volvo's big measured spending allotments were in tv, up 63% from 1983 to $7.3 million, and $8.6 million in magazines, up 43% in 1984, 85% of which was for various autos. (Spending figures do not include expenditures of dealer associations.)

Volvo was the only European luxury car (priced at more than $10,000) marketer to exceed import sales of 100,000 units in North America, with sales of 107,000 cars. Total sales volume for Volvo N.A., which includes all divisions, exceeded $2.4 billion in 1984, the best year ever. Sales in North America represented an important and growing share of Goteborg, Sweden-based AB Volvo's sales of $12.9 billion.

But Volvo car sales growth in the U.S. has come at a time of declining luxury car sales in Europe, which fell from 1.9 million units in 1979 to 1.2 million in 1984. In 1984, Volvo built an estimated 390,000 cars in that market, 100,000 of which were low-profit, compact cars.

Volvo N.A. will continue to face stiff competition in North America from European, Japanese and U.S. marketers, all of whom are seeking a share of the upscale import market. This market could reach sales of 500,000 units a year by 1990, depending on which models are included, analysts say. Japan, especially, is expected to be a growing force in the import market with the relaxation in 1985 of voluntary import quotas.

Volvo Cars N.A. is pinning its hopes for 1985 on the 740 and 760-series station wagons, introduced in March, the first models to be unveiled in the U.S. before introduction in Sweden. By emphasizing station wagons, Volvo is trying to avoid the heated market struggle here for European performance cars.

The wagons will get about 35% of Volvo Cars' estimated 1985 advertising budget of $15.7 million, which is up 17% from 1984 levels, according to the company. Sales are projected at 10,000 units for 1985. National ads accounting for about 40% of total weight broke in late March, mostly in high-demographic-category magazines.

Volvo also is attempting to broaden appeal of the 700-series beyond traditional family-type buyers, to include singles and others who need cargo space, but otherwise might prefer buying sedans. The theme line is, "Everything a station wagon was intended not to be."

Volvo is combatting the clumsy image of station wagons with a series of ads emphasizing drivability and handling. One ad says, "At last, a wagon meant to be enjoyed, not just endured."

The rest of Volvo Cars factory ad budget goes to local markets in support of dealer associations, with print and tv available. The tv ads build on the images of strength and safety, showing seven Volvos stacked atop one another. Volvo also is extending last fall's pilot local-market daily rental campaign "Test drive" around the clock, not the block. About 70% of overnight test drives resulted in purchases, the company discovered.

The new corporate structure is not expected to outwardly affect production and marketing of products made by Volvo N.A. Divisions, including: Volvo-Penta N.A., Rockleigh, N.J., maker of marine and industrial products; Volvo Canada Ltd., Willowdale, Ont.; Volvo Automated Systems, Sterling Heights, Mich., producer of factory automation devices; Volvo White Truck Corp., Greensboro, N.C., which manufactures and markets Volvo Trucks and Volvo White Trucks; Volvo Bus N.A., Chesapeake, Va., and Volvo Finance, N.A., Rockleigh, N.J., the corporate leasing operation.

The corporate shuffle at Volvo resulted in distribution of key individuals to various divisions. Bjorn Alstrom, president-ceo of Volvo N.A. Corp., was named chairman of all U.S. operating divisions.

Hiram Walker Resources was the 134th largest U.S. advertiser in 1984 with $30.5 million in total measured spending. Although spending is up a modest 4.2% over 1983, the Toronto, Ont.-based distilled spirits and natural resources concern is acting to preserve market share through introduction of new products, brand extensions and entrance into new markets.

In 1985, Hiram Walker also is taking aim against a rising tide of anti-drinking measures that threaten to affect the liquor industry's right to advertise in the U.S.

The company is introducing a "yield the keys" campaign to combat the problem of drunken driving, the subject of much anti-liquor advertising and grass-roots action and an issue that has contributed to continued declines in sales of spirits in general. The company plans to develop the campaign into a nonprofit organization to encourage drinking moderation.

Yet, Hiram Walker, which has six products that rank in the top 60 best-selling national liquor brands, including No. 11 Canadian Club whisky and No. 22 Kahlua, expects to face another barrier to its business growth Sept. 30 when a 19% increase in federal excise tax will be placed on distilled spirits.

Federal, state and local liquor taxes generated about $12 billion in 1984, accounting for nearly 45% of the average $7.13 retail price for a bottle of liquor. On Sept. 30, federal taxes will add an average 30 cents a bottle, which is expected to translate into a 3% to 5% drop in liquor sales for the year. The anticipated drop in consumption follows a 1% industrywide decline in 1984.

Hiram Walker in 1984 spent $8.6 million in measured media for Canadian Club, down 23% from 1983. The brand lost market share in 1984, with case sales dropping 4%, and brand rank among all liquors dropping from No. 9 to No. 11. Canadian Club underperformed the Canadian whisky category, which increased 0.4% in sales volume for the year, despite attempts to appeal to younger drinkers and women with HW's new "Be a part of it" ad campaign. The brand continued to lose ground in its category to Brown-Forman's Canadian Mist, which boosted sales 7.9% with its "misting" campaign, and Windsor Supreme, which increased sales 8% in 1984, mainly by comparative advertising with more expensive brands.

Hiram Walker introduced in October, 1984, Canadian Club Classic, a 12-year-old blended whisky, and Balblair, a single malt scotch.

January, 1984, marked HW's entry into the imported premium cream liqueur category with national rollout of Haagen-Dazs Cream Liqueur. Agency assignment is McCaffrey & McCall, New York. Projected 1984 sales were about $20 million. In addition, HW and a subsidiary acquired the 51% of Tia Maria Ltd. not already owned for $25 million.

Case sales of Hiram Walker's second leading brand in this sector, Kahlua, improved 4% in 1984, with backing of $5.9 million in measured media, including $4.4 million magazine and $1.4 million outdoor, with a small percentage newspaper. Kahlua received $5.5 million measured spending in 1983.

Spending for Courvoisier increased the most in 1984 to $3.6 million, up 22% over 1983. Case sales improved 5% from 1982 to 1984, jumping from No. 64 to No. 57 among all liquor brands in the same period.

Hiram Walker Resources had total net income of C$245 million, up 31.7%, on revenues of C$3.68 billion, up 8%. That translates to $191.1 million net income and $2.87 billion revenues in U.S. dollars, using the average annual rate of exchange in 1984 of U.S.$0.78= C$1.

For yearend 1984, Hiram Walker distilled spirits division had operating income of C$278 million on revenues of C$1.45 billion, both of which represented increases of 4.1% and 2.3%, respectively, from 1983. Distilled spirits represented 47.2% of corporate-wide operating income and 39.4% of total sales in 1983.

The company's other division results in 1984 include natural resources, 17.8% operating income and 12.3% total sales; and gas utility, 35% operating income and 48.3% operating revenues. For the first six months ended March 31, 1985, Hiram Walker's revenue from distilled spirits increased 5% to C$813 million over the same period in 1983.

Wang Laboratories
Lowell, Mass.

RANK 164

($ figures = 000,000)

	1984	1983	% chg
Worldwide			
Sales	2,184.7	1,538.0	42.0
Net income	210.2	152.2	38.3
U.S.			
Sales	1,555.2	1,103.4	40.8
Operating profits	178.4	128.9	38.4
Advertising	24.0	8.5	184.4

Wang Laboratories, Lowell, Mass., made a huge investment in 1984 in network tv spending for general coporate promotion as part of its continuing effort to change its image as a word processing equipment vendor to that of an office automation supplier.

Wang, the 164th largest U.S. advertiser in 1984, is "gunning for IBM" in the words of one tv spot, and fired its first volley by increasing total measured spending 184.4% to $24.0 million in 1984.

Office automation hardware and software provide the links that allow existing desktop, mini and mainframe computers to work together in a network. Office-automation systems are seen as key to companies such as Wang, Digital Equipment Corp., Data General, AT&T in their struggle to gain market share from International Business Machines.

Analysts estimate that office automation could double in sales to $9 billion this year and could reach $40 billion in 1988. IBM maintains a 75%-plus share of U.S. mainframe installations, has a similar share of desktop personal computers and commands a huge marketing-sales advantage.

The competition for Wang is expected to be tough. IBM's sales and marketing personnel outnumber Wang's 10 to 1. Wang, which has an installed base of about 300,000 word processors, is believed to be the leading worldwide producer of word processing equipment. Its reputation in this office equipment segment would make it a logical choice for office automation systems in many work places.

Wang's advertising focuses on its products' strengths in data, word, voice and image processing, combined with its versatility in communications. Wang also touts the introduction of about 300 new hardware and software products in 1984, including Wang Office, a software product that provides time and task management, communications and information management links for all Wang office systems.

Of Wang's measured ad spending totals in 1984 for "general promotion," $11.7 million was for network tv, up 172% from 1983; $2.3 million for spot tv, up 19%, and $1.5 million for magazine, down slightly from 1983. Overall, measured spending for spot tv jumped 136% in 1984 to $4.5 million. Magazine spending increased 76% to $3.5 million.

But Wang's measured spending totals in 1984 also were up significantly for specific products, led by $2.6

million in measured media for the Wang Personal Business Computer, an increase of 52%, and $2.1 million for the Wang Word Processing System, up 117%.

Despite increased advertising, Wang has not been able to ward off a softening in the computer industry that began in the fourth quarter of 1984 and continues into 1985. Wang's profits fell 66% in its third quarter, ended March 31, 1985, to $17 million on sales of $552.7 million. The precipitous drop in profits was much worse than the 30% to 40% drop anticipated by analysts.

Wang has said it expects to take a loss in the important fourth quarter ending June 30, traditionally its strongest. The company plans inventory writedowns and dismissal of 1,600 employees, 5% of its workforce. Wang has said it expects to report profits in fiscal 1985.

Wang's record net earnings for the fiscal year ended June 30, 1984, were $210 million, up 38% over 1983. Revenues for the year were $2.2 billion, up 42%. For comparison, Wang's revenues and earnings in 1982 had just topped $1 billion and $100 million, respectively.

Wang's fast-track growth is partly responsible for its current financial bind. The company has grown to nearly 7,500 employes in sales, sales support and administration, and 8,600 in manufacturing. Analysts say Wang will be forced in 1985 to cut back on nonsales and marketing employment to maintain its level of growth.

Whirlpool Corp.

RANK 117

Benton Harbor, Mich.

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	3,137.5	2,667.7	17.6
Net income	189.6	167.0	13.5
Advertising	34.3	21.0	62.9
Division sales			
Laundry appliances	1,136.7	1,017.0	11.8
Refrigeration/air cond.	1,159.5	968.5	19.8
Other appliances	581.8	476.1	1.2
Other services	259.6	206.1	26.0

Whirlpool Corp., the nation's 117th leading advertising with measured spending of $34.3 million, is seeking to grow through a hotly contested purchase of the KitchenAid division of Hobart Corp., a move that would give the Benton Harbor, Mich.-based company nearly 75% of the U.S. dishwasher market.

But Whirlpool must overcome an antitrust suit filed by competitor White Consolidated Industries. The suit claims that acquisition of KitchenAid would add a 26% market share to what Whirlpool already commands. Whirlpool holds an estimated 50% of the market.

KitchenAid markets dishwashers, mixers, food processors, garbage disposers and hot water dispensers, a phalanx of products similar to those for which Whirlpool increased its 1984 measured media spending by 62.9% over 1983.

The biggest change in Whirlpool's ad strategy in 1984, besides heavier spending, was the use of a variety of media. In 1983, the company bought only print and tv, but last year it began to spread its money around.

In 1984 Whirlpool spent $3.6 million on outdoor advertising for its major appliances, compared with less than $8,000 a year earlier. The company's allocations for network radio and network cable jumped from zero to $2.5 million and $305,000, respectively. D'Arcy MacManus Masius, Bloomfield Hills, Mich., and Netedu Co., Benton Harbor, are Whirlpool's ad agencies.

Whirlpool set sales and earnings records in 1984. Its consolidated net sales rose 17.6% to $3.1 billion and net earnings increased 13.5% to $189.6 million.

Regardless of whether its acquisition of KitchenAid takes place, the company can be expected to continue its current trend of aggressive marketing. The company forecasts replacement of about 20% of existing home appliances in five years, which explains its decision to raise Whirlpool's profile by spreading its message around to various media.

To establish a greater international presence, the company in April formed Whirlpool Trading Co. to consolidate existing overseas activities and explore new ventures.

Last year's record shipments of home appliances should convince Whirlpool that it's research is on target. In 1984, home appliance marketers shipped more than 39.4 million units, the first time the industry had exceeded the 1973 record level of 35.8 million units, according to the Assn. of Home Appliances.

In November, Whirlpool began producing in volume what it considers a revolutionary product in the home appliance industry—the Design 2000 automatic clothes washer. The Design 2000 represnts a new approach to manufacturing home laundry machines. The machine, which looks like most other washing machines, contains 30% fewer parts, is cheaper to make and allegedly simpler to fix.

Along with the appliances it makes to sell under the Whirlpool name and the heating and air conditioning equipment it sells under the Heil name, Whirlpool is the principal supplier of home appliances to Sears, Roebuck & Co., the nation's largest retailer.

The laundry machines, refrigerators, air conditioners, trash compactors and vacuum cleaners it supplies to Sears are sold under the retailer's Kenmore brand name. Appliances marketed by Sears accounted for about 41% of Whirlpool's consolidated net sales in 1984, down from about 55% in 1977.

In December, the company announced plans to restructure its manufacturing operations as part of a five-year, $600 million capital expenditure program. Three new operations—a major appliance group, a kitchen and specialty products group and a centralized manufacturing planning function—will replace the existing laundry, refrigeration and kitchen products structure.

F.W. Woolworth Co.

RANK 189

New York

($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	5,700.0	5,500.0	3.6
Net income	141.0	118.0	19.5
U.S.			
Sales	3,500.0	3,200.0	9.4
Operating profits	235.0	184.0	27.7
Advertising	21.0	17.4	20.8

New York-based F.W. Woolworth Co., the nation's 189th largest advertiser with measured media spending of $21 million, is looking to stimulate better returns the next few years through creation of a new breed of specialty stores.

Woolworth anticipates such retail units will contribute 55% of total sales by 1988, but industry analysts are more conservative, estimating they will account for about 34%.

The emphasis on specialty stores was adopted during 1984 when Woolworth had a modest revenue increase of 5.1% to $5.7 billion and net income of $141 million, up 19.5%, for the company's most profitable year. The financial pattern continued into the first quarter of 1985, ended April 30, with sales rising 2.5% over the year-earlier period to $1.24 billion and net income increasing 50% to $6 million.

Woolworth took steps in 1985 to build on the specialty store area by extracting two of its strongest merchandising areas—stationery and greeting cards—in its current variety stores and making separate free-standing shops out of them called Herald Square Stationery shops. It also is creating Afterthoughts shops—boutiques offering costume jewelry, handbags and accessories.

Woolworth is entering a new merchandising area in launching its first deep-discount drug outlet, called the Rx Place, set to open in Philadelphia. All three new specialty areas were scheduled to debut this spring.

A large-scale renovation and remodeling program also is under way by Woolworth, which operates more than 5,500 stores worldwide.

Totals include 1,210 Woolworth stores in the U.S.; 318 in Canada; 225 in Germany; 3,282 Kinney Shoe Corp. stores, under 12 brand names, operating in the U.S., Canada and Australia; 310 Richman Brothers men's clothing stores and Anderson-Little ladies' and men's clothing/furnishing stores; 37 *J. Brannam brand name discount clothing stores, and 167 Little Folk and Kids Mart children's clothing stores.

The company derives 33%, or $1.9 billion, of its sales from U.S. Woolworth; 25%, or $1.4 billion, from Woolworth Canada; 11%, or $631 million, from Woolworth Germany; 24%, or $1.4 billion, from Kinney Shoe Corp.; 4.3%, or $247 million, from Richman Brothers, and 1.3%, or $75 million, from Little Folk Shop.

The company is set to renovate this year more than 300 U.S. Woolworths and nearly 80 Woolworths and Woolco stores in Canada. The Kinney division intends to open an outlet in each major new U.S. shopping mall opening in 1985 and 1986.

Woolworth discontinued its U.S. Woolco department store chain in 1984 and sold its 52.6% interest in British Woolworth.

To advertise its various units, Woolworth continues to rely heavily on spot tv and spot radio for its major advertising units, Foot Locker and Kinney Shoe Stores, which took about 87% of the 1984 ad budget in measured media. Spending for Foot Locker was up 66% to $4.2 million; spending for Kinney rose fivefold, to $9.3 million in 1984.

Other 1984 spending was $750,000 in spot tv for Anderson-Little, a first-time expense, $1.1 million in spot tv for *J. Brannam, down 32% from 1983, and $234,800 mostly in magazines for Woolworth variety stores, off about 37% from 1983.

Where Ad Age got its data

The second 100 leading national advertisers are selected on the basis of measured ad spending supplied by Leading National Advertisers Inc., Broadcast Advertisers Reports, Media Records (newspapers), Institute of Outdoor Advertisers, Outdoor Advertising Assn. of America, Radio Advertising Bureau and Agricultural Marketing Information Service (AGRICOM).

In addition to ad spending, this issue contains year-to-year financial data on the companies supplied either by annual reports, 10k reports, company sources or by analysts, especially when the company in question is privately held.

The upcoming 100 leading national advertisers are selected by their *measured* ad expenditures. They are listed in a chart on Page 8.

However, the 100 leaders will be ranked as usual by measured *and* unmeasured spending. (The 100 leading national advertisers report will be published Sept. 19, 1985.)

Unmeasured totals were not attempted in this first issue of the second 100 leaders.#

Lorimar gets bigger

By STEWART ALTER

Bozell & Jacobs had been trying to hire a top creative leader, build an international network and increase the size of its New York and Los Angeles operations.

M. Adelson

Now B&J will accomplish all these goals at once, in a merger slated for next January with Kenyon & Eckhardt Advertising. It is generally being hailed as a perfect fit in terms of capabilities and accounts, as well as a smart move on the part of Lorimar, K&E's entertainment company parent.

Lorimar, for its part, reportedly was seeking to strengthen K&E's management, locate a next generation of top execs and expand into diversified communications. B&J brings all that to the party.

The merger was disclosed publicly June 12 by Merv Adelson, Lorimar chairman, and revealed to 90 senior B&J and K&E executives the night before at the Plaza Hotel in New York.

The combined agency will be called Bozell, Jacobs, Kenyon & Eckhardt and, based on 1985 billings projections for each agency, will have U.S. billings of $1.1 billion and another $100 million overseas.

B&J, with $671 million in billings last year, ranked 20th, and K&E, with $376.2 million in billings, ranked 25th in Advertising Age's 1984 list of ad agencies. Their combined gross income last year would have made it the 15th-largest agency worldwide, just behind Benton & Bowles and ahead of Marschalk Campbell-Ewald Worldwide. In U.S. income alone, it would rank 11th, just behind Doyle Dane Bernbach and ahead of McCann-Erickson.

Merger principals Leo-Arthur Kelmenson (l.) and Charles Peebler.

Thus Lorimar, a company that derives most of its income from outside the advertising business, will become the owner of one of the leading ad agencies. And the approximately $40 million that Lorimar, best known as the producer of "Dallas" and other top-rated tv shows, will pay for B&J—$25 million in cash, $15 million in notes—is not regarded as much of a strain on its coffers, leaving it free to continue pursuing either other ad agencies or broadcast properties.

Lorimar made an unsuccessful $1.1 billion bid for Multimedia recently and remains interested in broadcast acquisition, said Mr. Adelson.

Lorimar, which two years ago paid $20.9 million for K&E, reported revenues of $263.2 million and net income of $11.7 million in its fiscal year ended last August. This year, it is running 40% ahead in revenue and more than 200% ahead in net income. With B&J's addition, advertising revenues will rise to about one-third of Lorimar's total revenues, from about 20%. The company is expanding its agency holdings for financial reasons, Mr. Adelson said, and because it believes it knows how to manage a business that depends on creative talent.

Emerging as ceo of the combined agency is Charles Peebler Jr., 49, B&J's president-ceo who took over

Winter Olympics push readied

ABC sells sans Seoul

By ROBERT RAISSMAN

ABC-TV will begin selling its 1988 Winter Olympics coverage shortly, without waiting to see if it can secure the tv rights to the 1988 Summer Olympics and possibly foregoing its chance to put together winter-summer Olympic packages for advertisers.

"I can't give an exact date," said J. Larre Barrett, vp-sports sales, ABC, "but I think we'll be on the street sometime this summer."

The traditional Olympics advertisers generally applauded the ABC decision to start moving the winter '88 inventory before the summer '88 rights are sold, saying that the Olympics are by far the most attractive sports property on the market right now. Because of the generally depressed conditions in tv sports now, advertisers said ABC could expect a favorable reception.

But ABC is taking some risks. By not having the summer '88 games in hand, it will have to strike contingency plans with advertisers wanting both, should it later win the summer rights. If another network wins the summer games, advertisers say the result

Lipton's Sunkist Light challenges GF's drink

By GAY JERVEY

Thomas J. Lipton Inc. is introducing Sunkist Light in eastern and southern markets to battle General Foods in the NutraSweet-flavored powdered drink arena.

Crystal Light, the GF brand, is gaining popularity nearly as fast as Linda Evans, the "Dynasty" star currently featured in its ads. In addition to adding several new flavors, White Plains, N.Y.-based GF is increasing Crystal Light's ad budget substantially over the $20 million-plus it reached last year, a company spokesman said.

Agency is Benton & Bowles, New York.

Both Crystal Light—whose 1984 introduction helped to rejuvenate a

Last Minute News

Bergin definitely will set up McCann unit

New York—John Bergin definitely is going ahead with plans to form his own agency within McCann-Erickson (AA, June 3), perhaps as soon as July 1, sources indicate. He will retain his title as president, McCann-Erickson USA, but might hire as many as four or five creative people to work with him in the separate special-assignments unit.

B&J asked to check out of Radisson account

Memphis—Holiday Inns will ask Bozell & Jacobs, Minneapolis, to resign its $3 million Radisson Hotel Corp. account in the wake of Lorimar's acquisition of B&J and plans to merge it with Holiday Inns agency Kenyon & Eckhardt, New York *(see related story above)*. A Radisson official, however, said that chain has no problem with the apparent conflict. HI also will ask that B&J, Houston, resign its Westin Oaks Hotel assignment. Holiday Inns spent $11.7 million in national advertising last year, says Leading National Advertisers.

P&G brushes up $37M intro for Tartar Control

Cincinnati—Procter & Gamble is mounting an estimated $37 million national introduction of Crest Tartar Control Formula toothpaste after a three-month test (AA, March 18). Ads from Benton & Bowles, New York, may repeat test-market theme of "It turns your toothbrush into a tartar-fighting tool." Separately, P&G is going national with a four-item line of Duncan Hines Quick Bread Mixes. Saatchi & Saatchi Compton handles.

TCI/Time too big in cable?

Warner Amex sale stirs fear

By SUSAN SPILLMAN

New York—Though by no means a done deal, the possibility Tele-Communications Inc. and Time Inc. may buy Warner Amex Cable Communications, and with it gain mammoth industry control, has many cable tv executives panicking.

Last week American Express, which co-owns the sixth-largest cable company with Warner Communications, agreed to sell WACC to TCI and Time for $850 million in cash and the assumption of $500 million in debt. However, Warner Communications does not want to sell out, and under the terms of a "put call" clause in Warner and Amex's partnership, neither owner can sell before offering its share to the other at the same price being offered by the outsider.

Warner is said to be trying to join forces with another company to buy out Amex's interest. Among those rumored to be potential partners for Warner are Viacom International and Gulf & Western.

Industry executives are nervous about the increased industry dominance TCI and Time stand to gain. If their bid is accepted, the two companies would control 20% of the nation's 36 million cable subscribers. With 3.6 million and 2.6 million subscribers, TCI and Time's American Television & Communications unit are already the two largest cable tv operators respectively. The two companies said they would sell Warner Amex's ownership in MTV Networks, which

It's what's upfront that counts for NBC

By VERNE GAY

New York—NBC-TV is entering perhaps its most prosperous upfront selling season as close to $400 million in plans were submitted to all three networks last week, igniting network tv toward breaking the $2 billion mark for the second straight year.

Agency and network executives cautioned it is too early to predict the outcome of the 1985-86 prime time upfront market, which has just started to move, but all agree the No. 2 network finally is in the driver's seat.

Perhaps the first sign fortune is smiling on NBC came from the recently closed deal by Ralston Purina Co., which reportedly agreed to pay NBC 16% increases on a cost-per-thousand basis for women 18-to-49 and women 25-to-54, according to sources. However, Paul Schulman, president of Paul Schulman Co. and Ralston's negotiator, called the report of a steep increase "totally wrong and not even close."

Nevertheless, sources said NBC, which increased its key women demographics ratings 16% over last season and boosted its over-all household ratings 9% while CBS and ABC lost audience, stands the best chance among the networks of getting moderate to high double-digit increases from advertisers this year. NBC also is expected to take the biggest slice of the prime time upfront pie this season. The total market is expected to be between $2.1 billion and $2.5 billion, with one network predicting the higher figure and most agency sources expecting the lower tally. The prime time upfront volume last year was a record $2.4 billion.

"Clearly NBC is in a good position," said one agency executive. "They have the most stable schedule, the most upside potential and the fewest number of downside risks. People are anxious to participate."

Another top agency buyer predicted that the "majority" of NBC's deals will be cut at between 9% and 11% increases.

While talk of price increases is unsettling to most advertisers, and word of "double-digit" increases positively mortifying, some see NBC's ascendance in a slightly different light. Because the network has come off a low pricing base from past seasons, some advertisers grudgingly admit NBC deserves and will get double-digit increases. "You can't go on past increases but rather you have to look at bottom-line efficiencies" when buying, explained one executive. "If CBS costs $7 [per thousand households] and NBC costs $6.90, which do you buy? Do you buy CBS because it had a low increase [and forego] NBC because it had a double-digit one?"

The reversal in network for-

Pioneer spirit

Button-down types meet new-wave types in this spot for Pioneer Electronics, Long Beach, Cal., breaking its new campaign today on MTV: Music Television. It's the first series of ads by Dancer Fitzgerald Sample, Torrance (AA, June 6, *et seq.*). That agency won the account earlier this year from Chiat/Day, Los Angeles (AA, March 18). The MTV-style ads are supported by print.

Newport news: Big sales, packs

By WILLIAM F. GLOEDE

New York—The brand group that handles Lorillard's Newport cigarets is itself "alive with pleasure" of late as the brand continues to grow faster than any other smoke.

In a test of the "consumption goes up to availability" concept, Lorillard will begin testing Newport in a 25-pack in Pennsylvania next month. If the test succeeds, and the 25-pack is rolled out nationally, volume will likely get an extra boost as Newport smokers smoke the five extra cigarets contained in the package.

Lorillard will begin the test the week of July 8, backing it with newspaper, outdoor, magazine and point-of-purchase ads via MCA Advertising. The test will include both 85mm and 100mm styles, and packages will be priced 20% higher than the standard 20-pack. Cartons will carry eight packages, or a total of 200 smokes, and will cost the same as the 10-pack carton.

Newport is now the ninth-largest-selling cigaret in the U.S., having posted strong sales increases each year since 1975. Increases run more than 10% for each of the past three years. Newport has grabbed 3.5% of the American smoke market, and with Lorillard projecting

IAA roundtable mixed on global marketing

By JOHN WOLFE

NEW YORK—U.S. marketers grudgingly admit global marketing sometimes works, but they have major reservations about the controversial theory.

That was the consensus of an International Advertising Assn. roundtable last week. Global marketing, as espoused by the theory's "guru," Harvard Business School Prof. Theodore Levitt, calls for products to be marketed and advertised in virtually the same manner worldwide, thus creating a "world brand" such as Coca-Cola soft drink or Marlboro cigarets.

Panelists agreed global marketing is not effective for all product categories.

Joseph Smyth, senior marketing vp for Intercontinental Hotels Corp., predicted global marketing will diminish in the coming years, even though he acknowledged his company adopted such a strategy three years ago.

"One reason given for global marketing is the economies of scale for volume production," he said. "It is felt that the economies of scale will allow low prices to overcome consumer individuality, and that is true for products with high manufacturing costs."

He said another reason given for global marketing is that because of the pervasiveness of U.S. tv programs and movies worldwide, the U.S. gradually is homogenizing the international population and allowing it to see things through American eyes.

"In some ways that is true, but the attitudes of people living in the U.S. are a great deal different from people not in the U.S.," he said.

He also pointed out developing a global advertising campaign is difficult because few ad agencies have high-quality offices in as many parts of the world as marketers want to enter, and sometimes local restrictions on advertising prevent even the best agencies from launching effective campaigns.

For example, he said his company offers a highly successful promotion in many countries that offers a free airplane ticket to Europe to any guest who stays in one of their hotels for seven, nonconsecutive nights during a given year. The marketer wanted to launch a similar campaign in Germany, but local laws prohibit such promotions.

William Kalan, director of advertising services for the international division of the Gillette Co., said his company markets certain products globally, but stressed global marketing per se is not the marketer's top priority.

He said while Gillette sometimes acts as sponsor for such global events as the World Cup soccer matches, it doesn't try to create specific "world brands" because it can't be done.

"The transition to global marketing at Gillette tends to be evolutionary," he said. "I don't believe a switch to 'global think' can be accomplished overnight in a complex company like ours."

However, one panel member took a more positive and optimistic view of global marketing.

"I do think that we owe Prof. Levitt a debt," said Kim Armstrong, director of advertising for AT&T Communications. "The world is changing, and he has enlarged our concept of questions that we have to ask ourselves as smart marketers. But what I hear him saying ultimately is, 'Hey, stay on your toes and use your head.' "

She described AT&T as "world class, if you permit me, but global, if you insist."

She said the marketer's products are designed and engineered to be sold anywhere in the world without extensive modification and are compatible with local communications systems.#

CAMPAIGNS BREAKING

Burger King Corp., Miami, begins its $30 million tv campaign for the new, beefed-up Whopper sandwich this week with spots featuring celebrities such as Mr. T, actress Loretta Swit, actors Bruce Weitz and Emmanuel Lewis and Los Angeles Raider Lyle Alzado. Agency is J. Walter Thompson USA, New York (AA, May 13).

Red Lobster Inns, Orlando, Fla., begins a campaign today supporting redesign of its restaurants and repositioning of the chain as a marketer of healthful fresh fish. Media include network and spot tv, general-interest magazines and newspapers. Backer & Spielvogel, New York, handles the campaign (AA, June 10).

Bojangles of America, Charlotte, N.C., breaks a spot tv campaign today claiming that the chicken-and-biscuit chain offers escape from the boredom of other fast-food restaurants. Scali, McCabe, Sloves, New York, handles (AA, May 27).

Pioneer Electronics, Long Beach, Cal., today breaks a $9 million image campaign—the first from new agency Dancer Fitzgerald Sample, Torrance—highlighting people rather than products. The work includes three tv spots and six print ads, all previewed at the Consumer Electronics Show June 2 to 5 (AA, June 6).

Miller Brewing June 15 began airing a network tv spot backing its promotion to raise money for the endangered American eagle (AA, June 3).#

CORRECTIONS & CLARIFICATIONS

- McCollum/Spielman & Co.'s new joint service with NPD Research to predict sales volume for new products is called AC-T/ESP. The name was given incorrectly (AA, May 23, P. 34).
- The *Licensing Book* is published by Adventure Publishing Group. The publisher was reported incorrectly in a chart (AA, June 6, P. 16).
- In the article on fashion models (AA, June 6, P. 5), the top photograph incorrectly was identified as being of Yasmine. The "real" Yasmine is shown here, in a photo courtesy of *Glamour*.

Yasmine

- S.C. Johnson & Son, Racine, Wis., formulates, manufactures and distributes the 10-item Halsa line of shampoos and conditioners; the company does not license the formula, as reported (AA, June 10, P. 4). Also, Edge shaving gel is the No. 1 single shaving product in the U.S.
- Sommer Inc., which recently moved to Englewood Cliffs, N.J., after a fire at its Englewood offices (AA, June 10, P. 40), is relocating again. The new address is 15 Essex Rd., Paramus 07652. The advertising and public relations agency attributed the second move to "last-minute technical problems."#

Merger finale for D'Arcy, B&B

Will create a $2.4 billion giant

By STEWART ALTER

STAMFORD, CONN.—Capping a long merger search, D'Arcy MacManus Masius' 26-member board from around the world met here last Friday and voted to effect the largest agency merger in history—the marriage of D'Arcy and Benton & Bowles, New York.

The unanimous action is subject to the approval of stockholders of both agencies within 90 days.

If all goes well, the two giant agency networks will combine to produce a $2.4 billion global communications company. It will be called D'Arcy Masius Benton & Bowles.

The deal was put on the table for the D'Arcy executives in the Ethan Allen room of the Hotel Stamford Plaza and was followed appropriately by lunch in a room named for financier J.P. Morgan. Interestingly, the sign on the meeting room still had the ampersand between the names MacManus and Masius that the agency discarded a year ago to symbolize it no longer was an agency built on mergers.

As canned music was being piped through the five-story hostelry with an inviting atrium, D'Arcy execs brushed aside reporters who had posted themselves outside the rooms to get word of the historic event. To make sure their words were not overheard, D'Arcy had hotel security people stationed outside the room. The directors avoided questions by slipping through a side door to where lunch was being served.

B&B executives were said by sources to have agreed earlier in the week to the merger.

The deal is the industry's second major merger within a few weeks, following the announcement that Bozell & Jacobs and Kenyon & Eckhardt plan to combine in January (AA, June 17).

Rivaling the B&B/DMM combination in terms of size are only two other acquisitions in recent years: Interpublic Group of Cos.' two-stage, $60.5 million acquisition of SSC&B:Lintas Worldwide, completed in 1982 when it was a $1.2 billion network, and Saatchi & Saatchi's $56.8 million purchase of Compton Communications in 1982, when it had billings of $1 billion.

The merger will end what many have seen as an unusually lengthy DMM search for a partner. DMM chairman-ceo Hal Bay is said to have explored as many as a dozen opportunities. The agency first looked into a sale to such agencies as Doyle Dane Bernbach and Interpublic a few years ago, then decided to keep the agency independent. Mr. Bay, who became ceo in January, 1982, reportedly was in favor of independence, but

Prince makes racquet over new lines

Prince Mfg. marks its first unified tv and print campaign—"Let the games begin." The new campaign, to air during Wimbledon and the U.S. Open, follows introduction of Prince midsize and supersize racquets, men's tenniswear and men's and women's tennis shoes. Waring & LaRosa, New York, handles.

'Confident' United takes direct route

By SCOTT HUME

United Airlines is expected not only to regain its status as the nation's largest commercial air carrier but also to lay claim to status as one of the most adept direct marketers.

Emerging last week from the 29-day strike by its pilots, United announced a series of short-term promotional inducements to lure back lost business. Concurrently, its parent, Elk Grove Village, Ill.-based UAL Inc., announced an agreement to purchase car-rental leader Hertz Corp. from RCA Corp., New York, for $587.5 million.

The airline emerged from the strike confidently, but an exclusive ADVERTISING AGE survey suggests it shouldn't be cocky. The airline may face a tougher time regaining its customer base than its management may believe *(see related story)*.

United execs said the Hertz acquisition had been in the works for several weeks before the pilots' walkout. But the strike, which

Airline strikes out in survey

By SCOTT HUME

CHICAGO—Both United Airlines' management and its pilots' union emerged from the 29-day strike that ended June 14 having tarnished their images in the eyes of consumers, according to an exclusive ADVERTISING AGE survey.

As a result, the airline faces a tough marketing challenge as it endeavors to regain goodwill and business from a passenger base that had made it the nation's largest commercial carrier.

On June 16 and 17, a national sample

Net seers scan sked

By VERNE GAY

NEW YORK—"Hometown," CBS-TV's new yuppie series looking for a niche this fall opposite NBC's decidedly un-yuppie "A-Team," has the look of a hit: Good production, established actors and trendy writing modeled after the yuppie movie hit "The Big Chill."

CBS, however, is predicting "Hometown" will finish last in the time slot's ratings. CBS has told advertisers "Hometown" will generate a paltry 19 share of audience by spring, 1986, leading advertisers to predict the show will fail.

That is just one of the surprises in new fall shows contained in audience estimates written by the *networks* and obtained by ADVERTISING AGE through several sources. CBS expects to lead 8 p.m. (ET) time slots on Sundays (where "Murder, She Wrote" returns with

Lever Bros. brings European shampoo to U.S.

NEW YORK—Lever Bros. has introduced into test in Portland, Ore., Timotei shampoo and conditioner in dry and oily formulas. The product, which is the leading shampoo in Norway, Sweden and Switzerland, is promoted here with the theme "So mild you can wash your hair as often as you like." J. Walter Thompson USA handles.

Family planning to get big ad push

WASHINGTON—Population Institute today announces a three-year, multimedia ad blitz, with first-year spending of $1.8 million, to drive home the importance of population issues and control. The campaign is expected to begin later this summer. The advertising, created in-house, is being underwritten by Turner Broadcasting System, Atlanta.

Banks jumps over shoe furor

By ROBERT RAISSMAN

Triple jumper Willie Banks may be the only active world-record holder without a shoe contract.

Mr. Banks, who set a new world's record in the triple jump (also known as the hop, skip and jump) June 16 at the USA/Mobil national outdoor track and field championships in Indianapolis, accomplished the feat two months after Nike gave him the boot, ending a four-year association.

On the surface, the shoe-contract plight of the 29-year-old would seem to be the result of a marketing strategy that was adopted by athletic-shoe marketers in 1984. With the shoe market—especially the running-shoe market—leveling off, shoe-company executives believed they could cut their losses by centering endorsement on athletes who had star quality (AA, Oct. 18).

For track athletes, the problem was compounded by deals that were made by individuals because they were likely to compete in the '84 Olympic Games. In order to reduce budgets, many athletes were released when their contracts expired following the games.

"We're in the advertising business, whether we accept it or not," said Larry De Freitas, director of track-and-field and running-sports promotions at Mountainside, N.J.-based Adidas. "Every athlete we look at we have to ask the question 'Will they be there in '88?' "

Talk of marketing strategies and Olympic buildups may be legitimate, Mr. Banks said, but his case was different. He had placed a disappointing sixth in the Olympic Games and had not shown the

Claiborne retail link takes Avon past door

By PAT SLOAN

New York—Avon Products and Liz Claiborne Inc. are going into the cosmetics and fragrance business together in a 50/50 joint venture to be called Liz Claiborne Cosmetics, marking the first time Avon has been involved with retail stores.

In a separate announcement, Avon announced last week it has formed a new subsidiary, Parfums Phenix, to market new Deneuve fragrance, named for actress Catherine Deneuve. The fragrance is expected to be introduced in early 1986 at about the same time the Claiborne products are due.

Industry observers said the Deneuve perfume, priced at $165 an ounce and to be sold through direct-response mail and phone order, according to a spokesman, will enable Avon to reach a more upscale customer than now is served by its door-to-door sales reps. The venture with Claiborne also would hit a higher-income consumer and help Avon learn the retail business.

However, an Avon spokesman denied the partnership in any way was tied to Avon's branching into retail. He said, "We have backed off retail," referring to Avon's announcement last fall it was testing shopping-mall kiosks and considering retail boutiques because, as chairman Hicks Waldron then said, direct-sales force recruitment couldn't be expanded sufficiently (AA, Oct. 4).

Saying "to go into retail with the Avon name would be death," the spokesman said the kiosks are a dead issue, at least for 1985 and that "nothing is happening with the boutiques."

At the same conference last fall, Avon announced plans to move into direct response. But the Deneuve fragrance marketing system, presumably to be patterned after Parfums Giorgio's successful use of direct response, is the only product now reflecting those plans. Parfums Phenix will be headquartered in Paris and maintain a sales and marketing office in New York. Agency for Deneuve is MCA Advertising. When Avon announced its new Imari fragrance last month it said MCA had been assigned a special project but would not say if the assignment was related to the then-rumored Deneuve fragrance (AA, May 20).

The fragrance will be distributed internationally and in the U.S., with Ms. Deneuve, long associated with Chanel and later American Home Products' Youth Guarde, taking an active role in marketing and packaging. A president for the subsidiary has not been named but candidates are being interviewed. Besides

Fast-food, flicks early leaders in tv upfront deals

By VERNE GAY

New York—The three tv networks claimed to have advertiser upfront plan requests totaling nearly $1.5 billion as the upfront buying season began to heat up last week. Only a few isolated deals had been made, however.

Sources said fast-food advertisers are expected to secure upfront positions next, perhaps as early as midweek. Sources also noted that McDonald's Corp., which was one of the fastest-growing network advertisers in 1984, was weighing in with a larger prime time upfront commitment in 1985-86 than last year's. Other fast-food companies, including Burger King and Wendy's, also are expected to make sizable upfront commitments this week.

The prime time upfront pace picked up following upfront commitments made by several motion-picture advertisers. Movie advertisers normally move early to secure inventory on Thursday evenings for weekend movie premieres. The buyers were not known, but the top network movie advertisers in 1984 were Columbia Pictures, MCA/Universal, MGM/UA, Orion and Warner Bros. Sources noted Twentieth Century Fox had yet to make a

Cannes. Up until a year ago I thought of it as a city in France whose name I was never quite certain how to pronounce and whose purpose in life was to minister to the more or less extravagant and jaded tastes of the very rich and famous.

Merely to say the name—let alone pronounce it—called up pictures in my mind of endless white beaches strewn with tanned bodies, many of whom were selectively half-clad.

So when I was invited to be a judge at the 31st International Advertising Film Festival at Cannes last year, I decided I had no time for this kind of self-indulgence.

But Terry Laughren, president of Screenvision, is a persistent fellow and finally, in response to whatever blandishments he held out to me at the time, I agreed to serve. And having served—even before leaving Cannes—I made it a point to schedule myself back for this year's festival.

And as you read this, back I am—reasonably confident that Cannes is pronounced "can," unless you are British and insist on pronouncing it "con." Not only am I back in Cannes, but I have brought with me a full complement of those who preside over the creative destiny of our agency throughout the world.

Why this reversal of my earlier negative mindset? Let me try to explain—and to do so, I must first set the scene for you on my first arrival at Cannes last June.

I remember being whisked from the airport to my hotel, my only vision of the aforementioned beaches and bodies a peripheral one. Before I knew it, I

Nonalcoholic beer brands come ashore

By GAY JERVEY

With sagging sales and anti-alcohol pressure groups plaguing the beer industry, a distant cousin—nonalcoholic beer—is becoming the new item of choice for a growing number of beer importers.

All Brand Importers, the New York-based division of Nabisco Brands that markets such brews as Moosehead Canadian and Foster's Lager, recently shook hands with Binding Breweries, Frankfurt, in an agreement that will allow All Brand to market Clausthaler, a nonalcoholic beer that is a runaway hit in Germany and elsewhere in Europe.

No-alcohol beers have less than 0.5% alcohol content per serving.

Meanwhile, G. Heileman Brewing Co., La Crosse, Wis., last month launched Black Label Non-Alcoholic Malt Beverage, the first no-alcohol line extension of a regular-strength beer brand (AA, May 27). Heileman also markets the nonalcoholic Kingsbury, Schmidt Select and Zing brands.

At least one other domestic contender, Stroh Brewery Co., Detroit, has termed its move into the budding no-alcohol category "a definite maybe."

"Stroh is investigating all kinds of products, and one of them is a no-alcohol beer," a company spokesman said.

All Brand's introduction follows a long, hard corporate look at the

CBS looks again at Miller race ad

By STEVEN W. COLFORD

WASHINGTON—Miller Brewing Co.'s 30-second spot featuring Indy 500 winner Danny Sullivan has raised concerns at CBS, where the commercial is under review by its commercial-clearance department.

CBS moved after a report that the Bureau of Alcohol, Tobacco & Firearms believes Milwaukee-based Miller's print and broadcast campaign, by J. Walter Thompson USA, New York, violates federal regulations barring use of active athletes to promote an alcoholic product (AA, June 10).

It is CBS' third look at the Miller ads; the network said it already persuaded the brewer to edit its original montage of racing clips. ABC and NBC had given the commercial a clean bill of health.

NBC's Richard Gitter, vp for broadcast standards, called the spot a "corporate ad, not a product endorsement." At ABC, a spokesman said the Miller spot and a similar Anheuser-Busch ad for Budweiser, featuring race driver Darrell Waltrip, "were both cleared and are okay to air."

CBS declined to speculate on whether its review might lead to pulling the spot.

Meanwhile, BATF last week resorted to phone calls to Miller and A-B, asking both breweries when the agency might expect responses to its initial notices mailed in mid-May.

"By now, we would have hoped—we would have expected—to have heard something from them," Bruce Weininger, chief of BATF's industry-compliance division, said last week before the agency's follow-up phone inquiries.

Miller's Al Easton, vp-corporate

AMC loads up Comanche

By RAYMOND SERAFIN

HOOD RIVER, ORE.—American Motors Corp. is counting on its new line of Jeep Comanche compact pickup trucks to carry a heavy marketing load in 1986, making the company less vulnerable to competitive pressures in the shrinking small-car segment.

Jeep's load will increase if financially ailing AMC closes its Kenosha, Wis., assembly plant for Renault Alliance and Encore automobiles, as it has threatened to do if the United Auto Workers union doesn't agree to wage and other concessions by June 28.

The Kenosha plant has the highest labor costs in the country, AMC says.

The Jeep Comanche, which will be available in both two-wheel and four-wheel drive, is a key part of AMC's strategy of reducing its dependence on a single market segment.

Jeep's only pickup trucks until now have been full-size, four-wheel-drive models. Compacts are expected to account for 52%, or a little more than 1 million vehicles, of the pickup market in 1986, with two-wheel drive accounting for 71% of compact pickup sales, said Joseph Cappy, group vp-sales and marketing.

The Comanche over-all will expand Jeep's coverage of the 3.5 million-vehicle light-truck market to 50%, compared with only 16% previously.

AMC officials are predicting first-year sales of 50,000 units for Comanche, but privately hope to surpass that

Atari has go-it-alone plan, but pines for Ally

By CLEVELAND HORTON

Atari Corp., eager to market its newest personal computer in the U.S. but unable to find an agency willing to "make an investment" in the struggling operation, is prepared to undertake the creative work itself.

The Sunnyvale, Cal.-based company just lost Goodby, Berlin & Silverstein, San Francisco, as its agency (AA, June 10) and is wooing Ally & Gargano, New York. Atari chairman Jack Tramiel hired A&G when he headed Commodore Business Machines; he later fired the agency as a cost-cutting mesasure.

A&G chairman Amil Gargano confirmed he had a "cordial" meeting with Mr. Tramiel this month. "Certainly, based on our past experience [with Mr. Tramiel], any relationship would have to have certain [financial] stipulations," Mr. Gargano said.

Atari vp-marketing James Copland stressed that Atari can handle its own print and radio advertising. "I think we have some finely talented people in-house," he said, "myself included."

On tv advertising, Mr. Copland hedged. "Tv is somewhat more complicated," he said.

Mr. Copland said CPM Inc., Chicago, will continue to handle media buying.

Atari, unable to convince major mass merchandisers and computer specialty stores to handle its lines, recently began recruiting manufacturers' representatives to handle the new ST model, due in July. These reps will attempt to find 500 retail outlets for Atari's products by July 8, Mr. Copland projected, increasing that number to 2,000 by the end of August.#

Saatchi to move to Soho

By STEWART ALTER

NEW YORK—Saatchi & Saatchi Compton Worldwide will move its headquarters downtown within two years, making it the first major agency to locate its offices in the Hudson Square-Soho area.

The agency will move 1,200 employes to its own, as-yet-unbuilt 18-story building that will bear the S&S/Compton name. S&SCW and the companies in the Saatchi & Saatchi Compton Group, consisting of Rumrill-Hoyt; Klemtner Advertising; Fairfax Advertising; Cadwell-Davis Partners; Mayo-Infurna,

(Continued on Page 97)

Newsmakers harvest consumer awareness

By SCOTT HUME

It's no secret that when advertising becomes a news event, consumer awareness of the advertising can soar. Wendy's "Where's the beef?" campaign has become the classic example of that synergism.

Similarly, advertising awareness can jump when an *advertiser* becomes news. Results from ADVERTISING AGE's adWatch survey conducted last month confirm this: Among those with the greatest changes in consumer advertising awareness last month were Coca-Cola, United Airlines and E.F. Hutton.

Not surprisingly, the most dramatic example is Coca-Cola. Its announcement April 23 it would change Coke's 100-year-old formula stili is being talked about by students of marketing and devotees of the original formula (AA, April 22, *et seq.*). The "new" Coke quickly became the most talked about new product since G.D. Searle & Co. introduced NutraSweet. Every major news organization has carried several stories about the change and the reactions from consumers and Coke's rivals in the soft-drink industry.

As the new formula rolled into national distribution, Coca-Cola flooded the nation's newspapers and airwaves with advertising touting Coke's new taste. Consumers couldn't help but notice.

Coca-Cola's advertising last month logged the best recall score of any advertiser. When a national sample of 1,251 adults was asked to name the first advertising that came to mind from all they had seen, heard or read in the previous 30 days, 11.3% named Coke. That not only made Coke No. 1 for May, but it better than doubled Coke's over-all ad recall score from April (5.5%), when it also was No. 1.

Repeating as the advertiser with the second-best ad recall score was Pepsi, which quickly cast Coke's advertising change as an affirmation of the superior taste of Pepsi. Pepsi's advertising came to mind first for 6.8% of the respondents, nearly double its April recall share (3.8%).

Remaining members of the Top 10 in ad recall last month were, in descending order from No. 3, McDonald's, Miller/Miller Lite, Budweiser, Ford, Wendy's, Burger King, Chevrolet and AT&T.

The reformulation's impact on awareness of Coke's advertising is even more dramatic in head-to-head comparison with Pepsi and its smaller challengers. When respondents were asked specifically to name the soft-drink advertising that first came to mind, 42.9% named Coke, 32.2% said Pepsi.

Coke's share of first mentions was up 14.3 percentage points since April, when its 28.6% share had put it second to Pepsi's 31.4%. Coke's 42.9% in May also is the highest share of first mentions any marketer has received in the soft-drink category since adWatch was inaugurated three years ago.

Most hurt by the attention given Coke and Pepsi was 7UP. While it remains No. 3 in recall, its share of first mentions dipped from 4.9% in April to 2.5% in June. Coca-Cola's Diet Coke moved up from No. 5 in April (when it was named first by 3.1% of the sample) to No. 4 in May, even though its share declined to 2.2%.

The surprise in the May sample is the first appearance of Pepsi-Cola's newest soft-drink, Slice. Its advertising received 1.7% of first mentions, good enough for the No. 5 spot.

AdWatch is a joint project of ADVERTISING AGE and SRI Research Center, Lincoln, Neb. Ad awareness is measured by asking a nationally projectable sample of consumers to name advertising in a variety of product categories that first comes to mind from all seen, heard or read in the previous 30 days.

In May, 1,251 adults were polled by telephone. Under adWatch methodology, an increase or decrease of 2.8 percentage points is considered statistically significant and attributable to more than sample variation.

United Airlines will provide an interesting test of whether the good news the pilots' strike has ended will affect consumer awareness of advertising as sharply as did last month's bad news that a strike was on. Despite a cutback in media advertising after the pilots walked out, awareness of the United advertising that did appear showed an increase.

In May, 18.5% of respondents named United when asked for the first airline advertising that came to mind, tops in the category. That is a 5.5 percentage-point increase from April's No. 2-ranked 13% share. The gain came at the expense of American Airlines, which fell 4.5 points to 10.5% in ad awareness during May.

Also losing share was Eastern, ad awareness of which dipped 2 points from 8.2% in April to 6.2% in May, dropping it from the No. 3 position to No. 6. Moving up to No. 3 in May was Delta, with 7.8% of first mentions.

E.F. Hutton's advertising has been talking for years, and people have been listening. But they have watched, listened and read more closely since May 2, when the company pleaded guilty to fraud charges involving drafts on uncollected funds.

Asked to name the first financial-services institution's advertising that came to mind, 6.9% last month recalled E.F. Hutton's advertising, more than twice the 3% share of first mentions it received in April.

Merrill Lynch's share remained 4.4%, but it dropped to the No. 2 spot. Bank of America took third with 1.4% last month.

Among other significant changes last month:

- Anheuser-Busch's Budweiser brand regained the No. 1 spot in the **beer** category, a lead it had relinquished last month to Coors. "This Bud's for you" came to mind first for 13.6% of the sample, up 2.8 points from 10.8% in April.

  Coors May share was 11.3% of first mentions, down from 12.5% the previous month. Miller remained No. 3 with 9.8% in May.
- Declining awareness for its Liquid Tide line extension continues to depress Tide's score in the **laundry products** category. In May, 27.4% of the sample named Tide when asked for the first laundry-product advertising that came to mind. That's a 5.4 point drop since April and nearly a 10 point drop since February.

  Tide retained a healthy lead over ads for the product in the No. 2 spot, its own Cheer brand (5.2%), and the No. 3 brand, All (3%).
- Also continuing to slide is Apple in the **computer** category. In May, 29.7% of respondents said Apple's advertising first came to mind, compared with 33.9% in April and 39.2% in March.

  IBM remained No. 2 last month with 14.2% of first mentions, down from 15.7% in April. Commodore is still No. 3, but may have benefited from Apple's slippage. Its 6.6% share in May is 2 points better than April's 4.6%.
- Keep an eye on the **wine** category because the coolers are coming! California Cooler, which last month broke a humorous campaign, themed "One more reason to hate California," has made its first significant appearance in adWatch. Its 2.2% share of first mentions last month was only good enough for the No. 4 spot, but it wouldn't take too much to dominate recall for wine advertising. Leader Riunite came to mind for 12.2% of respondents; No. 2 Gallo was named first by 6.8%. ∎

For additional information or data, contact: Gary Gabelhouse, SRI Research Center, 301 S. 68th St., Lincoln, Neb. 68506. Phone: (402) 489-0351.

May winners & losers

INTERNATIONAL AGENCY/CLIENT REPORT

How to read the charts

The charts in this section are based on the following criteria:

- Clients must be in three or more countries by the end of 1984.
- Client business must add up to an aggregate of $3 million.
- An asterisk (*) notes that an agency included affiliated (non-equity) shops because of their importance to the agency's business.

The country list is not a complete rundown of each agency's shops worldwide.

Some agencies did not cooperate. In such cases, Advertising Age collected the data independently from its correspondents and gave those agencies the opportunity to comment.#

N W Ayer

N W Ayer, New York, had non-U.S. gross income in 1984 of $13.5 million, 13% of total ($104.7 million). Non-U.S. billings were $99.2 million, 13% of total ($751.7 million).

Ayer owns majority or maximum-allowable stock in 11 agencies and minority interest in 36. The network is affiliated with 20 agencies in which it owns no equity. In 1984, Ayer purchased 30% of Francis Lim, Zulkifli & Ayer in Kuala Lumpur, Malaysia.

In 1974 international business generated gross income of $900,000 on billings of $6 million. That was 3% of total gross income of $27.6 million on billings of $190.3 million. By 1979, non-U.S. gross income had grown to $5.9 million on billings of $39.5 million. That was 9% of total gross income of $63.9 million on billings of $428.4 million.

In 1984, major international business won included Bristol-Myers Co. (Germany) and the U.S. Travel & Tourism Administration. Accounts lost included AT&T Communications overseas, Rolls-Royce, CN Rail and Johnnie Walker (Americas). Ayer also resigned the Chemical Bank account.

Top international executives: Louis Hagopian, chairman-ceo; Jerry Siano, vice-chairman, worldwide creative director; Jerry Jordan, president, intl.; John Roedig, senior vp-finance; Bruce MacDonald, senior vp-managing director, Europe/Middle East; David Dodd, senior vp-managing director, Asia/Pacific/Latin America; Robert Young, vp-financial director.#

Ted Bates Worldwide

Ted Bates Worldwide, New York, in 1984 had non-U.S. gross income of $161.1 million, 38% of total gross income of $424.4 million. Non-U.S. billings were $1.1 billion, 39.3% of total billings of $2.8 billion.

The network consists of 99 agencies in 45 countries. Agencies added to the network in 1984: Delacroix (Puteaux, France) and Delvico (Madrid), and affiliated agencies, Korea First (Seoul) and Rediffusion (Bombay).

In 1974, non-U.S. gross income was $45.7 million. That was 56.6% of total gross income of $80.8 million. By 1979, non-U.S. gross income reached $82.5 million, or 45.6% of total gross income of $181 million.

The decline was due to past U.S. acquisitions of Sawdon & Bess, McDonald & Little and William Esty, which have little international volume.

Major international business won in 1984 included Olivetti ($10 million), Mars ($5 million), Colgate-Palmolive Co. ($3 million) and Nissan ($6 million). Other business won included Match Box Toys, Selley's Stores, American Cyanamid Co. (Brazil, Venezuela) and Avis (U.S.). Business lost included Cadbury Schweppes, Mobil Oil (U.S.) and Beiersdorf (U.S.).

Top international executives: Robert Jacoby, chairman; John Hoyne,

BBDO International

BBDO International, New York, had non-U.S. gross income in 1984 of $105 million, 30.9% of total gross income of $340 million.

The network covers 40 countries and 80 agencies outside the U.S., and BBDO holds equity in 73 agencies.

In 1974, non-U.S. gross income was $22.7 million—29.3% of total ($77.6 million). By 1979, non-U.S. gross income had grown to $53.5 million—36.9% of total. Through a new subsidiary, Asatsu/BBDO/Clemenger, the network established an association with LG Advertising in Seoul and Stentor Advertising in Taipei. Early in 1985, BBDO signed an affiliation agreement with R.K. Swamy Advertising in Madras, India.

In 1984, BBDO gained Kuwait Petroleum internationally, and increased business with Rothmans, Gillette Co., Henkel AG, Scott Paper Co., Delta Air Lines, Bayer, Frito-Lay, Wm. Wrigley Jr. Co., Wella and Apple Computer. Losses included Del Monte, Agfa-Gevaert, PepsiCo and N.V. Philips.

Top BBDO International execs: Allen Rosenshine, president-ceo; Bruce Crawford, chairman; Willi Schalk, exec vp.#

Benton & Bowles

Benton & Bowles, New York, had 1984 non-U.S. gross income of $52.1 million, 32% of total gross income of $163.2 million.

B&B holds majority or maximum-allowable interest in 11 agencies, minority interest in four agencies and is affiliated with 14 agencies.

In 1984, Boebel, Adam/B&B, Frankfurt and China Commercial Advertising Agency, Taipei, were added to the network, while an affiliation with Abrinicio in Lisbon was ended.

In 1974, B&B's non-U.S. gross income was $12.4 million—32.3% of the total ($38.4 million). In 1979, non-U.S. gross income was $25.4 million—25.6% of total ($99.2 million).

Major international business won in 1984 included ATT Philips, Finnish Tourist Board, Lee Jeans (Canada, Denmark, Japan) and Cartier. Losses included Emery and Nabisco.

Top international execs: John S. Bowen, chairman-ceo; Bernard Kanner, senior vp-director intl. operations; John Ferries, managing director, Europe.#

Leo Burnett Co.

Leo Burnett Co., Chicago, had non-U.S. gross income in 1984 of $90.3 million, 35.6% of total gross income of $253.5 million.

Burnett's international network consists of 42 agencies in 33 countries, and it owns majority or maximum-allowable stock in 40 agencies. In 1984, the agency added Leo Burnett/Taiwan in Taipei to its network.

In 1974, non-U.S. gross income was $38.9 million, 42% of total ($92.4 million). By 1979, income had grown to $48 million, 34% of total gross income ($142.5 million).

Major new clients in 1984 included Hewlett-Packard, Kraft and Beatrice. Losses (some in 1985) included Nestle in the U.K., Puerto Rico, Dominican Republic, France, Hong Kong, Singapore and Malaysia.

Top international executives: Wayne Wiggins, vice-chairman, chief administrator/financial officer; Robert Barocci, president, Leo Burnett Intl.; Joseph Novas, vice-chairman, Leo Burnett Intl. and John C. Kraft, exec vp-finance/administration.#

Dancer Fitzgerald Sample

Dancer Fitzgerald Sample, New York, had non-U.S. gross income in 1984 of $4.7 million, 4.1% of total gross income of $113.9 million.

The DFS network consists of 33 agencies in 31 countries.

Outside the U.S., DFS has equity in two agencies in Japan (NDC/DFS, 50%, and Yomiko DFS International, 49%) and one in Australia (DFS Australia, 50%).

In 1984, DFS sold its European operation to Dorland Advertising. The operation included 13 agencies that in 1984 accounted for $44.2 million in gross income on billings of $308.6 million. As part of the sale agreement, DFS retained a non-equity affiliation with the European group, forming Dorland-DFS International.

If total gross income and billings of all DFS foreign holdings (including Dorland-DFS International) were included, the network in 1984 would have had non-U.S. gross income of $79.6 million—42.2% of total gross income of $188.8 million.

In 1974, DFS had estimated non-U.S. gross income of $5.4 million—15% of total gross income of $36.1 million.

In 1979, non-U.S. gross income was $8.6 million—12.6% of total gross income of $68.4 million.

Major international business won in 1984 included London Rubber Co., CPC International (U.S., Japan), Toyota (Brazil, Canada), Hewlett-Packard Co. (U.S., Brazil) and Shulton toiletries (U.K.). Losses included Duracell (Argentina, Brazil, Denmark, Sweden), Beneficial Finance (U.K.), Hanes Group (Middle East) and Wendy's International (Italy, Spain, South Africa).

Top DFS International execs: William McC. Vickery, chairman, and Robert Eagan, senior vp-manager. Neil Kennedy is group intl. director, Dorland-DFS International, and Philip Byford is managing director, Dorland-DFS International.#

D'Arcy MacManus Masius Worldwide

D'Arcy MacManus Masius Worldwide, New York, had non-U.S. gross income in 1984 of $91.7 million, 46.2% of total gross income of $198.6 million.

D'Arcy owns majority or maximum-allowable stock in 51 agencies and minority interest in eight, and is affiliated with 13 agencies in which it holds no equity.

In 1974, non-U.S. gross income was $18 million—35.8% of total gross income of $50.3 million. By 1979, non-U.S. gross income had risen to $44.3 million—43.8% of total gross income of $101.2 million.

New agencies added to the network in 1984 included DMM Ipsen & Parmo in Copenhagen (51% interest), DMM Broberg & Eklind, Oslo (100%), and Man-Nen-Sha, Osaka (10%).

Major international business billing more than $3 million gained in 1984 included Lotus Software, Horizon Holidays (U.K.) and Knorr (Germany). Lee Cooper jeans was the agency's major international loss in 1984, pulling out of seven shops in Europe.

Top international execs: Hal Bay, chairman-ceo; P.T. Redsell, chief operating officer-international; J. Balson, chief operating officer-North America; Craig D. Brown, exec vp-chief financial officer.#

Doyle Dane Bernbach International

Doyle Dane Bernbach International, New York, had non-U.S. gross income in 1984 of $64.2 million—29% of total gross income of $218.3 million.

The network consists of 54 agen-

cies in 19 countries including the U.S., and DDB owns majority or maximum-allowable stock in all agencies. DDB also is affiliated with 15 agencies in which it holds no equity.

In 1984, DDB acquired a 40% interest in Brown Christensen/DDB in New Zealand. In 1974, non-U.S. gross income was $13.1 million, 25% of total gross income of $53.3 million. By 1979, non-U.S. gross income had reached $31.9 million, 31% of total gross income of $104 million.

International business won in 1984, billing more than $3 million, including Bristol-Myers Co., Clairol and IBM.

Business lost included Atari (U.S., Belgium, Switzerland, U.K., Japan, Hong Kong, Singapore), Porsche (U.S., Netherlands, Hong Kong) and Cote d'Or (Netherlands, Spain).

Top international execs: Joseph Daly, chairman; Barry Loughrane, president-ceo; John Bernbach, president-intl.; Nicolai von Dellingshausen, president, DDB Europe; Steven Burton, senior vp, cfo-intl. division.#

DYR Worldwide

DYR Worldwide, New York, a 50-50 joint venture between Young & Rubicam and Tokyo-based Dentsu Inc., had 1984 non-U.S. gross income of $15.7 million—42.5% of total gross income of $36.9 million.

The network, which opened its first shop Nov. 1, 1981, had 1983 non-U.S. gross income of $12 million—40.8% of total gross income of $29.4 million.

The network consists of eight agencies in seven countries and is concentrated in the Pacific. DYR also is purchasing an equity position in R.W. Eggert in Duesseldorf.

In 1984, the DYR network won non-U.S. business from Colgate-Palmolive Co. (Japan, Malaysia), Beatrice Cos. (Australia) and Johnson & Johnson (Japan, Hong Kong).

Top international executives: Tetsuro Umegaki, chairman-Tokyo (retiring June 28); Alexander Brody, president-New York; Jerry Roberts, chairman-DYR USA; Shunya Hashiguchi, president-DYR Japan, and managing directors Bo Seifert (Hong Kong), David Harrison (Malaysia), Takeshi Inamori (Singapore) and Teddy Palasthira (Thailand).

Young & Rubicam, which has an extensive international network apart from its holdings in DYR, is profiled separately in this report. Dentsu has only one full-service office overseas (outside of the DYR network), located in Bangkok. Major clients include Toyota, KAO, Bridgestone, Glico and Daimaru department stores.#

Eurocom Group

Eurocom Group, Paris, had gross income of $35.1 million from sources outside France in 1984—33.7% of total gross income of $104.3 million.

Eurocom owns majority or maximum-allowable stock in 16 agencies and is affiliated with eight.

Eurocom's gross income and billings include only financial results from those agencies that are part of Eurocom and not affiliates of Eurocom's parent, the Univas Network. Eurocom foreign shops include those in the HCM network (formed in September in a merger of Eurocom's Havas Conseil subsidiary in Paris with Young & Rubicam's New York-based Marsteller). Eurocom holds a 51% interest in HCM, while Y&R holds 49%. Eurocom also includes ATA Univas in Italy (60% interest) and UNICOM in Switzerland (80%). Other nonequity agencies are included under the larger Eurocom network banner.

If total (rather than percentage ownership) gross income of all Eurocom network foreign holdings (including Eurocom Group) is considered, the network would have gross income

from sources outside France of $96 million—49.1% of total gross income of $195.5 million.

International business billing more than $3 million won in 1984 included Buitoni Foods and Meridien.

The network's top international exec is Bernard Brochand, general manager-exec vp, Eurocom Group.

In the accompanying chart, the client list is exclusive of accounts handled by HCM, listed separately in this report.#

Foote, Cone & Belding

Foote, Cone & Belding, Chicago, in 1984 had non-U.S. gross income of $71.7 million—26.7% of total gross income of $268.5 million.

FCB holds majority or maximum-allowable interest in 46 agencies, minority interest in 21 agencies and is affiliated with 35 agencies in which it holds no equity.

FCB's non-U.S. gross income in 1974 was $15.5 million—30.3% of total gross income of $51.2 million. By 1979, non-U.S. gross income reached $43.9 million—31.7% of total gross income of $138.5 million.

In 1984, FCB acquired 100% ownership in NCK Organization Ltd., with offices in Europe, Canada and the Caribbean (advertising). It acquired majority ownership in Siboney Group of Agencies, Latin America and New York (advertising), and minority ownership in Mainstream Advertising Ltd., Auckland; Basic Advertising, Manila; Shorter Pty. Ltd., Perth (advertising), and Partnership in Advertising & Marketing, Johannesburg.

International business billing more than $3 million won in 1984 included Motta (Italy), Iberia Airlines, ComputerLand, Gillette Co. (Europe), H.J. Heinz Co. soups (U.K.), Mazda (Canada), Rothmans (Australia) and ICI (Germany, Portugal).

Also added in 1984 were accounts with Matsushita, Monsanto Co. and Nestle Foods (Ecuador, Trinidad), gained with the acquisition of Siboney in Latin America.

Major international business lost by FCB included Cinzano (Greece, Italy, Spain, U.K.) and Unilever (Germany, Italy).

Top international executives: Norman Brown, president-ceo, FCB Communications; William Kiely, chairman, FCB/Europe; Emine Messiqua, president, FCB/Europe; Antonio Beja, president, FCB/Latin America/Pacific/South Africa, and exec vps Michael Woodward (Europe), James Tucker (Pacific) and Jose Manuel Cubas (Latin America).#

GGK

GGK, Basle, in 1984 had gross income from sources outside Switzerland of $27.5 million—86.8% of total gross income of $31.7 million.

GGK owns maximum allowable interest in 14 shops in 10 countries. New agencies added to the network in 1984 included GGK Paris, GGK Barcelona and GGK Madrid, all wholly owned.

Last year the network also added LPGP/GGK New York and GGK London, in which GGK owns a majority interest.

In 1974, GGK's non-Swiss gross income was $6.1 million—76.3% of total gross income of $8 million.

By 1979, international gross income was $17.5 million—81.4% of total gross income of $21.5 million. Major international business added in 1984 included Porsche Design ($3.2 million) and Henkel AG ($3 million).

Top international executives: Wolf Rogosky, president, GGK International; Gary Washer, GGK London (who in 1984 became international new business director), and Volkmar Gunther, GGK Duesseldorf, international financial director.#

Grey Advertising

Grey Advertising, New York, in 1984 had non-U.S. gross income of $99 million—39% of total gross income of $254.1 million.

The Grey network consists of 52 agencies in 27 countries including the U.S., plus 20 affiliated agencies.

In 1974, Grey's non-U.S. gross income was $25.9 million—37.5% of total gross income of $69 million. In 1979, non-U.S. gross income was $70.5 million—48.6% of total gross income of $145.1 million.

New agencies added in 1984 included Dalziel Harper & Grey, Melbourne; Mackay Dalziel Harper & Grey, Canberra; Casares, Grey & Asociados, Buenos Aires; Ideas y Hechos/Grey, Mexico City; CNP & Grey, Lima; ARC-Everetts International, London; Rafael Vegas, Caracas, and Grey Direct agencies in Brussels, Copenhagen, Geneva, Paris, Stockholm and Vienna.

Major international business gains in 1984 included Televideo Systems (Austria, Denmark, France, Germany, Japan, Netherlands, Norway, Sweden, Switzerland), Beecham (France, Mexico, Switzerland, U.K.), Intercontinental Hotels (Australia, Canada, France, Greece, Venezuela), General Mills Toys (Austria, Italy), Revlon (Hong Kong, Singapore, Taiwan) and Procter & Gamble Co. (Denmark).

Top international executives: Edward Meyer, chairman-president; Anthony Thurston, general manager-international and area directors Norman Vale (Europe, Africa, Middle East), Frank Clarke (Americas) and T. Bruce McDonald (Pacific).#

Hakuhodo Inc.

Hakuhodo Inc., Japan, had non-Japanese gross income in 1984 of $10.7 million—5.4% of total gross income of $198 million.

Hakuhodo holds majority or maximum-allowable interest in six agencies outside Japan and has affiliate (non-equity) relationships with seven.

In 1974, Hakuhodo's international gross income was $920,000—2.1% of total gross income of $43 million. By 1979, international gross income had reached $4.9 million—3.8% of total gross income of $127 million.

Major multinational clients listed on the accompanying chart, also listed in 1983, include Ajinomoto, Citizen, KAO and Nippon Electric.

The rest are either expanded or new accounts.

Top international execs: Michitaka Kondo, chairman-ceo; Ritsuo Isobe, president.#

HCM

HCM, New York, created by the September merger of the Paris-based agency Havas Conseil part of the Eurocom network, with Young & Rubicam's New York-based Marsteller, in 1984 had non-U.S. gross income of $41 million, 54.4% of total gross income of $75.3 million.

Havas Conseil accounted for the bulk of international billings.

HCM holds majority or maximum-allowable stock in all its 18 agencies.

For comparison purposes, combined non-U.S. gross income for Havas Conseil and Marsteller in 1974 would have been $15.8 million—49.1% of total gross income of $32.2 million. In 1979, non-U.S. gross income would have totaled $27.8 million—42.4% of total gross income of $65.6 million.

Y&R and Eurocom are listed separately in this report, and accounts held by HCM are not included in the account listings of those agencies.

International business billing more than $3 million won in 1984 included Jacobs Suchard, N.V. Philips, BSN Gervais Danone and Meridien.

Top international executives: Rob-

Kenyon & Eckhardt

Kenyon & Eckhardt, New York, in 1984 had non-U.S. gross income of $15.1 million, 26.7% of total gross income of $56.4 million. Non-U.S. billings were $101.1 million, 26.9% of total billings of $376.2 million.

K&E holds majority or maximum-allowable stock in 12 agencies, minority interest in 16 agencies and is affiliated with 17 agencies in which it holds no equity. In 1984, K&E de Espana, Madrid was added. In 1974, non-U.S. gross income was $12.6 million—45.7% of total gross income of $27.6 million. By 1979, non-U.S. gross income was $15.8 million—32.1% of total gross income of $49.2 million.

In 1984, the network added Holiday Inns (U.K.) and lost the Puerto Rico Industrial Development account (France, Puerto Rico, Spain, U.S.).

Top international executives: Leo-Arthur Kelmenson, chairman-ceo; Murray Smith, exec vp; Peter Handley, senior vp-area director, Europe; Michael Anderson, senior vp-area director, Asia/Pacific; Andre de Louckx, senior vp-area director, Latin America/Caribbean; Shawki Safieddine, vp-area director, Middle East, and Michael Sampietro, senior vp-international financial controller.#

Ketchum International

Ketchum International, Pittsburgh, had non-U.S. gross income of $7.8 million, or 12.8% of total gross income of $60.9 million in 1984.

Ketchum owns majority or maximum-allowable interest in three non-U.S. agencies and minority interest in three. In 1984, the agency added AAP Ketchum in London. Ketchum also is affiliated with 40 agencies in which it holds no equity.

In 1974, non-U.S. gross income was $5.4 million—23.8% of total gross income of $22.8 million. By 1979, non-U.S. gross income had dipped to $5 million—14.1% of total gross income of $35.6 million.

The network added Miller Brewing's Lite beer (Japan) as a client in 1984; it lost Rockwell International and Caesar's Boardwalk Regency.

The company's top international executive is Thomas Smith, president of Ketchum International, who moved in 1984 from president of Ketchum Advertising, Pittsburgh. He replaced Joseph Coogle, now exec-vp of Ketchum Communications, the parent company.#

Marschalk Campbell-Ewald Worldwide

Marschalk Campbell-Ewald Worldwide, New York, in 1984 had non-U.S. gross income of $28.1 million, 20% of total gross income of $140.3 million.

MCE holds majority or maximum-allowable interest in 23 agencies, minority interest in 18 agencies and is affiliated with 11 agencies in which it holds no equity. In 1984, Pirella Goettsche in Italy was added to the network as a wholly owned agency.

MCE was a 1980 combination of Marschalk and Campbell-Ewald Co.

For comparison purposes, the combined business of the two agencies in 1974 would have totaled estimated gross income of $26.8 million—all in the U.S. By 1979, non-U.S. gross income would have totaled $44.7 million—44.3% of total gross income of $100.9 million.

Major international business won in 1984 included new assignments for Coca-Cola Co. (Mexico, Netherlands,

South Africa) and for Henkel AG (Canada, Germany, South Africa, Spain). Major losses included Goodyear Tire & Rubber Co., N.V. Philips and R.J. Reynolds Industries/Heublein (Belgium, France, Germany).

Top international executives: Richard O'Connor, chairman-ceo, MCE Worldwide; Lester Delano, president-chief operating officer, MCE Worldwide, and Edward Palevich, exec vp-international.#

McCann-Erickson Worldwide

McCann-Erickson Worldwide, New York, had non-U.S. gross income in 1984 of $206.7 million, 63.5% of total gross income of $325.2 million.

McCann-Erickson owns majority or maximum-allowable stock in 90 agencies and is affiliated with 22 agencies. In 1984, McCann added two wholly owned agencies, Clarin in Madrid and de Villiers in Johannesburg, while McCann-Erickson/Zambia in Lusaka was sold to Young & Rubicam.

In 1974, non-U.S. gross income was $73.6 million—69.9% of total gross income of $105.4 million. By 1979, non-U.S. gross income reached $180.9 million—72.3% of total gross income of $250.4 million.

Clients represented in 20 or more countries by McCann (which has equity in agencies in more countries than listed on the accompanying chart) include: Coca-Cola Co. (47), Del Monte (20), Exxon/Esso (34), General Motors (32), Gillette Co. (28), Goodyear Tire & Rubber Co. (32), Johnson & Johnson (22), Eastman Kodak Co. (27), L'Oreal (35), Martini & Rossi (24), Nestle Foods (29), R.J. Reynolds Industries (29), Texas Instruments (21) and Unilever (23).

Some clients that met Ad Age's criteria were not included because they are clients in countries not listed: Bata Shoe (4 countries), Beiersdorf (5), Du Pont (4), General Electric (3), IBM (4) and Swift & Co. (3).

In 1984, the network won new international business from Eastman Kodak, Martini & Rossi, R.J. Reynolds, Unilever, American Express, Goodyear, Tissot, General Motors, Heublein, Coca-Cola, Black & Decker and Federal Express.

Top international execs: Bill Mackey, chairman; Bob James, ceo; John Bergin, Barry Day and J. McNamara, vice-chairmen. Exec vps: Gianni Cottardo and Jerry Shively (Europe), Michael Ferrier (Europe/Africa), Jens Olesen (Latin America) and Max Cusnir (Asia/Pacific).#

Needham Harper Worldwide

Needham Harper Worldwide, New York, had non-U.S. gross income in 1984 of $18 million, 15.6% of total gross income of $114.7 million.

Needham owns majority or maximum-allowable interest in five agencies, minority interest in 17 agencies and is affiliated with one agency in which it holds no equity. In 1984, Needham purchased minority ownership in Perceptum Needham in Stockholm. Needham's international business has decreased as a percentage of its over-all business. In 1974, Needham's non-U.S. gross income was $7.1 million—23% of the agency's total gross income of $30.6 million. In 1979, non-U.S. gross income was $9.4 million—18.6% of total gross income of $50.4 million.

Major international business added in 1984 included *Fortune*, McDonald's (Thailand, Taiwan), Boots Co.'s cough remedies (Netherlands, Taiwan, Malaysia) and B.A.T. (Sweden). Losses included G.D. Searle & Co. (U.K.).

Top international executives include John Bradstock, president, and Norval B. Stephens Jr., exec vp.#

SSC&B holds majority or maximum-allowable interest in 59 agencies, minority interest in four and is affiliated with 15 agencies in which it holds no equity.

In 1974, non-U.S. gross income was $59.4 million—70% of estimated total gross income. By 1979, non-U.S. gross income had grown to $119.8 million—78.2% of total gross income of $153.2 million.

SSC&B:Lintas, part of the Interpublic Group of Cos., won major international business in 1984 from Coca-Cola Co. ($23 million), Unilever ($17.8 million), Remy Martin ($10.3 million) and Johnson & Johnson ($7.2 million).

Top international executives include: Ken Robbins, ceo-international division; David Croisdale-Appleby, London, operations director and regional director-Scandinavia and Southern Africa; Philippe Charmet, Paris, chairman-European coordination group and regional director for France, Italy, Spain, Portugal and Greece.#

TBWA Advertising

TBWA Advertising, New York, in 1984 had non-U.S. gross income of $29.6 million, 73.1% of total gross income of $40.5 million.

The network consists of 12 agencies in nine countries, and TBWA owns majority or maximum-allowable stock in all 12 shops. The agency also is affiliated with seven agencies in which it holds no equity.

In 1974, the network had gross income of $5.7 million—all non-U.S. By 1979, non-U.S. gross income was $20.1 million—89.9% of total gross income of $22.4 million.

In 1984, TBWA added major international business with American Airlines ($3 million in billings), Bull Computers ($15 million), Henkel AG (Austria, Germany, Netherlands, Spain—$10 million), Monsanto Co. ($5 million), Ralston Purina Co. ($4 million) and Volvo corporate ($10 million).

The network lost accounts with Cartier, Certina Watches, Mohawk Data Science and Singapore Airlines.

Top international executives: William Tragos, chairman-ceo; Claude Bonnange, co-founder, marketing research; Uli Wiesendanger, co-founder, creative; Paolo Ajroldi, co-founder, account management; Richard Costello, president, U.S.; Martin Denny, chairman, U.K., and managing directors Mike Camesasca (Germany, Switzerland), Alberto Levi (Italy), Jean-Francois Minne (France) and Roland van Kralingen (Netherlands).#

J. Walter Thompson Co.

J. Walter Thompson Co., New York, in 1984 had non-U.S. gross income of $187.6 million, 46.2% of total gross income of $405.8 million. Non-U.S. billings were $1.25 billion, 46.1% of total billings of $2.7 billion.

JWT consists of 135 advertising agencies in 40 countries, along with 21 branch offices and 42 related company offices for a total of 198 offices in 41 countries. JWT holds majority stock in 75 of the agencies.

In 1974, non-U.S. gross income was $69.9 million—53% of total gross income of $130.1 million. Non-U.S. billings were $466 million compared with total billings of $867.5 million. In 1979, non-U.S. gross income had grown to $135.7, or 53.4% of total gross income of $253.9 million. Non-U.S. billings were $905 million compared with total billings of $1.7 billion.

Major international business won in 1984 included Benetton (Austria, Belgium, Netherlands, Spain, Switzerland, U.K.), IBM (Hong Kong, Indonesia, Japan, Philippines, Thailand), Warner-Lambert Co. (Belgium, France, Netherlands, Portugal), Com-

modore International (Belgium, New Zealand, Sweden), Kraft (Chile, Greece, New Zealand), PepsiCo (Greece, Hong Kong, Portugal) and N.V. Philips (Australia, Japan, Netherlands).

Business lost included ComputerLand (U.S, Spain, U.K., Australia), Champion Spark Plug Co. (Austria, Belgium, Denmark, Germany, Italy, Netherlands), Timex (Germany, Portugal), Dunlop Tire & Rubber Co. (Australia, Malaysia, Singapore), Hoechst (Greece, Malaysia, Peru, Philippines), International Spike (Canada, South Africa, Spain, U.K.), Nabisco Brands (India, Netherlands, Philippines, Puerto Rico, Spain, U.K.) and Goodyear Tire & Rubber Co. (Hong Kong, New Zealand, Venezuela).

Top international executives: Don Johnston, chairman-ceo; Walter O'Brien, vice chairman-multinational client services director; John Cronin, exec vp-president/Europe; Ronald Kovas, exec vp-president/Canada; W. Lee Preschel, exec vp-president/Latin America, and Donald Thompson, exec vp-president/Asia and Pacific.#

Young & Rubicam

Young & Rubicam, New York, in 1984 had non-U.S. gross income of $157 million, 32.7% of total gross income of $480.1 million. Non-U.S. billings were estimated at $1 billion, 31.3% of estimated total billings of $3.2 billion. The network consists of 32 agencies in 26 countries.

(The above financial figures include 50% of DYR, a joint venture with Tokyo-based Dentsu, and 49% of HCM, a new agency created by the merger of Y&R's Marsteller Inc. and Paris-based Eurocom's Havas Conseil. DYR and HCM are listed separately in this report.)

Y&R's international business has dipped in recent years as a percentage of total activity, due largely to increased U.S. advertising and acquisition of U.S. shops.

In 1974, non-U.S. gross income was estimated at $42.2 million, 37.5% of estimated total gross income of $112.5 million. Non-U.S. billings were $281.6 million compared with total billings of $750.5 million. By 1979, non-U.S. gross income had grown to an estimated $97.9 million on non-U.S. billings of $763.6 million. That was 39.5% of an estimated total gross income of $247.6 million on billings of $1.92 billion.

Major international business won in 1984 included Suchard (Austria, Brazil, Spain, Switzerland), Rank Xerox (Denmark, Norway, Spain), Robert Bosch (Denmark, Norway, Sweden), BSN Gervais Danone (Brazil, Switzerland), Caffee Hag (Netherlands) and Union Carbide (Belgium).

Top international executives: Edward Ney, chairman-ceo; Alexander Kroll, president-chief operating officer; Peter Georgescu, president, Y&R International; Joseph DeDeo, president, Y&R Europe; Nelson DeMello, area director-Latin America; James McCoubrey, exec vp-area director, Canada/Australia/Africa; Alan Sheldon, exec vp-director of finance and administration, and Niels Menko, vp-director international headquarters (appointed in 1984).#

Global

(Continued from Page 39)

One reason is to increase business from existing multinational clients.

Other agencies adopted new or improved corporate strategies, and publicized them heavily, to counteract the publicity garnered by Saatchi & Saatchi for its world-brand positioning last year.

The Ogilvy Group even changed its corporate structure, partly to separate "second" agencies such as Meridian and Scali, McCabe, Sloves from the main business of the agency group, O&M Worldwide. It also adopted a new slogan—"Ogilvy orchestration"—to emphasize the advertising-related disciplines it offers globally.

Observers are warning that if clients and agencies push centralization too much they may destroy their organizations in the process.

"When global competition is driven by scale economies, at a certain point everyone gets equalized," said Christopher Bartlett, an associate professor at the Harvard Business School. Then "the competitive advantage will go to companies that are sensitive to individual market developments."

Mr. Bartlett, who is preparing a "Harvard Business Review" answer to the global-marketing theories of Harvard Business School professor Theodore Levitt, told a global-marketing conference in London last week that the centralization trend is resulting in "global glaucoma," or "viewing trends in an undimensional way."

The premier global marketers, Japanese companies, are already learning the value of local marketing after setting up local manufacturing facilities in each market, Mr. Bartlett said.

Also, he told the group that even global companies must spot global trends that may start in countries other than the U.S.#

This World Brand/International Agency/Client Report was put together by Dennis Chase, international editor; Ilse Cermak, international copy editor; Ellen Mardock, graphic designer; Steve Glynn, free-lance writer/researcher; Val Mackie, international reporter, and the Advertising Age international network.

Cannes

(Continued from Page 3)

was attending a small reception, meeting the other judges and being handed a terse program detailing my duties for the next six days.

From my first glance at that blunt schedule, I knew I was there to work. So much for fun in the sun.

I should pause here to reiterate my often-stated appreciation and applause for Simon Dalgleish, who, as executive director of the festival, choreographs the entire procedure. Together with his staff, he has reduced the monumental task of judging, and its culmination in a gala, to a well timed, well coordinated, well oiled tribute to common sense.

The judging began for us early June 14. During the first two days, the judges view all the entries—there were 2,000 or so last year—and with a simple "yes" or "no," whittle them down to a short list of roughly 500. As he or she views the films in each category, each judge refers to the "Catalogue des Films," a complete description of every entry in a volume the size of the Manhattan Yellow Pages. In the catalog, eventual Gold Lion winners look pretty much like any other entry.

During the following two days, the survivors to the short list are viewed again. This time they are given a numerical score by each judge. Finally, on the fifth and sixth days of their deliberations, the judges debate and discuss the relative merits of those films that have accumulated the highest scores, then vote on which of them shall receive the festival's trophies—those coveted lions wrought in gold, silver and bronze.

At last, the judging is over and the Screen Advertising World Assn. staff can begin the preparation for the short-list screenings, which begin two days later. Those screenings are attended by all the delegates to the festival, a body of some several thousand people.

The raucous reception the audience gives the judges' selection is an omen of the truly riotous reception they will give to the lion winners when they are announced at the gala screening Saturday night, the final night of the festival.

The reason I have gone to such lengths to describe the judging procedure is that it testifies to the seriousness with which the world's advertising professionals view their cumulative work and separate the gold from the dross.

And even as they are doing so, they let their peers in on the process—braving the catcalls of the delegates and ultimately the "yeas" and "nays" of the general public as well. What I like is the passion displayed by all parties concerned.

The judges care about excellent advertising. Their peers in the profession care about excellence, too. And the caring is expressed with an emotional fervor that renews one's conviction that the search for excellence, however much of a struggle, is well worth the trouble and the pain.

And in my opinion, unless we all—clients and agencies alike—exhibit such a passion for our business, excellence will forever elude us.

As I said earlier, all this impressed me—to such a degree that I felt it was important to expose more of our creative leaders at Needham to a first-hand experience of what goes on at Cannes. They will be reminded that advertising really does cut across international fences. They can then teach this gospel to the young people coming along.

If it is true, as I believe it is, that we must prepare for a global future by finding new languages of communication and by becoming more conversant with the nonverbal languages that already exist, I would nominate Cannes as a better place than any I can think of to "go to school" on the subject.

This year, of course, I am not a judge. So it will be my turn on Thursday and Friday and Saturday morning to boo and hiss and throw things to express displeasure and to cast mediocrity into outer darkness. At the same time, I can also stand up on my seat and yell my approval of the best advertising being done in the world.

It's going to be a more comfortable scene for me this year, but nonetheless stimulating. With a little luck, I may even be able to scuff a little sand.#

Mr. Reinhard is chairman-ceo of Needham Harper Worldwide, New York.

(Celebrity Packagers For Advertising Since 1969)

The 1985 Ad Dollar Summary lists 35,000 Brands and how much they spent in 7 Media.

You can't buy this complete listing anywhere else.

These are the official industry figures.
If you want to know who's spending what on advertising, BAR/LNA's Ad Dollar Summary is the reference tool you need.

Because only in this one volume will you find a complete summary of ad dollars from the PIB Magazine and Newspaper Supplement Service, from BAR's Broadcast Services and from the LNA Outdoor Advertising Service.

These are the very same figures LNA prepares for major media organizations like MPA, TVB, RAB, and OAAA. They're used by leading advertisers and their agencies. The trade journals also turn to LNA for media data.

The 1985 Volume now includes cable TV.
The Ad Dollar Summary tells you how much each of 35,000 brands is spending in consumer magazines, newspaper supplements, network and spot television, network radio, outdoor advertising, and now, for the first time, in cable TV.

Brands are listed in alphabetical order along with their parent company identifications and the media used.

And that's not all. For the first time we've added listings that show the top 100 companies ranked by expenditures in each of the media.

Top 1000 Companies by total ad dollars.
The Ad Dollar Summary includes other vital reference data.

For instance, there's a convenient listing of Top 1000 Companies ranked in order of total media expenditures and broken out in each of the seven media.

There's also a section in the year-end edition showing the top 10 brands in 275 product categories, with a category total.

Year-End 1984 Edition on sale now.
If you didn't subscribe to the last year's Ad Dollar Summary, now is your chance to order the entire year round-up in one conveniently bound edition for just $150.00.

Multi-Media Services from BAR/LNA.
The Ad Dollar Summary is just one of the Multi-Media reports we offer, and the only one available without subscribing to the full service. Our full-service subscribers receive two additional reports which complement the Ad Dollar Summary with more detailed analyses.

- Company/Brand—an alphabetical listing of companies and how much is spent on each brand in seven media.
- Class/Brand—compares competitive brands within 275 product categories. This enables you to see not only how much each brand spent in specific media, but also who the major spenders are in each category.

For more information about our other media analysis services, including on-line programs and customized reports, just check the box in the adjacent column.

Buyouts reshape '84 media rankings

By R. CRAIG ENDICOTT

The nation's media companies as a group no longer sit on the sidelines to watch players in other industries buy and sell properties. They have become what they have publicized. They are the message as shown by their movement within the ADVERTISING AGE list of top 100 media companies for 1984.

No ranking was sacrosanct among the top 100 as they jockeyed for position on the 1984 chart. American Broadcasting Cos. quickly discovered this. ABC, the perennial chart leader in the five years of this report, retained that position in 1984 with $3.65 billion in media revenues, but was bought out in a friendly acquisition by No. 16 Capital Cities Communications earlier this year. And now, No. 2 CBS Inc. is the subject of a hostile takeover bid by Ted Turner (No. 45 Turner Broadcasting Co.).

The acquisition fever that began to simmer in 1983 and continues to a boil in mid-1985 eliminated seven of nine companies from the 1983 list as the they were bought up entirely or piecemeal, generally by other companies on the chart. The top 100 were involved in 48 purchases involving 207 tv, radio and cable properties and 32 print purchases consuming 176 properties.

Composite growth results demonstrate why there is such a buying craze. Media revenues for the top 100 grew to $50.02 billion in 1984, compared with $42.03 billion in 1983 by that same group, an increase of 19.1%. The same companies had aggregate corporate revenues (media and nonmedia) of $87.35 billion, up only 12.8%, which shows why corporations with diverse operations welcome media properties.

Profitability is hard to determine because more than half of the companies on the list are private and don't release earnings. Forty-one public companies on the list had an average 8% return on sales in 1984, up from 6.5%.

The top 100 companies each year are ranked by their total media revenues. In the case of public companies, revenues usually are the media segment revenues published by the companies. Where nonmedia activities overlap in certain "media" segments, the companies usually help extricate the nonmedia revenues.

For the private companies, estimates either were obtained from the companies, provided by media analysts or estimated by AD AGE based on media models. *(See Page 63 for definition of media used in this report.)*

The first four positions on the chart remained the same, with Time Inc. again slipping by RCA Corp. (NBC) for the third spot behind ABC and CBS Inc. Times Mirror Co., jumped two notches to fifth, Gannett Co. remained in sixth, Advance Publications fell two notches to seventh, Knight-Ridder Newspapers again held down No. 8, the Tribune Co. No. 9, and Dun & Bradstreet, fortified with A.C. Nielsen Co.'s revenues, gunned from No. 18 to No. 10, replacing Hearst Corp., which fell to No. 11.

The biggest leap on the chart was not made by Americans but Canadians. Maclean Hunter Communications, which bought the *Houston Post* through a subsidiary late in 1983 and got a full year's revenue stream from the paper in 1984 to move up from No. 80 to No. 43 (only its U.S. properties are counted). Kohlberg Kravis Roberts & Co. vaulted from No. 68 in 1983 to No. 38 on the basis of its investment in Wometco Enterprises and the continued health of its dominant independent tv station, KTLA, in Los Angeles. KKR was represented on the chart in 1983 by KTLA parent Golden West Broadcasting (which KKR owned).

Stagnant media growth did not wash well with this highly competitive group. National Enquirer experienced the same sales in 1984 as in 1983—primarily because of the plethora of entertainment-oriented magazines robbing its space and headlines at the grocery counter—and dropped from No. 65 in 1983 to No. 77. Rogers Cablesystems lost 3% in sales and fell from No. 69 in 1983 to No. 81.

Cable companies were the growth leaders among the top 100, partly the result of cable's newness to the media scene, which makes growth more pronounced. The 41 media companies on the list with cable operations had growth of $5.84 billion in that medium, up 21.8% from 1983.

Cable operators, their growth rates held hostage for years in many franchise areas because of community regulatory resistance to fee increases, are breathing easier this year with passage of the Cable Communications Policy Act of 1984. The act allows cable operators to raise basic rates by 5% annually. The relief bails many operations out of threatened insolvency.

Tv and radio properties were hot potatoes among media properties, being bought and sold with abandon, primarily the result of a buyers-market mentality influenced by the relaxation of maximum ownership rules set by the Federal Communications Commission. The FCC liberalized its 7-7-7 rule (seven am, seven fm and seven tv stations) to 12-12-12, or any combination of stations beneath the 12-12-12 framework once a share of 25% of the U.S. households is reached. Tv, in particular, lived up to its "cash cow" reputation. The 56 media companies with tv and radio properties provided total revenues of $14.39 billion for that medium, up 20.7% from 1983.

The 40 media leaders on the list with magazine operations generated $8.63 billion in sales for that medium, up 16.9% from the previous year. Newspapers were the volume leader as 52 companies on the list contributed $18.88 billion in newspaper revenues in 1984, up 16.6% from 1983.

Proof that media acquisition activity was not just skin deep in plucking off the top media company is found in the new list of characters on the 100 chart in 1984: No. 22 John Blair & Co. entered via its acquisition of ADVO Systems, a shared mail medium. GFV Communications, No. 48, also entered on the basis of its growth in shared mail and free-standing inserts.

Kohlberg Kravis Roberts & Co., No.

Buyouts

(Continued from Page 1)

38, bought out Wometco Enterprises in March, 1984, for $1 billion and Storer Communications this May for $1.64 billion. No. 9 Tribune Co. this May then bought KKR's KTLA-TV.

Splintered off from other media companies on the 1983 list were new 1984 entries: MTV Networks, No. 90, a combination of MTV: Music Television, VH-1 and Nickelodeon, was carved from No. 42 Warner Communications; and TeleCable Corp., No. 95, was spawned by No. 52 Landmark Communications to give the cable unit greater ability to dip into the financial markets to finance growth. Family Media, No. 63; Ackerley Communications, No. 100, and 13-30/Esquire, No. 99, came in on the basis of their growth in media.

Newcomer SFN Inc., No. 79, played the lower division baseball team that suddenly catches fire at the All-Star break to come home a winner. Formerly known as Scott Foresman, the education book publisher, SFN came on the list primarily on the basis of its ownership of WFTV, the ABC Orlando, Fla., affiliate, which it bought in mid-1984. But SFN held the affiliate less than a year before selling it this June to Cox Enterprises for $60 million more than originally paid for the station. Presumably, SFN won't grow fat from its bonus like many major league winners do after the "big" year.

Because of the newcomers, more media companies moved off the list in 1984 than in any previous year of this report. Again, buyouts were endemic. Ziff-Davis Publishing Co., No. 31 in 1983, sold its consumer magazines to CBS Inc. It tumbled off the 1984 list and promptly fell into the bad graces of CBS, which sued Ziff-Davis for allegedly overstating the earnings of the 12 magazines bought for $362.5 million.

General Electric Co., No. 73 in 1983, continued its trend of de-emphasizing media in 1984, selling its entire cable operation. Southern Progress (*Southern Living, et al.*), No. 81 in 1983, was bought by this year's No. 3 Time Inc.; No. 82 in 1983, Jefferson-Pilot, sold its newspapers to fall from the list; the *Des Moines Register & Tribune*, the basis of the Des Moines Register & Tribune Co.'s 94th ranking in 1983, was sold with other properties to No. 6 Gannett Co. Revenue growth was not hefty enough to keep Rollins Inc., No. 99 in 1983, or Stauffer Communications, No. 100 in 1983, on the list in 1984. Oak Industries, No. 85 in 1983 on the basis of its ON TV subscription tv business, terminated ON TV in 1984 and exited the list.

The top 100 list is never static; a number of companies are packing it up for next year. ABC will be merged under the Cap Cities/ABC logo; No. 28 Metromedia, bought by Rupert Murdoch (No. 27 News America Publishing) will drop off unless Metromedia chairman John Kluge funnels his gains back into media properties.

The properties within News America will undergo considerable shuffling this year as well because the acquisition runs afoul of FCC regulations against media crossownership.

Mr. Murdoch runs into a crossownership conflict in the New York City market with acquisition of Metromedia's WNEW-TV, a leading station in the market. He is expected to sell the *New York Post*. The same situation arises in Chicago with his acquisition of WFLD-TV. The *Chicago Sun-Times*, purchased by News America in 1983 and the reason for News America's strong showing on the list in 1984, is likely to go. To raise cash for the Metromedia buyout, Murdoch sold the *Village Voice* for $55 million this June to Leonard Stern, chairman of Hartz Mountain Industries.

Atlanta newspaper king Cox Enterprises, No. 21, has consumed nearly all of No. 19 Cox Communications, the broadcast unit it spun off in 1964 to raise cash for acquisitions. It always had a big stake in the broadcast unit, holding some 40.2% of the company even when sending it public.

Warner Communications, No. 42, and American Express, No. 39, which share the nation's sixth largest multiple system operator—Warner Amex Cable Communications, which essentially is the reason for their high media rank—may be at the end of their joint venture. American Express has agreed to sell its share of the system—to a joint venture of the nation's two leading msos, Tele-Communications Inc. and American Television & Communications Corp., a Time subsidiary.

Warner, which divested its MTV Networks in 1984 and seems to be thinning down to its Warner Bros. origins, has yet to give its blessing to the deal, which must happen before Warner Amex can be sold.

Other acquisition activity this year among the 100 should produce higher rankings for the buyers in 1985. Advance Publications, known in the trade as Newhouse, bought *The New Yorker* and its ownership in several small but profitable magazines; Hearst Corp. is buying WCVB-TV in Boston for $450 million, the second largest purchase price for a tv station (the KTLA-TV purchase at $512 million so far is the largest) from Mr. Murdoch.

Mr. Murdoch is selling WCVB-TV because of its conflict with News America's *Boston Herald-American* in the same market and, probably more importantly, because it will bring the most money among the six Metromedia tv properties bought by Mr. Murdoch to help pay off the debt incurred by the $2 billion purchase price.

The Washington Post Co. has agreed to purchase Cap Cities' cable operations; Taft Broadcasting acquired Gulf Broadcasting's five tv and seven radio properties for $760 million in late 1984; and then there is the drama of the Ted Turner effort to snag CBS.

All this buyout activity is taking its toll on stockholder freedom and board member maneuverability as media companies have developed a number of so-called "shark-repellent" moves to thwart hostile takeover attempts.

CBS leads the pack—many of its measures being aped by other media companies. CBS has amended its bylaws to stop shareholders with 10% of CBS stock from calling a special shareholders meeting. The idea is to prevent a small group of shareholders from "harassing CBS by calling special meetings for the purpose of publicizing their demands," a CBS official says. A revision in the bylaws now allows the CBS chairman to dismiss business "not properly presented" at its annual board meeting and limit time for discussion at the annual meeting.

Media companies also have limited shareholders rights by concentrating voting power in the hands of management, a controlling family or other group that the board considers reliable. Meredith, with its biggest block of voting share—32%—in the hands of the founding E.T. Meredith family, approved an 80% requirement for either the removal of a director or to vote for a merger. Meredith, like Gannett and Tribune Co., also voted to stagger the terms of its board of directors.

Gannett shareholders in their May, 1985, annual meeting approved a fair-price amendment, which requires that all stockholders be offered the same price for shares in a tender offer.

Tribune Co. tripled its authorized common shares in a shareholders meeting May 3 to impede a takeover. The move means considerably more stock must be assembled in a takeover, and existing holdings now are diluted.

Multimedia Inc., tiring of fending off takeovers, is recapitalizing by permitting shareholders to cash in their shares and retain some equity in the company for a small investment.

Takeover activity spurs the targeted company to deplete its cash and increase its debt to become less attractive. That means the takeover target is in the takeover business itself to keep from being taken over. That's a vicious circle that continues to swirl about the media companies.

Such is the result when the medium becomes the message.#

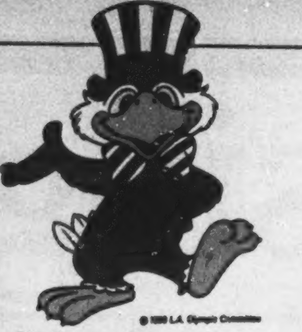
People

WE'RE BOOMING

Snapshots from the '50s to illustrate the theme that "We're booming" was People magazine's way of telling advertisers what the baby boomers are reading today.



© 1980 L.A. Olympic Committee

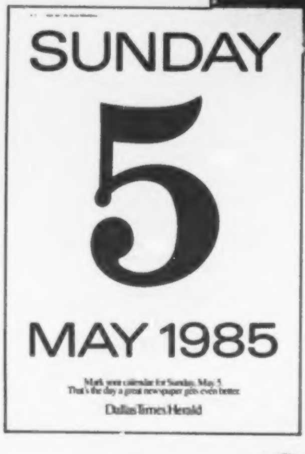
The Summer Olympics made a good year out of a so-so one for ABC Network. Spots, up to $435 million for 30 seconds, helped ABC win 40% of the sales total of the three nets, but ABC dropped to third in the ratings.

Mobil Oil, a heavy spender on the nation's op-ed pages, particularly the Wall Street Journal, yanked its nearly $1 million ad budget from the WSJ when it became upset with the Journal's coverage.

WHY NOT THE BEST? (A SPECIAL CONSUMER GUIDE P. 81)
VOICE
YOU'VE REALLY GOT A HOLD ON ME

Village Voice is the first Rupert Murdoch property to be sold following his acquisition of Metromedia broadcast units. The sale helps raise funds for other media deals.

Tina Turner, depicted as "one of the drab homebodies" who reads McCall's, joined Cher ("a typical mother"), Carly Simon and Diane von Furstenburg as part of the magazine's campaign to show McCall's is rapping with the baby boomers.



SUNDAY

5

MAY 1985

Mark your calendar for Sunday, May 5.
That's the day a great newspaper gets even better.

Dallas Times Herald

May 5 was the day that went down as Super Sunday at the Dallas Times Herald. Ads calendared a schedule of new moves at the paper which is in a pitched battle with the Dallas Morning News.

MTV
MUSIC TELEVISION™

Publicly held MTV Networks, which in addition to the music network includes VH-1 and Nickelodeon, offers special food to the platter-minded rock fan as its logo suggests.

"Dynasty" stars Linda Evans, John Forsyth and Joan Collins kept ABC Network's ratings buoyed, but not enough to prevent CBS and NBC networks from overtaking it in the ratings sweeps.

CBS brought to the tv screen Scripps Howard's Garfield (United Feature Syndicate), the eccentric feline, in a special called "Garfield in the Rough."

A.S. Abell Co., Baltimore, a privately held company, reports revenues increased 14.7% to $195 million in 1984, all from media, making it the 62nd largest media company.

Abell has two divisions, A.S. Abell Publishing Co. (Baltimore Sunpapers, *Country* magazine, *Ski Racing* and a tabloid newspaper) and A.S. Abell Communications.

The communications division has undergone major restructuring. On June 1, 1985, it completed an agreement to acquire independent WRLH-TV in Richmond, Va., from TVX Broadcast Group. The acquisition was part of a transaction begun in 1984 through which Abell sold its six radio stations.

Ownership of the stations, WMAR (fm) Baltimore (now WMKR), WTJZ (am) Newport News, Va., and WNVZ (fm) Norfolk, Va., WCFI (fm) Daytona Beach, Fla. and WCRJ (am, fm) in Jacksonville Fla., was transferred in March, 1985, from Abell to newly formed S&F Communications, Baltimore.

That company is headed by president Stuart Frankel, former president of Abell's radio division, and Steven Seymour, *chairman-ceo of S&F*, and former ceo at A.S. Abell Communications.

Abell Communications has appointed a new president, Arnold Kleiner, who also is general manager of the company's Baltimore tv station, WMAR-TV. Abell Communications is paring its holdings, Mr. Kleiner says. "By September, we will be only in television stations. We know television," he says. "We were not willing to devote the time and resources necessary to run a successful radio operation."

In 1984, Abell Communications also sold its Welcome USA in-hotel video advertising service to minority partners. The service operates in Miami, Baltimore and Washington.

WMAR-TV, an NBC affiliate, last year benefited from the resurgence of the network. The station also renegotiated its long-term agreement to televise Baltimore Orioles baseball games. Revenues for WMAR-TV were estimated at $32 million in 1984.

For Abell Publishing, 1984 was a year of increased growth in revenues and holdings. In March, 1984, a new all-day edition of the Saturday *Sun* was introduced. The Saturday edition uses the combined staffs of the *Baltimore Sun* and the *Baltimore Evening Sun.*

It had an average circulation of 322,478 in March 31, 1985, according to Audit Bureau of Circulations. Circulation was stagnant for the combined daily at 349,901 vs. 349,182 for the same period a year earlier. Sunday circulation increased 1.7% to an average of 414,330, according to ABC.

According to Jerry Smolinski, *Sun* public affairs manager, the Sunday *Sun* had a record high average circulation of 430,285 in March, 1985. The morning *Sun* also achieved a record high in March, 1985.

The newspapers expanded their dominance in the Baltimore market by introducing a fourth zoned county edition, the *Carroll Sun*. The tabloid began publishing in October as a regular insert in the Sunday *Sun*.

The Sunpapers carried 82% of full-run advertising linage in the Baltimore market in 1984. The newspapers show a 6% increase in daily and 13% increase in Sunday color advertising, based on a comparison of comparable five-month periods in 1984 and 1985, Mr. Smolinski says.

Editorially, the Sunpapers focused on developing new sections and the Saturday *Sun*. The papers were awarded two Pulitzer Prizes in 1985, the 11th and 12th in the paper's history.

For *Country* magazine, 1984 was a year of spectacular increases. In January, 1985, it began offering a guaranteed circulation of 100,000, compared with 70,000 in January, 1984. Yearend circulation for 1984 rested at 81,072.

Walter Nicklin, publisher-editor of *Country*, says the magazine's ad pages grew to 501.8 for 1984, compared with 337.8 for 1983. With gains in circulation, the magazine's cpm actually has declined, though ad rates have climbed to $4,240 per page in 1985 from $2,000 in 1984. Advertising growth is continuing in 1985 at a 25% increase over 1984 levels.

"There's a common life style in the area from Pennsylvania to North Carolina," Mr. Nicklin says. "We are reaching an area not covered by *Southern Living* or the New England magazines like *Yankee*. Our message is starting to come through. This is the first year that advertising revenues have exceeded circulation revenues."

Ski Racing, published in Poultney, Vt., was purchased by Abell in March, 1984. According to Don A. Metivier, editor-publisher, the magazine publishes 20 issues during the ski racing season and a glossy annual directory of competitors. During the annual March ski trade show in Las Vegas, the paper publishes daily issues. *Ski Racing* has a circulation of 30,000, primarily in the U.S. and Canada, though the newspaper has international coverage.

Broadcast	13	20	-32.3
Cable	0	0	0

Ackerley Communications, Seattle, the nation's 100th largest media company with media revenues increasing an estimated 12.5% in fiscal 1984 compared to an estimated $90.1 million in 1983, is expecting similar growth in 1985 with the addition of two new radio stations and a tv property.

Ackerley, which had total revenues of $97.9 million in 1984, derived an estimated 72.3% of that from its outdoor and airport board operations, 20.2% from broadcast and the remainder from the Seattle Supersonics.

While revenues are growing, the bottom line has been sagging, primarily a result of servicing the debt incurred from acquisitions. The company suffered a net loss of $7.3 million in 1984, compared with losses of $769,000 and $324,000 in 1983 and 1982, respectively.

President Barry Ackerley, a former advertising salesman for *Better Homes & Gardens*, shrugs off last year's losses and insists that the company's performance be judged by cash flow rather than profits.

And the cash has flowed. Since 1980, revenues have almost tripled and operating income has increased more than 200%. Continuing into 1985, Ackerley will add in the first full year of revenues from Seattle's KJR (am), which it bought from Metromedia for $6 million May 28, 1984, and add partial year revenues from KSGO (am) and KGON (fm) when that deal is closed. The company is acquiring the latter two, both Portland, Ore., rock stations, from the Des Moines Register & Tribune Co. Ackerley also is awaiting FCC approval of its purchase of KVOS-TV in Bellingham, Wash., from WBC Broadcasting Corp., a spinoff of Miami-based Wometco Broadcasting. Purchase price for these three properties is $32 million. Also in 1984, the company failed in its bid to acquire KZAZ-TV in Tucson.

Founded in 1975 as an outdoor advertising company, Ackerley Communications has grown quietly but rapidly through a series of acquisitions. Since 1982, Ackerley has spent $62 million to purchase three tv stations, a radio station and a National Basketball Assn. franchise.

Continued growth through acquisition is the company's stated goal. "We're not sellers," Mr. Ackerley says. "We never sell. We just buy." Financed primarily by long-term debt that stood at more than $95 million at the end of 1984, Ackerley's diversification strategy targets companies that complement its advertising presence in major metropolitan markets.

Last year's purchase of the Seattle SuperSonics ($20 million), for example, ties in with the company's outdoor boards, airport displays, radio and tv stations in the Seattle area. Despite lagging ticket sales, Ackerley says the Sonics have "great synergy with other marketing vehicles."

Ackerley Communications is the nation's third largest outdoor advertising company, with about 11,000 signs concentrated in Seattle/Tacoma, Wash.; Portland/Salem, Ore.; Miami/Fort Lauderdale, Fla., and Boston/Worcester, Mass.

Prospects for growth through acquisition in the outdoor business are limited because there are few, if any, board companies for sale that concentrate on the top 25 areas of dominant influence.

Although the company eschews publicity, Ackerley's legal battles with numerous cities over outdoor board regulations often have brought it before the public eye. Purchase of the SuperSonics has made Ackerley more visible in the Pacific Northwest. Still, when the company bid $156.5 million for the Des Moines Register & Tribune Co. earlier this year against major media companies such as Dow Jones & Co., many industry analysts had never heard of Ackerley Communications. Although Gannett's offer of $200 million ultimately snagged the *Register*, Ackerley succeeded in picking up the two Portland radio stations.

In 1981, Ackerley purchased Transportation Displays for $12 million, and it is now the nation's largest airport advertising company, with some 6,000 displays in more than 100 airports. Airport users are a "very high-class audience," Mr. Ackerley says, and looks to this part of the company's business as a continuing source of growth.

Ackerley is making a major move into broadcast media and the company is moving quickly. It jumped into tv in 1982 with the purchase of WIXT-TV, an ABC affiliate in Syracuse, N.Y. The next year, it spent $42 million for two stations—KKTV-TV in Colorado Springs, Colo., and KGET-TV in Bakersfield, Cal. While Mr. Ackerley says he would love to own a tv station in Seattle to tie in with his other properties, FCC rules won't permit such cross-ownership.

Ackerley, which has purchased all its radio properties since the beginning of 1984, plans to continue to acquire broadcast properties, especially radio stations, in markets where outdoor advertising can provide promotional support.

Privately owned, Ackerley in May went public by converting debentures into common stock. The debentures were issued in the early 1980s to finance acquisitions. Mr. Ackerley controls 93% of the voting stock.

Newspaper	1,250	1,194	4.7
Magazine	490	406	20.7
Broadcast	0	0	0
Cable	160	140	14.3

Advance Publications, New York, the umbrella company for the holdings of the family of the late S.I. Newhouse, is the nation's 7th largest media company, with $1.9 billion in media revenues, a 9.2% increase over 1983.

Total revenues were about $2 billion, generating operating profits of $180 million, estimates John Morton, newspaper industry analyst with Lynch, Jones & Ryan, Washington. Privately held Advance releases no financial data.

Revenues from media operations account for more than 90% of the company's total. Media operations include some of the nation's largest newspapers in addition to Conde Nast magazines and cable operations.

Advance's stable of media properties remained basically unchanged through 1984—with the exception of the sale early in the year of the *St. Louis Globe-Democrat*—but big change occurred May 7, 1985, with the purchase of the New Yorker Magazine Inc., parent of prestigious *The New Yorker* magazine. The New Yorker Magazine Inc. media revenues in 1984 were $66.9 million, or 82.3% of its total revenues incorporating book publishing.

In 1984, Advance sold the *St. Louis Globe-Democrat*, a money-losing morning daily in that city that had been linked with the Pulitzer family's *Post-Dispatch* through a joint operating agreement.

A joint operating agreement is a business combination of two competing newspapers, one of which is losing money, allowed under the federal Newspaper Preservation Act.

The *Globe-Democrat* was sold to Jeffrey Gluck, publisher of several magazines including Saturday Review, for a price estimated at less than $1 million. It retained 50% of the JOA that handles all the business functions for the *Globe-Democrat*.

Circulation at most of Advance's dailies remained generally stable, according to the ABC FAS-FAX report for the six months ended March 31, 1985. At the *Star-Ledger*, in Newark, N.J., daily circulation was up slightly to 434,804, and Sunday circulation increased 1% to 661,037. At the *Cleveland Plain Dealer*, daily circulation was down 5% to 464,251, while Sunday circulation was up 7% to 542,682. And at the Portland, Ore., *Oregonian*, daily circulation was up 7% to 309,395 and Sunday circulation was up slightly more than 2,000 to 410,519.

Revenue figures for newspapers published by Advance are not available. However, the newspaper industry in general posted ad revenue gains of about 15%, with the strongest gains coming in classified advertising.

At *Parade*, Advance's Sunday newspaper-distributed magazine, circulation was up more than 1 million to 25,153,000, according to the magazine's January estimates. Despite the increases, ad pages were off 14% to 640, and ad revenues fell 8.6% to $157.3 million from 1983 totals, according to Publishers Information Bureau.

The Conde Nast magazine group turned in a strong performance in 1984, with six of the nine titles posting circulation gains and all but one showing increases in ad pages.

Among the titles, *Bride's* circulation was up 9.6% to 342,349, ad pages were up 4.4% to 1,911 and ad revenues were up 16.3% to $22.6 million. *Glamour* circulation was up 0.6% to 2,288,988, ad pages were up 6.8% to 2,165 and ad revenues were up 20.4% to $70.5 million. *Gourmet* circulation was up 5.2% to 664,501, ad pages were up 6.7% to 995 and ad revenues were up 18.4% to $13.9 million.

Gentlemen's Quarterly circulation was up 12% to 642,156, ad pages were up 32.8% to 1,922 and ad revenues were up 54% to $26.7 million. *House & Garden* circulation was down 1.8% to 574,915, ad pages were up 32.5% and ad revenues were up 46.4% to $18.9 million.

Mademoiselle circulation was down 4.3% to 1,211,080, ad pages were up 6.9% to 1,683 and ad revenues were up 23.2% to $35.7 million.

Self circulation was down 2.3% to 1,066,181, ad pages were up 24.8% to 1,157 and ad revenues were up 40.7% to $24.1 million. *Vanity Fair* circulation was up 2.2% to 265,564, spurred by a 33% cut in the magazine's newsstand price and a 50% cut in the cost of subscriptions. Ad pages were down 34.9% to 335 and ad revenues were off 35.7% to $4 million.

At *Vogue*, circulation was up 6.7% to 1,218,742, ad pages were up 11.4% to 3465 and ad revenues were up 20.3% to $67.3 million.

The circulation figures quoted in this article are Audit Bureau of Circulations figures based on the six months ended Dec. 31, 1984. Comparisons are with Dec. 31, 1983, figures. Ad page and revenue data are according to Publishers Information Bureau.

The New Yorker Magazine Inc. purchase brings to Advance more than just its famed flagship, *The New Yorker*. The company is made up of several wholly and partially owned segments, all of them media-oriented: 100% of Boulder Enterprise, Boulder, Colo., a printing company; 69% of Horticulture Associates, Boston, publisher of *Horticulture*; 51% of Pennington Publishing Partners Limited Partnership, Westport, Conn., publisher of the *Cook's Magazine*; 38.6% of Raven Press Books, a medical books and journals publisher, and 10% of Terre Haute Newspapers, Terre Haute, Ind., publisher of the *Tribune-Star* in that community.

The buyout by Advance, valued at $168 million, climaxed an extraordinary period for New Yorker Magazine Inc. that began with a change in top management and finished with an end to its 60 years as an independent company.

George Green, president, left in March, 1984, to become exec vp-group publishing director, Hearst Magazines; he was succeeded by J. Kennard Bosee, formerly vp-treasurer.

Last November, Advance chairman-president S.I. Newhouse Jr. disclosed he had bought 17% of New Yorker Magazine Inc.'s stock at $180 a share, or about $25.6 million, describing the purchase as an investment, without plans to seek control of the company.

Just three months later, however, he made a bid for the 83% of the company's stock he did not own, again at $180 a share. When the bid was raised to $200 a share—$142.4 million for the remaining stock—New Yorker Magazine Inc.'s board agreed unanimously to the acquisition.

Data were available for Advance's cable properties.

Affiliated Publications' flagship, the *Boston Globe*, continued to dominate the Boston market, despite feisty competition from Rupert Murdoch's *Herald*, and lead the company to the most profitable year in Affiliated's history.

Revenues, all in media, were $343.8 million in 1984, an increase of 17% over 1983, making the company the nation's 32nd largest media company. Operating income jumped 19.8% to $60.4 million, while net income rose 23% to $27.4 million.

The *Globe* provided $327.5 million of Affiliated's revenue for the year. The newspaper had a 10.9% increase in advertising linage over 1983. Classified linage showed the largest gain. The *Globe's* daily circulation March 31, 1985, was 510,567, up 306 subscriptions from the year-earlier period, and the *Sunday Globe* reached 802,891, up 1.2%, according to Audit Bureau of Circulations. Both the daily and Sunday circulations were the highest the newspaper ever achieved.

By contrast, growth at the competing *Herald* has been more dramatic. ABC reports daily circulation of 368,027, up 13.2%, and Sunday circulation of 308,823, up 11.8%, during the same period. The *Herald* has been capitalizing on its Wingo contest and an additional promo tied in to the popular state lottery in which lottery ticket numbers are selected by the paper for cash prizes.

Broadcasting properties in 1984 generated $16.3 million in revenues. Affiliated owned and operated five am stations and five fm stations at the close of 1984, but since has acquired two fm stations, KHEP in Phoenix and KFYE in Fresno, Cal., and is in the process of selling WHYN (am, fm) in Springfield, Mass., and WFAS (am, fm) in White Plains, N.Y.

The acquisition and sale of broadcast properties result from changes in Affiliated's strategic plan. The official company position is that the move is part of a repositioning plan for Affiliated's broadcast properties to target the 25-to-54 age group. Industry observers also see the plan as one to exchange properties in the slower-moving Northeast for fast-track units in the West.

The company has not been involved in the large-scale acquisitions that are sweeping the media industry, but the board of directors at a May, 1984, meeting made technical changes in the corporation's rules that would make an unfriendly takeover more difficult. Essentially, the change made it more difficult to convene the board, requiring a greater number of board members to agree upon the need for a meeting. The company is not currently, nor is it believed to have been, a target of an acquisition attempt.

Controlling interest of Affiliated is held by the Taylor and Jordan family trusts. William O. Taylor is the *Boston Globe* publisher and chairman of the board. During 1985, Affiliated, through its interest in McCaw Communications, is seeking to add eight new cities to its cellular phone business.

A major personnel change occurred when the *Globe's* editor of 20 years, Thomas Winship, retired and Michael Janeway moved from executive editor to fill Mr. Winship's position.

five newspapers and five vhf tv stations, and it saw revenues increase an estimated 9.4% in 1984 over 1983 estimates.

The *Times*, Trenton, N.J., Allbritton's largest newspaper with a morning circulation of 62,098 in March, 1985, is making a major thrust into Princeton, N.J., and in February, 1985, dropped "Trenton" from its name in hopes of appealing to a wider New Jersey audience.

On March 15, 1985, the *Times* opened a full-service business and editorial office in Princeton. It also rented a trailer that travels to local shopping malls to encourage retailers to buy ads. The *Times* ad staff creates ads on the spot for small retailers.

The effort "has been unbelievably successful," says Michael Moore, president of Allbritton's newspaper division. "We're seeing some very encouraging numbers to match the less encouraging numbers on the cost side."

The *Times'* daily circulation was down about 600 subscribers from the similar prior-year period, while the Sunday circulation was 78,797, up 1.3%. Mr. Moore says daily circulation was flat in the first quarter of 1985, while Sunday was up about 2,000.

The *Trentonian*, owned by Ingersoll Publications, and the *Times* continually battle for the market, with the *Trentonian* still ahead during the week with ABC audited circulation of 67,092, up 1% from March, 1984, while the *Times* is winning the Sunday race. The Sunday *Trentonian* had circulation of 63,246, down 2.4% during the same period.

Thomas Cookerly, broadcast division president and general manager of WJLA-TV, Washington, says Allbritton's tv stations performed well in the past year, but made no significant ratings gains. WCIV, Charleston, S.C., will expand its reach later this year, along with other tv stations in the market, when they move to a newly erected 2,000-ft. tower.

"We, like everybody else, are watching the market with great interest," Mr. Cookerly says of the divestitures resulting from recent media company mergers. Allbritton may bid for some stations, Mr. Cookerly says, although the company will consider "at what price do these things stop making sense for us."

The company's most recent purchases—KATV, Little Rock, Ark., and KTUL, Tulsa, Okla.—were in 1983.

Ad revenues for the newspaper division in 1984 were up 5% over-all, with classifieds showing the greatest increases, often as much as 20%, Mr. Moore says. Retail advertising has been soft, while national "is a disaster area," except in Trenton, he says.

Circulation has dropped slightly at the *News*, Paterson, N.J., and the *Dispatch*, Union City, N.J., because of aggressive marketing by the *Record* of Bergen County, N.J.

The *News* dropped 8% from March, 1984, to a daily circulation of 45,392 in March, 1985, while the *Dispatch* dropped 8.3% to 32,805 during the same period.

Both newspapers named new publishers this year: Jim Scoggins, former owner and publisher of the *York Daily Record*, York, Pa., heads the *News*, and Richard Vezza, formerly publisher of the *Elizabeth Daily Journal*, Elizabeth, N.J., now publishes the *Dispatch*.

The *Standard Observer*, Irwin, Pa., is up slightly with a 15,000 daily circulation. The *Westfield Evening News*, Westfield, Mass., showed a 15% increase, to 6,000 daily.

Allbritton Communications is part of the Joe Allbritton-owned holding company, Perpetual Corp., which has interests in insurance and mortuaries.

American Broadcasting Cos., New York, surfaced from a record year in 1984 to find itself a hotly pursued takeover target in 1985, and it ultimately accepted a $3.5 billion bid from Capital Cities Communications in a friendly buyout.

The purchase, the largest in media history, seemed to bear the message that any media company was vulnerable if a major network such as ABC could be cracked. It touched off a frenzy of media transactions, hostile takeover attempts and leveraged buyouts that revolutionized the media industry.

ABC is treated as a separate entity in this profile issue, although its shareholders were to approve in late June the buyout and name change to Capital Cities/ABC Inc.

In 1984, ABC was the nation's largest media company with media revenues of $3.65 billion, a 29% increase over 1983. Media revenue accounted for virtually all of ABC's 1984 record revenue of $3.7 billion.

But while 1984 was an outstanding year for ABC, 1985, at least so far, is not. Earnings declined nearly 19% for the first quarter, compared with the first quarter of 1984, to $19.4 million. ABC Broadcast Group profits fell 8%. Company revenues for the quarter were $797.8 million, a 5% decline. The broadcast activity continues the downward trend that came after the euphoria of a successful Olympic Games coverage in Los Angeles last summer.

ABC's broadcast segment in 1984 still finished the year with an extraordinary increase of 26.4% in revenues to $3.3 billion with earnings before taxes of $427.8 million, up 17.1% from the prior year.

Publishing, the second largest segment, had revenues of $316.3 million, up 13%, and pretax earnings of $34.2 million, up 17.2%. The remaining two segments struggled during the year: Video Enterprises recording $54.4 million in revenues, up 306%, but a pretax loss of $44.6 million, compared with a loss of $47.3 million the prior year, and the motion pictures, scenic attractions and "other" segment had revenues of $27.9 million, off 14.4%, and a pretax loss of $271,000, down from a loss of $1.4 million the prior year.

The ABC Video Enterprises (ABCVE) segment, however, began paving the way for greater returns in 1984 with the acquisition in April, 1984, of Entertainment & Sports Programming Network, which makes it the largest supplier of basic cable programing in the country. ABC paid Texaco Inc. $227 million for the 85% stake Texaco had in ESPN. In October, ABC sold 20% of the company to Nabisco Brands Inc., East Hanover, N.J., for $60 million.

ESPN made the deal look good when it reached a three-year, $70 million agreement last summer with the United States Football League to broadcast its games. The ESPN acquisition and poor results from the Satellite News Channels and RSVP, the pay-per-view network, were the reasons for negative earnings in the ABCVE segment.

The most notable development in the motion pictures and scenic attractions category was the sale of the scenic attractions segment (Florida theme parks) in May, 1984, to officers of the division for $6.6 million.

Both the winter and summer Olympics greatly contributed to the strong earnings turned in by ABC's commercial broadcasting division. (ABC accounted for 40% of the aggregate ad revenues of $8.3 billion generated in 1984 by the nation's three major networks.) Within the segment, ABC Radio increased revenues for the second year in a row after a slight loss in 1982. The division also purchased KTKS (fm), Dallas-Fort Worth, for $9 million and sold KGO-FM in San Francisco and WXYZ-AM in Detroit.

But as the poor fall showings dulled the summer performance, it became apparent someone was attempting to make ABC a bride. Its stock dropped and large blocks were being bought by unknown suitors, from whom Cap Cities surfaced. On March 18, 1985, ABC unveiled the historic agreement: Cap Cities would purchase ABC's 29.1 million outstanding shares for $118 a share in cash plus 1/10th of a warrant to purchase Cap Cities stock at $250 a share. The transaction had a total value of $121 a share. ABC had just been sold for $3.5 billion.

Most of the money will come from banks, a dispersal of assets and other sources, including one of ABC's new owners, Warren E. Buffett. Mr. Buffett, chairman of Nebraska-based Berkshire Hathaway, a holding company with interests in several major ad agencies, contributed $517 million to the buyout.

At first, analysts were hesitant about the union. ABC, a vast sprawling empire that likes to consider itself a big happy family, did not appear the most suitable partner for small, tightly run Cap Cities. Later, opinions changed: ABC could benefit from the lean management style of a Thomas Murphy, Cap Cities' 59-year-old chairman, and Dan Burke, Cap Cities president. Both companies said the merger would provide a more stable revenue base.

Under the merger, the new management stucture will include Thomas Murphy, chairman-ceo; Daniel Burke, 56, president-chief operating officer of the broadcast division, and Fred Pierce, 52, will become chairman-ceo of ABC. (He headed the broadcast division at ABC at the time of the buyout.) Leonard Goldenson, former ABC chairman, becomes chairman of ABC Inc.'s executive committee.

The merger also will force a sale of broadcast stations. Stations must be sold that violate media crossownership restrictions (no tv, radio or newspaper combinations in a market not already grandfathered in), when the number of tv, fm or am stations exceeds 12 each or when penetration is greater than 25% of total U.S. households. Broadcast overlaps exist in five areas—New York, Los Angeles, Detroit, Houston and Dallas-Fort Worth.

Almost all of the properties to be divested will be radio stations. Three tv stations will be sold, with many of the tv and radio properties being let go because they are less profitable than those being kept. The following scenario is likely:

- Cap Cities already has put its Buffalo radio and tv stations, WKBW-TV, WKBW-AM, on the block.
- The divestiture problem is most complex in New York. Cap Cities owns stations in adjoining markets—WTNH-TV in Hartford, Conn., and WPVI-TV in Philadelphia—which conflict with overlapping signals in their markets from WABC-TV in New York. In May, Cap Cities said it would seek a waiver from the FCC to keep WPVI. If WPVI stays, then the company will sell WXYZ-TV, Detroit. WTNH definitely will be sold, the company says.
- ABC's New York radio properties, WABC-AM and WPLJ-FM, also conflict with WPAT (am, fm), Cap Cities' combo in Paterson, N.J. All of the stations will be sold, Cap Cities says.
- In Los Angeles, Cap Cities' radio stations KLAC-AM and KZLA-FM conflict with ABC outlets KABC-AM and KLOS-FM, as well as KABC-TV. All four radio stations will be sold.
- In Detroit, ABC's WRIF-FM conflicts with Cap Cities' WJR-AM. If the previously mentioned WPVI waiver is denied by the FCC, then Cap Cities will keep WXYZ-TV, Detroit, and sell the radio stations and the *Oakland Press*, Pontiac, Mich.
- In Tampa, Cap Cities' WFTS-TV will be sold.
- In Houston, ABC's newly acquired KSRR-FM will be sold, because Cap Cities owns KTRK-TV.
- In San Francisco, ABC will sell KGO (am). Because of the merger ABC lost its protection from the grandfather clause that allowed it to own both its KGO (am) radio station and KGO-TV.
- In Dallas, ABC's KTKS-FM will be sold to allow the *Fort Worth Star-Telegram*, Cap Cities' newspaper, to remain.
- Cap Cities' cable tv division, made up of 55 cable systems, also will be spun off. Broadcast networks currently are forbidden from holding major cable properties.
- The newspaper to be sold will be in the New York area—*Daily Register*, Red Bank, N.J.

Broadcast broker Gammon & Ninoski Media Investments, Washington, believes the radio stations, in total, are worth at least $440 million. The total value of all spunoff properties could approach $1 billion. Station swaps also may be considered, and radio stations are more likely to be involved than tv stations.

The publishing operations of both companies combine into a clean fit. Both companies have leading business and consumer publications. Cap Cities owns, among other publishing properties, the Fairchild Publications, which publishes *Women's Wear Daily* and *Institutional Investor*.

The merger is only one part of the drama that has engulfed ABC's broadcast operations during the past year. A triumphant Summer Olympics broadcast gave way to the most disastrous fall tv season for the company since 1972.

The 1984 Olympics turned out to be a bittersweet pill for the network. The winter games in January averaged only an 18.2 rating and 28 share, the blame of which generally is placed on taped delays and the poor showing of the U.S. hockey team. For the first time in Olympics history, advertisers, who had spent $187 million on the games, were compensated for the shortfall.

ABC achieved a slim $15 million profit on the games. The following month, however, the network paid a record $309 million for rights to broadcast the Winter Olympics in Calgary in 1988.

The Los Angeles summer games were a resounding victory for the network. At $200,000 a 30-second spot, the network sold $435 million in ad time, by far the single most lucrative event in the history of tv.

But controversy dogged the games.

Russian and Eastern Bloc athletes pulled out, and ABC feared the summer event would suffer the fate of the winter games. The network pressured the Olympics tv committee to return some of the broadcast rights fees.

After opening day in July, the fears were allayed. The opening ceremonies got a 23.9 rating and 48 share, and the games went on to deliver an average 24.8 ratings and 44 share. An estimated 180 million Americans watched all or part of the games, making the Summer Olympics the most viewed event ever presented by a single network.

ABC used its own fillers during the Olympics to promote its fall lineup of programs. The promos proved meaningless, however, as heavily promoted "Glitter" and "The Call to Glory"—and virtually every other new show to bow in the fall—were removed after poor ratings. ABC, for the first time in more than 12 years, ended last in prime-time ratings for the season. CBS finished first with a 16.9 rating, NBC, second with 16.2, and ABC, 15.4.

The difficulties led to a major corporate shakeup in March, when John Severino, president of ABC Television, was demoted. The two top programing executives, however, solidified their power base in the shakeup. They are Anthony Thomopoulos, Broadcast Group president, and Lew Erlicht, head of Entertainment.

For the 1985-86 fall season, the network has added 10 new series to the schedule, representing a huge eight-hour block. The four new comedies, three action-adventure shows and three dramas represent a major swing back to the young urban viewer ABC lost to NBC last year.

ABC will try to capitalize on "Dynasty," anchor of the entire ABC schedule for the past two years. "Dynasty" finished the 1984 season as the top-rated show on network tv with a 25 rating and 37 share. A spinoff produced by Aaron Spelling, "Dynasty II: The Colbys," has been added to the Thursday evening schedule. In an unusual twist, ABC added "Diff'rent Strokes," the canceled NBC series. Two years ago NBC picked up "Taxi," a canceled ABC series.

Only Monday night remains intact on the schedule. "Monday Night Football" will return for its 12th season, although this show also has suffered a drop in ratings. Some major advertisers managed to lower their unit costs on the show as a result.

The problems on "Monday Night Football" highlighted a major transition period for the network last year. Because of an overabundance of advertiser inventory in the sports market, all three networks have experienced sales difficulties. ABC has restructured its sports sales department, partly in preparation for the huge sales effort it plans for the '88 Winter Olympics. The network cut back slightly last year on its sports programing—including the cancelation of its long-running "American Sportsman" anthology. "Wide World of Sports" continued its reign as top-rated sports anthology on network tv.

ABC also has put the United States Football League on notice that it will not broadcast its games if it moves ahead, as planned, to a fall schedule in 1985.

ABC achieved a major sales victory with its first-ever broadcast of the Super Bowl. The game brought less than expected ratings, but advertisers spent a record $1 million a minute to get a berth on it.

In daytime, CBS notched a slight ratings victory over ABC, although ABC continues to dominate ratings among women 18 to 49 and women 18 to 34. "Good Morning America," the top-rated morning news/entertainment show, continued its dominance, although NBC's "Today" made some inroads.

American Express Co., New York, which has proposed the sale of its 50% share of Warner Amex Cable Communications, is the 39th largest media company, with 1984 media revenues estimated by Advertising Age at $279.3 million, up 10.5% from 1983's estimate.

Media contributions at American Express, equal to 2.2% of total revenues of $12.90 billion, are derived from its 50% ownership in Warner Amex and from three magazines, *Travel & Leisure, Food & Wine*, and newly launched *Departures* magazine.

Warner Amex had total revenues of $472.9 million in 1984, up 8% from 1983, and a net loss of $25 million, compared with a net loss of $98.6 million the previous year.

Warner Communications, which owns the other 50% of Warner Amex, shares half the losses and gains of Warner Amex.

American Express is seeking to exit the unprofitable cable venture to concentrate more fully on financial services. It has signed an agreement with two Denver-based cable operators, Time Inc.'s American Television & Communications subsidiary and Tele-Communications.

The potential buyers are offering to pay $850 million in cash, and assume $500 million in debt. The other partner, Warner Communications, must approve the deal, however. Under the joint venture agreement, each has the right to buy out the other if one agrees to sell.

Drew Lewis, the former U.S. Secretary of Transportation under President Ronald Reagan who became chairman-ceo of Warner Amex in 1983, reduced losses during 1984 by, among other things, selling some of Warner Amex's cable franchises, renegotiating several other franchises and cutting overhead, mainly by reducing staff and consolidating offices.

Warner Amex is the sixth largest U.S. cable system, with a 1984 subscriber base of 1.2 million homes, of which 901,000 are also pay cable customers. This is down from 1983 when its subscriber base was 1.36 million households, of which 1.30 million were also pay cable customers. This decline is mainly because Warner Amex operated 104 cable systems in 24 states at the end of 1984—15 systems and one state less than at the end of 1983.

Warner Amex also owns 19% of Showtime/The Movie Channel, which provides 24-hour-a-day programing for pay cable tv. (For more details on Warner Amex, see the profile on Warner Communications.)

MTV: Music Television and Nickelodeon, two cable services of Warner Amex Satellite Entertainment Corp., a unit of Warner Amex, were sold in July, 1984, to MTV Networks for $67.7 million in cash and 66.1% of the capital stock of MTV Networks. The remaining capital stock was sold in a public offering in August, 1984. (For more details, see profile of MTV Networks.)

As for its magazines, in July the company appointed Thomas Ryder to head American Express Publishing Corp., ending speculation that American Express was considering unloading its publishing division after the April 4 death of John Connors, who had headed the division for 10 years.

The publishing division is made up of *Travel & Leisure* and *Food & Wine*, both of which posted new highs in ad pages and revenues in 1984. Compared with the end of 1983, *Travel & Leisure's* paid subscriptions were up 5.4%, to 975,000 at the end of 1984, and *Food & Wine's* were up 14.2%, to 600,000.

During the same period, *Travel & Leisure* increased its ad pages 16.9% to 1,304, and *Food & Wine* increased its ad pages 21.2% to 505. Advertising Age estimates the two magazines together generated $24.9 million in ad revenues in 1984 and another $17.4 million from subscriptions.

AmEx has just started its *Departures* magazine, a travel publication being sent to the top 150,000 cardholders in Europe and the Middle East. *Departures* is being published six times a year.

Over-all, American Express had a good year, performing well in what was a generally difficult environment for the financial services industry.

Travel related services and international banking both turned in record performances. The acquisition of Lehman Brothers Kuhn Loeb Holding Co., effective in May, 1984, had a positive impact on investment service earnings. IDS Financial Services, acquired in a purchase effective Dec. 31, 1983, was included in the company's results for the first time in 1984; IDS earnings were up significantly from 1983.

The insurance service, of which Fireman's Fund is a division, had a net income of $43 million in 1984, up from $30 million in 1983, but still significantly below 1982's $244 million in net income.

MEDIA PROPERTIES

Cable tv/video

As part of 50-50 partnership in Warner Amex Cable Communications, American Express has interests in 104 cable systems in 24 states with about 1.2 million basic subscribers, of which 901,000 also subscribe to pay cable.

A.H. Belo Corp., Dallas, ranked 31st among the nation's media companies in 1984 with media revenues of $353.6 million, up 46% from 1983. Media revenues were 99.8% of the company's total revenues.

The company was thrust into the industry's higher rankings from its position in 1983 as the 41st largest media company by completing its acquisition of the Corinthian Broadcast Group from Dun & Bradstreet Corp. That acquisition accounted for major increases in revenues and earnings for Belo in 1984.

Of Belo's 1984 operating revenues, $195.2 million, or 55.1%, was derived from newspaper publishing, and $158.3 million, or 44.7%, was derived from tv and radio broadcasting. The "Texas Almanac" accounts for the remaining revenue.

Newspaper ad revenues at Belo's lead property, the *Dallas Morning News*, were $169 million, up 19.4% from 1983. The *News* increased its ad rates about 8% in January, 1984.

Earnings from operations rose 72.2% in 1984, to $91.1 million, of which $33.4 million was from newspaper publishing (up 14.8), and $62.7 million was from tv and radio broadcasting (up 102%).

Belo's primary mission in 1984 was to absorb its newly acquired broadcast properties and to widen the *News'* leadership position over the competing Times Mirror-owned *Dallas Times Herald.*

The effort coincided with a general softening of conditions in the broadcast business and with Belo's construction of a $57 million printing and distribution facility in suburban Plano. The new offset presses began to roll in January, 1985, improving color reproduction quality in the *News.*

Belo's new tv stations remained a strong second or third in their markets, except for KXTV-TV in Sacramento, which sometimes runs fourth. Houston's KHOU-TV experienced soft local spot advertising but edged past H&C Communication's KPRC into second place according to the Nielsen May, 1985, books that gave KHOU a 17 share vs. 16 for KPRC and 25 for leader, Cap Cities' KTRK.

Belo's WFAA-TV retained its leadership position in Dallas-Fort Worth throughout 1984 despite several major personnel changes. In early 1985, Iola Johnson, a popular co-anchor on WFAA's leading news broadcasts, left the station after 11 years in the position. Earlier, a popular consumer affairs reporter for the station died.

While Belo was establishing its management and policies in the new tv markets during 1984, the *News* was making strides in its effort to remain the dominant newspaper in the Dallas-Fort Worth market.

For the six months ended March 31, 1985, the *News* reported total average paid circulation of 368,683 weekdays (up 10.2% for the similar period a year earlier) and 476,004 Sundays (up 10.2%), according to the Audit Bureau of Circulations.

The release of circulation figures for the 12 months ended March 31, 1984, was delayed until November, 1984, because of an audit requested by the *News* to challenge *Times Herald* figures. That audit revealed the *Times Herald* had overstated its figures by more than 20,000 subscriptions that did not qualify to be included.

In the subsequent ABC report for the six months ended March 31, 1984, the *News* was reported to have extended its circulation lead over the *Times Herald* to more than 125,000 both daily and Sunday.

The *Dallas Morning News* gained in all geographic categories, while the *Times Herald* experienced losses in all categories. The *Times Herald* had circulation of 241,055 daily (down 6.2% from the year-earlier period) and 345,932 Sunday (down 1.1%), according to March 31, 1985 ABC audit statements.

The *News'* gains were not limited to circulation. In 1984, the *News* led the nation's newspapers in full-run advertising linage with 116.5 million lines, passing the *Houston Chronicle* and the *Los Angeles Times*, which led the nation as No. 1 and No. 2, respectively, in 1983.

Through the first quarter of 1985, the *News'* total advertising market share was 55.9%, up from 54.3% in the first quarter of 1984, and from its 54.7% share at the end of 1984, according to Media Records. The *News'* first-quarter market share of classified advertising rose to 60% from 57% the year earlier.

On Jan. 1, 1985, Robert W. Decherd was promoted to president of Belo from exec vp. He remained chief operating officer. James M. Moroney Jr., who relinquished the presidency, remains chairman-chief executive officer.

John A. Rector Jr. became publisher of the *News*, moving from president, where he was succeeded by Burl Osborne, formerly senior vp-editor. And Jeremy L. Halbreich was promoted from senior vp to exec vp of the *News*, in which position he is responsible for all of the newspaper's business operations.

While Texas is preparing to celebrate its 125th anniversary in 1986, the *News* will be celebrating its 100th anniversary in the fall of 1985. Leading up to that celebration, the paper acquired the exclusive first newspaper publication rights for the state of Texas to James A. Michener's historical novel "Texas."

In early 1985, Belo stockholders approved a rule that would require changes in bylaws to be approved by two-thirds of the stockholders, a move designed to fortify the company against any takeover attempts.

Blade Communications Inc., Toledo, O., is the nation's 69th largest media company with 1984 revenues estimated by Advertising Age at $157.6 million, all from media operations, up 10% from 1983's estimate.

The privately owned company in mid-June, 1985, underwent corporate restructuring creating the new parent name, Blade Communications Inc., as a holding company responsible for managing nine businesses, including newspapers, cable tv systems and tv station properties in several states. In essence, the restructuring separates the functions of the newspaper division—the company's primary business—from other operations.

The company has been controlled by the Block family since Paul Block Sr. started it early in the 1920s. Today, his sons, Paul Block Jr. of Toledo and William Block of Pittsburgh, Pa., are co-owners.

Blade Communications is a "fairly conservative company" according to a Blade spokesperson. The source says the company experienced growth of between 10% and 15% in 1984 and expected to do about the same this year.

Part of that new growth will result from the purchase of KTRV-TV in Nampa/Boise, Idaho, from Payton Broadcasting Ltd. According to papers filed with the FCC, the purchase price is $4.9 million, but a source outside the company says the purchase also involved Blade's assumption of KTRV's debts, bringing the price to about $6.6 million. Blade is buying the station under the name Idaho Independent Television. KTRV should generate revenues annually of between $3 million and $4 million.

The purchase, already approved by the FCC, was expected to be completed this June, bringing Blade's tv holdings to four stations. Its other stations are WLFI in Lafayette, Ind.; WLIO in Lima, O., and WDRB in Louisville, Ky.

Although the company is continually looking for additional properties, Blade is not likely to make another deal before yearend, says the source, who notes that although the company would consider a good offer involving a newspaper, Blade will look hardest for tv and cable outlets.

"There still are some bargains out there," he says. "It depends on how well you shop."

In its other media dealings, the company experienced moderate growth during 1984. Buckeye Cablevision, which serves the Greater Toledo area, added about 5,000 subscribers, climbing to about 100,000; Erie County Cablevision, which serves the Sandusky, O., vicinity, added fewer than 800 subscribers, climbing to about 15,000, and Monroe Cablevision, Monroe, Mich., added just 500 new subscribers, reaching about 6,000.

The company source says that both the Erie County and Monroe systems are state-of-the-art operations that have been completely rebuilt. Buckeye, which is using all 24 of its available channels, is ready to expand the number of channels it offers as soon as the company sees a need for it, he says.

Financially, the cable operations have been performing about as expected. Part of that performance is a sizable amount of local advertising.

Paul Kagan & Associates, a cable industry analyst, estimates 1984 local ad revenues were about $700,000 for Buckeye. Kagan lists Blade as the nation's 47th largest multiple system operator.

As for pay cable subscribers, the company source says Blade is having good success in that area. Kagan, however, in a January, 1984, case study, says, "The system has achieved only marginal pay penetration," 40.1% of basic.

That figure since has improved to slightly more than 45%.

In the newspaper arena, the *Toledo Blade*, the company's flagship, continued to build circulation. Daily circulation rose 0.3% to 163,194 as of March 31, 1985, compared to the same year-earlier period, and 1.6% to 219,072 on Sunday, according to ABC audit reports.

At the *Pittsburgh Post-Gazette*, circulation fell. The *Post-Gazette's* Monday through Friday circulation was 174,982 at March 31, 1985, down 1.9% from a year earlier, and the Saturday paper averaged 161,860, down 2.2%. The dip in circulation at the *Post-Gazette*, however, were not as great as that at the leading *Press*, which had evening circulation of 247,784, down 3%, and Sunday circulation of 594,025, down 3.2%, during the same ABC reporting period.

The *Post-Gazette*, which does not publish Sundays, has a joint operating agreement with the Scripps-Howard-owned *Press*.

The *Monterey Peninsula* (Cal.) *Herald* circulation rose slightly to 32,794 daily and 34,529 Sunday for the March reporting period.

John Blair & Co., New York, the nation's 22nd largest media company, in 1984 became the largest processor of carrier-route-sorted, third-class mail through its acquisition of ADVO-System, Hartford, Conn.

But Blair's acquisition for $37 million of the direct mail company in March and subsequent attempt to marry its services with those of John Blair Marketing proved to be a heavy burden on the company, outstripping the positive performance of its broadcasting properties.

Over-all, media revenues in 1984 were up a whopping 170% from 1983, to $585.1 million, while media operating profit increased a negligible 1.9% to $21.8 million. Media at the diversified marketing and communications company represented 69.4% of total revenues of $842.4 million, and media operating profit represented 44.3% of total operating profit of $49.2 million.

Over-all net earnings for the year were down 43% to $10.5 million for the year. Printing activities and broadcast repping were not included in media totals for this report.

The 1.9% increase in media operating profit hid both the strength of the broadcasting group and the weakness in marketing. Broadcasting revenues were up 123% to $89 million, while broadcast operating profit increased 185% to $15.7 million. The increases reflected the first full year of operations of one tv and four radio stations acquired in late 1983.

Blair attributed much of that growth to a first-year performance from WKAQ-TV, Puerto Rico, and strong results from first-year operations at radio stations KVIL (am, fm) in Dallas and WIBC (am) and WNAP (fm) in Indianapolis.

At the end of last year, Blair purchased Oak Industries' subscription tv station, WSCV-TV, Fort Lauderdale, Fla., for $18 million. After major equipment investment, the station went on the air in June, 1985, as a Spanish-language station, Blair's second in addition to WKAQ-TV. The station will be programed by Telemundo, operator of WKAQ-TV.

Blair expanded its market for KSBW-TV, Salinas, Cal., by erecting a new broadcast tower. Now able to reach San Jose and southern Santa Clara County, Blair estimates it has added 67,000 homes to its viewing audience out of a potential 500,000.

All that good news was largely eclipsed, however, by the performance, or lack of it, turned in by John Blair Marketing and ADVO, and still is. In the first quarter ended March 31, 1985, Blair posted a loss in earnings of $7.85 million, compared with an earnings gain of $1.1 million the corresponding period in 1985. Revenues for the quarter rose 69.5% to $228.1 million in 1985. During the period, the couponing division of the Blair Marketing segment suffered a loss as expected. Profits were up for broadcasting and printing over-all, but down for the Blair owned and operated portion of broadcast.

Blair initially conceived of the ADVO purchase as a means of enhancing Blair Marketing's ability to deliver cents-off coupons to consumers. Free-standing newspaper inserts (fsi's), the company's traditional vehicle, were becoming increasingly competitive. By combining the insert with the ADVO Marriage Mail package, a new product dubbed Network Mail, Blair thought it would obtain an advantage over its competitors.

The company has been hard hit in 1984 and so far in 1985, however, by a softening market for inserts compounded by an overly ambitious expansion at ADVO that called for delivering Marriage and Network Mail to more than 45 million homes.

The result has been a 1983 operating profit of $15.8 million that faded to slightly more than $6 million last year for the marketing services segment. Worse, the entire profit came from ADVO as pre-ADVO marketing operations turned in a loss.

The problems were many. Increased numbers of free-standing inserts made it difficult, if not impossible, to deliver product exclusivity on any given date. On some Sundays as many as four inserts appeared. Further, a price war broke out that forced prices and profits down.

Reorganization struck the group in the fall. Robert Hemm, who founded the marketing operation and led the move to acquire ADVO, was out. Jack Valentine, ADVO president, was in. Some 40 executives were let go. This year, too, John Blair Marketing plans six fewer fsi's than it had last year. That number is down even more from what originally had been planned.

ADVO wasn't exempt from the reorganization. While the number of Network Mail drops was increased from 12 to 20, circulation was scaled back. Markets served were cut from 215 to 160 while facilities were consolidated. The result is a circulation of 30 million, down from 45 million.

Not counted as media income for Blair, but contributing substantially to its over-all profit, is its media representation business to nonowned stations.

The operation had revenues of $62.2 million and operating profit of $11.8 million. While that performance is expected to continue through 1985, a shadow has been cast on the operation beyond that date.

Capital Cities Communications, now in the process of buying ABC, has been a major Blair client. Blair hopes it will not lose the business even if the stations are sold. In any event, Blair does not expect to be affected by the sale until sometime in 1986.

Bonneville International Corp., Salt Lake City, is the country's 84th largest media company, with 1984 media revenues of $119.1 million, 78.7% of total revenues.

Media revenues in 1984, split evenly between radio and tv at Bonneville, increased 11.3% over 1983. The remaining 21.3% of Bonneville's returns stemmed from satellite and data systems and radio production services.

The company's broadcast station holdings remain unchanged. Bonneville, a closed corporation of the President of the Church of Jesus Christ of Latter-day Saints, owns two CBS-affiliate tv stations, in Salt Lake City and Seattle, and five am and seven fm radio stations.

However, Arch Madsen, Bonneville president, says the company is looking at both radio and tv acquisition possibilities, which have surfaced since the removal of the 7-7-7 ownership rule. Aside from future prospects, Mr. Madsen says Bonneville's main concern in broadcast is to continue to improve programing quality, especially broadcast journalism. Its long-standing satellite capabilities have allowed the company to remain on top of news events as they occur.

Its satellite involvement and electronic data transmission communications keep Bonneville "on the cutting edge" of technology, research and ultimate commercial application of these methods, Mr. Madsen says. He sees Bonneville expanding rapidly in these areas. However, last year's plans for construction of an additional uplink in New York have been dropped because of high cost.

Bonneville Communications, the merger of Bonneville's satellite division and radio data service, is one year old and growing, particularly in data transmission. During the past year, Bonneville Communications division has entered into agreements with several new companies to expand in this area. For McGraw-Hill, for example, Bonneville is developing electronic mail concepts. During the past year, Bonneville signed a contract with General Electric Information Systems Co. (GEISCO) to pool resources on a joint value-added network sales program. A similar agreement was signed with another company, Tymnet Co.

Bonneville Communications also continues to hold contracts with companies such as Western Union Industries and Southern Pacific Transportation Co. for operating satellite transponder channels. The company recently signed a contract with Turner Broadcasting System's Cable News Network to transmit some of its services.

Active in teletext transmission at both its tv stations for seven years, Bonneville services between 700 and 800 telephone calls daily from users of personal home computer who dial into its CBS affiliates to get news readouts. The 24-hour-a-day news service, updated eight times a day, is being conducted in cooperation with CBS. Although Mr. Madsen wishes there were faster movement in this area on the part of CBS, he says the service is progressing, and it continues to provide background for potential commercial usage.

Developments in Bonneville's radio activities included moving subsidiary Bonneville Broadcasting System, a "beautiful music" syndicator, from Tenafly, N.J., to Northbrook, Ill., where Bonneville's three radio production divisions are located. The subsidiary bought Schulke Radio Productions from Cox Communications for $1.7 million, to add to Chicago-based Darrel Peters Productions, acquired a year earlier.

Bonneville's objectives for the coming year are to continue its current range of activities with an eye toward acquiring other broadcast properties and pursue electronic data transmission and satellite activites, Mr. Madsen says.

Cable	0	0	0

New magazine titles, both acquired and developed internally, will continue to build revenues at Cahners Publishing Co., the nation's 58th largest media company, with media revenues of $200 million in 1984.

Total revenues, of which media represent 74%, leaped 35% from fiscal 1984 to $270 million in fiscal 1985, ended in March, 1985.

William Platt, exec vp, magazine division, expects total revenues in fiscal 1986 to reach $300 million, with the growth area shifting to trade shows.

Media, during fiscal 1984, was up 25% in revenues over the previous year. Almost as striking as the revenue growth was a 13% boost in the number of ad pages in 1984. The ad pages of the company's two flagship publications, *EDN* and *Restaurants & Institutions*, jumped 22% and 29% respectively.

Cahner's secret to growth has been its ability to place its weight behind the right properties, whether resuscitating an ailing publication or divesting the money losers.

That is the case of *Transition/Medicine and the Aging Process*, which Cahners got in March, 1983, when it purchased Fischer Medical Publications, New York, and later folded the magazine in 1984. "When [Steve Fischer] started *Transition*, some of his own people said it would never work," Mr. Platt says. "After we looked at the size of the market, we agreed." Rather than put the book on extensive life support, Cahners "zeroed in and put all its effort into *Emergency Medicine*, which was the real money maker" among the Fischer properties.

The medical publications have not fared well under Cahners' ownership—ad pages of the two remaining Fischer publications, *Emergency Medicine* and *Journal of Cardiovascular Medicine*, declined about 20% in 1984.

It is not Cahners' style to buy ailing properties and attempt to heal them. Mr. Platt agrees, although states extenuating circumstances: "When we bought the Fischer books they were coming off a top year and the years ahead looked good. Then a few months later, Steve Fischer died and some key salesmen left. When you lose

people like that it doesn't go without some effect."

The books were laid up even further when the medical market underwent its first downturn in 10 years. "However, the field should come around next year and we're picking up share of market," he says.

Another facet of Cahners' personality is its tenacity, illustrated by its weathering the depressed market conditions of the early 1980s that cut deep into Cahners' building and construction group. Now the industries have become healthy, as have Cahners' publications addressing them. But the building group's competitors also have gained strength.

Cahner's *Building Supply & Home Centers* and *Professional Builder*, historically two of the group's top performers, are in fierce fights. "In those categories, every book in the field is separated by only a couple of share points," Mr. Platt says. "The industry is slowing up a little now, but as long as we continue to pick up market share we'll be satisfied."

Further proof that the company will stand by its man, Cahners took a "stepchild," according to Mr. Platt, and conferred upon it favorite son status. *Corporate Design & Realty*, formerly *Corporate Design*, was redesigned and repositioned to include management information for building managers.

"We were able to expand the market dramatically," he says.

"It was a question of getting out of the business or putting some money into it and expanding the advertiser base," Mr. Platt says. "We showed our commitment by boosting the frequency and putting a lot of four-color work into it." The result is a dramatically improved circulation statement, he says, as well as a 72% leap in ad pages and an 8.2% jump in market share.

Purchased with *Interior Design* from Whitney Communications Corp., New York, in April, 1984, *Corporate Design & Realty* illustrates Cahners' growth strategy. "We'll continue to emphasize acquisitions," Mr. Platt says, "because the property already has a name, you don't have to build initial circulation or hire an editorial staff. An established publication also has trend lines, so you can see how it has grown and judge its potential. The task is basically to bring it up to Cahners' standards."

As single-minded as this sounds, "if we see a need for something and there's nothing addressing it, we'll continue to launch books filling those niches," he says.

Bar Business, scheduled to begin monthly distribution to 101,000 readers in September, fits this pattern. "There was no real bar business magazine, just basically a listing of prices," Mr. Platt says. "This industry needed a spokesman."

It seems rather unusual that traditionally conservative Cahners would select such a volatile industry—one experiencing steadily declining sales, particularly in out-of-home consumption—to launch only its fourth startup. "There's still a tremendous amount of advertising going on," he says. "If companies continue to produce brands with little or no alcohol, they'll still have to promote them. As the market shrinks, they also should be pressured to promote more in the bars.

"As for the bar managers and owners," Mr. Platt says, "they need more information because of the changing laws. They also will need assistance in how to increase profits in a tightening market."

The launch of *Bar Business* probably does not signal a shift toward more risky ventures on Cahners' part. The company's steady growth primarily has resulted from solid acquisitions of stable properties, and Cahners' activities indicate this strategy largely will remain unchanged.

Since 1984, the Times Publishing Company has worked to reach excellence. And while there's much left to be done, we've made some impressive strides:

- In 1984, the *St. Petersburg Times* was cited as one of America's top ten newspapers by *Time Magazine* and judged to have the world's best color reproduction by Kodak. This year we won a Pulitzer Prize for investigative reporting.
- Winner of more than 600 state, regional and national awards, the *Evening Independent* has a whole new look — and circulation gains to go with it.
- *Florida Trend* was named the nation's best regional business publication by the University of Missouri School of Journalism and the American Association of Business Publications.
- *Florida Trend's* sister publication, *Georgia Trend*, will begin publication in September, 1985.
- Modern Graphic Arts produced more than 190 million pieces of quality printing and opened new offices in Atlanta and Charlotte.
- Washington-based *Congressional Quarterly*, the nation's foremost journal on Congress and political action, in 1984 won the Everett McKinley Dirksen Award for Distinguished Congressional Reporting. We also launched the Washington Alert Service offering worldwide on-line access to comprehensive and timely information on Congress, politics and national issues.

New challenges lie ahead, but as we begin our second century our goal remains the same ... excellence.

Capital Cities Communications, New York, surprised the communications industry with the 1985 acquisition of American Broadcasting Cos.—four times its size. Cap Cities is the 16th largest media company with 1984 revenues of $939.7 million, up 23% from 1983.

Cap Cities revenues, all from media operations, helped generate a net income of $135.2 million, up 17.9%, giving Cap Cities a profit margin among the highest in the broadcasting industry.

However, in the first three months of 1985, Cap Cities had lower returns, mimicking much of the rest of the industry for the quarter. Revenues of $234.1 million were 13% above the similar period in 1983. Net income increased only 2.2% to $27.7 million. Soft advertising demand both in publishing and broadcasting hurt the bottom line.

In late June, 1985, Cap Cities shareholders were expected to vote for the proposed merger with ABC, the largest media buyout ever. Cap Cities in March, 1985, proposed to buy ABC for $3.5 billion. Stockholders from both companies were expected to approve the merger June 25.

Just prior to the shareholder's meetings, Cap Cities said it planned to sell its cable operation—ranked the 21st largest with 375,000 basic subscribers—to the Washington Post Co. for $375 million. The sale, which is in keeping with the $1,000 per subscriber industry standard for such transactions, is part of Cap Cities' plan to raise $1 billion to finance the ABC acquisition.

During 1984, most of Cap Cities' revenues derived from its publishing entities. Including results from its most recent purchase in the publishing field, *Institutional Investor*, Cap Cities' publishing division produced $591.6 million in 1984, 63% of its total revenue base. Broadcasting contributed $271.8 million, or 29%. The final and much smaller piece of the Cap Cities media empire, cable tv, had $76.3 million in revenues last year.

Though its publishing revenue base is larger, broadcasting is a far more lucrative business for the company. Operating income of the division in 1984 was $141.6 million or 53% of corporate operating income. Publishing accounted for $133.2 million in operating income.

Cap Cities attributed its banner year of 1984 in part to the contribution of the ABC-TV Network broadcasts of the Winter and Summer Olympics. The company's four largest stations are ABC affiliates: WPVI-TV, Philadelphia; KTRK-TV, Houston; WTNH-TV, New Haven, Conn., and WKBW-TV, Buffalo, N.Y.

Cap Cities made several acquisitions in 1984. In August, an independent uhf in Tampa, WFTS-TV, was purchased, bringing Cap Cities' total tv holdings to six. In December, KLAC-AM, Los Angeles, was purchased and KZLA-AM was sold to Spanish Broadcasting Systems of California Inc. Cap Cities continues to own 12 radio stations. This configuration will change dramatically after the merger with ABC, when as many as four tv stations will be sold. In addition, Cap Cities owns 54 cable systems, which will be spun off after the merger in accordance with media concentration of ownership rules. (See ABC profile in this issue for likely divestitures resulting from the ABC acquisition.)

In March, the company made a large shopping guide acquisition with the purchase of Sutton Industries, Mission Viejo, Cal., which distributes some 1.3 million weekly fliers in Southern California.

Sutton joins Cap Cities other regional shoppers *Pennypower Shopping News* (distributed in Kansas and Missouri), *Little Nickel Want Ads* (purchased in 1983 and distributed in Seattle), and *Pennysaver* (distributed in Southern and Central California).

Last August, *Institutional Investor* was purchased for about $40 million—Cap Cities' major publishing buy of the year. This top financial publication joins a host of other specialized publications in the Cap Cities Fairchild Publications' stable.

The past two years have been especially frenetic and productive ones for Cap Cities' specialized publishing division. In 1983, *M*, the men's fashion monthly, was inaugurated and sustained higher than expected losses its first full year because of cost overruns. Last year, the consumer version of *Sportstyle* was folded after just nine issues, while the trade version of the publication continued.

A new magazine for children's fashions, toys and furniture, *Children's Business*, is in the planning stages. The magazines are published by Fairchild Publications, which also publishes *Women's Wear Daily, W, Footwear News, Supermarket News* and *MIS Week*.

The company's other magazine publishing operations include the International Medical News Group, Rockville, Md.; Professional Press, New York; American Traveler, New York, which publishes *Travel Agent*; Philatelic Publications, Albany, Ore., and Electronic Publishing, New York and Norwalk, Conn. The magazines achieved record revenues last year thanks to favorable market conditions.

Similar conditions were absent in the metal working publications' market, however, although revenues increased slightly over 1983.

Cap Cities also continued to add to its weekly and twice-weekly newspaper holdings, which include 14 newspapers in Connecticut, Illinois, Missouri, New Jersey, Oregon, Pennsylvania and Texas. In January, 1984, Wilson Publishing, a small publisher of weeklies in Rhode Island, was purchased. Shore Line Newspapers, a string of weeklies in Connecticut and Rhode Island, began two new weeklies and acquired two others. Shore Line had a record earnings year.

Cap Cities began marketing its 1983 database publishing acquisition, Videolog, late last fall.

While Cap Cities' daily newspaper circulation declined slightly from 1983 to 1984 (Sunday newspaper circulation increased slightly), the company's eight major market newspapers had record ad volume last year. Total newspaper revenue was $328.7 million, a 15% increase from 1983, while ad volume was $275.6 million, a 17% increase. One of the best performers in the newspaper group was the *Fort Worth Star-Telegram*. Resurgence of the auto industry continued to spur the performance of the Pontiac, Mich.-based Oakland Press.

Cap Cities' cable tv division had only marginal success last year. The division earned $2.5 million in operating income on revenues of $76.3 million, a slight increase over 1983's performance. One reason: Premium subscribers, those who order pay services, leveled off last year as pay tv began to mature. The company made few additions to its cable operation in 1984. A small system in Oklahoma was added, and in January, a 5,000-subscriber system in Union City, Cal., was purchased.

Most of the action in 1985 will be the spinoff of several highly profitable Cap Cities tv stations and ABC radio stations as part of the new company's compliance with FCC media concentration regulations. Cap Cities, however, says it will seek a temporary waiver from the FCC on the sale of radio stations in Chicago, San Francisco, New York and Los Angeles owned either by Cap Cities or ABC in order to allow more time to sell the properties in an orderly way.

CBS Inc., New York, which is fending off a takeover attempt by Ted Turner, chairman of Turner Broadcasting, is the 2nd largest U.S. media company, with 1984 revenues from media operations estimated by ADVERTISING AGE at $3.03 billion, up 12.9% from 1983.

CBS, which had 1984 corporate-wide net income of $212.3 million, up 13.4% from the previous year, on revenues of $4.93 billion, up 8.5% from the previous year, during most of 1985 has been putting up roadblocks to Mr. Turner's bid. From continuing operations, revenues in 1983 would be $4.396 billion, and the revenue growth 12.1%.

The Turner offer is $5.4 billion, a value he places on his so-called high-yield, high-risk "junk bonds" and stock he plans to use to buy CBS. The FCC will need to rule on a CBS petition filed in June, 1985, that alleges such a buyout would reduce news programing and lessen competition for national advertising.

CBS' original business, radio and tv, contributed $2.72 billion to total revenues in 1984, advancing 14% from 1983. Magazine publishing brought in an estimated $309.6 million, up 5%.

Media operations added $438.6 million to the profits column in 1984. Broadcasting was the big hero with an increase of 40% over 1983. Publishing, which includes nonmedia books and advertising-supported magazines, boosted its profit level 7%.

The basic ingredient in CBS' advertising success is the long-term popularity and stability of CBS-TV Network. While NBC and ABC grapple for the honor of being No. 2 in A.C. Nielsen Co. homes during the most valuable time periods in America, the kingpin seat remains firmly occupied by the folks at Black Rock, the CBS nickname for CBS' New York headquarters.

CBS-TV has been the prime-time leader in household ratings for six consecutive seasons. CBS-TV rather quietly wound up 1984 by outpointing ABC-TV in the net income column, even though the latter led in sales, according to *Electronic Media*.

The CBS-TV Network had pretax profits in 1984 of about $310 million compared with $252 million for ABC-

TV. CBS scored this coup, despite the boost ABC picked up from the Summer Olympics in Los Angeles.

The broadcast division's 40% profit gain compares with a 17% increase for ABC and 39% for NBC. Tv and radio at CBS contributed $408.6 million in 1984. Nonetheless the division, headed by president Gene Jankowski, was not without its troubles. As the jewel of this corporate empire, the broadcast group could not feel too comfortable with the takeover artists circling the premises.

Further, the broadcast group has been beset with legal headaches. The most worrisome lawsuit, brought by former Gen. William Westmoreland against CBS News, was settled out of court, but only after months of court testimony by numerous witnesses. This cost CBS at least $10 million. Still to be resolved are about 12 other libel suits against CBS News. Another Army officer from the Vietnam War and five Protestant ministers, who believe they were wronged by "60 Minutes," are awaiting their day in court. Also, a woman executive has filed a sexual harassment complaint against a former CBS vp.

Then, there is the "CBS Morning News" dilemma. The network that for most of the last 30 years has dominated nighttime tv still can't find a formula for an early morning hit. Consequently, ABC and NBC are getting the big ad dollars in this time period.

At the station level there always is room for improvement. Only one of five owned stations, WBBM-TV, Chicago, was first in total audience delivery for the late local news in the Nielsen February sweeps. WCBS-TV, New York, and WCAU-TV, Philadelphia, were second, while KNOX-TV, St. Louis, and KSBC-TV, Los Angeles, were third.

The CBS Radio Network fared well in the Radio All Dimension Audience Research measurements for the fall of 1984, ranking first with persons 18 and older for the total week count. Of the 13 owned am and fm radio stations, the best Arbitron report cards for fall, 1984, came from WHTT-FM (former WEEI-FM), Boston; WCAU-TV, Philadelphia, and KMOX, St. Louis. They were first in the time period selected for media comparisons in this special section.

In second place were WCBS, New York; WBBM-FM, Chicago; KCBS, San Francisco, and KNX, Los Angeles. In the worst spots for this group owner were KRQR (fm), San Francisco, in 13th place and WCBS-FM, New York, 10th. In May, 1985, the company bought five more radio outlets from Taft Broadcasting Co. for $107.5 million. Including the Taft stations, CBS has seven am and 11 fm radio stations.

Like many other communications corporations, CBS has yet to find a way to capitalize on new video technologies. The company persuaded the FCC to give it a waiver to buy a small cable company, CBS/Blackhawk Communications, near Dallas-Fort Worth. This was to be an "experimental" venture and the experience has not been encouraging. The systems probably are for sale unless top management decides they want to keep a foot in the door of cable operation.

Last fall, CBS became a partner in cable's SportsChannel and in Rainbow Service's Bravo and American Movie Classics. This $57 million investment is not expected to pay off anytime soon. Bravo, in particular, was a surprising buy for a company that suffered a $30 million-plus loss trying to market culture to cable a few years ago.

Also, the Trintex videotex joint venture with Sears, Roebuck & Co. and International Business Machines are not likely to be profitable right away.

Mr. Jankowski reorganized his group slightly in 1984 to gear up to produce more software for distribution in the U.S. and abroad. He says he wants to grab a bigger share of the videocassette market and to expand program sales to tv and cable abroad.

The CBS Theatrical Films unit (not to be confused with CBS/Fox, the home video venture, or Tri-Star Pictures, a movie partnership) was rechristened CBS Productions. Lumped in with the film unit was CBS Worldwide Enterprises, an operation that has been showing aggressiveness and ingenuity in distributing CBS shows abroad. Barter has been introduced to the People's Republic of China, with U.S. advertisers aboard.

Unless displaced by entrepreneur Ted Turner, Sen. Jesse Helms' band of conservatives (Fairness in Media) or someone else, Thomas H. Wyman, CBS chairman, is certain to expand CBS' tv station list now that the individual company ownership limit has been raised from seven to 12 stations.

In the past, however, his acquisition energies have been directed toward print and radio. Last November, CBS bought 12 magazines from Ziff-Davis Publishing Co. for $362.5 million, in one of the largest print deals ever. Because the purchase was not finalized until February, these magazines do not figure in media compilations for 1984. The Ziff-Davis acquisitions were not without controversy. About three months after the deal closed, CBS filed suit against Ziff-Davis alleging the company overstated the earnings of the 12 magazines it sold.

Of the new titles added from Ziff-Davis, Mr. Wyman contends *Modern Bride, Popular Photography* and other less well-known titles are natural mates for CBS' *Woman's Day* and the magazines on its leisure list.

CBS's *Cuisine* gave up the ghost, and its subscription list was sold to Conde Nast. In 1984, *World Tennis* and *Family Weekly* were sold. Even so, after the acquisition from Ziff-Davis, CBS Magazines division claims to be the largest publisher of special interest consumer titles in the U.S. The crown jewel, *Woman's Day*, touts a readership of 25 million. Specials have been added to the year's regular publishing schedule. This magazine was down 4.8% in ad pages but charged enough to climb 4.5% to $110 million in ad sales.

Field & Stream, CBS' first magazine, dropped a shade in pages, yet forged ahead 12.2% in media revenues to $34.3 million. Among the Ziff-Davis titles showing gains are: *Car & Driver*, up 18.8% to $27.4 million, and *Modern Bride*, up 8.3% to $18.3 million.

The third publishing unit is software, an operation set up to provide information for home computers. In addition, the unit will use material from the magazines and books to turn out products for the home video and videotex market. These are nonmedia items.

The CBS annual report credited CBS/Publishing Group with a sales increase of 5% to bring it to $619.2 million and income of $59 million, for a gain of 7%. This includes revenues from the educational and professional publishing division—that is books—as well as from the magazine division. For purposes of this analysis, ADVERTISING AGE credits the magazines with half the revenues and profits of the publishing division.

In the chart at the start of this profile, books are included with "other," along with CBS Records, which had a sizzling year, and toys and theatrical films, which produced red ink.

Central Newspapers, Indianapolis, the 30th largest media company in 1984 with media revenues of $380 million, is changing shape with cutbacks in some areas and expansions in others.

Central owns newspapers in Indiana and Arizona and last September entered the rapidly expanding public-access videotex arena by launching Teleguide Metro Phoenix two weeks after folding its three-channel cable operations there.

The fast-growing Phoenix market continues to be where most of Central's changes are occurring. The R/G Cable subsidiary changed its name May 1, 1984, to Telegroup to more closely identify with the Teleguides it operates and to distance itself from the failed cable ventures. The discontinued channels were R/G Vision News, R/G Vision Classified and the Home Channel classified real estate listings.

Teleguide now has more than 80 advertisers, called information providers, on 82 terminals (100 projected by July 1 and between 150 and 200 by the end of 1985) in 19 high-traffic locations, such as shopping malls, hotels, Arizona State University and, as of July 1, Sky Harbor Airport. Users have free access to directories that list restaurant, hotel and shopping events information via multicolored computer-generated graphics.

Telegroup general manager Joe Cole says the operation is "still losing money, but it looks better" than projections, because "revenues are not where we thought they'd be, but expenses are lower than expected." Mr. Cole says he's looking for Telegroup to be profitable in early 1987.

Telegroup is affiliated with Videotex America, a joint venture of Times Mirror Videotex Services and Infomart, and as such is in the front of the line when expanded videotex service enters Arizona. "It's just a matter of when," Mr. Cole says. Telegroup is not participating in the Times Mirror services, but is able to share in the information gained from the experiment.

Central's morning *Arizona Republic* and evening *Phoenix Gazette*, operated by Phoenix Newspapers Inc., have a lock on the Phoenix market. Both share printing facilities and equipment and have one sales staff, which sells space in the newspapers either separately or in combination. The editorial staffs are separate and competitive, even though they reside in the same building. Publisher Darrow (Duke) Tully oversees both papers.

The Sunday *Republic* recently broke through into the top 25 newspapers in circulation nationwide, hitting 499,917, reflecting an annual increase of close to 7%, according to March 31, 1985, ABC figures. The *Republic* daily circulation for the same period was 325,677, up about 5% over the year earlier. The *Gazette* daily circulation was 125,021, up 3.3%.

Also owned by Phoenix Newspapers Inc. are two weeklies. One is the *Arizona Business Gazette*, a business and legal weekly with paid circulation of less than 5,000 out of a total circulation of about 8,000. The 104-year-old publication has changed management, editorial and sales staffs, content and format in the past two years. Display advertising linage increased 60.3% in 1984 over 1983. As of May 1, 1985, linage was up 14.8% over the similar period in 1984.

The other Phoenix Newspapers weekly is *City Life*, an arts and entertainment free paper that is available at street stands, quantity of 45,000, and inserted into nearly 84,000 *Republics* and *Gazettes* on Wednesdays. *City Life* was launched in 1983. A strong rivalry exists between *City Life* and the popular local weekly *New Times*, an artsy, liberal, investigative giveaway with a circulation of 113,000.

City Life is seen in the market as Mr. Tully's red-ink indulgence, a way of countering the frequent jabs at his personal life made by *New Times*.

Phoenix Newspapers spokesman William R. Shover, however, says *City Life* is now in the black, "although it's a week-to-week thing."

He says *City Life* is an adjunct to the *Republic* and *Gazette* because there was not enough space in those papers for all the listings of restaurants, movies, theaters and other events. "We were lacking coverage in that area," he says. "You don't go out and do things out of spite; it just doesn't work."

Several new ventures are on tap for the *Republic* and *Gazette* in the next year. The newspapers will install computerized pagination in August. A newsprint storage warehouse is being built.

Phoenix Newspapers also is working with Gruen & Associates in Los Angeles to develop a six-block "superblock" on property it owns near its downtown Phoenix headquarters.

This year's biggest project is a joint venture with four other newspaper groups: Chronicle Publishing in San Francisco, Copley Newspapers in San Diego, McClatchy Newspapers (*Sacramento Bee*) and Kearns-Tribune Corp. (Salt Lake *Tribune*) on a newsprint mill in Washington state. Capacity is to be 155,000 metric tons of newsprint a year, and of that the *Republic* and *Gazette* expect to use 20,000 metric tons.

Closer to home, Mr. Tully mandated restrictions throughout Phoenix Newspapers effective May 6 because of a failure to reach revenue projections as costs increased. No salary or staff cutbacks are scheduled, but freezes and cuts pervade nearly every other area.

A planned printing plant expansion in suburban Mesa has been "temporarily put aside," Mr. Shover says.

Circulation remained stagnant at the Indiana half of Central Newspapers. Only the Sunday editions of the Indianapolis and Muncie papers showed circulation gains, the *Indianapolis Sunday Star* increasing 1.4% and the *Muncie Sunday Star*, up 2.3%. Both the evening and Sunday Vincennes *Sun-Commercial* showed small circulation gains. Cutbacks are not in effect in Indiana, according to Central Newspapers president Frank A. Russell.

Earlier this year, Central entered into negotiations to buy Spark Newspapers in Hayward, Cal., but ended up "walking away," Mr. Shover says. "It was not a good business deal," he says. No further acquisition talks reportedly are scheduled with anyone.

Central is privately owned and very closely held. Founder Eugene C. Pulliam died in 1975, and the company is run by his son, Eugene S. Pulliam, 70, along with Mr. Russell, 64, and *Indianapolis Star & News* general manager William A. Dyer Jr., 82. Each operates out of Indianapolis.

Mr. Russell says he spends a week to 10 days a month at the Phoenix facility, but he keeps a low profile. When one veteran staffer was asked about Mr. Russell, his response was, "Frank who?" Even the Phoenix Newspapers tour guide had never heard of Central Newspapers, insisting the papers were owned solely by Phoenix Newspapers Inc.

When the senior Mr. Pulliam died there was a provision for an irrevocable trust for the papers not to be sold. Asked if the provision was for as long as 50 years, Mr. Russell said, "That's not necessarily correct. Well into the future, though."

Chris-Craft Industries, New York, the 73rd largest media company with media revenues increasing 20.2% from 1983 to $146.7 million in 1984, is finding that the recent softening in demand for tv ad time will make it difficult to record similar growth in fiscal 1985.

The company, which has six tv stations, four of which it controls through its BHC Inc. subsidiary's 50.3% ownership in United Television of Minneapolis, has experienced an 8.7% increase in operating revenues to $86.2 million in 1984. But by Feb. 28, 1985, the end of the first six months in Chris-Craft's fiscal year, the company had a net income loss of $7.4 million.

The heavy loss in net income—$11.2 million—came in the second quarter and was attributed to Chris-Craft's *pro rata* portion of the $225 million loss reported by Warner Communications for Warner's fourth quarter ended Dec. 31, 1984. Chris-Craft owns 29% of Warner.

The slack in tv ad sales, plaguing much of the country, is spotty at Chris-Craft, evidenced by the best back-to-back quarterly performances (first and second quarters) by KCOP-TV, Los Angeles, compared with a poor showing by KPTV-TV in Portland, which is feeling the effects of an over-all poor economic environment in Portland and a new uhf station in the market. Both stations are wholly owned by Chris-Craft.

During 1984, Chris-Craft, whose media properties made up 88.2% of total revenues of $166.4 million, had returns that were above industry average for its tv properties. But it suffered an over-all loss of $12.3 million in net income traced largely to heavy losses incurred by Warner, of which Chris-Craft is the largest shareholder.

Chris-Craft and Warner exchanged stock in 1984 in a move designed to upset a takeover attempt of Warner by Rupert Murdoch's News America Corp. In the exchange, Chris-Craft got 19% of the voting stock and later upped the ante to 29%, and Warner gained a 42.5% interest in BHC. Chris-Craft consolidates all revenues of BHC in its financial statement.

More recently, Chris-Craft and Warner have been trying to work out a deal to sell their stock back to each other. There also have been rumors that Warner may be making a takeover bid for Chris-Craft. Concerning the latter, Chris-Craft vp-general counsel Barry Greene says he is not worried about fighting off a takeover attempt, mainly because management owns a substantial portion of the corporation's stock and because a classified board provision allows for the selection of only one-third of the corporate board each year. Other than that, "we're not building fences around ourselves," he says.

During prime access from 7:30 p.m. to 8 p.m., A.C. Nielsen Co. rated KCOP-TV in a tie with KTTV in the November rating period, while Arbitron Ratings Co. reported KCOP-TV second behind KTTV-TV.

The highly competitive Los Angeles market has prompted KCOP-TV to place a greater emphasis on news to provide a strong lead-in for the station's high-rated prime time movies. Within the past two years, KCOP-TV tripled the size of its news department in its effort to compete head-on against news market leader KTLA-TV. A new set and new personnel have been added, but Chris-Craft doesn't expect immediate results. Don Searle Jr., research director for KCOP-TV and Chris-Craft Television, says, "Ratings take time to build in this area. KTLA-TV may be No. 1 in news now, but it took them years to get there."

Recently, KPTV-TV in Portland became a Cable News Network affiliate.

The four United Television (UTV) stations echoed Chris-Craft's commitment toward news upgrading. According to Mr. Thompson, news is especially important among the two UTV affiliates, KMOL-TV, an NBC affiliate in San Antonio, and KTVX-TV, an ABC affiliate in Salt Lake City. "News programing in these markets occurs during the most important local time period on the stations. It is the anchor of their local programing efforts and affects network programing with its carry-over effect," Mr. Thompson says. Chris-Craft spent $5.8 million last year to improve its stations' newsgathering efforts.

The UTV stations recorded an 8% increase in operating income last year, and a 48% increase in operating revenues, percentages that include only about six months of returns in the prior year from UTV's acquisition of KBHK-TV, San Francisco, in July, 1983. UTV's properties apart from KBHK-TV gained 17% in revenues and 12% in operating income in 1984.

Construction has begun on a new uhf independent station in the Phoenix market, which now has three vhf affiliates, one vhf independent and a uhf independent. Assigned the call letters KUTP-TV, the station plans to be on the air by January.

Plans have been proposed to create a single entity by combining the two BHC stations with the UTV's properties. The Warner reswap affects such a move. Chris-Craft has announced a proposal to exchange 11.3% of its Warner stock to give it an 81.1% share of UTV. However, in early May, 1985, it delayed action for 90 days.

The greater stake in UTV "would greatly enhance the size, muscle and appeal of the combined entity," Mr. Greene says, adding that the possibility of future acquisitions also would be increased, presumably aided by greater cash flow. The stations serve a combined total of 9.4 million homes, or 11% of the nation's households.

Chris-Craft independent stations were among the founding fathers of the so-called Independent Prime Time programing effort to provide first-run programs.

Chris-Craft also owns a collection of small manufacturers of plastic flexible films and foams, latex foams and nonwoven fiber products.

Chronicle Publishing Co., San Francisco, is the nation's 50th largest media company, reporting 1984 media revenues of $231 million.

Media at Chronicle Publishing includes the *San Francisco Chronicle*, four tv stations and a cable operation. Real estate and a book publishing group contribute an additional $20 million in revenues to bring total corporate revenues to $251 million.

No year-to-year comparisons are available for Chronicle Publishing, whose estimates last year were overstated when 66% of the combined *Examiner & Chronicle* Sunday paper was attributed to Chronicle; it splits proceeds from that product 50-50 with Hearst Corp.'s *Examiner*. The daily Chronicle, half of the Sunday paper and the Bloomington, Ill., paper produced revenues of an estimated $170 million in 1984. Tv properties added an additional $30 million, and cable, through Western Communications, contributed $31 million.

The company is wholly owned by the family trust of the M.H. de Young estate and has published San Francisco's leading newspaper since 1895. Publisher Richard Tobin Thieriot is a great-grandson of founder Michel H. de Young, as is Francis A. Martin III, president of Chronicle Broadcasting Co.

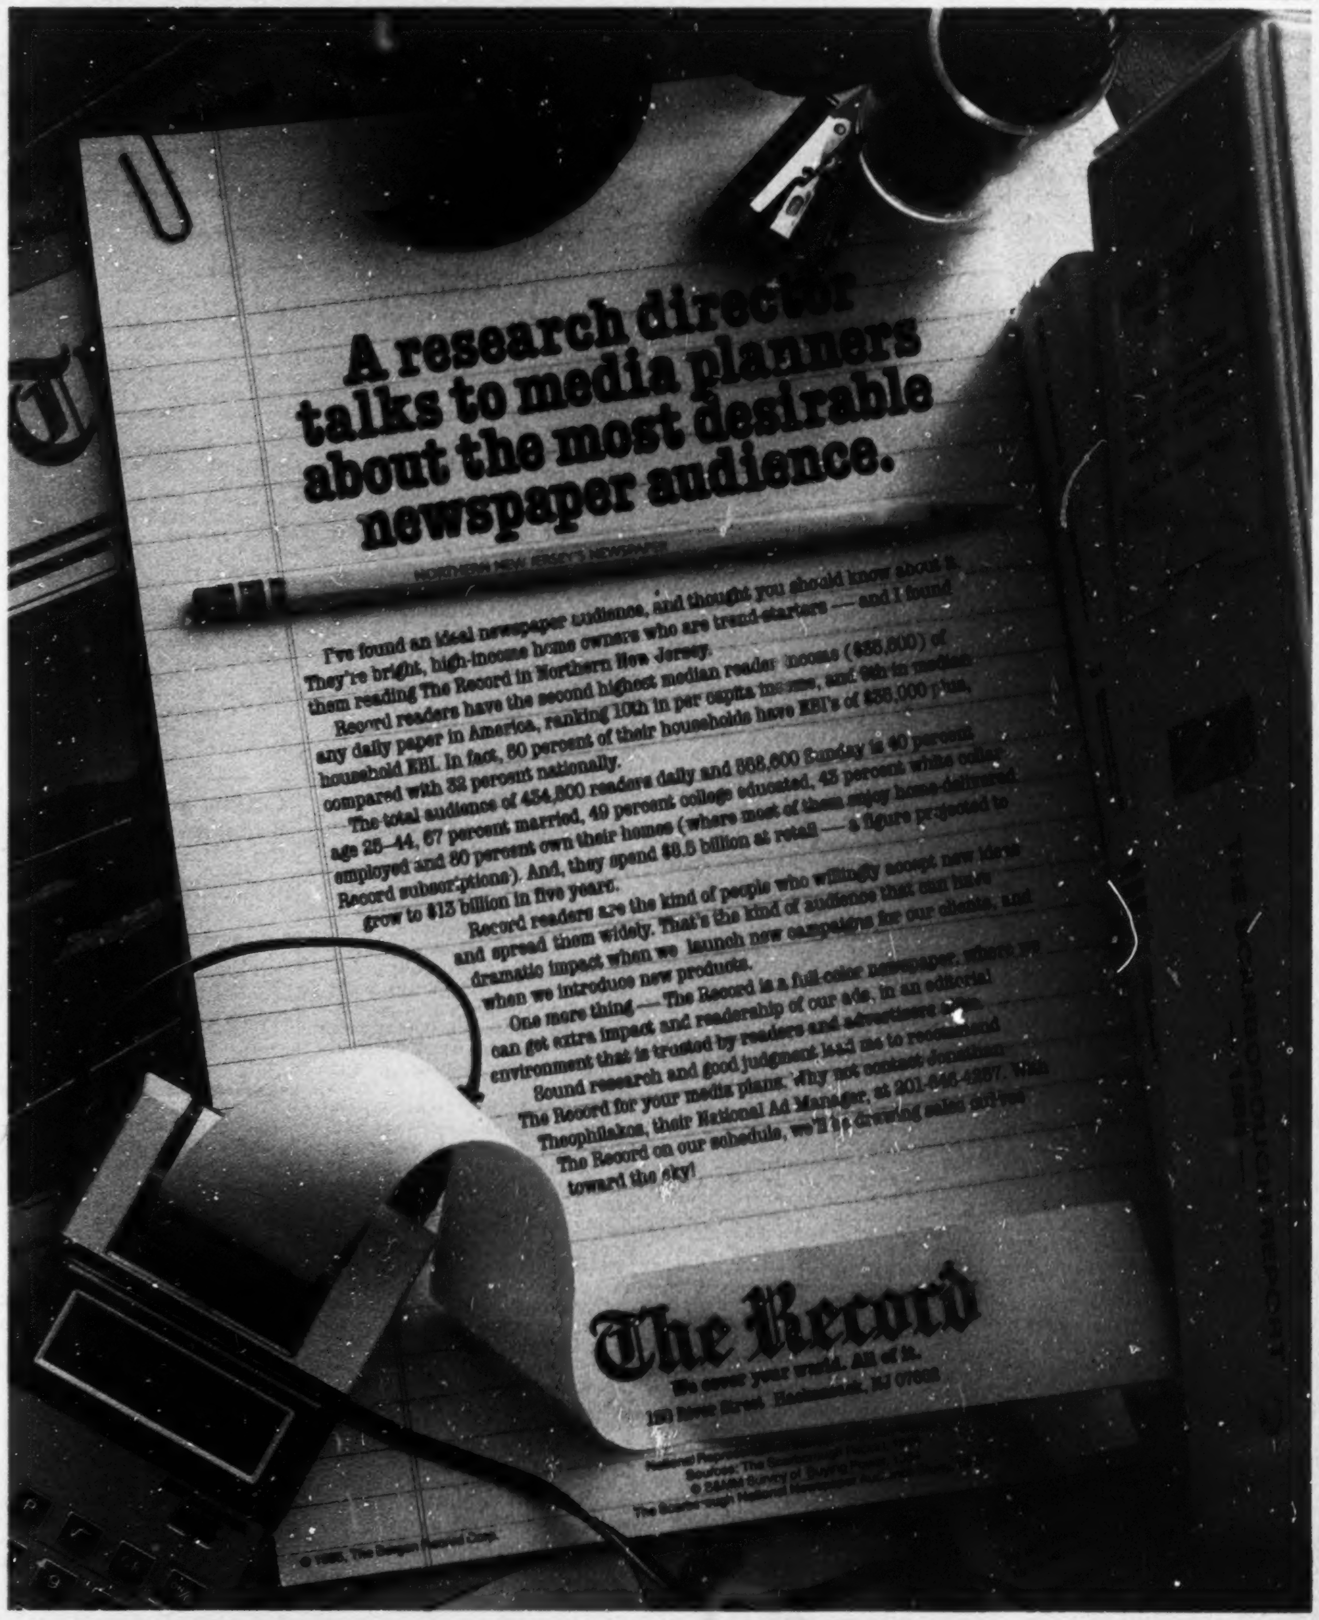
Daily circulation according to the March 31, 1985, ABC statement was 554,979, up 2.9% from the corresponding period a year earlier. The combined Sunday *Examiner & Chronicle* was 717,426, up 1.6%.

On April 15, 1985, the *Chronicle* began beefing up its business coverage on Mondays with an expanded "BusinessExtra," section, edited by new business editor Peter Sinton, who came from *Business Week* in mid-1984. Alan Mutter, city editor, joined the paper from the *Chicago Sun-Times*.

"Things are growing, but not spectacularly," says Phelps Dewey, assistant publisher, noting the bulk of circulation growth is outside the city, extending from Oregon to Bakersfield. Mr. Dewey agrees that "over a wide area, penetration is not all that great," but says the *Chronicle's* efforts are as good as those of the *Los Angeles Times* in its market. Among the more critical observers of the paper, University of California at Berkeley journalism professor Ben Bagdikian says the *Chronicle* has a lower penetration rate than most papers its size.

The penetration dilemma does not exist at the *Bloomington* (Ill.) *Pantagraph*, the company's other daily. Penetration in that market is 87%, Mr. Dewey says, adding, "That's what you get in a small, independent, concentrated market." The March 31, 1985, ABC figures show morning circulation to be 52,941, a slight gain over the prior year. Sunday circulation is 56,104, again a slight gain over 1984.

Chronicle Broadcasting Co. owns KRON-TV, an ABC affiliate that garnered a Peabody Award as well as 22 of the local Emmys this year, "a record for a single station in the market," Mr. Martin says. The station is second in news ratings only to the CBS affiliate, KPIX-TV. "We've significantly increased our market share in terms of ad dollars, both percentage growth of ad revenues . . . and the share of ad



A research director talks to media planners about the most desirable newspaper audience.

NORTHERN NEW JERSEY'S NEWSPAPER

I've found an ideal newspaper audience, and thought you should know about it. They're bright, high-income home owners who are trend-starters — and I found them reading The Record in Northern New Jersey.

Record readers have the second highest median reader income ($35,500) of any daily paper in America, ranking 10th in per capita income, and 9th in median household EBI. In fact, 50 percent of their households have EBI's of $35,000 plus, compared with 32 percent nationally.

The total audience of 454,800 readers daily and 568,600 Sunday is 40 percent age 25–44, 67 percent married, 49 percent college educated, 43 percent white collar employed and 80 percent own their homes (where most of them enjoy home-delivered Record subscriptions). And, they spend $8.5 billion at retail — a figure projected to grow to $13 billion in five years.

Record readers are the kind of people who willingly accept new ideas and spread them widely. That's the kind of audience that can have dramatic impact when we launch new campaigns for our clients, and when we introduce new products.

One more thing — The Record is a full-color newspaper, where we can get extra impact and readership of our ads, in an editorial environment that is trusted by readers and advertisers alike.

Sound research and good judgment lead me to recommend The Record for your media plans. Why not contact Jonathan Theophilakos, their National Ad Manager, at 201-646-4287. With The Record on our schedule, we'll be drawing sales curves toward the sky!

The Record

We cover your world. All of it.

dollars in the market," Mr. Martin says.

The company also owns CBS affiliate WOWT-TV in Omaha, Neb., and ABC affiliate KAKE-TV in Wichita, Kan. Both "remain dominant in these markets in news and all facets of programing," Mr. Martin says.

Western Communications, the company's cable tv subsidiary, now boasts 150,000 subscribers (up slightly from last year) for its five cable systems. Four have been rebuilt to carry 53 channels; the fifth sends 27 channels. "We're in the process of closing on another 15,000 subscribers in California at the end of June," says Western Communications president Ed Allen.

Programing varies widely from market to market. Western has experimented with pay-per-view and has begun running commercial spots on its Monterey system, a move that probably will be extended to other systems, Mr. Allen says.

Bay Area Teleguide, a public access videotex system, is the first product of Chronicle Videotex, created in 1983 by Chronicle Information Services, a division of Chronicle Publishing Co. Bay Area Teleguide reached 286 terminals—mostly in heavily trafficked San Francisco locations—in June, 1985. Two branch offices in Palo Alto and Oakland are opening this year.

As of December, Phoenix, Sacramento and Toronto have been added to the network. The 10,000-page database, offering information in such categories as entertainment, shopping, dining, hotels, sports and public agencies, is scanned by some 300,000 people a month.

Continental Cablevision, Boston, is the country's 51st largest media company with revenues of $226 million in 1984, up 44.9% from 1983.

Continental continued its steady growth last year, extending its subscriber count to 965,000, up 12.3% from 1983. It had 1,100,000 pay units the end of 1984, up 30.3%, or a pay tv sell-in rate of 1.14 pay services per basic subscriber. In the process, Continental boosted its asset base 18.8% to $570 million in 1984.

Continental made one of its bigger moves in winning the St. Paul, Minn., franchise after a two-year battle. It had to make more concessions than usual—community channels, minority training, production studios, and discount subs—in this area of high social awareness.

The system, launched the end of April, 1985, seeks 15,000 subscribers by year end. There is a 135,000 home-potential in the franchise. It already has a sell-in of 1.7 pay units per basic subscriber.

Continental expects to expand within its present geographic boundaries through "highly selective acquisitions" in 1985, says a company spokesman. Continental is private, although Dow Jones & Co. owns 24.7%.

Copley Newspapers, which owns media properties nationwide, confined most of its activities in 1984 to its home base as the company generated media revenues of $303.9 million, ranking it the 37th largest media company.

La Jolla, Cal.-based Copley broadened news coverage at its flagship newspaper, the *San Diego Union*, in increasing company-wide media revenues by 28.4% over 1983. Media at Copley represents 98.5% of total revenues. A resort hotel and a computer service account for the remainder.

Copley's dramatic revenue increase is rooted in the recovery experienced in its six papers in Illinois and continued growth in its five California papers. Together, they have a combined daily circulation exceeding 750,000.

Copley's Illinois newspapers, which include the *State Journal-Register* in the capital city of Springfield and five other dailies that ring Chicago, rallied from a recession that hit the industry in Illinois in 1983 with "a double-digit rebound in ad linage," in 1984, says Robert F. Crouch, vp-finance for Copley.

The company's morning *Union* and *Evening Tribune* in San Diego are not standing still. In an effort to provide better service, the papers have added 50 employes and assigned them to suburban offices. The new staffers, using new computer equipment, will provide expanded coverage for readers in five zones: Central (metropolitan), north county, north coastal, south bay and east county. The communities targeted are Oceanside, Escondido, Del Mar, El Cajon, Coronado, National City and La Jolla.

This move has been studied by Copley for several years, and it is hoped the move will enable the *Union* and the *Evening Tribune* to stay ahead of growth in the San Diego area. The move will pit the *Evening Tribune* in particular against smaller widely read evening newspapers in the area: *The Californian* in El Cajon with circulation of 22,704, up 6.4%; *Times-Advocate* in Escondido with circulation of 35,862, up 7.5%, and *Blade-Tribune* in Oceanside with circulation of 30,832, up 8.3%. The Escondido and Oceanside papers both have strong Sunday circulations. Figures are based on ABC audits comparing March 31, 1985 six-month estimates with the comparable period in 1984.

Copley's *Evening Tribune* in the same March 31 reporting period had circulation of 122,590, up 0.8%. The *Union* fared much better, growing 5% to 231,306.

Hubert Kaltenbach, Copley president, looks at the San Diego expansion as providing a needed service to current and potential readers. "There is no particular price tag on this project," he says, noting "we expect to gain circulation because of the zoned editions. In some cases, advertising rates will be reduced because of the zones. But we will be providing better service, and in the long run it will make our newspapers better."

Copley has yet to realize revenues from its cable tv partnership with Colony Communications, owned by Providence Journal Co., Providence, R.I. Construction delays have caused revenues to lag behind original projections. Although the subscriber lists are beginning to grow in the Southern California areas where the Copley-Colony team has been awarded franchises, Mr. Kaltenbach says, "It could be two or three years before we see any substantial revenues." There are 9,900 subscribers in the system.

Late in 1984, Copley announced it had entered into negotiations with Chronicle Publishing and Hearst Corp. in San Francisco, McClatchy Newspapers in Sacramento, Kearns-Tribune Co. in Salt Lake City and the Phoenix Newspapers Inc. to form Ponderay Corp. to produce newsprint in Washington state. Ponderay's plant is expected to be operational by 1987.

"This is a protection against shortages," Mr. Crouch says. "There is a greater need than ever [for newsprint]. This way, we won't be totally dependent on other sources."

The Courier-Journal & Louisville Times Co. and WHAS Inc., a separate broadcast company also owned by the Barry Bingham family, ranked 85th among U.S. media companies in 1984 with media revenues of $116 million, an 8.4% increase over 1983.

Total revenues for the Louisville-based company were $192 million, which include revenues from Standard Gravure and Standard Colorprint, printing presses in Morristown, Tenn.; Data Courier, a database publishing enterprise; Courier Communications Corp., a computerized information service, and two retail computer stores called Computer Emporium.

The company also has acquired a 50% interest in an Indianapolis mailing company in order to position itself with a direct mail capability. The mailing operation handles supplements, advertising, direct mail and premiums. Wide regional expansion of this service is planned.

The ABC audit for the six months ended March 31, 1985, listed the morning *Courier-Journal* with a circulation of 175,266, down 1.1% from the similar period a year earlier, the evening *Louisville Times*, 133,661, down 1.6% and the Sunday *Courier-Journal*, 331,686, up 0.5%.

John L. Richards, senior vp, says the entire newspaper industry was experiencing circulation troubles. The company has hired two local ad agencies, Doe-Anderson and Gibson-McKnight, to tackle the circulation problem. One agency will work for the morning newspaper and the other for the evening paper.

"Each newspaper has a different image, and we'd like the public to distinguish between them," Mr. Richards says. "The morning paper is a newspaper of record, more serious and down to business. The evening paper is lighter, more amusing."

Ad rates and linage have increased for the basic newspaper and the five zoned editions.

In the fall of 1984, company-owned radio stations WAMZ (fm), with a country format, and WHAS (am), a contemporary adult format, were rated by Arbitron No. 1 and No. 2 for their respective audience share in the Louisville market. WHAS-TV, its CBS affiliate, achieved a leading 21 share of households in the 6:30 p.m. news slot, and 18 at the 11 p.m. news period. WHAS had an 18.5% increase in ad revenue. NBC affiliate, WAVE-TV, had an 18 share at 6:30 p.m. and at 11 p.m. WLKY-TV, the ABC affiliate, carried a 7 rating for both slots.

In the past decade, Louisville Productions, a division of WHAS Inc., has expanded its corporate communications services to include films and videotapes for sales training, orientation, new product introductions, promotion and pr. In the last year, video conferencing, a new communication tool for business, has blossomed.

Satellite communications also have grown to the point where Louisville Productions can connect with one city or coordinate a network of sites worldwide, demonstrated last year during the press conference called by Louisville-based Humana Inc. to report the results of an artificial heart implant.

The company's electronic publishing capabilities continue to expand. Its wholly owned subsidiary operates two new ad-supported public-access videotex systems. Metroguide, a Louisville visitors' information guide, started placing kiosks in hotels and other public places in late 1984.

Travelers' Highway Information System is putting terminals at interstate highway rest areas in Indiana and is seeking to develop similar systems in neighboring states. The systems feature advanced use of graphics and are built around IBM microcomputers placed in kiosks. Advertisers must pay to be carried on the tourist-type listings offered motorists. Motorists key-in at no cost.

CJ&T Channel, the newspapers' 24-hour cable tv news and classified advertising service, is modifying its text-only presentation to include photographic real estate and automotive classified. Unlike the current text segments, which are sold as add-on to a newspaper classified ad, the illustrated segments will be sold on a stand-alone basis. Surveys show that more than 20% of Louisville's and surrounding Jefferson County's 136,000 cable subscribers view the channel in a given week.

Data Courier specializes in database publishing. Its products include ABI/INFORM, one of the largest and oldest business databases, and an array of new computer and business-related databases, which can be accessed by computer over phone wires. Expansion plans for the company's retail computer stores have been put on hold awaiting a shakeout in the Louisville market. Competition in the business is keen and margins are thin.

The company is considering developing a database that could be accessed through individual personal computers. "Experience gained from downloading videotex pages to the IBM PCs in public-access kiosks could lead to a similar in-home product," Mr. Richards says.

One factor is chilling the company's expansion plans: A drive by one of the family members, Sallie Bingham, to sell her about 15% share in the family companies. She has retained New York broker Henry Ansbacher Associates to seek an outside buyer for the stock, which Ansbacher valued at $82 million to $92 million.

The stock offering has its origins in a rift that developed among family members in 1983 when Barry Bingham Jr., editor and publisher of the Louisville papers, asked his sisters, his mother and his wife to resign from the board of directors of the family companies to bring in outside directors with more business acumen. The others agreed to resign, but Sallie Bingham refused and was not re-elected to her board seat. She offered to sell her shares to the family for $42 million, but was turned down.

The possibility that the family eventually might have to make the investment to buy her out "is making us watch our nickels and dimes," Mr. Richards says.

Ms. Bingham counters, "The family should make its bid soon, or my asking price will go up. Based on recent sales that have been taking place, like the *Des Moines Register & Tribune*, it is boom time for the media."

Cowles Media Co., Minneapolis, is the nation's 49th largest media company, with operating revenues of $232 million for the fiscal year ended March 31, 1985, an increase of 11% from revenues for fiscal 1984.

Net income in the period was $15.7 million, down 45% from the year earlier period, while operating earnings were $31.7 million, a 63% improvement from the corresponding period.

The drop in net income was largely due to a $16.9 million one-time gain in fiscal 1984 from the sale of Cowles cable and broadcast holdings. The results in fiscal 1984, in fact, were the first increase recorded since a wave of cable and broadcast divestitures in the early 1980s left the company leaner though better poised for growth.

Cowles' is being ranked on its fiscal 1985, which largely covers calendar 1984. Previously, the company has been ranked on its media returns from the prior year. All Cowles revenues come from media operations.

While Cowles has neither bought nor sold any properties since its fiscal closing in April, 1984—following earlier divestitures of all its broadcast and cable properties—the company made news when two publishing giants bought blocks of its stock from family hands.

The liquidation earlier this year of the Cowles family-owned Des Moines Register & Tribune Co. enabled Gannett Co., Rochester, N.Y., to buy the Des Moines company's 14.3% stake in Cowles, along with the *Register & Tribune* and three smaller papers.

Kingsley Murphy Jr., whose family sold the *Minneapolis Star & Tribune* to Cowles in the 1940s, sold his 17% interest in the company to Washington Post Co. for an estimated $45 million in March, 1985. The Post has more recently acquired another 3% of Cowles' stock.

The Des Moines company's liquidation and sale also fueled speculation on the fate of Cowles Media. Many industry observers predicted Cowles would meet the same fate after Cowles chairman David Kruidenier's unsuccessful effort to merge the two companies.

Mr. Kruidenier, who also was chairman of the Des Moines company, repeatedly has said Cowles is not for sale, echoing his previous statements about the Des Moines company.

In part to avoid a sale, Cowles has attempted to extend the control and tenure of a five-member voting trust, established in 1977, to ensure that control of the company remains in family hands.

However, a lawsuit filed by Mr. Murphy, a dissident shareholder unhappy with management, charged the extension was illegal and diluted the value of the 17% stake in Cowles Mr. Murphy had earlier said he intended to sell.

Mr. Murphy since has sold his stake to the Post Co. (which earlier expressed an interest in buying the *Des Moines Register & Tribune*), rendering the lawsuit moot, says a source close to Mr. Murphy.

Other news at Cowles includes formation of a division to market videotex services primarily in the Twin Cities skyway system. Though it has made no formal announcement, Cowles plans a series of touch-screen terminals providing shoppers and tourists with information on retailers and sightseeing attractions.

Meanwhile, the flagship *Star & Tribune* has registered circulation increases of 3% daily and 2% Sunday over last year, while its competitor across the Mississippi, the *St. Paul Pioneer Press* and *Dispatch*, showed combined daily and Sunday losses.

The *Star & Tribune's* daily average circulation for the six months ended March 31, 1985, was 383,657, while Sunday circulation was 596,181. The *Star* and *Tribune* were combined in April, 1982, as a step toward boosting profits.

Since then, the *Star & Tribune* has expanded its business coverage with a Monday "Marketplace" section, and increased its news hole for weather, sports and suburban stories.

Cowles also is planning a $110 million expansion of the Minneapolis production facilities, to be completed in 1987.

Magazine	0	0	0
Broadcast	279	200	39.4
Cable	405	337	20.0

Cox Communications, Atlanta, celebrating its 20th and last anniversary as a public company, is the country's 19th largest media company with 1984 media revenues of $684 million, up 20.3% from 1983. It is being bought by Cox Enterprises. (See Cox Enterprises' profile, this page.)

Media revenues accounted for 92% of total revenues of $742.8 million which generated net income of $78 million, up 19.1%.

Cox is a diversified media company with interests in broadcasting and cable tv, as well as several new media, including satellite master antenna tv. The nonmedia portion of Cox's earnings comes from its organizing of automobile auctions (with revenues up 21% and operating income up 6% from 1983) and from programing and nonaffiliate media sales from its TeleRep subsidiary.

Cox broadcasting division reported record results, with a 20.8% revenue gain over 1983 to $279.1 million and a 23% increase in operating income to $107.2 million. After adjusting for the purchases of WAGO (fm) in Chicago ($9 million) and WKBD-TV in Detroit ($70 million) and the sale of WLIF (fm) in Baltimore, 1984 revenues actually increased 11% and operating income, 18% over 1983.

WSB-TV, Cox's flagship station and ABC affiliate in Atlanta, again delivered the highest profit margin in the division. WSB-TV has regained leadership in news at 6 p.m., with WAGA-TV, according to early 1985 Arbitron reports, and is tied with WAGA for first place at 11 p.m., an improvement over last year's report.

WHIO-TV, the CBS affiliate in Dayton, O., had record revenues and continued to dominate the market. WHIO-TV's share is nearly double the audience share of the second-place station, WDTN-TV. WSOC-TV, the ABC affiliate in Charlotte, N.C., also had a record year in revenues and operating income.

KDNL-TV, St. Louis, became the only uhf independent in the market when it switched over from a subscription tv, pay-per-view service in 1984. It remains fifth in a five-tv station market.

Cox's newest tv acquisition, WKBD in Detroit, ranks first among uhf independents in the top 10 markets, according to the latest Nielsen Independent Ranking report, based on the number of viewers in early prime time.

The company's national tv sales rep company, TeleRep, is the third largest rep company in the U.S. in both billing and coverage. According to Cox, TeleRep's 1984 billings approached $600 million and coverage exceeded 61% of the nation.

TeleRep has developed and run several series in recent years including "Solid Gold," the nation's top rated weekly music show seen on 214 stations around the country. "Entertainment Tonight," in its fourth season can be seen in 94% of U.S. tv households. "Star Search," billed as the "world's greatest talent hunt," has been renewed after a successful first season. "Lifestyles of the Rich and Famous" was Cox Communications' 1984 entry and within four months of its debut was on the top 10 first-run syndicated series list. TeleRep also featured two miniseries in 1984 under the Operation Prime Time label. "Helen Keller-The Miracle Continues" and "A Woman of Substance" were OPT's contributions.

It was a successful year for the Cox radio community as well. In Los Angeles, KOST (fm) had its highest rating ever and now ranks second among adults 25 to 54. WSB (am, fm), Atlanta, is second in morning drive in that market.

The 1985 season introduced the broadcasting of Atlanta Braves, Atlanta Falcons and University of Georgia football and basketball games over WSB.

WHIO (am, fm) is the highest rated am, fm and combination station in Dayton. In Charlotte, country music station WSOC (fm) is the leading station in the market. Because of the fm station's success, WSOC (am) was recently changed to a country format from middle of road. WSOC (am, fm) led the radio group in operating margins in 1984. In Miami, WAIA (fm) ranks second among adult contemporary stations in the market.

In Philadelphia, fm station WZGO is benefiting from a change to a contemporary music format, also from middle of road.

Revenues of the station are improving and audience acceptance is growing, say Cox officials.

WAGO (fm), acquired early in 1985, is experiencing lagging sales.

Cox Cable reported 20% increases in both revenues and operating income for 1984. At yearend, basic subscriptions were 1,538,000 and paid program subscriptions were 1,557,000.

Tier units (advertising-supported satellite programing services sold as a separate package) increased to 253,000. After adjusting for four small systems sold during December, 1984, basic subscriptions increased 8% and 4% paid program prescriptions over 1983.

The Cox Cable system in San Diego exemplified the company's growth by signing its 250,000th subscriber, making it the first cable system in the nation to reach that level.

Franchise renewals were negotiated successfully in Santa Barbara and Eureka, Cal., Lubbock, Tex., North Adams, Mass., Parma, O., The Dalles and Seaside, Ore., and Gainesville, Fla. Operating losses were experienced in four major markets, Omaha, Tucson, New Orleans and Vancouver, because of high construction costs.

In December, 1984, sales of three Chicago area systems and the Robinson, Ill., system were completed. Cox also entered into agreement to sell cable systems in Burlington, Rutland and Montpelier, Vt., North Adams, Mass., and Saranac Lake, N.Y. Local partners exercised their right to purchase 80% of Cox Cable in Fort Wayne, Ind.

In April, 1984, Cox Communications purchased On Cable Publications, publisher of *On Cable* magazine. Fox bought the monthly cable program magazine in 1983.

In June, 1984, Cox entered the radio common carrier business with the acquisition of 90% of CyberTel Corp., the oldest and largest paging and mobile telephone operator in St. Louis and the largest in Illinois outside Chicago. The acquisition will provide Cox the means to develop and manage early entry into new radio common carrier technologies, such as cellular radio.

In January, 1984, Cox sold Cox Data Services, a tv software subsidiary. In July, 1984, the company sold Schulke Radio Productions Ltd., a music syndication subsidiary.

Cox Enterprises, Atlanta, the nation's 21th largest media company in 1984, will virtually double in size with its reuniting with sister corporation, Cox Communications.

Had the merger been consummated by yearend, Cox Enterprises, which in 1964 spun off Cox Communications into a quasi-public company (Cox family interests retained 40.8% of the stock) to finance expansion in broadcast, would have ranked 12th with 1984 media revenues of $1:27 billion among this year's 100 media companies.

As it was, Cox Enterprises held down its current ranking with revenues of an estimated $587 million, up 17.4% from the prior year.

Cox Enterprises is a privately owned newpaper company led by Barbara Cox Anthony and her sister, Anne Cox Chambers. The *Atlanta Journal* and *Constitution* are its lead papers. The company operates 24 daily newspapers in 16 cities and several weeklies in suburban New Orleans and in Texas. It also has shoppers in Arizona, Colorado, Florida, Louisiana, Ohio and Texas, and it publishes the monthly *Palm Beach Life.*

Cox Enterprises had purchased more than 95% of the outstanding shares of Cox Communications by the end of May, 1985, paying $75 a share, or $1.2 billion.

According to sources at Cox Enterprises, no changes are expected in the broadcast, cable or newspaper operations.

The reunited companies took little time in taking decisive action. In early June, Cox Enterprises agreed to buy for $185 million SFN Cos.' WFTV, the ABC-affiliate and leading station in Orlando in news and other local programing. SFN Cos. picked up the station less than a year ago for $125 million. Cox may have paid as high as 16 times projected cash flow for the station, excessively steep even in today's euphoric media market.

Cox Enterprises in 1984 acquired the *Orange* (Tex.) *Leader*, with a circulation of about 12,000, and in February, it acquired 50% of the *Yuma* (Ariz.) Daily Sun from the Soldwedel family, and then later in the year bought out Donrey Media Group which had purchased the other 50%.

Cox now operates 24 daily newspapers with a total circulation exceeding 1.4 million. Its Sunday editions reach another 1.5 million readers.

Contrary to rumor, Cox Enterprises says it intends to hold on to the *Miami News* despite speculation that it would dump the poorly performing evening paper with ABC audited circulation for the six-month period ended March 31, 1985 of 60,286, down 5.1% from the prior year.

Cox's *Atlanta Journal* and *Constitution* continue to show growth with ABC audited circulation March 31 of 420,156, up 2.1% from the prior year. The Sunday *Journal & Constitution* had circulation of 595,625, up 4.9%.

Privately held Dispatch Printing Co., Columbus, O., the nation's 70th largest media company, had 1984 revenues, all in media, estimated by ADVERTISING AGE at $152 million, up 8.6% from 1983's estimate.

The company's main enterprise, the afternoon *Columbus Dispatch*, has increased its Sunday circulation by 5,257 since 1983, while its weekday sales decreased 128, according to Terry De Vassie, assistant circulation director.

Hal Schellkopf, assistant managing editor, says better economic conditions account for the increase in Sunday sales. "At $1 a copy, maybe some people who didn't have a buck a year ago, do now."

Mr. Schellkopf and Mr. De Vassie agree that Gannett Co.'s *USA Today* has affected the *Dispatch's* weekday circulation.

Mr. De Vassie says, "*USA Today* also created newspaper readers—people who never bought daily papers before." So he believes, "If *USA Today* should go off the market, we'd have a bunch of new readers."

A 25-year joint operating agreement (JOA) with the *Columbus Citizen-Journal* will end Dec. 31, 1985, Mr. Schellkopf says. He refused to elaborate on reasons, saying the contract, which called for Dispatch Printing Co. to handle advertising, circulation and other noneditorial functions for both papers, will expire and not be renewed. Mr. Schellkopf says the *Dispatch* has no plans to switch to a morning paper to compete head-on with the *Citizen-Journal*, owned by Scripps-Howard, Cincinnati. That would present "production problems," he says, noting that the *Dispatch* will continue printing both papers.

The *Citizen-Journal's* circulation of 119,150 in the March 31, 1985, ABC report was down 1.7% from last year. The *Citizen-Journal* does not publish a Sunday edition. The *Dispatch*, which publishes a bulky 400-page to 500-page edition, had an estimated Sunday circulation, in April, of 363,546.

Mr. De Vassie says his staff estimated the *Dispatch's* daily circulation was 206,420 in April, 1985. His figures are based on ABC standards, he says, and the two papers currently are undergoing their yearly ABC audit. The *Dispatch* Sunday magazine, *Capitol*, shows off the paper's new heat-set/offset printing technique, which Mr. Schellkopf says offers truer color reproduction.

The *Dispatch's* newly installed Atex computer system, Mr. Schellkopf says, has improved efficiency for his 170-member editorial staff. Negotiations are under way to hook up *Dispatch* computers to VU/TEXT, an information research service out of Philadelphia.

Richard Franks, vp-operations, says the paper soon will offer advertisers "any combination of methods" for penetrating advertising markets, such as zone advertising in the paper or by mailing preprinted ads as part of a total market coverage (tmc) to reach nonsubscribers. The service will be available this fall or by the end of the year, he says.

Changing the format of the monthly *Ohio* magazine from a city magazine covering the whole state to a regional focus is credited by Ellen Stein, managing editor, with building the circulation base to 122,000 in 1985 from 111,000 at the beginning of 1984. An ABC audit lists circulation as 97,137 for the fourth quarter of 1984.

Ohio magazine is distributed fairly evenly across the state, with stronger penetration showing in some major cities without city magazines, such as Akron and Youngstown, Ms. Stein says. Dispatch Printing Co. started radio station WBNS (am) in Columbus in 1929. Ten years later, it expanded into an fm station. Both are now easy listening stations.

The company's WBNS-TV, a CBS affiliate, ranks No. 1 with its 6 p.m. news in the Columbus area and claims 43% of the viewing audience, down 5 percentage points from last year. Jerry Cary, chief financial officer, says the drop was caused by the advent of a new independent station, WTTE, owned by Julian Smith. WTTE recently began operations in Columbus and has taken a percentage of viewers from all the local stations.

Dispatch's Indianapolis tv property, WTHR-TV continues to rank No. 2 in that market's 6 p.m. news slot. Mr. Cary says WTHR-TV's affiliation with NBC has produced heavy gains in prime-time ratings this season.

Donrey Media Group, Fort Smith, Ark., is a privately held company with media revenues estimated by ADVERTISING AGE at $198 million in 1984 and the nation's 60th largest media company.

All of Donrey's interests are in media operations, with an estimated 80% of its revenues generated by newspapers. Focusing on newspapers with circulations between 15,000 and 100,000, Donrey now owns 105 newspapers, including 52 dailies.

Characterizing 1984 as "a year of growth," Donrey exec vp Fred Smith says he looks to 1985 for "continuing internal growth and additional acquisition activity."

To illustrate his point, Mr. Smith

noted the company acquired in May, 1985, the *Norman* (Okla.) *Transcript*, with ABC circulation of 17,245 daily and 18,204 Sunday for the six-month period ended March 31, 1985.

Donrey also owns 12 outdoor advertising plants, seven radio stations, one tv station and five cable companies. It broadened its holdings in 1984 with the addition of a radio station, KLDR (fm), in Delta, Colo., and another outdoor advertising operation, Donrey Outdoor, in Muncie, Ind.

Also acquired were four more newspapers; *Ukiah* (Cal.) *Daily Journal*; *Altus* (Okla.) *Times*; *Advocate News* in Fort Bragg, Cal., and the *Mendocino* (Cal.) *Beacon*.

The company remains committed to developing technology, particularly in its newspaper operations. Donrey is very pleased, Mr. Smith says, with the progress of a laser plate maker it has been researching.

Now in use at the company's largest newspaper with daily circulation of 101,658—the *Las Vegas Review-Journal*—Donrey is considering the plate maker introduction elsewhere in the system.

Dow Jones & Co., New York, is the country's 17th largest media company with media revenues of $926 million in 1984, a 13.4% increase over 1983.

Media revenues accounted for 96% of total revenues of $965.6 million in 1984. National publications and news and information services accounted for nearly 78% of the total revenue.

Like many media companies, Dow Jones spent time on the acquisition trail. Last January, 1985, the company purchased interests in two software companies—Software Ventures and Planning Economics Software. The purchases were part of a corporate strategy to expand the company's growing software operations.

In June, 1984, Ottaway Newspapers, Dow Jones' community newspaper publishing subsidiary, purchased the *News-Sun*, Sun City, Ariz., its 22nd daily newspaper for $9 million in notes. The six-day a week afternoon newspaper has a circulation of nearly 17,000.

In November, in a surprise move, Dow Jones unsuccessfully offered $112 million for the Des Moines Register & Tribune Co. The company's offer was made in conjunction with a group of investors, two of whom were top executives at the *Des Moines Register & Tribune*, the company's lead paper. The *Des Moines Register* and the company's other newspapers were sold to Gannett Co., in January, 1985, for $200 million.

During 1984, Dow Jones' flagship publication, the *Wall Street Journal*, made news when a Securities & Exchange Commission investigation alleged that *Journal* reporter R. Foster Winans, who often wrote the "Heard on the Street" column, leaked advance information about topics of future columns to outsiders. Mr. Winans, his roommate and a Kidder Peabody & Co. employe are defendants in the resulting criminal securities, wire and mail fraud trial.

Last September, *Journal* executives said the company was expecting third-quarter ad linage to be flat and were expecting a slip in circulation by yearend. At that time, the company said, circulation had been down 2% to 4% during the previous few months. The company attributed the circulation decline to increases in subscription rates and single-copy prices, which rose from 35¢ to 50¢.

ABC six-month average as of March 31, 1985, place the *Journal* circulation at 1,990,025, down 4.4% from the prior year. And for its 1985 first quarter, ended March 31, the *Journal* reported a 0.3% slippage in ad linage primarily due to decreases in classified advertising and help-wanted and condominium ads.

The company said the slowdown in ad linage was based on "difficult" comparisons with the third quarter of 1983 when ad linage was up substantially as the recession ended.

In the fourth quarter, the paper's stagnant ad linage was compounded by Mobil Corp.'s removal of the the *Journal* from its media buying schedule. The decision stemmed from Mobil's apparent dissatisfaction over its editorial treatment in the newspaper. Mobil spent more than $500,000 in the *Journal* through the first 11 months of 1984.

In November, the *Journal* announced an increase in national ad rates of 9.5% and regional rates 8% to 9%. Also, the company's *Asian Wall Street Journal* boosted its rates 12.5%, and rates for the *Asian Wall Street Journal Weekly*, published in the U.S. for a North American audience, rose 15%. Ad rates for the *Wall Street Journal/Europe* rose 25%.

In April, 1985, the *Journal* launched a $5 million ad campaign aimed at increasing readership among its target group of 25 to 54-year-olds.

The 30 and 60-second b&w tv spots, dubbing the *Journal* "the daily diary of the American dream," featured film clips mixed with still photos of immigrants arriving in the U.S. and being processed at Ellis Island. During the spot a singer tells the viewers, "the dreamer, the leader, they're one and the same in you."

The 13-week circulation campaign aired on sports, news and prime-time programs. Agency for the campaign is Fallon McElligott Rice, Minneapolis.

The company's *Barron's* magazine faced similar circulation erosion as the

BUSINESS WITH BILL*

[*Frankly, an advertisement*]

Yes, frankly, this is an ad. Our objective? If we can reflect to you the uniqueness of our Bill Communications' properties, then you can judge us even better as a reader, perhaps an advertiser, and maybe even a future fellow employee.

John Hartman
Chairman of the Board
Bill Communications, Inc.

Any good job will give you the opportunity to better yourself and to advance your position within a company, but Bill Communications gives you much more. How else could I have started as a clerk-typist and (with no sales experience) gotten to be a sales representative in four years?

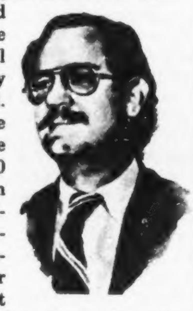
Bill Communications is a very special place to work because at Bill you get a feeling of being part of a close-knit family. There is a willingness to help people who stumble because you get the same consideration in return. This establishes an openness of communication and accessibility from the top manager to the newest employee.

Bill is a place where personal development is considered as important as professional success; a place where constructive advice will be found both within your own division and also from others. It's a place where fear of failure is overpowered by the excitement of possible success; a place where solutions are sought out at the expense of standard operating procedures. Everyone at Bill recognizes that the company's greatest asset is properly acknowledged—the people who work here. Bill Communications is a place where everyone comes to work knowing that we are all happily working towards one common goal—personal growth and success.

Andrew J. Desidoro
Regional Sales Manager
Sales & Marketing Management

With Bill: 11 Years

Bill Communications is a company for the independent, self-motivated, goal-oriented individual. Technical competence must be coupled with vision and tenacity. Corporate staff is kept to a minimum and the financial people like me are involved in the creative process as advisers, not as policemen. For them success is measured by numbers, and the numbers at Bill have been very gratifying, indeed. Sales in 1972, the year I joined the company, were $10 million. Sales in 1981 were $33 million. That represents an average increase of 15% per year for the last nine years. During those years, the company has started four new magazines, increased employment levels by 10%, and become a national leader of a disappearing breed—the privately held publishing company.



At Bill, the emphasis is always on quality, of product and performance. There are probably some areas where we could save a nickel here, a dime there, but Bill wouldn't be the company it is if we did.

Joseph J. Furey
Corporate Controller

With Bill: 13 Years

Market Statistics' success and growth proves how important individuals and ideas are at Bill Communications. Although we are a statistical consulting division sitting alongside eleven publications, our corporate heads take the time and initiative to learn our business and guide us. At the same time, our range of freedom is enormous. I have been given the opportunity to assemble and develop a highly skilled and motivated team of professional people.

Obviously, that bottom line is what counts with the men in the front office. In order to show profit in the highly competitive field of Marketing Analysis we are continually developing new techniques, improving our basic data, and seeking out new business opportunities. Bill's corporate management realizes the need to let us "run with the ball," and because of that our story is a successful one.

For me, personally, this has been very gratifying. I have been allowed to grow, to experiment, and most important: to learn. After having worked in environments which were stifling to creativity, the feeling at Bill that ideas are always positively received is very enjoyable. It's the only way to have fun in your career.

Edward J. Spar
President

Dun & Bradstreet Corp., New York, which completed the sale of its broadcast and cable properties in 1984, is the country's 10th largest media company, with 1984 revenues of $1.40 billion from the media portion of its business, up 7.6% from the previous year.

The company's media revenues are derived from two business segments: The largely ad-generated publishing segment with 22 trade and professional magazines produced in the segment's technical publishing division; and the marketing services segment, which includes Donnelley Marketing cooperative-mailing programs, A.C. Nielsen Co.'s marketing research and media group. The broader interpretation of media used by Advertising Age for this 1984 media report accounts for the inclusion of D&B's marketing services as media.

Media accounted for 60.8% of total D&B revenues of $2.40 billion, up 16.4%, and 76.8% of total operating income. Figures for 1983 were restated to reflect the acquisition of A.C. Nielsen and divestiture of Funk & Wagnalls and Corinthian Broadcasting Corp.'s six tv stations sold to A.H. Belo Corp. in 1984.

D&B's only nonmedia business segment is business information services, accounting for $938.8 million in operating revenue, 39.2% of the total, and operating income of $161 million, or 39.3% of the total.

During 1984, D&B completed the sale of wholly owned Corinthian Broadcasting Corp.'s six tv stations and the sale of Pembroke Cable Corp., which operated 10 cable franchises, later in the year. The sale of its broadcast and cable properties, along with other divestitures, were key decisions in the company's long-term strategy to redeploy its assets into the mainstream of the business information and services sector.

In 1984, the publishing segment contributed 24% of operating revenue and 45.9% of its operating income. Total ad pages for Technical Publishing's 22 magazines were up in 1984, reflecting improvements in the economy as a whole and in markets served by industrial and construction publications. Its publications aimed at data processing and high-tech markets had the most growth, while its medical and graphic arts publications had the least.

Datamation, which serves the information-processing market, increased its publishing frequency to twice a month in April, 1984. The new schedule enables the magazine to offer more complete editorial coverage of fast-changing developments and to offer advertisers increased opportunities to reach customers. *Control Engineering, Research & Development* and *Solid State Technology*, each of which leads its market segment, had record performances.

Last year, Technical Publishing acquired Ironoak Co., which publishes buyers' guides for microcomputer-systems designers, and *Test and Measurement World*, a magazine serving engineers responsible for testing high-tech products at the point of manufacture. It sold *Software News* and DBI Books.

Dun & Bradstreet's 1984 growth was paced by a number of media operations, including Reuben H. Donnelley (which in early 1985 was restructured into two divisions: Donnelley Directory, which manages relationships with telephone companies regarding the production of its Yellow Pages, and Donnelley Information Publishing, which handles the publishing of independent directories); Donnelley Marketing, and Moody's Investors Service.

These operations reported higher operating margins based on strong revenue growth and continued cost containment, enabling D&B to increase its investment in new products and services and startup operations, as well as absorb the initial costs of acquisitions.

The acquisition of A.C. Nielsen Co., finalized in August, 1984, involved a stock transaction valued at about $1.3 billion. Nielsen is the world's largest market research company, with operations in 26 countries.

While Nielsen is perhaps best known for its tv audience measurement service, its other substantial businesses include marketing research, clearinghouse services for promotional coupons, circulation fulfillment for magazine publishers, petroleum information services and research for high-tech companies.

Following the retirement of Harrington (Duke) Drake, 65, on Jan. 1, 1985, Charles W. Moritz moved up from president-coo to fill the chairman-ceo post; Robert E. Weissman moved up from exec vp to president-ceo. Mr. Drake continues as a director of the company.

Evening News Assn., Detroit, whose flagship property is the *Detroit News*, is the nation's 40th largest media company with total media revenues estimated by Advertising Age at $279.1 million.

ENA's 1984 media revenues were up 7.3% from 1983's $260.2 million. The *News* represents about 65% of the company's total media revenues.

The *News* increased circulation across-the-board in the three months ended March 31. Daily circulation rose to 666,949, up 1.5%. Sunday circulation is 884,763, up 2.7% over the year-earlier period. For the same period, the *News*' rival, the *Detroit Free Press*, had daily circulation of 646,476, up 2.4%, and Sunday circulation of 778,178, off 1.2% from the year-earlier period.

The war between the newspapers remains fierce, with each paper's promotional ads jabbing at the other. A *News* spokesman says, "Circulation figures show that the *News* is in a much stronger position than the *Free Press.*" However, competition for readers is still so intense that newsstand prices lag behind the national norm, contributing heavily to annual losses that analysts say amount to more than $10 million for each paper.

The *News* raised its Sunday price from 50¢ to 75¢ in April, 1985. Dailies are 15¢ each in the Detroit metro area and 20¢ out-state. The *Free Press* is 20¢ daily and 75¢ on Sundays.

In addition to its circulation margin, the *News* has a 60% share of the ad volume of the two papers' combined total.

In December, 1984, ENA bought back 31,000 of its own shares at $250 each to thwart a possible company takeover after learning that other companies were soliciting stockholders of the closely held company. ENA also filed suit in Wayne County Circuit Court, contending the attempts to acquire ENA stock violated Michigan's takeover law.

ENA was denied a preliminary injunction against Booth American Co., a Detroit-based radio and cable tv operator; George Gillett Jr., owner of Gillett Group, Nashville, and Post Corp., Appleton, Wis., and two brokerage companies. The denied injunction ended litigation for all except Booth, which asked for an exemption from state laws requiring it to disclose stock purchase plans.

Booth American is owned and operated by descendants of Ralph H. Booth, whose brother, George, married Ellen W. Scripps in 1887. Ms. Scripps was the daughter of *Detroit News* founder James E. Scripps. Descendants of George Booth and James Scripps control ENA's board of directors and management. Peter B. Clark, current ENA president and the fifth *News* publisher, is the great-grandson of James Scripps.

ENA and Booth settled the legal dispute in May, 1985. Booth demonstrated to ENA that it had purchased ENA stock as a long-term investment and was supportive of ENA's board of directors. Booth now owns 3.7% of ENA outstanding stock and plans to buy an additional 5,500 shares, increasing holdings to 4.9%. ENA board members hold 51% to 53% of ENA stock.

ENA is considering going public within the next five years to meet minority shareholder demands for increased liquidity. If it does, ENA will acquire other smaller companies, secure its position against the *Free Press* and be listed on a stock exchange.

One industry analyst hinted that competition between the *News* and *Free Press* might be less intense than is supposed. "If ENA goes public, it will have to show a breakdown of revenues, assets, etc., by category," says J. Kendrick Noble of Paine Webber Mitchell Hutchins, New York. "It would be the first time we'd see the true nature of the competition."

Meanwhile, ENA made a plea for stockholder unity after a group of shareholders solicited support for an appraisal of ENA stock. Peter Clark warned shareholders in a letter that independent appraisals could damage the company's operations and shareholders' prospects for long-term gains.

Meanwhile, ENA's broadcast properties continue to hold strong market positions. WDVM-TV, ENA's CBS affiliate in Washington, is the most consistent challenger sign-on to sign-off to market supremacy of independent WTTG-TV. Among the affiliates, A.C. Nielsen Co. pegs WDVM-TV market leader in late-night local news, ahead of WJLA-TV, the ABC affiliate owned by Allbritton. Arbitron Ratings Co., however, shows WDVM-TV trailing WRC-TV, the NBC-owned and operated station, in the late-night spot. Only a few percentage points separate the three affiliates regardless of the monitoring service.

Other tv properties include CBS affiliate KOLD-TV, Tucson, which is No. 1 in ratings and share; NBC affiliates KTVY-TV, Oklahoma City, and WALA-TV, Mobile, Ala., both in second place in their markets, and ABC affiliate KVUE-TV, Austin, Tex., No. 1 "blockbuster," according to James Clark, ENA director of corporate communications.

Radio station WJOI (fm), with a beautiful music format, is No. 1 in Detroit's 40-station market. However, WJR (am), broadcaster of Detroit Tigers baseball games, pushes WJOI (fm) to second place during baseball season. ENA's WWJ (am), the only all-news station in Detroit, ranks anywhere from No. 3 to No. 5, depending on the season.

Times Graphics, Vineland, N.J., publisher of six newspapers and wholly owned by ENA, recorded slight circulation drops among its properties, all located in New Jersey. Publications and circulations are: Two daily papers, *Vineland Times Journal*, 17,573, and *Millville Daily*, 6,614. New Jersey weeklies are: *Mainland Journal*, 5,926; *Hammonton News*, 5,419; *Egg Harbor News*, 1,975, and *Atlantic County Record*, 1,900. Times Graphics also does commercial printing.

ENA's two California papers are published by Desert Sun Publishing Co. of Palm Springs. Circulation increases were recorded at both for the three-month period ended March 31, 1985, according to ABC. The papers, their circulations and increases are: *Palm Springs Desert Sun*, 30,971, up 5.5%, and *Indio Daily News*, 9,116, up 4.1%.

ENA is searching for both newspaper and broadcast properties, although it is not concentrating on any specific geographical areas. Mr. Clark declined to give details.

Family Media Inc., publisher of *Ladies' Home Journal*, ended 1984 with a 14% increase in net revenues from 1983 to $185.3 million, making it the 63rd largest media company.

Net revenues, all of which are attributed to media properties, will continue on the upswing next year with the acquisition in the first two months of 1985 of two new magazines, *Savvy* and *World Tennis.*

The major disappointment for company officials in 1984 was losing out to Mortimer Zuckerman in the bidding for U.S. News & World Report Inc., parent of the magazine of the same name.

"It's difficult to think we were that close to having one of the great names in American publishing and lost it," Family Media chairman-president Robert Riordan says.

Ladies' Home Journal has the highest circulation and the most media revenue of the company's six publications. However, the greatest percentage increase was recorded by *Homeowner*, which doubled its media revenues in 1984. Small losses were registered by Health and *1,001 Home Ideas.*

According to vp-operations Jeremy Grazel, in 1984 the circulations and net revenues (net advertising and circulation) were: *Ladies' Home Journal* had circulation of 5 million and revenues of $111.6 million, up 21.1% from 1983; *1,001 Home Ideas* had 1.5 million circulation and revenues of $30.4 million, down 5.3%; *Health*, 1 million circulation and $18.4 million in revenues, down 6.6%; *Homeowner*, 650,000 circulation, $11.2 million in revenues, up 115.4%; *World Tennis*, 350,000 circulation, $7.1 million in revenues, up 10.9%, and *Savvy*, 300,000 circulation and revenues of $6.6 million, up 1%.

Net ad revenues (minus discounts, agency commissions, etc.) for most of the company's publications have risen by a healthy amount. *Ladies' Home Journal* ad revenues have swelled almost 16%, to $56.6 million. *Health* ad revenues have contributed $4.6 million, up almost 26%. Ad revenues at *1,001 Home Ideas* soared 41% to $7.6 million, while advertising in *Homeowner* brought in $1.6 million, up 49% from 1983. *Savvy*'s advertising was $4 million, a 10% increase. The only ad revenue loss was shown by *World Tennis*, down 3% to $5.6 million. This was before Family Media purchased it from CBS Magazines.

The major personnel change in 1984 was the appointment of Martin Gitow as president of Family Media Communications, an acquisition and ancillary products division. Mr. Gitow formerly was vp of Publishers Clearing House. Family Media Communications is testing a mail order book operation.

Mr. Riordan owns a little less than 85% of the privately held company, with the remainder held by the estate of former publisher and founder Max Geffen and his associates.

Family Media's strategies for rescuing *World Tennis* and *Savvy* will be dictated by the reality that they are "each competing in a field where they are No. 2," Mr. Riordan says, "and the gap between No. 1 and No. 2 is currently enormous. If you can cut that gap in half, there's enormous profitability." He hopes to have *World Tennis*, which trails No. 1 *Tennis*, in the black by the end of this year, and *Savvy*, second to *Working Woman* in its field, profitable in 1986.

The two recent acquisitions mean the company "will be a little quiescent for a short term," Mr. Riordan says. In the meantime, Family Media has prepared new combination rates offering discounts up to 25% for advertising in two or more magazines. The company has opened a subscription fulfillment center in Palm Coast, Fla., leaving Charter Data Service, Des Moines, after it was purchased by Hearst Corp.

In addition, the company is co-financing with George Banta of Menasha, Wis., the startup of Digital Prepress Center, Yonkers, N.Y., an electronic prepress center for printing magazines and catalogs.

For Forbes Inc., 1984 proved to be a big year. *Forbes* magazine entrenched itself as the third-highest among all magazines ranked by the Publishers Information Bureau in terms of ad pages, racked up a 30% increase in ad revenues, and raked in major journalism awards.

In addition, *Forbes'* colorful editor-in-chief Malcolm Forbes took flight again—in a widely publicized excursion across Egypt in a sphinx-shaped hot air balloon, and followed that up this year with a jaunt across Southeast Asia.

Forbes Inc., the nation's 92nd largest media company, up 21% from 1983, itself has been taking flight in the past five years, registering the largest gain in ad pages—1,193 between 1980 and 1984—among all PIB-ranked magazines. According to ADVERTISING AGE estimates, the company's media net revenues last year increased 21%, to $108.3 million, the basis of its ranking. Media revenues all come from the fortnightly magazine, whose circulation last year reached 725,727, up 0.8% over 1983.

Nonmedia revenues of an estimated $30.4 million come from such properties as the Sangre de Cristo Ranch in Colorado, the Forbes Investment Advisory Institute and an array of real estate holdings from New York to the Fiji Islands.

The recent success of the magazine is partly a reflection of increased interest in business and finance, communications director Don Garson says.

The magazine continues to appeal to advertisers with its "Capitalist tool" campaign, handled by Doremus & Co. There are also direct mailings to potential subscribers, though company spokesmen say there is little dissatisfaction regarding circulation levels. *Forbes* says annual household income for the average reader tops $124,000 and net worth more than $900,000.

The most appealing sales feature for the company may be the 65-year-old editor-in-chief. The sometimes-adventurer and art collector Malcolm Forbes inherited the magazine from his father, B.C. Forbes, who began *Forbes* in 1917. Malcolm Forbes is very much a hands-on executive, passing on most of the magazine's editorial copy and writing a regular up-front column, "Fact and Comment."

His adventures have been coming recently at a rate of about one a year. He followed up the Egypt foray with an excursion to Southeast Asia early this year, crossing Thailand, Malaysia and Singapore by motorcycle and hot air balloon, which this time was in the shape of an elephant. Though there is no direct connection between Mr. Forbes' exploits and the magazine, analysts agree that such publicity can only be good. "It certainly has a positive effect on the magazine," Mr. Garson says.

The biggest attention-getter of the year for *Forbes* is always its annual listing of the 400 richest people in the U.S. Malcolm Forbes was included in the list last year, but the magazine did not give its own estimate of his wealth. Estimates from other observers put his worth at nearly $200 million.

Forbes is clearly a family business. Three of Malcolm Forbes' sons are involved with *Forbes*, including Malcolm Forbes Jr., president, deputy editor-in-chief and author of the magazine's "Fact and Comment II," and Christopher Forbes, the associate publisher.

Despite its great advances last year, *Forbes'* ad revenues of $109.7 million still lagged behind those of its major competitors, *Business Week* and *Fortune*, though its 3,834 ad pages, up 12.7%, stayed ahead of *Fortune's* 3,486, up 7.4%. *Business Week*, the perennial ad page king, had total pages of 4,972, up 7.1%.

The magazine has pulled in several awards this year, including the American Society of Magazine Editors' "Ellie" award for magazine design and the UCLA Graduate School of Management's Gerald Loeb Award for two stories published in 1984.

With one full year of operation under its belt for its two newest properties, Freedom Newspapers' revenues, as estimated by ADVERTISING AGE, increased in 1984 to $272.1 million, ranking the Santa Ana, Cal.-based company the 41st largest in media revenue.

Revenues, up 21% from 1983's estimate, were all from media operations.

Early in 1984, Freedom, a privately held company owned by descendants of the late R.C. Hoiles, acquired ABC affiliate WTVC-TV, Chattanooga, Tenn., and CBS-affiliate KFDM-TV, Beaumont, Tex., from Dallas-based A.H. Belo Corp. The purchase price was $49 million. Both of the tv properties are top-ranked in their markets.

Of Freedom's four tv properties, only CBS-affiliate WLNE-TV in the Providence, R.I./New Bedford, Mass., market lags behind its competitors. Each of the others, including CBS-affiliate KTVL-TV in Medford-Klamath Falls, Ore., appears to be firmly in

Why Florida's Money Market is a wise investment.

There was a time when people came to the Fort Lauderdale/South Palm Beach area to play. Now they come here to work and raise their families. They've created the most affluent market in the State. Florida's Money Market.

Based in the 13th largest ADI, this market (552,000 households and growing fast), has a higher EBI and sales per capita than any other major market in the State. And it shows. In the homes they own. The cars they drive. The clothes they wear. The boats they sail. The restaurants they frequent.

These younger, better educated professionals know what they want. And that includes their newspaper. The News/Sun-Sentinel. Chosen by four out of five newspaper readers. Nine out of ten who read it wouldn't even bother with any other paper.

So when you buy the News/Sun-Sentinel, you're showing your smarts. Because you're investing in Florida's Money Market.

Fort Lauderdale/South Palm Beach

control as of the latest A.C. Nielsen Co. ratings.

Freedom is a late entry in tv. The company's strength is newspapers, and the strongest of these is the *Register*, located in Santa Ana, Freedom's corporate headquarters. The *Register*, winner of a Pulitzer Prize for its photographic coverage of the 1984 Summer Olympics, serves the affluent Orange County suburban area south of Los Angeles.

The *Register's* circulation average for the six-month period ended March 31, 1985, was 291,619, up 4.4% from the corresponding year-earlier period, according to ABC audited statements. The Sunday *Register* increased circulation 4.8% to 326,038. The *Register* by the end of the year had stretched its lead over the Los Angeles Times in Orange County to 109,000 daily and 92,000 Sunday. While the *Register's* gains in Orange County mirrored its over-all gains, the *Times* lost circulation in the county.

As the *Register's* circulation increased, so did its advertising linage. The paper retained its position as first in the country in full-run color linage, and ranks No. 4 in full-run retail advertising and No. 6 in full-run total advertising.

Thirty-two community editions, blanketing the county with zoned advertising capability and local news coverage, have given the *Register* total market coverage. The community editions are mailed to more than 300,000 households each week. On Tuesdays, they are inserted in the *Register*.

Freedom owns 29 dailies and three weeklies in 11 states with a total circulation of 880,000. The company has no immediate plans for further acquisitions, either of broadcast properties or newspapers, although Michael Maloney, administrative assistant to the president, says Freedom is always on the lookout for property in the right market at the right price.

Gannett Co., Rochester, N.Y., which outbid a host of other top media companies to buy the Des Moines Register & Tribune Co.'s newspaper properties in early 1985, is the country's 6th largest media company with media revenues of $1.96 billion in 1984, a 17.3% increase over 1983 media revenue.

Throughout 1984 and early 1985 the company grew through acquisition. In 1984, the company purchased KKBQ (am, fm) in Houston for $35 million and WDAE in Tampa-St. Petersburg, Fla. Then during January, 1985, Gannett got the highly contested newspapers of the Des Moines Register & Tribune Co., paying $200 million. Dow Jones & Co., Ingersoll Publications, Ackerley Communications, and Washington Post Co. were among the bidders.

Newspapers included in the transaction were: The *Des Moines* (Ia.) *Register & Tribune*, which at the March 31, 1985, ABC reporting period had daily circulation of 235,231, down 1.3% from the prior year, and Sunday circulation of 384,604, down only slightly; and the *Jackson* (Tenn.) *Sun*, with daily circulation of 36,902, up slightly over the previous year, and Sunday circulation of 37,641, even with the previous year.

Also acquired in the deal was Triangle Sign Co., Chicago, with more than 900 outdoor advertising structures in the Chicago area.

Gannett's acquisition with the broadest coverage to date, however, is that of *Family Weekly* with a weekend circulation of 12.8 million, through its distribution by 363 newspapers. Gannett agreed to buy *Family Weekly* from CBS Magazines in early 1985 for $42.5 million. The newspaper-distributed magazine had a poor 1984, dropping 11.2% in total advertising pages to 693, and declining 10.4% in total ad dollars to $87.1 million, according to Publishers Information Bureau.

At an analysts meeting this past February, Gannett chairman Allen H. Neuharth reportedly said the company will be pursuing its strategy to acquire more regional newspapers in 1985 and is eyeing more broadcast properties as well, in an effort to "broaden our media mix."

At the company's annual meeting in May, 1985, Gannett took steps to avoid becoming another takeover target when shareholders approved two proposals designed to make a takoever more difficult. The two proposals included a fair-price amendment, which requires that all stockholders be offered the same price for shares in a tender offer, and an amendment providing staggered terms for members of the board of directors.

Newspaper revenues in 1984 were $1.53 billion, up 15.4% from the previous year, and represented more than 75% of total company revenues. With the acquisitions, Gannett's paid daily circulation is about 5 million.

USA Today, the company flagship newspaper, continued to make news. The national publication's daily circulation of 1,162,606, according to ABC audits, makes it the third largest newspaper in the country behind the *Wall Street Journal* and *Daily News* in New York. That figure, however, should decline with the rise in the newsstand price of the publication from 35¢ to 50¢. A decline was recorded by the national daily when its newsstand cost went from 25¢ to 35¢ early in 1984.

Last June, the company named *USA Today's* president, Cathleen Black, to publisher, following word that John Heselden would retire as publisher in April.

Early last year, Gannett announced that it was putting together a task force to look into the feasibility of developing a system for satellite transmission of *USA Today* to a printing plant in Japan for printing and distribution of the newspaper. At the same time, Gannett Co. is considering a Pacific edition of the newspaper designed to appeal to U.S. expatriates. Also, last July, Gannett began a test distribution of *USA Today* in Europe and the Middle East. The international edition was scaled down to two sections.

While the newspaper is spreading its pages internationally, it continues to face circulation problems at home. In March, 1985, the ABC audit showed *USA Today* circulation had declined 9.5% to 1,162,606 copies from the similar reporting period a year earlier. The loss, in part, was attributed to the increased newsstand price.

Advertising picked up at *USA Today* in 1984. The paper averaged seven ad pages the first half of 1984, but moved up to 11 pages daily in the second half, reaching a peak of 16.5 in the Nov. 12, 1985, issue. *USA Today* will debut in an electronic form in mid-December, with the introduction of *USA Today* Update, an electronic text service that will be accessible through personal computers and distributed via electronic mail and office automation systems. The service will provide information, updated hourly, drawn from Gannett media properties and news services.

In other *USA Today* news, Young & Rubicam resigned last July the Gannett Co. corporate and *USA Today* consumer ad accounts after spending levels for the newspaper fell 75% and the agency lost the paper's trade ad account. In midyear, Gannett announced plans to relocate to the Washington area by the middle of 1986. *USA Today* is based in Rosslyn, Va.

Commenting on the move, Mr. Neuharth says the company's growing national scope created the need to concentrate key corporate activities in Washington. By the time of the move, the company will have been based in Rochester, N.Y., for 66 years.

Gannett's Broadcasting Group, made up of six tv stations and 14 radio stations, increased revenue 21% to $232.7 million in 1984, or 11.9% of total company revenues. The new radio acquisitions essentially replace stations WWWE and WDOK-FM, Cleveland, which Gannett has agreed to sell to Lake Erie Radio Co.

During 1984, the company joined with four other broadcasting groups in an effort to improve and develop new programing. To service the company's six tv stations, Gannett unveiled its tv Flying Squad, a team of reporters and crew that provide individual coverage of major events.

In other developments, Gannett

Intense competition in the free-standing inserts marketplace has proved healthy for Livonia, Mich.-based GFV Communications, which reported an increase of 35% in revenues in 1984, all in media.

The privately held company, the largest producer of free-standing inserts in the U.S., ranked as the 48th largest media company in 1984 with revenues of $246 million. Earnings were not available.

Formed in 1969 as George F. Valassis & Co., the company has grown and diversified into a marketer, printer and distributor of Valassis Inserts—full-color multipage Sunday newspaper supplements containing cents-off and direct-response coupons.

The company also has printing, promotion and promotion security subsidiaries. GFV recently expanded its operations by acquiring the JAMI Group, a leading list management and media services company in Fort Lee, N.J.

The acquisition was completed in September, 1984, for an undisclosed price and will give Valassis Inserts "greater penetration in the markets," furthering the company's expansion strategy of growth through acquisition, says David Brandon, exec vp-coo, GFV Communications.

Valassis Inserts reaches more than 46 million households in the U.S. with the consumer-oriented coupons. The coupons are from more than 300 clients, about 75% of which are *Fortune* 500 package good companies, a company spokeswoman says. The traditional GFV client presents artwork or film for printing and distribution by GFV. GFV offers a design service for clients needing that assistance.

The inserts are 99% distributed through more than 250 ABC-audited Sunday newspapers and are direct-mailed to Los Angeles, Atlanta, Denver and Dallas to supplement newspaper penetration.

Although the past focus of the inserts has been on grocery items, the company has moved into additional areas including health and beauty aids, small appliances and lawncare products, where couponing has been minimal in the past, the spokeswoman says.

The company spent about $500,000 in 1984 in print advertising to promote its inserts.

GFV stirred up controversy with an April, 1984, ad for Valassis Inserts, which used a picture of what the company called "generic religious symbols." Accompanying copy asked, "What do over 44 million American women do religiously on Sunday mornings?"

The answer, which was to "Read Valassis Impact Inserts," was clouded by letters from angry readers deploring the use of religion in humor. Others complained it pointed at a particular faith.

GFV withdrew the offending ad, which was created to "draw differences between us and competitors," Mr. Brandon says. "We're not in the business of being controversial. We didn't expect that reaction."

Mr. Brandon says Valassis Inserts and subsidiaries will establish themselves as individual businesses in 1985 as growth by acquisition slows in order to keep the company manageable.

"I would call 1985 a year to do what we do best," Mr. Brandon says. "We want to exploit the fact that we're industry leaders." A 25% to 30% growth in sales is projected for this year.

The company has more than 700 employes spread across the country, and publishes inserts 26 times a year, with more than 1 billion inserts printed and distributed annually.

Harcourt Brace Jovanovich, New York City, whose media contributions consist largely of its trade publications, was the 83rd largest media company in 1984 with media revenues of $119.4 million, up 18% from 1983.

The media properties, contained in the HBJ Communications and Services group, represent 16.8% of total revenues at HBJ of $712.5 million, up 9.8% from 1983.

HBJ received most of its revenues—51% or $364.2 million—from publishing of elementary and secondary education and university and professional education materials. HBJ also includes graphic materials, executive counseling, insurance and Sea World Enterprises Inc.—areas of business not included in the media totals for this report.

The Harcourt Brace Jovanovich empire, comprised of decentralized operations in Orlando, San Diego, Cleveland, San Antonio and Austin in addition to the New York headquarters, had earnings in 1984 of $34.5 million, the highest in the company's history and a 25.5% increase over the previous year. The HBJ Communications & Services unit, which includes the trade magazines and a modest amount for book club activity, was highly profitable, its revenues (16.7% of the company total) generating 24.3% of the company's total operating income.

HBJ Communications & Services includes 132 magazines and newsletters. HBJ also owns two vhf tv stations, both ABC affiliates, located in Duluth and Hibbing, Minn. Their totals are not included in the HBJ Communications & Services. However, their contribution to company revenues in 1984 was an estimated $16.3 million, up 3.5% from 1983.

Most of the business magazines and directories under the HBJ umbrella are "controlled circulation" publications. Distributed free to professionals, manufacturers and product dealers, the periodicals are supported by advertising.

HBJ publications cover beverage, concrete, dentistry, energy, food handling, housewares, meat processing, medicine, packaging, plastics, telecommunications, tourism, toys, vending machines and other fields. In many industries, the company also publishes newsletters.

Revenues from the periodicals increased 19% to about $119 million, and according to HBJ management, the increase was the result of more ad pages and higher ad rates.

In a transaction involving 244,126 shares of its common stock, the company acquired Industry Media Inc. and Davies Publishing Co. The March, 1984, acquisitions added seven periodicals devoted to the plastics industry and a magazine for the meat industry to HBJ's publications roster.

Another stock transaction, involving 39,309 shares, enabled HBJ to acquire Pit & Quarry Publications, publisher of magazines for the nonmetallic and concrete industries. These acquisitions bolstered HBJ's revenue potential.

Also contributing to revenues will be the leisure industry publications acquired in January, 1985, from Hester Communications. In this transaction, the company issued 160,000 shares of its common stock.

Magazines gained from the Hester acquisition include *Bicycle Dealer Showcase, Motorcycle Dealer News, Spa and Sauna Trade Journal, Flotation Sleep Industry* and *Video Store* as well as four annual buyers' guides, an after-market yearbook for the motorcycle industry and a fortnightly newsletter in the video field.

"The Hester Communications properties," says Robert L. Edgell, chairman of HBJ Communications & Services, "give HBJ Publications a strong position in what I'll describe as the 'leisure' industry."

As an outgrowth of its many publications, HBJ Communications produces or sponsors 26 trade shows. There are plans for a lawncare industry show later this year and HBJ is exploring a show for the frozen-food industry. Similarly, the acquisition of the Hester Communications properties included exposition opportunities.

The basic business of Harcourt Brace Jovanovich is publishing—textbooks and other related instructional materials. It is from this foundation that other HBJ enterprises have evolved. The three Sea World marine parks—a fourth in Texas is in the planning stage—provide instructional entertainment while purveying food and merchandise.

HBJ Insurance was an outgrowth of the magazine publishing business, which began with farm magazines in several midwestern states. The company sells life, health and accident policies to farmers in Ohio, Michigan, Indiana, Kansas, Missouri, Pennsylvania, Nebraska and Colorado. At the end of 1984, life insurance in force totaled $805 million, and profits had increased by 30%.

The past year saw the company's directors create an Employee Stock Ownership Plan: The net effect will be that employes become, at no cost to themselves, company shareholders and HBJ is provided with needed cash. This is made possible by an excess of assets in the pension plan of some $50 million and federal statutes that permit the ESOP to borrow the amount at low interest rates.

Harte-Hanks Communications, which went public 12 years ago and returned to a private company in 1984, had total revenues estimated at $500 million, all in media, to rank as the 25th largest media company.

The San Antonio-based company, with media contributions from newspapers, magazine, cable/video and broadcasting, went private in a leveraged buyout in June, 1984. In the $450 million buyout, a small group of officers and directors acquired the nearly 60% of the company's stock they did not already own.

Not long after the company gained shareholder approval for the leveraged buyout, Harte-Hanks agreed to sell the nine stations in its radio group. Seven of the stations were sold to a new company formed by Gary D. Edens, former president of Harte-Hanks' radio division. The stations acquired by the Edens' group include KOY and KQYT (fm), Phoenix, Ariz.; WRBQ (am, fm) in Tampa-St. Petersburg, Fla.; WRVA and WRVQ (fm), Richmond, Va., and WSGN in Birmingham, Ala.

The other two, KKBQ (am, fm) in Houston, were sold to Gannett Co. for $35 million. Larry D. Franklin, Harte-Hanks exec vp, says the radio properties have contributed $30 million annually to the company's revenues.

Harte-Hanks, which began as a newspaper publisher, continues to be dominated by that business. The company publishes 27 daily and 75 nondaily newspapers and advertising publications produced by the newspapers. Although its newspaper activity in terms of acquisitions has been limited in the past year, the company did add two weeklies to complement its daily newspaper, the *Middlesex News*, in the Framingham, Mass., market. The new acquisitions, *Sudbury Town Crier* and *Wayland-Weston Town Crier* have a combined circulation of just under 10,000.

That perhaps is an indication of Harte-Hanks' willingness to attain maximum coverage and penetration in the markets in the 29 states where the company operates.

The company's largest newspaper is the 60,000 circulation *Caller-Times* in Corpus Christi, Tex.

Around Framingham, *Extra*, a news and advertising zoned-supplement, is distributed on Friday and Saturday to 136,000 households in 26 communities. Of the total distribution, 92,000 copies are bulk-mailed and 44,000 are carrier-delivered. The News carries the nonmailed editions in most of its circulation of 48,774 daily.

In the Los Angeles area, Harte-Hanks' *Pennysaver*, delivered by direct mail, has a circulation of 1.9 million and an estimated readership of 4 million. The publication claims 94% penetration in the areas it covers.

Since the radio properties have been sold, Harte-Hanks broadcast business consists of four vhf tv stations in San Antonio; Greensboro-High Point, N.C.; Jacksonville, Fla., and Springfield, Mo., and several cable systems.

When executives of Harte-Hanks determined to take the company public in 1972, it was for the announced intention of expanding from its relatively small stable of Texas newspapers into other media opportunities, including broadcasting and cable systems. By being public, the company raised cash to pay for such acquisitions.

The company continues to pursue opportunities in cable. In 1984, Harte-Hanks increased its number of cable subscribers to 140,000 by exercising its option to acquire two existing systems.

Ultra-Com Inc., a Montgomeryville, Pa., company, was acquired for an estimated $75 million. This acquisition added about 75,000 basic cable subscribers in New Jersey, Ohio, Tennessee, Oklahoma, Florida and Pennsylvania.

Another 25,000 subscribers were added with the acquisition of Jim E. Smith Inc., a cable company Harte-Hanks had managed in southeastern Arizona. The purchase price was estimated at $25 million. With these systems added to previous Harte-Hanks cable systems in Colorado, Arizona and Texas, cable revenues in 1985 are likely to contribute substantially more than the estimated 4% in 1984.

Newspapers, vhf tv and cable are just a part of the Harte-Hanks communications empire. The company owns and operates seven marketing services companies and 25 direct mail systems, which can offer advertisers direct mail programs reaching 96% of U.S. households. The company has seven alternate delivery systems, which can reach more than 1.5 million households via hand delivery. Harte-Hanks also operates a nationwide trucking service specializing in delivery of advertising materials.

Harte-Hanks is a strong advocate of total market coverage. Harte-Hanks Direct Marketing is the industry leader, and few newspapers have been inclined to follow.

Indeed, some analysts have suggested that doubts about Harte-Hanks' direct marketing concept kept the stock depressed, and it was that which indirectly led to the leveraged buyout.

Harte-Hanks is determined to continue on the course charted by president-ceo Robert G. Marbut and other company officers.

Says Mr. Franklin: "Our primary thrust this year is a focus on customer service, asset management and employe productivity."

increasing 46.2% to an estimated $131.6 million in 1984. All revenues are attributed to media for the privately held company.

The two Cowles properties, NBC-affiliate WESH-TV in Daytona Beach-Orlando, Fla., and CBS-affiliate KCCI-TV in Des Monies, Ia., were purchased for a combined $182.6 million.

"The market in central Florida is very attractive," says Dan Thornburg, vice president-treasurer of H&C Communications. "Des Moines is a good property, but Florida is what we wanted. And Cowles didn't want to separate the two properties." John Heise, Midwest regional sales manager of Petry TV Sales, confirms that assessment of the central Florida market and WESH-TV.

"That is a very competitive market," Mr. Heise says, "and WESH just had a tremendous [ratings] book."

Florida Trends, in a recent discussion of the growth in the Southeast, points out that Floridians have more disposable income than ever before. As a consequence, Mr. Heise says, the amusements industry around Orlando is spending heavily on advertising.

Of KCCI-TV, the other acquisition from Cowles, Mr. Heise says, "It's a strong station, a leader in the marketplace." A.C. Nielsen Co. ranks Daytona Beach-Orlando as 31st among Areas of Dominant Influence and Des Moines 71st. Advertising Age estimates the two stations contributed a combined $30 million to H&C's 1984 revenues.

Acquisition of the two Cowles properties was made possible after H&C realized $100 million from the sale of the *Post* to the Toronto Sun Co.

H&C is a private holding company owned by Houston's Hobby and Catto family interests. Having made the decision a year ago to steer clear of newspapers, the company is likely to make any future acquisitions in broadcast.

H&C is entrenched in Houston with its ownership of KPRC-TV, and KPRC (am, fm). KPRC-TV, an NBC affiliate, is a solid second in the marketplace and has made significant inroads early in 1985 on the strength of a strong early newscast.

The two other H&C properties are in the country's 29th (Nashville, Tenn.) and 87th (Tucson, Ariz.) tv markets. Mr. Heise of Petry says the Nashville market is a two-horse race between H&C's WTVF, a CBS affiliate, and WSMV, the NBC affiliate. From a ratings and sales standpoint, 1984 was a good year in Nashville, but the economy has fallen off in 1985, and advertisers do not seem to be using the Nashville market as much.

In Tucson, KVOA-TV had a good first quarter in both sales and ratings numbers, and the CBS affiliate has been coming on strong. Its prime-time ratings have increased three points in the past year.

Last year, H&C sold WTOK-TV in Meridian, Miss., to Southeastmedia for an estimated $13.2 million. Previous FCC rules, limiting tv ownership to five vhf outlets, mandated that sale. The FCC liberalized its rules later in 1984, permitting ownership of up to 12 stations.

H&C's only print property is the *Washington Journalism Review*. Last spring, the company entered into a joint venture with Crain Communications Inc., parent company of Advertising Age, to handle advertising, circulation and provide some editorial support for *WJR*.

Distributed to communicators as well as government and corporate leaders, *WJR* in mid-1984 had a circulation of 22,066, of which 20,056 were subs and 2,010 were single sales, according to ABC figures. A change in strategy has shifted circulation numbers to a total of 28,106, with 8,091 nonpaid subs and 20,015 single sales. A campaign plans to convert to paid the 8,091 nonpaid copies.

Hearst Corp., New York, is the nation's 11th largest media company, with 1984 revenues estimated by Advertising Age at $1.4 billion.

Hearst, an intensely private company, continued an acquistion binge begun six years ago that has, to date, seen the company founded by William Randoph Hearst spend more than $1 billion adding some 50 properties to its corporate stable.

In 1984, Hearst bought three daily newspapers from Jefferson-Pilot Corp., the 71,203 daily circulation *Beaumont Enterprise*, the 19,000 circulation *Laredo Morning Times* in Texas and the *Clearwater Sun*, daily circulation 32,868, in Florida. All three also publish Sunday newspapers.

Hearst also bought two Diversion Communications magazines—the monthly *Diversion* and every-other-monthly *Diversion Travel Planner*—that are leisure time publications aimed at physicians. Finally, Hearst bought the Disneyland Official Guide and the Walt Disney World Official Guide.

In May, 1985, Hearst agreed to purchase WCBV-TV, the Boston ABC affiliate, from Metromedia Inc. in a simultaneous transaction under which Austrialian publisher Rupert Murdoch acquired six other Metromedia tv stations. The price was $450 million.

In the cable tv/entertainment field, Hearst's joint venture with ABC and RCA, the Arts & Entertainment Network, was launched in February, 1984, and by year's end passed more than 12 million U.S. and Canadian homes. Also in February, Hearst launched Lifetime, a joint venture with ABC and Viacom International. Lifetime met its subscriber goals and was available in more than 23 million homes in the U.S. by year's end.

In a letter to employes, Hearst president-ceo Frank A. Bennack Jr. wrote that "most" of the company's 125-plus businesses improved performance over 1983.

In the magazine group, according to ABC statements of Dec. 31, 1984, and Publishers Information Bureau, in 1984:

Connoisseur's circulation was up 40.1% to 238,607, ad pages were up 17.1% to 702 and ad revenues were up 88% to $4.61 million; *Cosmopolitan's* circulation was down 7% to 2.82 million, ad pages were up 2% to 2,491 and ad revenues were up 17.3% to $95.14 million; *Good Housekeeping's* circulation was down 3.9% to 5.18 million, ad pages were down 3% to 2,031 and ad revenues were up 4.9% to $133.30 million; *Harper's Bazaar's* circulation was up 2.4% to 737,430, ad pages were up 17.3% to 1,823 and ad revenues were up 30.1% to $31.10 million.

House Beautiful's circulation was up 0.4% to 867,736, ad pages were up 3.6% to 1,139 and ad revenues were up 22.6% to $26.00 million; *Motor Boating & Sailing's* circulation was 142,162 (no figures were available for 1983 circulation), ad pages were up 16% to 1,891, but no revenue figures were available; *Popular Mechanics'* circulation rose 1% to 1.64 million, ad pages were down 3% to 1,150 and ad revenues were up 11.2% to $27.20 million; *Science Digest's* circulation was up 0.3% to 556,736, ad pages were down 11.4% to 379.3 and ad revenues were up 0.1% to $4.86 million; *Sports Afield's* circulation was down 4.9% to 518,010, ad pages were up 4.8% to 1,053 and ad revenues were up 11.9% to $12.80 million, and *Town & Country's* circulation was up 15% to 427,249, ad pages were up 4.9% to 1,903 and ad revenues were up 24.7% to $27.00 million.

Among Hearst's most recent acqusitions and startups, *Redbook*, acquired in 1982, lost 0.2% of its circulation, now about 4 million, but gained 7.1% in ad pages to 1,176 and gained 19.3% in ad revenues to $53 million. *Colonial Homes*, launched in 1979, gained 1% in circulation to 607,389, 7.6% in ad pages to 413 and 23.4% in ad revenues to $6.36 million. *Country Living*, launched in 1978, gained 27.7% in circulation to 1.32 million, 25.1% in ad pages to 796 and 71.5% in revenues to $15.90 million.

In Hearst Broadcasting Group, ABC's Olympic coverage boosted performance in the four Hearst stations that are ABC affiliates. "Our television stations in Pittsburgh, Baltimore and Kansas City maintained leadership positions in their marketplaces," Mr. Bennack says. "Our Milwaukee station . . . found 1984 somewhat more challenging, but our Dayton station has shown marked improvement. Our radio stations in Pittsburgh, Baltimore and San Juan performed well, with particular success this past year with WHTX-FM in Pittsburgh. However, our radio stations in Milwaukee are experiencing market difficulties."

The Cable Communications & Electronic Publishing Division, Mr. Bennack says, "experienced growth this year in all of its core businesses. While the acquistion market continues to be dominated by the largest multiple systems operators, the group continues to analyze potential candidates and intends to pursue the systems which most nearly meet our acquisition criteria."

Hearst's systems, all in California, posted their first full year of operation in 1984, ending the year with a total of 30,000 subcribers, an 11% increase over 1983. Renovation and rebuilding projects in Newark, Los Gatos and Milpitas systems resulted in a 17% gain in total basic and pay subscribers.

Acquisition of the Jefferson-Pilot publications provided the biggest news of 1984 for the newspaper group, although Hearst "does not plan to retain the Florida properties," according to Mr. Bennack. Total circulation of the Hearst papers is now more than 1.1 million daily and 2.1 million on Sunday.

The Capital Newspapers in Albany, N.Y., were among the best corporate performers in 1984, with circulation and classified ad gains reported at the *Times-Union* and *Sunday Times-Union*. The afternoon *Knickerbocker News* circulation was relatively stable, though it slipped slightly. Among Hearst's larger dailies, the *Baltimore News American*, which analysts believe is losing money, expanded its total market coverage program but scrapped a separate sports publication, called *Sports Afield*, in September, 1984, after it was deemed unable to reach circulation goals.

The Herald Community Papers in the Los Angeles market combined two dailies into one enlarged product and began a new marketing strategy for its 29 weeklies. The Herald Examiner in Los Angeles managed to stabilize a severe 1983 circulation slide. "Strategies continue to be explored for identifying a stronger niche for this paper in a very challenging and difficult market environment," Mr. Bennack reports.

The *San Antonio Light* saw increases in both daily and Sunday circulation and began operation of a new press line. The *San Francisco Examiner*, part of a joint operating agreement with the Chronicle, saw daily circulation soften slightly, but registered strong gains in classified advertising. William Randolph Hearst III, grandson of Hearst Corp.'s founder, took the operational reins at the *Examiner* as the paper's publisher in 1984.

The *Seattle Post-Intelligencer* saw moderate circulation gains as it completed its first year in a joint operating agreement with the *Seattle Times* in 1984.

Houston Chronicle Publishing Co., Houston, the 54th largest media company, had 1984 revenues estimated by Advertising Age at $217 million, all from the company's only property, the *Houston Chronicle*. The 1984 total was up 16.5% from 1983's estimate.

Despite a drop in classified ad linage, the *Houston Chronicle* continued to be the city's leader in the classified ad market in 1984.

Although classified ad linage fell 2.6% to 3,995,880 ins. in 1984, the paper still retains 70% of the Houston classified market, according to Jack Sweeney, sales and marketing director. Mr. Sweeney says that in the past year the real estate industry and possibilities for employment are somewhat less robust than in prior years, affecting ad linage in those areas.

He also says classified ad rates were up in 1984 by 10% to 12% over 1983. Total retail ad linage increased about 13%, to 2,807,813 ins., according to Mr. Sweeney. He attributed this to increased retail activity, particularly an increase in the number of off-price shopping stores.

The retail advertising activity and Houston's continuance as the fourth largest market in the country for construction despite the contention that the Houston economy is declining, Mr. Sweeney says. While Mr. Sweeney concedes Houston has slipped from its phenomenal growth pattern of the late 1970s, he says the city has evolved into a more realistic and sustainable pattern of growth.

General circulation at the *Chronicle* also continues to grow. As of March 31, 1985, ABC six-month averages show the Monday through Friday circulation increased 1.4% to 433,380 compared to the same period a year earlier; and Sunday increased 1.1% to 536,585. This compares to the Toronto Sun Co.-owned *Houston Post*, with daily circulation of 326,556, down 18.7%, and 376,015 for Sunday, down 18.8% for the reporting period of Sept. 30, 1984, the last available data by ABC on the *Post*.

According to Mr. Sweeney, the *Chronicle* is "pleased with its advertising, circulation and role in the media mix in the Houston market." To retain its share of market, the *Chronicle* advertises its product extensively. Its ad budget is up about 10% over last year. *Chronicle* ads focus on the paper's extensive classified ads section.

Papers in Houston like other markets have felt the impact of the aggressive entry into their market by Gannett Co.'s *USA Today*. Last year the *Chronicle* redesigned its street boxes to project a more colorful image. And, according to Mr. Sweeney, *Chronicle* street sales are at an alltime high—thus pitting the paper directly against the Gannett product. Of the 433,380 daily circulation, 80,000 are from newsstands; of the 536,505 Sunday circulation, 138,000 are from newsstands, representing 8% and 8.6% increases, respectively, over the 1984.

"*USA Today* is basically a daily street sale product, but we are on the newsstands all day long—with five editions," Mr. Sweeney says.

In 1983, the Chronicle unsuccessfully tried street sales in Dallas. "In as much as the *Chronicle* is a regional paper serving Southeast Texas, it is not surprising that the *Chronicle* did not succeed in Dallas," Mr. Sweeney says. For the foreseeable future, he says, the *Chronicle's* distribution will remain targeted to a 100-mile radius of its home market.

In addition, he says, the balance between morning and afternoon distribution will remain at about the same 50-50 ratio.

"We're going to let the consumer tell us which way to go, if any new direction," Mr. Sweeney says. "Right now they can have it any way they want it."

Another 1984 innovation at the *Chronicle* was insertion of a local magazine into the national Sunday weekly, *Parade*. Mr. Sweeney says the concept has proved popular. He says the editors stress correlating the national and local publications. For example, when *Parade* runs its national "Policeman of the Year" issue, the local magazine also names and profiles a local "Policeman of the Year."

Another source the *Chronicle* integrates with its local coverage is news provided by the *Financial Times* of London. Four pages run every Monday in the business section. Mr. Sweeney says the international coverage from a highly respected overseas source has been very successful because of the internationalism of Houston's business community.

To win over and keep advertisers, the *Chronicle* emphasizes "tailored" market coverage, which involves working closely with advertisers and being able and willing to offer them "a lot of different services and print concepts for creative use of the paper," says a company spokesperson.

The *Chronicle* continues to publish five editions daily, which are available at newstands.

Howard Publications, Oceanside, Cal., which has diversified into the oil and gas business, is the 68th largest media company in the U.S. with revenues estimated by ADVERTISING AGE of $166 million, up 10.7% from the 1983 estimate. Privatelyheld Howard, with the exception of its newly formed energy-oriented subsidiary, is wholly media.

The company derives its media income from 19 daily newspapers, the CBS-TV affiliate in Buffalo, N.Y., and cable tv systems in California and Wyoming.

There was relatively little change on the media front during 1984 at Howard Publications, whose founder and owner Robert S. Howard, says many of the company holdings are "in a construction mode," with physical plant facilities being upgraded across the board.

The company followed up its expansion in cable tv, which added some half-dozen new franchises to its California properties in 1983, with the start of badly needed refurbishing of some of the older systems.

Concurrent with the addition of new transmission equipment and administrative procedures was the company's launch of an aggressive tv and newspaper marketing effort to exploit the improvements and add cable subscriptions.

As a result, Howard's Los Angeles-based Falcon Communications posted substantial gains in its subscriber numbers, now up to 110,000 basic users from the 71,000 reported in 1983. Ad revenues from the company's cable operations are still at modest levels, but remain a potential growth area that Howard Publications has indicated it will continue to pursue in the Los Angeles market.

Falcon Communications is 80% owned by Howard and Donrey Media Group, Fort Smith, Ark. Howard's California franchises in the Los Angeles metropolitan area are Pasadena (now undergoing reconstruction), Montebello, Monterey Park, Temple City, San Gabriel, West Covina, Norco, Walnut, Riverside and some areas of Los Angeles, including unincorporated Altadena. The Howard-Donrey partnership also owns Overthrust Cable TV in Evanston, Wyo.

After the mergers and consolidation of some of its newspaper properties in 1983, the company experienced "a healthy year in print media," with increased 1984 revenues "although our newspaper ad linage figures were flat," Mr. Howard, ceo-president, says. Looking into 1985 and beyond, he says, "We expect to record some gains, but nothing exceptional."

The company operates newspapers in the medium-size range, led by the evening daily *Hammond* (Ind.) *Times* with circulation of 68,466, down 1%. Its Sunday paper with circulation of 76,401, was slightly-off the 1984 pace, according to ABC audited statements comparing six-month averages pulled March 31, 1985, with the similar period in 1984.

Like the *Hammond Times*, two other major contributors to Howard suffered small circulation losses: The *Sioux City* (Ia.) *Journal* had a circulation of 55,077 for its morning paper, down 2.1%, and 48,456 for the Sunday paper, down 5.1%; the *Waterloo* (Ia.) *Courier* had 50,974 circulation for its evening paper, down 2.7, and 54,609 for Sunday, off 1.2%; Casper, Wyo. *Star-Tribune's* morning paper circulation of 36,413 was off 3.3%, and its Sunday paper circulation of 39,294 was down 1%.

The company's major circulation gainer was the *Oceanside* (Cal.) *Blade-Tribune*, with evening circulation of 30,832, up 8.3%, and Sunday circulation of 32,188, up 7.5%.

In the broadcast area, Howard's sole property to date is WIVB-TV, Buffalo, the No. 2 station in its market. Purchased in 1977, the station's revenues have risen steadily since Howard took over.

While other companies in the communications field have experienced some degree of acquisition and merger activity in recent years, Howard has elected not to play the media acquisitions game. "We're in less inflationary times, and all media appear to be more stable than they were years earlier," Mr. Howard says. "So we don't look for any dramatic changes to take place in media." Instead, the company has embarked on a program of diversification with primary concentration in the energy field.

Founded in 1985, Howard Energy Co., Traverse City, Mich., is heavily involved in the exploration for gas and oil in Michigan and several other Midwest states. The company also has drilling operations in Texas and Wyoming.

Ingersoll Publications Co., Lakeville, Conn., is the 56th largest U.S. media company, with media revenues in 1984 estimated by ADVERTISING AGE at $207 million, up 60.5% from 1983's estimate.

The company marked its first full year of operation in the St. Louis newspaper market—where it debuted in May, 1983—by adding six more papers in the area, bringing the company's total to 41 in that market.

According to company president Ralph Ingersoll II, the "Ingersoll play" will be long running. "We've done more than we've contemplated," he says. The papers added to the company's already healthy package of Suburban Newspapers of Greater St. Louis are:

Alton (Ill.) *Telegraph*, paid daily, (May, 1985); *Collinsville* (Ill.) *Herald*, paid midweek and Sunday (December, 1984); *Granite City* (Ill.) *Press Record*, paid midweek and Sunday (December, 1984); *Jefferson County* (Mo.) *Daily Rocket*, paid (January, 1985); *Weekend Journal*, free weekly (May, 1984), and *Central West End* (Mo.) *Journal*, free weekly (September, 1984).

Although Ingersoll's St. Louis product originally consisted of free papers, four of the acquisitions are paid.

"We've been buying the paid papers because they give us real presence on the Illinois side," he says, because "a lot of people who live across the river work in St. Louis and vice versa."

The company's interest in the St. Louis area—$70 million in revenue, according to Mr. Ingersoll—is more than just a fondness for the city on the Mississippi.

"We are heading for a showdown with Pulitzer," Mr. Ingersoll says, referring to Pulitzer Publishing Co., owner of the *St. Louis Post-Dispatch*. "It's not inconceivable [for Ingersoll] to start a daily paper" in this market, he says, but "if we start publishing daily, it won't mean publishing any of the existing papers daily."

Ingersoll is building its St. Louis properties by introducing a wire service and a "classified system"—the first ever—expected to go on-line December, 1985.

The project, currently a $2 million investment, is being handled by Sacramento, Cal.-based Systems Integraters, the company used by the *Chicago Tribune* to work with its zoned edition changes. The classified system will allow a consumer to pinpoint an area and make a buy—with one phone call —just in those papers covering the market desired.

In November, Ingersoll strayed from the St. Louis area long enough to place a $150 million bid on the Des Moines Register & Tribune Co., which was sold to Gannett Co.

In April, 1985, as an alternative to financing through commercial banks, Ingersoll privately placed $100 million in 15-year debentures on the market. The advantage to this is a fixed rate and a longer term amortization than found in a bank, Mr. Ingersoll says.

In December, going back to its long-standing role as "newspaper doctors," Ingersoll purchased the *Woonsocket* (R.I.) *Call & Reporter*, a paid daily with a circulation March 31, 1985, of 31,263, according to ABC. "It desperately needs a Sunday edition, which will be out by Labor Day," Mr. Ingersoll says. With this paper, Ingersoll hopes to make Rhode Island a more attractive place for business.

The company's hot acquisition pattern—seven newspapers in 12 months —and its ability to develop capital, indicate growth potential. As Mr. Ingersoll says, "We may be the last pure play newspaper operators."

International Data Group, Framingham, Mass., better known in media circles by its publishing arm, CW Communications, publisher of *Computerworld*, ranked as the 80th largest media company in 1984 with net revenues from media operations of $138 million, up 62.4% from 1983.

IDG, which draws its name from the company's research arm, International Data Corp., had total revenues for the year of $160 million, up 45.5%.

The revenue increases are attributed to a 17% gain in ad revenue from *Computerworld*, up to $50 million, and from an increase in the number of foreign publications to 47 from 40 in 1983. The privately held company does not release earnings figures. *Computerworld* is the company's lead publication with paid circulation of 125,969 at yearend, up about 2.5%, according to ABC figures.

With the bottom falling out of the computer publishing business almost as quickly as the industry grew, IDG could not avoid some of the losses experienced by other publishers. There are about half the number of computer magazines now as in late 1983.

In the U.S., *Microcomputing, jr.*, and *Computerworld Buyer's Guides* were discontinued. The buyer's guides were distributed to *Computerworld* subscribers as an ancillary publication. "We cut all our losses and got it over with at once," says Lee Vidmer, exec vp of CW Communications. Overseas, the company closed *Micro Info* in the Netherlands and *Micro Verden* in Denmark.

Some publications were not discontinued outright, but folded into others. *Computerworld Office Automation* was changed into a new monthly called *Computerworld Focus*, which covers a different topic each issue and is distributed to all *Computerworld* subscribers.

IDG also broke *Computerworld on Communications* away from *Computerworld* and set it up as a monthly publication on its own, called *On Communications*. It has 60,000 controlled circulation and covers voice and data communication.

In general, however, the trend this year was contracting and consolidating as the publishing business in general did. "We gain market share," Ms. Vidmer says, although ad pages in computer industry publications in general continued to decline in April, 1985.

There were some major personnel changes within the publishing group. Don Fagan became publisher of *Infoworld* early in 1985, and Art Shields became publisher of *Micro Marketworld*.

Although no new publications are imminent, the company always is looking at new business opportunities. Ms. Vidmer predicts any search for new publications is most likely to come from its Framingham publishing group and its Peterborough group, the former Wayne Green publishing operation. "We probably won't see any new publications from the personal com-

puter group," she says.

By bringing out *On Communications* as its own vehicle, the company is demonstrating its belief that communications is the direction for growth in the computer industry. "The communications industry has blossomed since the breakup [of AT&T]," Ms. Vidmer says, and the company's Communications Network annual conference has been successful and profitable, particularly the past three years, running contrary to the industry dropoff in computer shows.

The Communications Network Conference is the oldest of the company's conferenced seminars, all of which specialize in communications. The company's Conference Management Group has become a profit center, but it will present no personal computer or consumer shows, both of which have been struggling industrywide.

The company continues to keep a broadcast entity alive doing video work for special projects, and it has no plans to expand this activity. An early foray into tv syndication in 1981-82 was abandoned. "We were ahead of our time," Ms. Vidmer says of the effort.

As a privately held company, International Data Group is not looking to be acquired and has rejected offers from unnamed suitors, Ms. Vidmer says. Nor is the company looking to purchase more properties outright, she says, describing the acquisition of the Wayne Green Publishing operation as being "quasi-successful." Growth in the foreseeable future will come from within the existing company groups.

International Thomson Holdings, New York, the principal U.S. subsidiary of International Thomson Organisation Ltd. of Toronto, had estimated revenues of $550 million in 1984 from its U.S. business press segment, ranking 23rd among U.S. media companies.

A public company 75.3% controlled by the family of Canadian Kenneth Thomson, Lord Thomson of Fleet, parent ITH is separate from Thomson Newspapers (also covered in this profile report), which controls Thomson newspaper interests in Canada and the U.S. The two were combined in last year's report because of common ownership but were separated this year at the request of Thomson, which cited their complete autonomous operations as reason for separate treatment.

ITH through its International Thomson Business Press publishes 80 business magazines, but ITH also has substantial interests in information services (software, micropublishing, library automation) and in education/reference book publishing, travel and oil and gas.

Advertising Age made its revenue estimate based on the $78.6 million in profit reported in 1984 for ITH's publishing and information businesses in the U.S., an increase of 22% from 1983.

In 1984, ITH reported its business magazines in the medical, transportation and industrial fields performed strongly, while those in communications and electronics were disappointing.

The company launched two new magazines during the year: *Home Satellite Marketing* and *Contemporary Pediatrics.* It also acquired American Health Consultants, which publishes 12 newsletters for physicians and hospital administrators, and National Railway Publication Co., a leading information provider to the railway industry.

The professional publishing group (including *American Banker* and *Bond Buyer*, purchased for $58.7 million in 1983) had a record year in sales and trading profit, ITH says. These publications and those in the information group are generally subscription based. They currently are the most profitable part of Thomson businesses in the U.S.

ITO started its business press unit in the U.S. in the 1970s, growing largely through acquisition. One of its most successful trade magazines is *Medical Economics*, edited for physicians in private practice. The twice-monthly publication had estimated gross ad revenues of $20.1 million in 1983 (the latest available date), on ad pages of 4,073, up 0.7% from the prior year, according to *Folio* magazine, which placed its circulation at 180,087, some 28,938 of which was subscriptions, down 2.8%.

Medical Economics is part of the ITO's Medical Economics Co., Oradell, N.J., along with four other highly circulated publications in the medical profession (with 1983 *Folio* figures and 1982 comparisons when applicable):

Drug Topics, a fortnightly written for drugstore retailing, had gross ad revenues of $4.3 million in 1983 on ad pages of 971, down 1.7%, and circulation of 80,586 (only 2,540 subscriptions), up 3.4%; *Patient Care*, published 21 times a year, addresses clinical problems physicians face in daily practice. It had gross ad revenues of $8.1 million in 1983 on ad pages of 2,465, up 3.1%, and circulation of 112,899.

Practical Cardiology, a monthly written as continuing education for the cardiologist, had ad revenues of $5.1 million on ad pages of 1,692, up 22.6%, and circulation of 145,000, up 6.8%, and *RN*, a monthly, had ad revenue of $4 million on ad pages of 653, down 12.7% with circulation of 366,024, down 2.3%, a circulation that brings total gross revenues of the magazine to $9.1 million.

Journal Co., Milwaukee, is the 61st largest media company, with 1984 media revenues of $197.3 million, up 11.3% from the previous year.

Media revenue at Journal Co. comes largely from the *Milwaukee Journal* and *Sentinel*, weekly newspapers and three tv properties. Together they comprised 58% of the company's total revenues of $339.5 million in 1984. Commercial printing accounts for most of the nonmedia business.

Net income for the employe-owned company rose 28% to $34.1 million in 1984. Although sales and acquisition activity for Journal Co. in 1984 were minimal, the company took steps in the first quarter of 1985 to build its revenue stream by acquiring an independent tv station, launching a weekly publication and selling its cable operation.

The cable system, Teletron Inc., was sold Feb. 28, 1985, to Jones Intercable of Englewood, Col., for $25 million. The system, which was added in 1965, served the central Wisconsin cities of Stevens Point, Wausau and Wisconsin Rapids and had built its subscriber list to 26,000.

"We're better off to concentrate on publishing, broadcasting and commercial printing," says Jack Knake, vp-corporate communications. "If you want to be [successful] in the cable business today, you either have to get big and grow, or not be in it at all."

In January, 1985, the company acquired WFSL-TV, an independent station in Lansing, Mich., for $8.25 million. To support an impending ad campaign to promote it, the company changed the station's call letters to WSYM ("We Say Yes To Michigan") in March. Journal Co.'s other tv properties include ABC affiliate KTNV-TV, Las Vegas, and WTMJ-TV, the NBC affiliate in Milwaukee.

According to the February, 1985, A.C. Nielsen Co. ratings report, KTNV is ranked No. 3 over-all in the tight Las Vegas market, posting a 7 rating with a 19 share. The station follows NBC affiliate KVBC, ranked No. 1 over-all, and CBS affiliate KLAS, ranked No. 2. WTMJ, with a 9 rating and a 25 share, ranks No. 1 in the Milwaukee market, according to Nielsen.

Journal Co.'s print properties showed significant gains in 1984. Total revenues for the *Milwaukee Journal* and *Milwaukee Sentinel* combined increased by 12.4%, according to Mr. Knake. Circulation increased for the *Sentinel* and the *Journal's* Sunday edition, but fell for the *Journal's* daily edition.

While the ABC March, 1985, report shows circulation for the Journal's Sunday edition climbed to 529,636, a 0.5% increase from the same period a year earlier, circulation for the *Journal's* daily edition fell 1% to 303,127. The *Sentinel's* circulation is posted at 183,621, a 1.8% increase.

Add Inc., a group of shoppers in Montana and Wisconsin, added the *Oshkosh* (Wis.) *Buyer's Guide* and the *Neenah* (Wis.) *Buyer's Guide* to its list of nine properties in September, 1984. Total revenues for the entire group increased in 1984 by 23.6%, notes the company.

In March, Journal Co. added the weekly *Stratford* (Conn.) *Star* to its roster of five weekly publications produced by its Hometown Publishing division in Trumbull, Conn. Total revenues for the Hometown Publishing group increased in 1984 by 18.4%.

Personnel changes in 1984 included giving Robert A. Kahlor, president, Newspapers Inc. (which governs the *Journal* and *Sentinel*), the additional title of exec vp, Journal Co. Mr. Kahlor succeeds Warren J. Heyse, now president of the Journal Co. D.

The editorial staffs of the company's two dailies voted to institute a guild in June, 1984, by a vote of 161 to 136. According to Mr. Knake, editorial employes are "still in negotiations" for a contract and company officials "have no idea when one will be approved."

Journal Co. also owns Teleport, Skokie, Ill., a facility of Midwestern Relay Inc. Teleport supplies communications satellites and feeds signals to Chicago-area broadcasters for pick-up and transmission.

Knapp Communications, Los Angeles, whose attempts to revive *Geo* magazine have finally ended with the scuttling of the magazine this year, is the 97th largest media company, with 1984 media revenues of $97.6 million, up 10% from 1983.

Total consolidated revenues for 1984 (all figures are for the fiscal year ended Jan. 31, 1985) were $111.2 million, of which 79% was generated by advertising and circulation revenues for the three U.S. magazines published by the company—*Architectural Digest, Bon Appetit* and *Home.*

Missing from this roster is *Geo*, the 250,000-circulation magazine purchased from German publisher Gruner & Jahr in 1979. First billed as "a new view of our world," *Geo*'s identity shifted to the "Earth Diary" and finally—as of last September—to the travel field. It ceased publication with the February, 1985, issue.

In the view of industry observers quoted in the March, 1985, *Folio*, the final transformation came too late, necessitating a period of several more years until readers and advertisers became used to the new product. But magazine group publisher Harry Myers told *Folio* it would have been too expensive to pump up *Geo's* circulation to the 500,000 level needed to cover the costs of producing the lavishly illustrated magazine. It was estimated that *Geo* consumed an estimated $70 million of Gruner & Jahr and Knapp money during its short history.

The remaining three magazines are geared to the upscale market that Knapp has made its focus. *Architectural Digest*, purchased by Knapp 20 years ago, was transformed from a twice-annual trade magazine into a monthly for consumers.

Thomas P. Losee Jr., vp-publisher, hired from Hearst Corp. last year, says, "Nobody spends the kind of money we do" to reach the market with a median income of $82,000 and a median age of about 40. "We were one of the few magazines mentioned in the 'Yuppie Handbook,'" he says.

Last year marked *Architectural Digest's* biggest annual ad revenue bonanza—$20.8 million—with ad pages increasing 3% over the previous year. *AD* ad pages were up 2.5% to 1,503 in 1984 bringing revenues of $27.8 million, up 12.6%.

The 1984 circulation figure, exclusive of foreign editions (a German edition, published by Burda-Verlag, was added to the lineup of foreign licensees last year), was 601,000, a slight drop from 602,397 in 1983. Gross circulation revenues in 1984 were $21.1 million.

This year, *Architectural Digest* was chosen to fulfill the subscriptions of former *Geo* readers.

Legend has it that Bud Knapp once walked into a bookstore and discovered that the only books that sold more than the Bible were cookbooks, and so *Bon Appetit* was transformed from a Pillsbury giveaway into a food magazine for the rich. Ad revenues at the magazine were $16.6 million in 1984 on a net basis, and $24.1 million at gross. Ad pages were up 10% to 1,116 over the previous year. Circulation remained steady at 1.3 million with circulation gross revenues at $16.1 million.

Asked what impact Conde Nast's purchase of rival *Gourmet* magazine might have, *Bon Appetit* publisher Robert Phelps said he expected it to be "a force with which to be reckoned," but noted that "they still do not want to compete with us in the food area." *Bon Appetit's* emphasis is on recipes that can be prepared with food available in the supermarket.

Mr. Phelps is excited about the tv show "Master Chefs of New York," which *Bon Appetit* developed last year in collaboration with KQED/Golden Productions, San Francisco. The magazine was asked to be a "creative partner . . . We chose the restaurants, chose the menu, prepared the cookbook, tested the recipes," Mr. Phelps says. That cookbook, published by otherwise inactive Knapp Press, funded the production with sales—at the most recent count—of 77,000 copies. Says a Knapp spokesperson of the 13-week show, first aired last July in New York and since shown elsewhere in the U.S.: "It was a pretty successful co-venture . . . very important for the cooperation of television and magazines." A second series is scheduled to go into production this summer.

When Knapp acquired *Home* (formerly *Hudson Home Magazine*) in 1981, its circulation stood at 380,000. Last year that figure rose to 579,000, up 38,231 from 1983. Publisher George Fields says that, as of March, 1985, the total has jumped to 700,000. Ad pages rose 33.5% to 610 in 1984 and ad revenues hit $7.3 million, up 55% from 1983, according to Publishers Information Bureau.

Mr. Fields cites *Home's* 1983 redesign, increasing strength on the newsstand and appeal to the growing numbers of "affluent couples who are really defining their position in life by their home surroundings," as factors in the magazine's recent growth. "Shelter magazines used to be fairly passive," he says. "Now there is a dual interest in the home . . . you sit around the bar and hear guys talking about their kitchens." The kitchen is the focal point, Mr. Field says, but the bathroom is emerging as "an equally interesting area." *Home* carries more kitchen and bath editorial pages than any other U.S. consumer magazine.

Four years ago, Knapp began working on the first of its motivational market studies, which are supplied free to ad agencies and the industries the studies survey. "You can't sell space to people unless you understand what their problems are," says vp-associate magazine publisher Bob Brown, who wrote last year's study "The Affluent Market and the Automobile." This year he'll be coming out with cross-tabulated information on auto imagery.

Also due out this year is a survey of why people do and do not buy furniture for their homes and a report on liquor-buying habits. Next year, Mr. Brown says, home furnishings probably will be surveyed, and "at some point" consumer electronics buying habits may be subjected to scrutiny. On the latter subject, Knapp is rumored to be bringing out a new publication related to the electronics field, a subject on which Knapp remains quiet.

Each area of study is in line with the leading categories of business Knapp attracts in its magazines. "We look at it as an investment," Mr. Brown says. "With all this kind of data, you can talk to the chairman of the board, the president . . . How can you be in this business and not care about everyday real-life consumer information?"

Knight-Ridder Newspapers, Miami, continues to build on its performance in 1984 that produced media revenues of $1.67 billion, ranking the company 8th among the nation's media companies.

Media revenues at Knight-Ridder increased 13% from the prior year. K-R has several media support operations—newsprint maker and supplier, newspaper sales, trucking system, and a small book printing facility—but these are treated as media in this issue. They represented less than 3% of total revenues in 1984.

In the first quarter of fiscal 1985 ended March 31, K-R showed earnings of $28.9 million, a gain of 10.7% over the comparable period in 1984. K-R's 1984 total earnings grew 17.7% over 1983, outpacing a 16% increase in the previous year-to-year period.

While K-R remains essentially a newspaper company—89.4% of total revenues were from newspapers in 1984—it continues to dabble in the broadcast market. Early this year, it linked forces with Scripps-Howard and Tele-Communications Inc. to bid unsuccessfully for Storer Communications, a Miami cable and broadcast company.

K-R is sticking to its Viewtron videotex experiment despite capital expenditures of $40 million thus far, and a loss in 1984 of $17 million as reported by K-R chairman Alvah Chapman Jr. to a group of security analysts last year. Viewtron, which in 1983 became the nation's first consumer videotex service, has about 3,000 subscribers, short of the 5,000 it had expected by the end of its first full year of operation.

Viewtron, seeking a market niche for its menu of services, may have found one. By this summer, Viewtron will offer a software package allowing Apple II and Commodore 64 computer users to hook up to Viewtron through their own equipment, eliminating the special hardware required to receive Viewtron data. That hardware originally cost $600, a one-time cost scrapped last year in favor of a monthly rental, which at first was $39.95 and more recently $24.95.

The year also saw a change in management at Viewtron as well as the cutting of 41 fulltime employes and an undisclosed number of parttimers. Viewdata Corp. of America president Albert J. Gilien retired and was replaced by *Jackson* (Tenn.) *Sun* publisher Reid Ashe, who took the new title of ceo. Former Heublein International executive Paul Orme was appointed president.

Ad revenues of K-R's biggest media section—newspapers—climbed 14.7% on the strength of a 24.6% increase in classified revenues. Particularly strong showings were posted in employment advertising, up 41%, and automotive advertising, up 26%. Total full-run linage rose 4.6%. Preprint ad revenues also showed strong gains. Full-run preprint revenues climbed 25.8% and zoned part-run preprint revenues rose 22.8%.

K-R introduced six new suburban-zoned "neighborhood" sections and four more Business Monday-style products to its 24 daily general newspapers. No new papers, however, were added in 1984. In two markets, Long Beach, Cal., and Aberdeen, S.D., the papers were converted to morning publication. In a third market, St. Paul, Minn., K-R announced plans to combine the city's two daily papers, the *St. Paul Pioneer Press* and *St. Paul Dispatch*, into a single publication with morning and afternoon editions.

K-R's total daily circulation rose by 38,000 to 3.83 million; Sunday circulation grew by more than 79,000 to 4.59 million.

K-R carried out or committed itself to a number of capital improvement projects for its newspaper properties in 1984. A new $16 million state-of-the-art plant was opened in Bradenton, Fla., where the company publishes the *Bradenton Herald*. In St. Paul, the *Dispatch* and *Pioneer Press* gained a new $11 million office building. Pagination systems were approved for Philadelphia and Long Beach, and K-R began testing flexographic printing in Miami and Long Beach.

Because of the strength of the dollar abroad and the slowdown in international travel to Miami, growth of the *Miami Herald* was slightly below the company's composite average. The paper continues to be K-R's major profit center, with total revenues up 11.6% over last year, to $230.4 million.

The *Herald* beefed up editorial coverage in the counties north of Miami, where a battle has been brewing for new subscribers during the past few years. This area, also hotly pursued by the Fort Lauderdale and Palm Beach daily papers, is where the overwhelming majority of South Florida's growth will occur in the coming decade.

The *Philadelphia Inquirer* and *Philadelphia Daily News* also introduced several new products in 1984 to secure readership: Three zoned neighborhood sections and a beefed-up sports section at the *Inquirer* and a targeted Business Plus section at the *News*. The two papers continue to contribute 21% of K-R's total operating revenues, with ad revenues up 18.3% over 1983 to $263.3 million in 1984. *Inquirer* daily circulation is slipping slowly. The latest figures show average daily circulation of 519,621, down 2.9%, and the Sunday circulation of 1,011,837, up 0.4%, according to March 31, 1985, ABC audited figures comparing six-month averages for that period to the comparable 1984 period.

At the Detroit Free Press circulation figures for the daily climbed to 646,476 daily, up 2.4%, but dipped to 778,178 for Sunday, off 1.1%. The lower Sunday circulation has to do with an increase in the Sunday price early this year, from 50¢ to 75¢ per copy.

The *Free Press* is the only paper in the K-R stable facing stiff head-on competition, making it a perennial money loser for the company. The locally-owned *Detroit News* had daily circulation of 666,949, up 1.5%, and Sunday's 884,763, up 2.8%.

However, total r.o.p. ad linage share of market in 1984 for the *Free Press* vs. the Evening News Assn.'s *News* rose slightly to 41.3% compared to 41.2% in 1983 and 41.0% in 1982, says K-R. Ad revenues at the morning *Free Press* rose 9.8%, to $104.8 million, with a 36.3% increase in classified ad revenues leading the way, thanks to an improved automotive industry.

The *San Jose Mercury News*, which converted to an all-day newspaper in 1983, broke its circulation record, rising to 259,059 for the daily, up 5.4%, and 309,527 on Sunday, up 3.6%. The paper, which contributes 10% of all K-R newspaper revenues, has expanded its business coverage and has introduced a Religion and Ethics section to Saturday's edition. Ad revenues were up 21.2% over 1983, to almost $153.9 million.

In the broadcast area, K-R bought one cable system and sold another, reflecting management's cautious approach to diversification. TKR Cable Co., a joint venture with Denver-based Tele-Communications Inc., purchased Hamilton Cablevision, Hamilton, N.J. The $22 million purchase brought TKR's total subscriber count to 161,000. Trading the East Coast for the West Coast, K-R and partner Times Mirror Co. agreed to sell Long Beach Cablevision to Simmons Communications, Stamford Conn. The sale will be completed this year.

Broadcast revenues rocketed 35.9% over 1983, largely because of the November, 1983, purchase of ABC-affiliate WNGE-TV (the name was changed to WKRN-TV), Nashville, Tenn. One industry analyst says he expects K-R will get more heavily involved in tv and cable if the Viewtron experiment ends.

K-R also is showing signs of slow penetration of other areas of information dissemination.

Two acquisitions were completed in the business information services division, where revenues grew last year by 14.9% to $67 million: Commodity Research Bureau, which provides charts for commodity traders, and Tradecenter, which provides real-time graphic price information to the financial community. These products complement K-R's Commodity News Service, whose customer base increased to more than 35,000. The company said, however, revenue growth in this area was below expectations.

K-R also made a commitment to expand the *Journal of Commerce* in 1985 with a West Coast edition published via satellite. The publication is considered the dominant source of information on ocean cargo and shipping, and plans are also in the works for a Midwest edition.

On the mobile telephone front, K-R's Tel-Air Network opened operations in Miami, Tampa, Austin and San Antonio, but sold its interests in cellular telephone applications pending in eight markets to McCaw Communications. The company made the move because of an unanticipated rule change by the FCC that would have made K-R a minority owner in any franchises awarded.

K-R received an additional boost in 1984 by being featured in the book, "The Best Companies to Work for in America." Management gets high marks from both analysts and employes and is said to be a company that knows when to swim and when to return to shore. Says industry analyst Bruce Thorp of Ryan, Lynch & Jones, Washington, "At Knight-Ridder the emphasis is on quality. They made a commitment to develop the best system they could."

Cable	102	90	13.0

Kohlberg Kravis Roberts & Co., the New York-based private investment banking company, is the nation's 38th largest media company with revenues from media properties of an estimated $302 million in 1984.

KKR's ownership during 1984 of KTLA-TV, the Los Angeles independent station, and its ownership during eight months of 1984 of the six tv stations and cable operations of what used to be Wometco Enterprises, Miami, are included in ADVERTISING AGE's media estimate. A year-to-year comparison is not applicable because of the partial-year ownership of Wometco by KKR.

KKR has assumed a prominent role in the nation's broadcast media by virtue of its purchases—all leveraged buyouts—in the past two years. The company bought the country's largest independent tv station, KTLA in Los Angeles, in 1982. In March, 1984, shareholders at Wometco Enterprises in Miami agreed to a $1 billion buyout engineered by KKR. Then in May, 1985, Storer Communications agreed to a buyout.

In a leveraged buyout, a company is sold, generally to its management in cooperation with outside interests. Because this incurs sizable debt, the debt is serviced by the cash flow from existing properties and by the sale of assets to reduce the debt.

Storer revenues are not included in those of KKR in this profile because that deal is still being concluded, and the time period determining the rankings by AD AGE is calendar 1984 or fiscal years that may end as late as March 31, 1985. (For more information, see Storer profile.)

KKR remains highly active in the market on all fronts, selling KTLA in May, 1985, to Tribune Co. of Chicago for $510 million, nearly twice the price KKR paid former movie cowboy Gene

Autry for it in 1982. In mid-1985, KKR was in the process of purchasing Storer Communications in Miami for an estimated $1.64 billion. Shareholder resistance has held up that purchase.

This activity may just be the beginning. The company plans to continue to deal in communications properties—"if the price is right," qualifies Anthony Cassara, president of Wometco Broadcasting Co. Indeed, KKR must sell off some of its acquisitions because several run counter to FCC regulations prohibiting media crossownership in the same market.

In 1982, KKR purchased KTLA for $245 million, followed by the purchase in 1984 of Wometco Enterprises, including large cable holdings and six tv stations. To manage these new stations, KKR formed Wometco Broadcasting Co.

Mr. Cassara, president of KKR's Golden West Television (its sole tv property was KTLA) at the time of the Wometco purchase, was given the additional title of president of Wometco Broadcasting. Mr. Cassara, while heading up KTLA for one-time owner, Mr. Autry, first made the KKR connections, getting the investment banker to participate in a buyout of KTLA in which he became part-owner along with KKR.

Mr. Cassara estimated combined revenues of KTLA and only the Wometco tv properties at $200 million for 1984. In 1983, KTLA had estimated revenues of about $130 million and Wometco's six tv stations had revenues of $79 million. KTLA in the 1984 estimate supplied about 71% of the seven-tv total. Wometco's cable operations, accounting for revenues of $90.3 million in 1983, had estimated revenues of $102 million in 1984.

When the sale of KTLA is finalized in late summer—pending FCC approval of the license transfer—Golden West Television will be dissolved, Mr. Cassara says. He will remain as president of Wometco Broadcasting.

Meanwhile, things are changing at Wometco. Wometco Broadcasting has sold KVOS-TV in Bellingham, Wash., to Ackerley Communications, Seattle, and is selling WZZM-TV in Grand Rapids, Mich., to Price Communications, New York, pending FCC approval.

Wometco Enterprises, which split into two divisions—Wometco Broadcasting and WEI Enterprises—at the time of the KKR purchase, has whittled away at the WEI division, selling off its soft drink business in February, 1985, and its vending and theater activities in June, 1985. That leaves only cable operations in the division. At the end of July, 1985, WEI Enterprises will become a separate private company called Wometco Cable TV Inc., solely to house the vast cable business.

Wometco's cable operations increased total subscribers 12.1% to 305,000 from 1984 to mid-1985 serving communities in North Carolina, Georgia, Alabama, Mississippi, Louisiana, and Oklahoma. The systems passed 544,000 homes, and pay tv units (one sub may have more than one unit) were 233,000. During 1984, the company added systems in Kingstree, S.C., and a group system in Red Springs, N.C. In early 1985, the company sold its Ausable Communications, Plattsburg, N.Y., system to Gateway Cablevision and acquired the Manning, S.C., system.

Of the Storer Communications buyout, Mr. Cassara says there are no plans to combine it with Wometco. The two will remain different companies with separate corporate entities, he says.

Storer has about 1.5 million basic subscribers and estimated cable revenues of $341.8 million. The Miami-based company also owns seven tv stations with estimated revenues of about $195 million, which KKR also obtained in the purchase. These stations serve the markets of Atlanta, Boston, Detroit, Cleveland, Toledo, San Diego and Milwaukee.

Concerning the stations sold at Wometco, Mr. Cassara says they were sold because they serve markets smaller than those in which Wometco is interested, and KKR purchased them only because they were included in the original Wometco deal.

The sale of these stations leaves Wometco with four stations: Two uhf channels in Newark, N.J., and Smithtown, N.Y.; an ABC affiliate in Asheville, N.C., and a CBS affiliate in Miami.

KKR now has 11 stations among Wometco and Storer properties, but because FCC regulations count uhf stations as half of a vhf station, KKR legally owns only 10—two below the limit of 12.

KKR, however, has tv and cable franchises in the same market, a crossownership that runs counter to FCC regulations. KKR will need to do something about the Miami market where Wometco owns a tv station and Storer has the cable rights. One must go. "These decisions probably won't be made for another year," Mr. Cassara says.

"KKR is very interested in the broadcast industries, and would like to invest more. But this desire is contingent upon the market. If tv station prices continue to rise, then leveraged buyouts are going to be difficult."

Landmark Communications, Norfolk, Va., whose TeleCable division was spun off to become a private company in January, 1984, was the 52nd largest media company, with 1984 media revenues of $225 million, 98.3% of its corporate revenue of $229 million.

The divestiture left Landmark basically with its traditional newspaper properties and two tv and two radio stations. Media revenues from these continuing operations were up 21% from the prior year.

Of the 1984 revenues, 83.7%, or $191.6 million was from the company's publishing enterprises—primarily daily and weekly newspapers—compared with 87.4% the year before. Broadcasting revenues increased 53.9% to $33.4 million.

Company officials will not give additional financial details, but much of the increase in broadcasting revenues in 1984 came from Landmark's Weather Channel. Although still running in the red, the Weather Channel received substantial income from subscriber fees, which the company instituted Jan. 1, 1984.

The subscriber fees, charged to cable operators, range from 3¢ a month a customer for larger markets to 5¢ in smaller markets. Assuming an average of 4¢ a month for each of the Weather Channel's 16 million customers in 1984, gross income from subscriber fees would be $640,000 a month or $7.68 million a year.

John O. Wynne, chairman of the Weather Channel and president of Landmark Broadcast & Video, says subscriber fees represented about 45% of the Weather Channel's 1984 revenue, but this percentage will drop in the next few years because subscription rates were guaranteed for three years.

"Implementation of the subscription fees puts us on a solid financial footing, and even though we still are losing money, we're pleased with the direction the Weather Channel is taking," Mr. Wynne says. "Our costs now are very manageable, and we expect to see a positive cash flow beginning in 1986."

Mr. Wynne says ad revenues from the Weather Channel doubled in 1984 from 1983 figures.

The Weather Channel's ad sales were helped by its first ratings from A.C. Nielsen Co., at the beginning of 1985 when the channel first totaled 12 million subscribers. The metered ratings have been constant at 0.4, Mr. Wynne says. This means that at any given moment the channel is being watched in 70,000 households. The figure, Mr. Wynne says, is comparable to USA Cable Network, Entertainment & Sports Programming Network and Cable News Network during parts of the day.

Less than a quarter of 1% of the 1,750 cable operators carrying Weather Channel dropped the service when the subscription fees began, Mr. Wynne says, although some chose to continue under their old nonpayment status until the contractual period concludes and then negotiate a subscription fee.

"Our financial growth, with implementation of the subscriber fee, is right on schedule," Mr. Wynne says.

Landmark's three major daily newspapers, the *Norfolk Virginian Pilot* and *Ledger-Star*, the *Roanoke Times & World News* and the Greensboro, N.C., *News & Record*, showed consistent advertising and circulation gains in 1984, says Landmark vp E.C. Oldfield Jr. Those papers accounted for 69% of Landmark's publishing revenues in 1984, a drop from 60% in 1983, he says, noting the drop had to do with a bigger base created through the acquisition of new publications.

The acquisitions included a weekly newspaper, the *Henry County Local*, New Castle, Ky., and *Style Inc.*, a free-distribution, entertainment-oriented newsprint magazine serving the Richmond, Va., market. *Style* joins *Port Folio*, which serves Hampton Roads, Va., and *Spectator* Magazine of the Triad, Greensboro, N.C. Another new publication introduced in 1984 was a South Florida edition of *Senior World*, Fort Lauderdale, Fla.

Perry Morgan, exec vp-executive editor of Landmark Communications and senior editor of the *Virginian-Pilot* and *Ledger-Star*, retired in February, 1985, after 12 years at Landmark. His replacement has not been announced.

Mr. Oldfield is optimistic about 1985 financial prospects at Landmark. "We had a particularly good 1984, with across-the-board publishing and broadcasting revenue increases from 1983, and 1985 continues to look encouraging."

Lee Enterprises, the 64th largest media company in the U.S., had revenues of $182.7 million from its Midwest newspaper and broadcast properties in 1984, a 10% increase from 1983.

Lee achieved similar growth in recording total revenues of $190 million, up 10.1%. For the first half of the new fiscal year ended April 30, 1985, Lee had earnings of $11.4 million, an increase of 23.5% over the comparable period a year earlier, on operating revenues of $100.6 million, up 9.5%. For 15 of the past 16 years, earnings have risen.

The Davenport, Ia.-based company publishes daily newspapers in eight states, operates tv stations in five states, owns directly or indirectly four radio stations in Illinois and Nebraska, participates in cable tv services in Iowa and Wisconsin and, through a joint venture, is a leading producer of photosensitive polymer printing plates for newspapers.

In 1984, the newspapers were particularly strong. Newspaper operating income was up 17% to $13.2 million, 26.3% of total operating profit compared to 24.8% in 1984. Revenues from newspaper operations were $120.8 million, up 10%. Lee president Lloyd Schermer says not all the newspaper division's performance can be attributed to the upturn in the economy.

"We are modifying some of the traditional ways we have operated in order to respond to fundamental changes taking place in our industry," Mr. Schermer says.

A matter of no small concern to newspaper publishers, including Lee Enterprises, is the shift of retail advertising linage from newspapers to ad circulars delivered either as inserts in the newspapers or by mail carriers, thus eroding newspapers' revenue base.

"Our goal," Mr. Schermer says, "is to counter this trend by creating new products which will lead to an increased share of advertising dollars."

To that end, Lee Enterprises' corporate marketing staff was gradually expanded to include: Stuart Schwartz, former associate professor of communication at Georgia State University, now corporate director of newspaper marketing; and Molly Greider, the new director of newspaper and sales promotion. She had a similar title at Lee's *Decatur* (Ill.) *Herald & Review.*

Newspaper advertising and circulation revenues were up 9.1% and 12.8%, respectively, in 1984. Classified advertising and preprint unit increases were primarily responsible for the ad revenue increase.

"Our newspaper groups have targeted an additional 13,000 subscribers during this fiscal year by producing a better product and improving our sales and marketing skills," Mr. Schermer says. "This is a much wiser investment than buying another newspaper with the same circulation at today's prices."

Lee made no additions to its newspaper or broadcast properties in 1984, preferring instead to continue its program of seminars aimed at improving managerial skills. Eight such seminars were held in 1984 and an additional four were scheduled for 1985.

The *Ottumwa Courier* in Iowa converted from afternoon to morning publication, and after six months, circulation has risen above preconversion levels, says the company. Ad linage is up as well.

Hopes are high on a new monthly tabloid, *Western Business*, published by Unicorn Communications, a subsidiary of Lee's *Gazette* of Billings, Mont. With a 26,000 circulation, the business publication reaches subscribers in Montana, Wyoming and the western portions of North and South Dakota. Ad revenue is running 77% above the early forecasts made in January when it started up.

Lee is attempting to save its Call-It Co. business, developed at the time of the AT&T divestiture. Call-It Co. was designed to provide information—from sports scores to weather to Bible readings—to phone callers who are charged for each call through their regular phone bill. Lee had entered the business through a joint venture with Audichron Co., Atlanta, but scuttled that venture in 1984 to move its Call-It Co. in another direction—to use the service to sell information. Under the system, a user (anyone with a telephone) calls a published number for sports scores, weather reports, humorous quips, or Bible readings and quizzes.

The broadcasting group's performance in 1984 was not as strong as that of the newspapers. Broadcasting revenues were up 6.6% to $48.5 million, equal to 20.5% of total revenue in 1984, down from 22.5% in 1983 and 26% in 1982.

Increased competition from independent stations in the markets served by Lee's tv properties, along with weak advertising demand, led to the minimal revenue gains. Higher operating costs associated with KOIN-TV's move to new broadcast facilities in Portland, Ore., coupled with costs related to programing improvements, contributed to reduced operating income in 1984.

NAPP Systems (USA), a joint venture of Lee and Nippon Paint Co. Ltd., Osaka, Japan, has enabled the company's properties to remain on the leading edge of graphic arts technology in the newspaper industry. After the successful 1983 introduction of NAPPPlate IV, also known as the "blueplate," the company is setting its sights on controlled market testing of NAPP-LIGHT, a silverless film. The Plate IV enables a company to adapt its letterpress equipment to offset printing without converting the present equipment.

Lee, NAPP and Nippon Paint continue to explore the opportunities created by flexographic printing, a process that enables newspapers to equal or better offset quality without converting to offset presses.

The *Quad City Times*, Davenport, Ia., started the company's first public access videotex system called Video Times in a Davenport shopping mall. Shoppers can use the touch-screen terminals to call up sale information and other data from more than 1,500 pages of information. The service, begun in December, 1984, is 100% advertiser-supported.

Last year, LIN Broadcasting Corp., the nation's 75th largest media company, continued to show its stuff as an aggressive, acquisition-minded company with a venturesome investment strategy.

The company acquired two tv stations in 1984, bringing its total to seven, and strengthened its bid for shares of licenses to operate cellular telephone systems in five major markets, including the largest two in the U.S.

Media revenues increased last year an impressive 40%, leaping to $142.8 million. Most of that—$106.3 million—came from the tv stations.The 10 radio stations contributed $22.5 million in revenues. Total revenues were $148.8 million, up 38.7% from the previous year. The only nonmedia activity at LIN is radio paging, accounting for $6 million in revenue in 1984.

The LIN array of properties also includes radio paging service in New York and the Houston-Galveston area of Texas, as well as a string of hardcover magazines distributed to guests in hotels in 31 cities.

LIN cashed in on its 5.1% interest in New Yorker Magazine Inc. for a net profit of about $1.5 million when the magazine publisher voted to approve a buyout offer of $142.4 million made by S.I. Newhouse Jr. of Advance Publications.

According to president Donald A. Pels, 1984 was the 10th successive year of record earnings for LIN, whose profits registered a 24% increase to $29.1 million.

Members of the board

The board of directors at Blade Communications is a family affair, as power in vested in directors: Paul Block Jr. and William Block, both co-chairman; William Block Jr., John Block, Allan Block and Donald Block. Three non-Blocks serve on the board. Needless to say, the company is private.

Profits and ratings for LIN's tv properties generally were ahead of the rest of the industry, Mr. Pels says. But it was in tv that the company experienced its "two disappointments" for the year, he says. Over-all industry growth and initial results of new tv stations in Indianapolis and Fort Wayne were not what the company had hoped for. WISH-TV (Indianapolis) and WANE-TV (Fort Wayne), both CBS affiliates, were purchased in April, 1984, from A.H. Belo Corp. for a combined price of $104.9 million. Both "have come off the mark rather slowly," Mr. Pels says.

Besides the Indiana stations, LIN owns two tv stations in Texas and one each in Michigan, Virginia and Illinois.

LIN owns paired am and fm stations in Philadelphia, Houston, St. Louis, Milwaukee, Wis., and Rochester, N.Y., broadcasting in a variety of formats, from country music and urban contemporary to "oldies" music and news-talk. The radio stations showed a combined increase of 26% in profits, according to Mr. Pels. Reflecting a general trend, the company's five fm stations pulled in 70% of LIN's total radio revenues. That's up from 66% in 1983. The company has five am stations as well.

But LIN's most speculative venture has been in the cellular telephone field, where the wireline telephone companies have a built-in advantage, at least in the major markets. Most of the non-wireline entrants have been stalled by legal imbroglios because so many are competing for FCC-awarded licenses. That has left the field wide open for the wireline companies, the divested Bell affiliates.

In New York, for example, LIN has a 45% interest in the nonwireline Cellular Telephone Co. of New York, which has gotten FCC approval. But NYNEX Mobile, which already is operating a cellular system in the New York area, is at least a year ahead of its nonwireline competitor because other applicants have challenged the FCC ruling.

But LIN is counting on being able to attract customers with more up-to-date equipment by the time its system becomes operative.

LIN has filed, as a partner in a variety of joint ventures, for cellular licenses in New York, Los Angeles, Philadelphia, Dallas-Fort Worth and Houston. The first three of those five applications—in three out of the top four cellular markets—all face legal challenges from competitors.

But LIN spokesmen remain confident that the company's investment, expected to reach $25 million this year, will pay off. "At a very modest cost relative to other nonwireline entrants," Mr. Pels says, "LIN is now the second largest factor in this new business and the only carrier to have significant interests in the two largest markets [New York and Los Angeles]." Analysts have predicted that the cellular telephone field will generate anywhere from $2 billion to $6 billion in annual revenues by 1990.

LIN Broadcasting has been cited by some analysts and brokers as a possible target for an unfriendly takeover bid. Michael Plouf, vp-corporate development and treasurer, says there is little concern at LIN for such a prospect. "We don't think LIN is typical of the companies that have been subjected to unfriendly takeovers," he says. "We have a high price-earnings ratio, for one thing. And our management is not vulnerable to the criticism that they're not living up to expectations."

Maclean Hunter Communications

Toronto

RANK 43

($ figures = 000,000)

Corporate returns	1984	1983	% chg
Media sales	270	115	135.0
Total sales	704	518	35.9
Net income	49	48	3.2
Sales per medium			
Newspaper	151	15	903
Magazine	50	40	25.5
Broadcast	0	0	0
Cable	70	60	15.8

Maclean Hunter Communications, Toronto, the 43rd largest media company in the U.S., had revenues from U.S. media operations during 1984 of $270.2 million, a 135% increase primarily due to a full-year's inclusion of the *Houston Post* purchased in December, 1983.

Total corporate revenues from U.S., Canadian and British properties jumped 42% in 1984 to $704 million. (Over-all revenue figures in U.S. dollars in this profile are based on the average annual rate of exchange for 1984 of C$1=US $0.78).

U.S. media contributions at Maclean Hunter include cable tv contributions of $69.5 million, up 15.8% from 1983; periodicals that generated more than $50.2 million, up 25.5%, and $150.5 million in revenues from the *Houston Post*, which is owned by the Toronto Sun Publishing Corp., of which Maclean Hunter owns 51%. Maclean Hunter, however, consolidated the full amount into its financial report.

Efficiency measures established during 1984 are credited with increasing *Post* revenues from 1983's $140 million. Some 250 staff positions were trimmed from the production and circulation departments, and "circulation waste" was also cut out, says Donald Hunt, *Post* publisher and exec vp, Toronto Sun Publishing Corp. Further savings were achieved by consolidating all printing in one location from the previous two. While those reductions were occurring, editorial staff was increased by 10%, Mr. Hunt says. "We eliminated $8 million in newsprint costs alone and knocked off about $12 million in costs altogether," Mr. Hunt said.

The *Houston Post* has shown a stable daily circulation of 326,556, and 376,015 for Sunday, according to the reporting period of Sept. 30, 1984, the last available data by ABC on the *Post*. This places it some distance off the pace of market leader, the *Houston Chronicle*. As of March 31, 1985, ABC six-month averages show the Monday through Friday circulation of the *Chronicle* increased 1.4% to 433,380 compared to the same period a year earlier; Sunday paper increased 1.1% to 536,585.

Mr. Hunt expects circulation gains at the *Post* to come about when Houston bounces back from its current economic doldrums.

In periodicals, where Maclean Hunter publishes 157 consumer and business magazines—118 in Canada, 22 in the U.S. and 17 in Britian—revenues were up 18% in 1984. The company canceled plans to increase the frequency of the *Financial Post* from weekly to daily because of competition. It also ceased publication of *Program Guide*, a monthly listings magazine for cable tv because of dissatisfaction with the results, according to Harvey T.M. Botting, Maclean Hunter assistant vp.

Last July, publication of *Western Fisheries* was stopped and the magazine was folded into a new publication, *Pacific Fishing*, which Maclean Hunter acquired last September.

Also acquired last year was *Physician's Management Manuals*, a non-client, doctor's life-style magazine.

Another business magazine, Building Renovation, published twice a month, was started in September, 1984, as well as *Selected Software*, a spinoff from *Canadian Directory of Software*, an existing Maclean Hunter publication. All three are circulated in the U.S.

In the past year, *C-Store Business* was discontinued, but Maclean Hunter recently acquired Supermarket Insight, a videocassette service for supermarket managers. The service is an extension of the magazine *Progressive Grocer*.

In printing, a new 32-page web offset press has been installed in Toronto. It will provide extra capacity and allow the company to expand its job printing operations, Mr. Botting says.

Cable tv produced a 4% growth in subscribers to 615,000 in the U.S. and Canada in a total of seven systems. During the year, Ontario's cable operations grew by some 12,500 to 372,000 subscribers, spurred by new housing starts.

Maclean now operates five Michigan cable systems in fifteen franchised communities, but subscribership dipped somewhat because of the sale in June, 1984, of Bedford Cablevision Inc. to a Rancho San Diego, Cal., company for about $3.5 million.

Maclean Hunter still has a building and operating agreement with Barden Cablevision of Detroit, but negotiations between Barden and the Detroit city council are bogged down.

In New Jersey, Suburban Cablevision had an excellent year in 1984, with subscribership up to the approximate present number of 175,000 from 163,000 in 1984. It also introduced three new services to customers: Disney Channel, Cinemax and Playboy Channel. Maclean Hunter has attained 80% penetration in its Canadian cable market and 50% in its U.S. markets according to Mr. Botting.

The broadcast division, consisting of 11 radio outlets and two tv stations, all of them Canadian, generated about $52 million last year, up slightly from $51 million in 1983.

Maclean Hunter also owns the non-media operations of Transkrit, a U.S.-based business forms company that generates about $30 million a year, along with industrial trade shows, radio paging and book distribution.

In management appointments, J. Robert Furse was appointed vp-finance and chief financial officer, while Wayne Hill was named vp-controller.

Macromedia Inc., the holding company that owns the Bergen Record Corp. and Gateway Communications, had media revenues of $108.5 million in 1984, up 12.4% from the previous year to rank as the 91st largest media company.

The Hackensack, N.J.-based company had earnings of $9.9 million for 1984, based on revenues of $109.2 million.

Macromedia was created as a holding company Jan. 1, 1984, to establish separation between the company's newspaper and tv operations. The company remains privately held by Malcolm A. Borg and his family trusts.

For the year, newspaper operations for the *Record* produced revenues of $86.2 million, up nearly $11 million from 1983. Tv generated $22.3 million in revenue in 1984.

The *Record*, the largest evening newspaper in New Jersey, spent more than $10 million on modernization in 1984, adding to the $62 million spent on expanding the paper's color and insert-handling capacity during the previous two years.

In only its second full year with four-color capacity, the *Record* carried 4.7 million lines of color advertising. It was ranked first among the nation's newspapers for Sunday color advertising and rose to fourth from eighth among evening and Sunday newspapers for color advertising, as measured by Media Records.

The *Record's* over-all ad revenue in-

More selling opportunities for Less than you'd expect.

The Journal of Accountancy's 270,000 paid subscribers can dramatically improve your bottom line... without bending your budget out of shape.

In the public sector, their product/service decision-making clout is demonstrated by the fact that 93% of our subscribers are owners, partners, or principals. What's more, they have enormous product/service influence over their clients, who number 100-200 each. How's that for multiplying your selling opportunities. With no additional advertising investment.

In the private sector, 65% of the Journal's subscribers have product/service selection clout to go with their CEO/top management titles.

All this fire power for less than you'd expect. The Journal has by far the lowest CPM in the accounting field. Without the astronomical page rates of the general business publications.

So, why not call Dick Flynn today at (212) 575-6286.

Journal of Accountancy

"Send for Readership Profile"

creased 15.8% from 1983. The newspaper carried 8.5% more advertising linage and 12.1% more insert advertising.

The *Record* is aggressive in its sales pitch to advertisers. It boasts in promotional material that it "reaches the second highest median household income in America," in a market that "accounts for 21% of the retail sales in all of New Jersey."

Yet, the *Record's* circulation, both daily and Sunday, remained flat for 1984, and continuing into 1985, especially the Sunday product. Sunday circulation was 225,520, according to Audit Bureau of Circulations figures for March 31, 1985, a slight increase of 0.8% from the comparable figure in 1983.

Average daily circulation for the same period increased 2.2% to 156,954.

The paper has launched a program to expand its circulation by reaching into neighboring Passaic and Morris counties. The *Record* expanded its facilities in Wayne, N.J., and opened a Passaic/Morris headquarters in September. The newspaper has become the largest selling newspaper in Passaic County, with 35,577 circulation, according to the company's spokeswoman.

"We anticipate much success in this area over the next few years and look forward to moving closer to our goal of becoming the dominant paper in Passaic and Morris counties," says Frank Savino, vp-marketing for the *Record.*

Editorially, the newspaper received first-place awards from the New Jersey Press Assn. for editorial comment, enterprise, business writing, general typography, and the content and layout of the front page, editorial section and sports section.

Macromedia's Gateway Communications division, based in Cherry Hill, N.J., operating four vhf tv stations, had a 7% increase from 1983 revenues of $20.8 million.

The company's CBS affiliates are located in Binghamton, N.Y., the nation's 133rd largest market (according to the Areas of Dominant Influence established by Arbitron Ratings Co.); Lancaster/Lebanon, Pa., the 46th market, and Johnstown/Altoona, Pa., the 49th market. It also operates an ABC affiliate in Charleston/Huntington, W.Va., the 44th market.

No tv purchases are planned by Macromedia, according to Michael H. Heath, president. However, the company has a continuing interest in acquiring other tv properties, he says.

McCall Publishing Co., the 93rd largest media company, found the market a tough sell in 1984 in increasing ad sales by 18.5% for the company's flagship.

According to Advertising Age estimates, media revenues in 1984 were $106 million on a net basis, up 17.8% from the estimate in 1983. Privately held McCall's total media has been netted for comparable treatment with publicly held companies. The treatment, not applied in 1983's estimates, caused 1983 to be restated.

McCall's estimated gross revenues were $142.8 million, up from $127 million in 1984, according to exec vp Andrew Dempsey, who terms the netting of McCall's figures as "ludicrous." The difference between net and gross essentially is that net is the elimination of agency commission and ad discount rates from the Publisher's Information Bureau advertising estimates, and the factoring out of circulation procurement costs.

The managers of the company, owned by the Pritzker family of Chicago, sound a little tentative when they talk about just having completed "a good year . . . but we're looking forward to better in 1985." One executive acknowledges off the record that 1984 was "difficult. The economic climate wasn't as bullish as we had hoped, but we came out of it well."

A $2.5 million ad campaign in 1984 for *McCall's* circulation could not stem a drop in total circulation to 6.2 million, a September, 1984, figure off about 43,000 subs from the prior year, according to ABC audited statements. The drop was "insignificant," according to Mr. Dempsey, and did not affect the magazine's status as the nation's eighth largest magazine.

The ad campaign, designed by Levine, Huntley, Schmidt & Beaver, emphasized the appeal of *McCall's* to modern, upscale, with-it readers. Print, tv and outdoor ads portrayed rock singers Tina Turner, Carly Simon, Cher and designer Diane von Furstenburg as *McCall's* readers. Ms. Turner was depicted as "one of the drab homebodies who reads *McCall's,*" while Cher was "one of the typical mothers."

Harold Levine, chairman of the ad agency, says the approach, which continues into 1985, seeks to break through "the clutter, the sameness" of media advertising, while getting media planners to perceive that the magazine is "talking directly to the baby-boom generation, talking in a language they understand."

It's all part of a new strategy to carve out for the magazine an identity separate from other women's magazines, editor Robert Stein says. The magazine wants agency media planners to understand that "*McCall's* isn't the type of magazine their mothers used to read," he says.

"Part of the problem is that all of the women's magazines are seen as the same," he says. He objects to the term "Seven Sisters," for the traditional women's magazines, as a "phrase which belongs to another era." *McCall's,* he says, "has more quality, goes deeper into subjects, is more useful to the reader, makes them think more" than other women's magazines.

And it's more clairvoyant, the magazine could have claimed last spring. The March issue of *McCall's,* with a cover story on Princess Diana's expected second pregnancy, appeared the day after Buckingham Palace announced the occurrence. That issue was one of the year's most successful, not only in terms of circulation but also for the amount of media attention it attracted, Mr. Stein says.

The company's other publications showed significant circulation increases in 1984. *Working Mother,* for example, showed a 7.3% increase to 519,979, according to the company, while *Working Mother Digest,* a special edition distributed by Kinder-Care Learning Centers, was handed out to more than 400,000 people. The company's annual special interest publications, *Cooking School* and *Beauty, Diet & Health Guide,* accounted for a distribution of 950,000 between them.

McCall Publishing continues to hold a 50% interest in American Family Publishers and 33⅓% in Select Magazines, which last year lost a major contract for domestic distribution of *Newsweek* to Triangle Publishing. The reported merger last September of Select Magazines with Warner publisher "ultimately fell through," according to Mr. Dempsey. The company continues to be beset by industry rumor—all of these denied vehemently—that the Pritzker's are seeking a buyer for *McCall's.* This includes the report two months ago by *New York Daily News'* columnist Liz Smith that *National Enquirer's* owner Gene Pope would buy the women's magazine for $75 million.

The Pritzker's, a family of lawyers with controlling interest in the Hyatt Corp. and Braniff Airlines, leave the running of their magazines largely in the hands of McCall managers and editors, said Mr. Stein. The principles in this family include Jay Pritzker, the financial wizard of the family, and brother Robert, who manages most of the Pritzker company. Their father, A.N. Pritzker, also continues to be active in family business affairs, though McCall Publishing managers usually deal directly with chairman Allen Turner, said Mr. Stein.

Cable	13	11	18.2

McClatchy Newspapers, Sacramento, Cal., is the nation's 47th largest media company, with 1984 revenues estimated by Advertising Age at $255 million, all from media operations.

McClatchy's media revenues, generated by seven daily newspapers, three weeklies, four radio stations and four cable systems, were up 18.6% from 1983's estimate. Newspapers represent about 85% of this family-owned business.

Circulation at the *Anchorage Daily News* is "growing at a very strong clip," corporate vp Edwin Potts says. McClatchy bought an 80% interest in the morning daily in 1979, when its circulation was 12,000. According to the ABC report of Sept. 30, 1984—the latest available—the *Daily News* stands at 48,077 during the week and 56,456 on Sunday. The competing *Anchorage Times* had a circulation of 43,121 daily and 51,965 Sunday in the same period.

Mr. Potts says the *Daily News* has captured 51% of the retail advertising market, with classified ad share at 54.6% as of March, 1985. A sign of the paper's condition is a $25 million-plus building project that is scheduled to start "as soon as the snow melts," Mr. Potts says.

McClatchy is best known for its ownership of the *Sacramento Bee, Fresno Bee* and *Modesto Bee.* Each daily has shown small gains during the past year. The Sacramento Bee, the only one of the three in a competitive market, has also shown circulation increases. Daily circulation for the six months ended March 31, 1985, was 230,160, up 2.6% from the corresponding period in 1984, according to the ABC. Sunday circulation for the same periods rose 1.8% to 263,763.

These figures far surpass those of the competing *Sacramento Union* (102,317 daily and 101,182 Sunday, according to the March 31, 1985, ABC report). Part of the *Sacramento Bee's* circulation come-on has been a Wingo (lucky numbers) game.

The *Bee* in 1984 got a new executive editor, Gregory Favre, a former *Chicago Sun-Times* managing editor. Mr. Potts says the paper has added some sections, expanded its business coverage and is using more color. He says the paper has an advertising share of close to 70% in both retail and classified areas.

At the *Gilroy Dispatch,* a five-day-a-week paper serving the southern end of Silicon Valley, "things are looking better . . . the market is stronger than a year ago," says Mr. Potts. According to the Sept. 30, 1984, ABC report, circulation is 9,879.

The *Tri-City Herald,* based in Richland, Wash., has eased the rate of its circulation decline, with a drop to 33,746 for the six months ended March 31, 1985, according to the ABC, from 34,859 in the similar period in 1984. Sunday circulation also dropped from 37,391 to 36,411.

During the past two years, a new electronic communication division has brought major changes to McClatchy. Headed since January, 1984, by Frank Washington (formerly vp-general manager for Videotex America, Times Mirror Co., Los Angeles), this division oversees McClatchy's ventures in radio, cable and videotex.

LegiTech, a computerized service for tracking state legislation and political contributions, acquired in 1982, is sold for a fee to magazines, newspapers, government agencies and lobbyists in California, New York and Washington (added in March, 1985). Mr. Washington says the service is doing "fairly well" despite competition.

One of two videotex projects launched in 1984, Eldorado Teleguide is an advertiser-supported public access operation based on the software technology provided by Infomat of Toronto.

During the past year, McClatchy has installed more than 60 new terminals with 3,200 pages of information on restaurants, hotels, local events and other subjects in the Sacramento, Reno and Lake Tahoe areas, bringing the number of terminals in operation to about 100.

The other videotex project is Grass Roots California, a partnership with Times Mirror Co. and the *Bakersfield Californian.* Centered in the San Joaquin Valley, the system offers weather, commodity and farm management information to the agricultural community.

McClatchy's cellular radio project, a joint venture with FMI, Miami, and Cellular Communications, New York, is still not off the ground. Mr. Washington says McClatchy has "pieces of construction permits" in Fresno and Oxnard, Cal., and is exploring other opportunities in this burgeoning field.

The Fresno country music station KNAX (fm) has jumped from a 2.3 to a 5.6 rating during the past year, while news/talk station KMJ (am), Fresno, moved up one point to remain the primary station in its category.

"We don't have a competitor in news/talk," Mr. Washington says. In Sacramento, news/talk station KFBK (am) is also No. 1 in its field, as is country music station KAER (fm).

Mr. Washington says McClatchy is taking some new approaches to cable tv, "particularly in the marketing but also in the operations area." Using research to target its audience is also part of the new effort, as is "looking at pricing sensitivity . . . what the threshold of pain for our subscribers is."

Modest gains have been the rule for the subscriber bases at each of four systems. Norcal Cablevision has 2[illegible],107 subscribers (nearly unchanged from last year), Fresno Cable TV Ltd. rose slightly to 44,105 from 42,500 subscribers, Sequoia Cablevision moved up slightly to 10,585 subscribers from 9,400 in the Tulare area, and Telcab Communications serves 3,741 subscribers in the Reno, Nev., area, up slightly from 3,400 last year.

McGraw-Hill, New York, is the 14th largest media company in 1984 with media revenues of $963.7 billion, up 9.7% from the prior year.

Media contribution to total revenues increased from 67.9% in 1983 to 68.8% in 1984 on total revenues of $1,402 billion, up 8.3% from the previous year.

McGraw-Hill Book Co., representing $438.1 million in revenues, is the only nonmedia contribution to McGraw-Hill's total revenues.

In 1984, McGraw-Hill began an acquisition hunt that led to the acquisition of six companies, while reorganizing McGraw-Hill.

As part of the corporate realignment, McGraw-Hill reduced the number of operating companies from six to five by creating the McGraw-Hill Financial & Economic Information Co. to include Standard & Poor's Corp., Data Resources and Monchik-Weber Corp.

Advertising Age considers as media the McGraw-Hill Information Systems Co. (F.W. Dodge and Sweet's divisions including four magazines and two newsletters), with sales of $340.2 million, up 2.2% from the prior year; McGraw-Hill Publications Co. (60 magazines, newsletters and newswire service including *Business Week*), with sales of $331.5 million, up 11.7% from 1983.

McGraw-Hill Broadcasting Co. (four tv stations in major markets) had revenues of $81.9 million, up 14.4%; and McGraw-Hill Financial & Economic Information Co. had revenues of $210.1 million, up 18.2%.

Last year's acquisitions were integrated into three of McGraw-Hill's operating companies.

The company's major acquisition of which was Monchik-Weber Corp., a provider of computer and information products for the financial services industry. It was purchased for $56 million.

Two other acquisitions—Center for Communications Management, which provides rate data and other information on telecommunications services, and Future Computing, supplying marketing data and analyses on the personal computer industry—were merged into the McGraw-Hill Information Systems Co.

This June, McGraw-Hill made its first major venture into the cable industry by linking up with Tele-Communications Inc. and Telecrafter Corp. to form X-Press Information Services. In the partnership, McGraw-Hill will provide the news and information service to be delivered to computers over cable tv wires, and manage and produce the editorial content of the system.

Within McGraw-Hill Publications Co., *Business Week* led all U.S. magazines in ad pages in 1984 with 4,972, up 7.1%, and ranked sixth among all U.S. magazines in ad revenue with $184.8 million, up 18.3%.

In August, *Business Week's* Lewis Young, who guided the magazine for 15 years, resigned as editor-in-chief. Executive editor Stephen Shepard was named to succeed Mr. Young.

Within the publications company, *Aviation Week & Space Technology, Chemical Engineering* and *Textile World* produced their first Chinese editions, produced in conjunction with China Consultants International.

Also, Aviation Week's 1984 special issue on the commercialization of outer space and *Graduating Engineer's* special issue on computer careers were introduced as new publications.

At the same time, Nikkei-McGraw-Hill, McGraw-Hill's joint venture partner in Japan, introduced Nikkei BYTE, Nikkei Venture and *Nikkei Datapro Personal Computers.*

McGraw-Hill's four tv stations had an increase in operating profits of 17.9% on improved revenues of 14.5% as revenue from local and national time sales grew 15% each.

The Olympics boosted sales at the company's ABC affiliates in Indianapolis and San Diego. Its other two stations are CBS affiliate, KMGH, Denver, and NBC affiliate, KERO, Bakersfield, the latter of which linked up last December with McGraw-Hill's *Aviation Week & Space Technology* to produce and air a pilot, "Wings," to be run on the three other stations in 1985.

Media General

Richmond, Va.

($ figures = 000,000)

Corporate returns	1984	1983	% chg
Media sales	305	315	-3.1
Total sales	548	508	7.9
Net income	40	36	10.7
Sales per medium			
Newspaper	241	209	15.6
Magazine	22	20	8.0
Broadcast	35	51	-31.6
Cable	7	5	40.0

Media General, Richmond, Va., the 35th largest media company in the U.S., had 1984 media revenues estimated by Advertising Age of $305 million in 1984, up 7.9% from the prior year.

Total revenues increased 7.9% to $507.8 million in 1984, and net income increased 10.7% to $39.8 million.

Of the 1984 media revenues, newspapers accounted for $241.4 million, up 15.6% from 1983. Revenues from magazines increased 8% to $21.6 million, and cable operations had revenues of $7 million, up 40%.

But revenue from Media General's broadcasting operations dropped from $51.2 million to $35 million, primarily because of a continued decline at Media General Broadcast Services, the former William B. Tanner Co. of Memphis, which Media General purchased in 1982.

For the purposes of this analysis, Ad Age figures do not include ad placement revenues from Media General Broadcasting Services.

In its profitable newspaper division, revenues increased 15.6% in 1984. Media General merged its evening Winston-Salem, N.C., *Sentinel* and morning *Journal.*

The all-day *Sentinel* had a daily circulation of 105,428, down 1.4%, and Sunday circulation of 98,509, up just under 1%, according to ABC audits for the six-month period ending March 31, 1985.

In Tampa, Fla., the *Tribune* showed a 19.8% gain in ad revenues in 1984, with profits rising 29.5% in what Media General officials called a market area of "explosive growth." The *Tribune*, according to ABC audited statements ending March, 1985, had daily circulation of 225,748, up 9.1%, and Sunday circulation of 297,802, up 5.5%.

Printing presses at all three daily newspaper groups—the Richmond, Va., papers are the third—are being converted from letterpress to offset, and the paper's width has been reduced to 55 ins. from 58 or 59 ins., conforming to industry standards and saving an estimated $2.3 million in newsprint costs annually.

In all three markets, Media General initiated a total market coverage (tmc) program, enabling advertisers to place preprinted ads in the newspaper while the ads are distributed concurrently by mail to nonsubscribers.

Media General reported an over-all revenue increase of 22% in 1984 in its three tv stations in Tampa and Jacksonville, Fla., and Charleston, S.C. A proposed $25 million sale of WJKS-TV in Jacksonville fell through. The would-be buyer, Macromedia's Gateway Communications, could not conclude a deal with the local vhf public broadcasting channel to switch frequencies with WJKS, a uhf station. Subsequently, NBC renewed the station's affiliation for two years.

Cable revenues increased, but heavy costs related to major capital outlays at Media General's Fairfax County, Va., cable system and reduced sales by Media General Broadcast Services, produced a loss in operating profit of $3.7 million, down from a gain of $10.8 million the previous year. The Fairfax system began operating late in 1983.

Some 1,500 miles of cable wiring remain to be installed in the 2,800-mile system.

Media General's cable operations date to 1968 when it purchased a system in Fredericksburg, Va. Other systems include Hillsborough and Pinellas counties in Florida. The company during 1984 dropped NewsScan, an experimental service providing news and ads to the local cable company in Winston-Salem.

The $185 million, 126-channel Fairfax cable system, now serves some 58,000 customers, with 137,000 expected upon completion in 1986. Media General says 60% of the homes passed to date have signed on, paying an average of $28 monthly, in the top 2% of cable networks. When completed, the system should generate revenues of $50 million a year, Media General says.

Thomas E. Waldrop, a divisional operating officer at Media General, was named chairman-ceo of Fairfax Cable.

Media General Broadcast Services, the media-buying arm of Media General, continues to restructure its organization after two years of substantial losses and a continuing federal investigation of its former owner, William B. Tanner. Various lawsuits involving the sale and alleged improprieties remain to be settled in federal and state courts.

To strengthen MGBS' image, Media General has installed a new management team, embarked on a $1 million ad program, and moved its media buying and sales operations to a new 23,000-sq.-ft. building in New York. MGBS plans a fall introduction of a 26-week syndicated late-night show, "Comedy Tonight," in an attempt to capitalize on the $500-million-a-year tv syndication market.

MGBS had 1984 revenues of $55.8 million, down 18% from 1983, but officials say they remain confident the operation can be turned around through new ventures such as tv syndication.

Personnel changes at Media General in 1984 saw James S. Evans, formerly president-chief operating officer, replace Alan S. Donnahoe, who retired as ceo while continuing as vice-chairman and director. J. Stewart Bryan III, publisher of Richmond Newspapers, was elected vice-chairman this January.

Cable	4	3	59.3

Expansion in the tv station market during 1984 and 1985 will continue to build media revenues at Des Moines-based Meredith Corp., which recorded $327.2 million in media revenues in fiscal 1984, up 13.3% from 1983, ranking the company the 33rd largest U.S. media company.

Meredith's performance in media far exceeded the company's over-all revenue performance that edged up only 0.6% to $450.6 million during fiscal 1984. Net income of $38.4 million was up 15% from the previous year. Current figures for Meredith are based on the fiscal year ended June 30, 1984.

Meredith, in the three-quarter period ending March 31 of its current fiscal year, showed much improved sales compared with those of the previous year. Year-to-date revenues of $354.6 million were up 6.2%, and net earnings of $33.4 million were up 20.5%.

During fiscal 1984, the company's magazine properties had $210 million in revenues, followed by broadcast at $103.8 million, and minor contributions of an estimated $4.3 million from cable, up 59.3%, and $9 million from newspapers, the same as in 1983.

Broadcast, up 17.3%, showed the greatest growth among the Meredith media lineup. The company owns and operates seven tv stations, of which three are uhf and four are vhf, but that will change soon. Crossing the former 7-7-7 rule barrier for the first time, Meredith expects to add a fifth vhf station soon—KVVU-TV, Las Vegas, owned by Carson Broadcasting Corp. Tv personality Johnny Carson has a 30% interest in the company, which reportedly is seeking $30 million in the sale. Had the FCC not relaxed the ownership rule, Meredith had been prepared to dispose of one of its tv stations to gain the Carson property.

Meredith, which last year acquired NBC affiliate KSEE-TV of Fresno, Cal., and WOFL-TV, an independent uhf station in Orlando, says the over-all increase in broadcasting revenues and profits can be attributed to their performance.

While the company continues to emphasize its commitment to tv, it is bowing out of radio—a process begun in 1983 with the divestiture of its Kansas City, Kan., and Omaha, Neb., radio stations. This April, Meredith reached an agreement to sell its remaining properties—all located in Georgia—to a subsidiary of Cincinnati-based Jacor Communications for $20 million.

The radio units are paced by WPCH-FM, Atlanta, the regional market leader in the easy listening category. Other properties include WGST-AM, Atlanta, and Georgia Radio News Service.

Saddled with construction costs and general cost increases, Meredith's cable holdings increased their losses over the previous year despite higher revenues. Construction is completed on the two systems the company owns in part, and plans include augmenting subscriber rolls to improve the picture.

Last October, Meredith increased its 50% stake in Planned Cable Systems Corp. of Fort Lauderdale, Fla., to 67%. Planned Cable carries programing to 2,950 subscribers. In addition, Meredith owns 81% of Texas-based Star CATV Investment Corp., a cable system that serves 33,449 subscribers in Texas, Louisiana and Arkansas.

Meredith's publishing division, consisting of six major magazines, 17 *Better Homes and Gardens* special interest publication titles and 22 community newspapers in California, had its most profitable year in 1984.

Last September, the publishing group's vp, editor-in-chief Neil Kuehl, became vp-product development, lending support to Meredith's continued search for new magazine opportunities.

All Meredith publications recorded higher ad revenues, while *Better Homes and Gardens* and *Successful Farming* also posted record earnings. *Better Homes and Gardens*, which reaches 8 million subscribers, increased ad rates 7.25% in March.

Metropolitan Home, which also experienced a strong increase in ad pages and revenues, continued on a profitable course, which began in March, 1984, when the publication presented the themed issue "Elements of Style." The March blockbuster ran 163 ad pages, compared with 67.3 pages the previous year. This success has led publisher Stephen Burzon to schedule seven themed issues for 1985, compared with two in 1984.

In other developments, Meredith butted heads with the FCC over the failure of its CBS affiliate in Syracuse, N.Y., WTVH-TV, to comply with the Fairness Doctrine. The FCC charged the station with failure to provide sufficient airtime for critics to respond to a paid advertisement by the Energy Assn. of New York that advocated the construction of a nuclear power plant. WTVH-TV has asked the FCC to reverse its decision and review its rights under the First Amendment because it was a paid advertisement.

For Metromedia Inc., the 28th largest media company, 1984 was the year it made a bold financial and corporate move that caused its departure from the tv broadcasting business.

The Secaucus, N.J.-based company, which went private in mid-1984 in a leveraged buyout, and then sold off its tv stations in mid-1985, earned its ranking on the basis of an estimated $430 million in media revenues turned in for 1984, up 12% from 1983.

Metromedia had total revenues of $646.1 million, up 21.3% from 1983.

As a result of the sale of its tv properties, Metromedia will glean its future media income from radio broadcasting and outdoor advertising. The company's nonmedia activities, including ownership of the Ice Capades and the Harlem Globetrotters, and cellular radio systems covering paging, beeping and conventional mobile radio services, have been retained.

The past 18 months have been epochal for Metromedia. Early in 1984, the company announced it was going private by buying its own common stock through a leveraged buyout. Metromedia borrowed $1.3 billion to pay for the stock. In a leveraged buyout, the company is confident of receiving the funds to pay the debts from ongoing or divested properties.

On June 20, 1984, the company formally went private, owned by a new operation called JWK Acquisition Corp. From then until the end of 1984, the company reported a net loss of more than $60 million, including $24.4 million in debts associated with going private. Also on the minus side for the second half of 1984, the company said interest payments totaled $129 million of which $71 million showed up in the red. (This was offset somewhat by operating income of slightly more than $57 million for the period.)

For the second half period of 1984, according to documents filed with the Securities & Exchange Commission, broadcasting contributed 60.2% of consolidated net revenues, and of the broadcasting amount, 83% was tv and 17% was radio. Telecommunications, covering primarily cellular radio, accounted for 22.3% of consolidated net revenue; outdoor advertising, 2.1%, and entertainment, 15.1%.

In May, 1985, Metromedia announced the sale of its seven tv stations in a deal estimated at $2 billion. Six of the stations—KRIV, Houston; KTTV, Los Angeles; WNEW, New York; WFLD, Chicago; WXIX, Cincinnati; WTTG, Washington—went to Twentieth Holdings Corp., a new company created by Rupert Murdoch and Denver oilman Marvin Davis, coowners of 20th Century-Fox Film Corp.

Twentieth Holdings then sold the remaining station, WCVB, Boston, to Hearst Corp. for $450 million. Metromedia had purchased the station in 1982 for $220 million.

Metromedia is planning to sell its Metromedia Producers Corp., maker of a number of first-run tv projects, to Robert Bennett, Metromedia's senior vp-broadcasting and programing.

Morris Communications Corp., Augusta, Ga., which took steps in mid-1985 to diversify into other media forms to complement its newspaper properties, was the 53rd largest media company with revenues estimated by ADVERTISING AGE at $218 million in 1984, all in media.

Revenues were up about 11% from 1983 at the tightly held company, a publisher of newspapers located in communities characterized by steady growth and diversified economies ranging from fisheries, timber, cotton, diversified farming and livestock, to seafood processing, chemicals, paint, furniture-making and shipbuilding, tourism, and textiles.

Morris struck an agreement in May, 1985, to buy Naegele Outdoor Advertising Cos., Minneapolis. Naegele has operations in 12 states and 25 cities, including Minneapolis; New Orleans; Indianapolis; Youngstown, O.; Palm Springs, Cal., and Memphis.

The acquisition could allow the Morris chain to network its advertising by offering more in its ad package. Richard Condon, current Naegele president, is expected to continue to run the company, one of the largest outdoor advertisers in the nation.

The biggest papers of the family enterprise headed by Robert Morris III are the two Jacksonville dailies, the every-morning *Florida Times-Union* and the evening *Jacksonville Journal*, published Monday through Friday. Combined circulation for the March 31, 1985, ABC-audited period was 204,029, off slightly from 205,707 in the year-earlier period, although the March figure in 1985 was up slightly from the final ABC-audited count for 1984 of 203,314. Jacksonville, with about 600,000 population, is northern Florida's major center of commerce, finance and industry.

Over-all, the Jacksonville dailies have increased steadily in the past eight years, rising 18.4% from 172,300 in 1977. Circulation of the Sunday *Times-Union* was up 1.2% to 218,919.

Morris picked up the Jacksonville papers in late 1982 from the transportation conglomerate, CSX Corp. for $211 million. The purchase also included two other papers, the daily *St. Augustine Record*, and the weekly *Putnam County Courier-Journal* out of Crescent City, Fla., south of Jacksonville.

The *Record* circulates about 11,400 papers in a town of 11,895. It has charted a 23% growth since 1977. The reason, according to a market analysis, is the general acceptance of the paper by the established retirement and working population of the community as the prime source of information about St. Augustine. Good color printing also is said to help among affluent retirees.

The weekly *Putnam County Courier-Journal* circulates about 2,000 paid and 5,800 free copies every Wednesday in a lakeside (Crescent Lake) town built on seafood packing, boat building, tool and die making, citrus processing and diversified farming. The company has one other small weekly, the *Hilton Head* (S.C.) *News*, with circulation of 7,100.

Near one of Morris' bigger markets, Athens, Ga., the company publishes three small-town papers: the *Hartwell* (Ga.) *Sun*, a weekly, circulating 4,800 paid copies; the *Elberton* (Ga.) *Star Beacon*, a twice weekly with 5,700 circulation, and the *Royston* (Ga.) *News*, a weekly with 1,400 copies.

Athens, a city of about 45,000 and a college town, has two dailies, both Morris papers, the morning weekday *News* and the evening *Banner-Herald*, a seven-day paper. Combined ABC audited circulation for both in the March 31, 1985, reporting period was 22,422, off 3% from the similar period in 1984. A Sunday total of 26,715 is even with 1984.

Augusta is an industrial city of about 50,000 population and a golfer's dream. Its two dailies are the Morris-published *Chronicle*, a Monday-Friday morning paper, and the *Herald*, a five-day evening publication. Combined, the papers circulated 79,414, up from 79,042 from the similar period in 1984. Sunday is up 2% to 85,221.

Savannah, Georgia's port of entry from the Atlantic, is the biggest of the three Georgia cities with Morris papers. The city, with population of 140,000, has two Morris dailies, the morning *News* and the evening *Press*, circulating 77,099 combined weekdays, down from 77,505 last year. Sunday's *News-Press* had 73,532 for the March reporting period, down 3%.

The two Texas cities with Morris dailies also are each two-newspaper towns with Morris-only products. Amarillo, an oil and agricultural center of 150,000 in the Texas Panhandle, is served by the morning *Daily News* and the evening *Globe-Times*, which circulated a combined 74,168, off 12% from 1984. The count for the Sunday *News-Globe* is now 78,547, up slightly from 1984.

Lubbock, with about 170,000 population, is the trading and wholesale center for the Texas South Plains. The *Avalanche-Journal* publishes seven mornings a week; the *Journal* is a five-day evening paper, and combined they reach 73,017, down 3% from 1984. Sunday's *Avalanche-Journal* is up slightly to 81,689.

Alaska's state capital of 20,000-plus, Juneau, has one daily newspaper, the *Empire*, published by Morris. Publisher's latest circulation statement in March, 1985, is 7,850, up 11.7% from the last publisher's sworn statement, October, 1983.

Morris also publishes *Quarter Horse News*, a twice-monthly tabloid newspaper that averages 124 pages an issue and now circulates about 8,000 copies. Along with its editorial coverage of quarter horse breeding and performing, the Fort Worth, Tex.-based paper is heavy with advertising and runs high-quality color. While it may not fit the newspaper mold of the company, the publication reflects the personal indulgence of Mr. Morris, a horse breeder.

Completing the Morris strategy of maximum coverage for its markets, the corporation operates four commercial printing plants in the immediate areas of its various newspapers. In Georgia are Hartwell Publications and Southeastern Publications; in Florida is St. John's Publications, and in Amarillo, Southwestern Publications. Each serves major retailers with process-color printing of inserts and supplements either to tip into the Morris papers in the market or to be used in Morris' total market coverage deliveries to nonnewspaper subscribers.

MTV Networks, New York, which currently operates MTV: Music Television and VH-1/Video Hits One, two cable music networks, and one children's cable network, Nickelodeon, is the country's 90th largest media company with revenues of $109.5 million in 1984, all in media.

MTV Networks, which became a public company in 1984 when a third of its stock was placed on the market after the company was purchased from Warner Amex Satellite Entertainment Co., more than doubled its operating revenues in 1984 and showed a profit for the first time.

The two music video operations had 1984 revenues of $72.9 million and operating income of $19.9 million, although prelaunch expenses for VH-1, which premiered Jan. 1, 1985, cut into operating income. Nickelodeon had revenues of $27.5 million and operating income of $3.9 million in 1984, compared with revenues of $16.7 million and an operating loss of $3.3 million in 1983. The company made nearly $9.1 million in revenues and $1.6 million in operating profit from other media-related operations.

The company's profitability continued in the first quarter of 1985, with net operating revenues of $30 million and net income of $2.7 billion, up 45.6% and 80.4%, respectively, from the first quarter of 1983.

MTV Networks was incorporated in February last year, but had no operations until July when it acquired the MTV: Music Television and Nickelodeon businesses from the entertainment unit of Warner Amex Cable Communications, itself a joint venture of Warner Communications and American Express Co.

MTV Networks paid $67.7 million and issued 5 million common and 5 million convertible preferred shares for the Warner Amex businesses. A public offering of 5.1 million MTV Networks common shares in August, 1984, netted $70.3 million, which was used to repay bank loans incurred to finance the cash portion of the deal.

A prospectus on MTV Networks filed with the SEC on June 15, 1984, showed that MTV: Music Television and Nickelodeon had together lost about $79 million from January, 1980, to the end of the first quarter of 1984, while parents Warner Communications and American Express pumped a total of about $108.3 million into their joint venture businesses.

By accepting the $67.7 million in cash and receiving 66.1% of the capital stock of MTV Networks, Warner Amex moved from a position of jointly owning 100% of a $108.3 million investment that had not been returning a profit to a position of jointly owning two-thirds of a $40.6 million investment that is beginning to show operating profits.

Recently, it has been reported that David Horowitz, president of MTV, and Boston Ventures Ltd. Partnership, which has engineered several leveraged buyouts of media companies, have made a bid for the two-thirds of MTV still in the hands of Warner Amex. The Warner half of Warner Amex, in particular, might be interested in cashing in on this investment to raise money to finance a leveraged buyout in taking itself private or to repurchase the 30% of its stock sold to Chris-Craft Industries last year as a friendly ploy to avert a hostile takeover from Rupert Murdoch.

The bulk of MTV Networks' revenues come from the sale of advertising time on its three networks, with additional revenues coming from monthly fees from its affiliated cable operators and from trademark licensing, international programing sales, as well as operational services provided to other cable tv programing networks.

MTV: Music Television, the 24-hour rock music network launched in August, 1981, aimed at the 12-to-34-year-old age group offers a mixture of rock music videos, music news and specials. According to A.C. Nielsen Co., the rock music network reached 25.4 million cable households at the end of 1984, up 38% from the end of 1983. Before 1983, MTV: Music Television derived its revenue almost entirely from ad sales.

License fees were introduced in 1983, and by the end of 1984 the company had renegotiated agreements to include a license fee with cable affiliates representing more than 80% of MTV: Music Television's subscribers.

Nickelodeon, launched in January, 1980, is currently the only cable network aimed specifically at children. According to Nielsen, Nickelodeon reached 24.2 million cable households at the end of 1984, up 37% from the end of 1983. Its programing is time specific, with particular dayparts geared to different age groups.

In early 1985, Nickelodeon initiated a second satellite feed to serve the West Coast and intends to expand to 24 hours from the current 13. Nickelodeon derived revenue primarily from license fees based on agreements with cable affiliates and other licensees carrying the service until late 1983 when it instituted ad sales.

The MTV Networks' second 24-hour video music service, VH-1/Video Hits One, premiered in 1985 with 3.4 million subscriber homes and 28 charter advertisers. It is designed to complement MTV: Music Television and is aimed at the 24-to-54-year-old audience. VH-1 is programed with a mix of established music styles, including contemporary music, soft rock, rhythm and blues and cross-over country.

The cable tv affiliates licensed to carry both MTV: Music Television and VH-1 generally receive the license for VH-1 at no additional charge.

Of the 19 principal basic cable programing services and superstations at the end of 1984, Nielsen ranked MTV: Music Television sixth and Nickelodeon seventh in number of subscribers.

MEDIA PROPERTIES
Broadcasting
MTV: Music Television, Nickelodeon, VH-1/Video Hits One. The company also makes fees from leasing excess transponder capacity, from providing access to the company's subscriber base to programers, and from providing network operations services, including program integration, playback of programing and transmission to satellites.

Multimedia Inc.

RANK 36

Greenville, S.C.

($ figures = 000,000)

Corporate returns	1984	1983	% chg

Newspaper	103	91	13.6
Magazine	0	0	0
Broadcast	135	126	7.6
Cable	66	53	24.2

With consolidated revenues for 1984 of $304.4 million, all from media, and earnings increases from all its media divisions, Multimedia Inc., turned in a strong performance for the year, making it the 36th largest U.S. media company.

The Greenville, S.C.-based company, whose revenues derive solely from media, saw an over-all revenue increase of 13% over 1983. The only weak spot was an $11 million loss on the regional cable network Sports Time, a joint venture with Anheuser-Busch and Tele-Communications Inc. After a year's trial, Sports Time ceased operations March 31, 1985.

"Cable viewers just weren't ready to see its value," says Walter E. Bartlett, Multimedia president-ceo. "There's no question in my mind that regional cable channels will make it. You just have to have awfully deep pockets and be willing to wait a long time."

Multimedia picked up its stride, though, and results from the first-quarter, ended March 31, 1985, show earnings of $7.6 million, a 9% increase over the same period in 1984. Revenues from broadcasting were up 14%; newspapers, 9%, and cable, 13%.

So attractive was the company's performance that management found itself fending off three takeover attempts after a bid to take the company private through a leveraged buyout in February failed.

The original offer by company management and members of the Peace, Jolley, Sisk and Furman families, who founded Multimedia in 1969, was for $37 a share cash and $25 principal amount of a new issue of subordinated discount debentures.

By mid-May, 1985, the company was offering $52.46 per share in cash or $125 in discount debentures (with a market value of $60) in a recapitalization plan that allowed stockholders the option of $47.19 in cash and 0.527 shares of the corporation.

The plan is for the new company to buy out shares of Multimedia and merge with Multimedia, according to Mr. Bartlett.

Earlier this year, the company turned down a billion-dollar offer of $60 per share from Wesray Inc., Morristown, N.J., the investment company headed by former Secretary of the Treasury William E. Simon. A $1.05 billion offer—$61 per share—from Lorimar Productions, Culver City, Cal., also was snubbed by Multimedia's founders and management.

An offer of more than $65 per share from Jack Kent Cooke, owner of the Washington Redskins, also was rejected. Mr. Cooke owns 9.7% of Multimedia stock. The founding families and management together hold 44% of the 16.7 million shares of company stock.

After the rejection of his offer, Mr. Cooke filed a preliminary injunction with the state court of South Carolina to halt Multimedia's recapitalization plan. The court has not ruled on the case.

Throughout the negotiations described by Mr. Bartlett as "absolutely hectic; I've never seen anything like it in my career," the company maintained it was not for sale.

"The founding families are adamant about wanting to keep the company intact," Mr. Bartlett said in an interview in mid-May.

He said the first-quarter results for all the company's media divisions "are running somewhat better than the rest of the broadcast industry."

He singled out Multimedia Entertainment, the production division of the company, as "doing exceptionally well." The division has a new president, Mike Weinblatt, formerly president-ceo of Showtime/The Movie Channel and the first president of NBC's entertainment division.

Now that Multimedia's flagship production, "Donahue," is settled into new quarters in New York after moving from Chicago in mid-1984, "We're looking for more areas of growth and expansion," Mr. Weinblatt says.

"Our newest major success," he says, "is the 'Sally Jessy Raphael Show,'" a syndicated talk show from KSDK-TV in St. Louis. Ms. Raphael is being touted as a female "Donahue" and her half-hour show was expanded from 26 to 53 markets during the first half of 1985. "By year's end, we hope to be in 75 to 80 markets," Mr. Weinblatt says.

Multimedia Entertainment is developing at least one game show, and possibly more, for syndication by the end of the summer, according to Mr. Weinblatt.

The company is "looking at additional programing during the early fringe and late-night time slots," Mr. Weinblatt says. A new vp-program development was named, Dick Miner, former executive producer of the "Donahue" show.

The company dropped "Braun & Co.," one of the oldest syndicated talk/variety shows in the country, when efforts to improve demographics for the 40-year-old show failed. The show originated from WLWT-TV, Cincinnati.

Multimedia Newspaper Co. has a new president, Donald J. Barhyte. Mr. Barhyte, the corporation's treasurer-chief financial officer, succeeded Rhea T. Eskew, who became senior executive.

The company publishes 14 daily and 29 nondaily newspapers. Two of the dailies were converted to morning publication in 1984. Ad revenues for the newspaper division increased 15.7% over 1983 and circulation sales were up 4.1%.

Multimedia Cablevision Co.'s subscribers increased 5.5% from 1983 to 268,000 in 1984, and the company spent $16.5 million to expand and modify the system. The company purchased the final 40% of Tar River Communications' outstanding common stock and acquired four cable systems in Oklahoma from American Television & Communications, a subsidiary of Time Inc., for the exchange of three of the Tar River Cablevision systems and $22.5 million in cash.

In early 1985, the company began marketing its new franchise for the 8,000-household community of Villa Park in DuPage County, Ill.

The company has agreed in principle to the settlement of four class action lawsuits filed in response to the attempt at a leveraged buyout.

National Enquirer, Lantana, Fla., is the 77th largest U.S. media company with 1984 revenues of $142 million, unchanged from 1983. The all-media company derives revenues solely from two publications, the *National Enquirer* and *Weekly World News.*

A compilation of global news, features and brights, the 5-year-old *Weekly World News* continued to grow in 1984, with circulation increasing 7% to 910,000. Publisher James Martise says a newsstand price 15¢ less than the *National Enquirer's* helped *Weekly World News* hold its own in an increasingly competitive market. No major changes are planned for 1985.

The circulation-driven *National Enquirer* revenues were affected by a drop in circulation from 4.9 million to 4.7 million that was attributed to the increase in number of competitive magazines in the news/entertainment industry.

Although 1984 was a flat year for revenues, Mr. Martise says the *National Enquirer* made significant gains in national ad linage. A shift from its traditional format of entertainment and celebrity features to articles on food, fashion, beauty, marriage and children boosted national advertising 43% in 1984 to 358 pages, a gain Mr. Martise calls nothing short of "spectacular."

An increase in the number of magazines and tv shows dealing with celebrities continued to erode the *Enquirer's* market in 1984. The competition coupled with widely publicized libel suits by actresses Carol Burnett and Shirley Jones led the *Enquirer* to reverse its editorial policy and seek a new market in 1984.

"I'm not trying to suggest that the *Enquirer* is 100% self-help articles, but now our editorial content is about 60% in the service and human interest category—articles on adoptive children and religious columns and the like," Mr. Martise says.

"In the 1970s, the *Enquirer* had the entertainment category all to itself, but that isn't the case anymore," he says. The change in emphasis targets an audience of women who are high school graduates and home makers, a group of readers Mr. Martise says is uniquely the *Enquirer's* because the so-called Seven Sisters magazines, which the *Enquirer* sells against, cater to college educated professionals.

"We have been very successful in showing national advertisers that the unique contribution the *Enquirer* makes to their marketing plan is an unduplicated reach of women," Mr. Martise says.

The company plans to hold its tv ad budget at 1984 levels and continue what it considers to be a successful two-year campaign to recruit national advertisers through promotional mailings and advertising in trade publications. In 1984, the *Enquirer* spent $16 million, down 22.7% from 1983. Advertising was split into $14.7 million for national tv, down 26%, and $1.3 million on spot tv, down 27.8%, according to Leading National Advertisers.

Enquirer market studies have shown its audience to be largely "self-medicated," a reference to the readers' familiarity and use of over-the-counter products. Editorially, this has been exploited by the publishing of regular features written in conjunction with the Arthritis Foundation, American Heart Assn. and American Cancer Society. The newspaper published two major features on diabetes and one on anorexia in 1984, all of which were well received by national advertisers of otc products, Mr. Martise says.

The *Enquirer* also works with the Rochester, N.Y.-based Council of Adoptive Parents. Features on handicapped children and those from underprivileged backgrounds have led to a number of adoptions since 1980.

Nationally known ministers Robert Sculler, Norman Vincent Peale and Billy Graham write regularly for the *Enquirer.*

National Geographic Society, Washington, in 1984 suffered from startup costs for *National Geographic Traveler* and reduced circulation and advertising of its lead publication, the *National Geographic.*

Earnings plummeted 123.8% overall to a loss of $2.6 million from a gain of $10.9 million in 1983 as revenues increased only 0.06% to $326.8 million.

Media revenues increased 5.6% to $213.4 million ranking the nonprofit Society 55th among the nation's media companies.

The new quarterly *Traveler,* with an annual subscription price of $12.50, quickly achieved a 1 million subscription base in 1984 after its startup in March, 1984. Ad rates were set at 600,000, with a 25% discount for frequent advertisers. Rates were increased later in the year.

Traveler, considered a supplement to *National Geographic,* carried 212 ad pages in 1984, and produced ad revenues of $3.6 million and total revenues of $13 million.

This year may prove more tumultuous for the *Traveler* because its editorial staff wants to reduce ad pages by about a third. George Moffat, the Society's ad director, predicts *Traveler* will carry only between 160 and 170 pages in 1985. Plans to increase the frequency of the magazine are on hold, and circulation is expected to remain at slightly more than 1 million. But Society officials say *Traveler* will show a profit in 1985.

The Society's mainstay, the *National Geographic,* had 282 ad pages in 1984, and ad revenues of $30 million, down slightly from 1983. Total 1984 revenues for the magazine were $168 million.

So far in 1985, the magazine's advertising has been soft, says Mr. Moffat, who expects to finish the year flat or down by a slim margin.

Circulation for the *Geographic* dipped to 10.35 million in 1984 from 10.60 million in 1983. This year the Society expects circulation of 10.50 million and a renewal rate of at least 86%. Membership costs for the magazine will remain at $15 through the year, but may be raised in 1986.

To boost ad sales, Mr. Moffat reorganized the domestic and international sales force in the first half of 1985, appointing Bill Hughes to the new post of national sales manager-East, and Phil Reynolds, formerly Chicago ad manager, to national sales manager-West.

Michele Boutin, the European sales director based in Paris, is now international sales director, a new post. Mr. Boutin will supervise the newly expanded international sales offices in London, Duesseldorf, Madrid, Sydney and Hong Kong.

The magazine began accepting beer, wine and cordials advertising in its international edition 18 months ago, but has "not been deluged by advertisers," Mr. Moffat says. U.S. editions probably will never carry alcohol or tobacco ads, he says.

U.S. regional sales are poor, Mr. Moffat says. He intends to modify the successful "Big G" sales program by eliminating buys in smaller markets to

keep advertising circulation at less than 5 million. The program currently allows advertisers to buy space in 36 selected U.S. markets at slightly more than half the cost of a regular *Geographic* ad page.

Mr. Moffat hopes to bring in new types of advertisers, such as home furnishings, with a promotion campaign breaking in the fall that will be more competitive and "will not bore people with numbers," he says. Last year's campaign cited reader demographics.

Geographic this fall will publish a cover with a hologram, repeating its successful gimmick from its March, 1984, issue.

The Society in January, 1985, launched a quarterly periodical, "National Geographic Research," which does not carry advertising. The $40-a-year publication will publish articles written by Society-sponsored scientists. Circulation is estimated to be 4,500 to 5,000.

"National Geographic World," geared to children between the ages of 8 and 13, is stable with a circulation of 1.5 million. It accepts no advertising.

The Society ventured into cable tv in April, 1985, and will produce 150 hours of the "National Geographic Explorer" for the Nickelodeon cable network, part of MTV Networks. It continues to produce four specials annually for the Public Broadcasting Service.

News America Publishing, New York, a unit of News Group Ltd., Sydney, Australia, is the nation's 27th largest media company, though it seems destined for top 10 status in 1985. Rupert Murdoch and his family own 46% of News Group Ltd. He is chairman-ceo of the company.

News America had net revenues from media operations of $439.9 million from a $463.1 million in gross revenues in the fiscal year ended June 30, 1984. Media revenues were up nearly 36.2% over fiscal 1983, primarily reflecting the addition of revenues from the *Chicago Sun-Times.*

News America made headlines several times in 1984, first with the January acquisition of the *Sun-Times* from the Field family for $100 million. That was followed in May by the purchase of *New Woman* magazine for a price estimated in excess of $20 million from the book's founder, Margaret Harold Whitehead. In November, Mr. Murdoch paid $362.5 million for the 12 trade publications of Ziff-Davis Corp.

All the 1984 activities were overshadowed when, in March, 1985, Mr. Murdoch struck a deal with Denver oilman Marvin Davis to buy a 50% stake in 20th Century-Fox Film Corp. for $250 million. Two months later, Mr. Murdoch announced a plan to purchase the seven major market tv stations owned by Metromedia Inc. for $2 billion. One of the stations, WCVB-TV in Boston, was sold to Hearst Corp. for an estimated $450 million in a simultaneous transaction.

By press time, Mr. Murdoch was being touted as the man behind the much talked about but never realized fourth commercial tv network—a network that could spring from the lead of the Metromedia independent stations and the program backing of a major Hollywood studio.

However, it remained to be seen whether Mr. Murdoch, an Australian citizen, could obtain American citizenship (foreigners can own no more than 20% of a broadcast station company) and divest himself of potential cross-ownership conflicts in New York and Chicago, both of which likely would be required of him before he could be awarded the Metromedia broadcast licenses by the FCC.

News America's 1984 fiscal year accounts only for the acquisition of the *Sun-Times. New Woman* and the Ziff-Davis publications were acquired after the books were closed on fiscal 1984.

Among the properties included in 1984's returns, the *New York Post* and the *Boston Herald* were the only money losers. Analysts believe the *Post* lost in excess of $10 million in calendar 1984. News America does not report financial results for the *Post.* Moreover, the *Post*, which had shown steady if not spectacular circulation gains since Mr. Murdoch bought the paper in 1976, showed its first decrease, going from some 960,000 daily sales to 930,000 at the Sept. 30, 1984, ABC audit, then showing further losses into 1985 to 901,313 for the six months ended March 31, 1985.

At press time, it was believed that Mr. Murdoch would have one of three options for the *Post* if he were to proceed with the Metromedia deal: Sell it (thought unlikely, because it's been losing money since Mr. Murdoch bought it); fold it and sell the assets, or attempt to obtain a waiver from the FCC that would allow him to own both a newspaper and a tv station in the New York market.

Losses at the *Boston Herald* were halved during the fiscal year, the first full year of News America's ownership. In the consolidated balance sheet for News Group Ltd., News Group Boston, which runs the *Herald*, showed a loss of $3.2 million Australian, about equal to U.S. $2.7 million at the June 30, 1984, exchange rates. Circulation and advertising share of market have continued to grow, however, with daily circulation in the March 31, 1985, ABC FAS-FAX report put at 368,027, up nearly 60,000 since it became a News America property in December, 1982. Sunday circulation was 308,823 in the March 31 FAS-FAX report, a gain of more than 65,000 sales over the same period.

News America's two newspaper properties in San Antonio, Tex., the San Antonio *Express* and the *News*, were merged into a single, all day paper, the *Express-News*, in September. The Express-News Corp. contributed about $6.1 million to News Group's consolidated net profit.

The *Sun-Times* circulation increased 1.7% to 639,187 daily and 0.5% to 690,904 on Sunday. While its daily trails the *Chicago Tribune* by about 136,000 subscribers, it is far behind the *Tribune's* 1.17 million Sunday circulation.

Mr. Murdoch's magazine properties are now part of a new unit, Murdoch Magazines. It was formed when News America acquired the Ziff-Davis trade books. The three properties included in the company's fiscal report are *New York*, the *Star* and the *Village Voice*, an alternative weekly newspaper in New York. At press time it was announced that the *Voice* has been sold for more than $55 million to Leonard Stern, ceo and chief executive officer of Hartz Mountain Industries, a New Jersey-based pet supplies and real estate company.

New York enjoyed a record year, with after-tax income up 62% to $11.9 million. Similar figures were not available for the *Voice* or the *Star*.

The *Star*, having suffered a loss of about 225,000 circulation during the fiscal year, underwent a major redesign and refocus early in 1985 to broaden its appeal beyond the typical checkout stand magazine reader to more sophisticated, professional women. While the celebrity news that the *Star* is noted for remains, added attention was given food, fashion and leisure.

The New York Times Co., the nation's 12th largest media company, reported another record year in 1984, with revenues of $1.23 billion, up 12.7% from 1983. All revenues were from media.

Record earnings of $100.2 million were up 27.3% primarily on the strength of the company's newspaper group, which increased revenues by 15% over 1983, and the tripling of income from equity interest the company holds in four forest products companies.

This pace continued into the first quarter of 1985, with first-quarter earnings up 20% from the 1984 quarter, excluding the one-time, after-tax gain of $2.8 million from the sale of property in New York. The four forest products companies also continued to make significant contributions.

Gains in the newspaper group in the first quarter came primarily from increased ad rates and higher circulation. Although the magazine group also posted gains in circulation and ad revenue, the group suffered an 11% decline in operating profit. This primarily reflects costs associated with the sale of Times Books to Random House in November, which ended New York Times Co.'s involvement in the book, educational and library services businesses.

In 1984, the company's flagship paper, the *New York Times*, enhanced operations in several ways, including expanding existing features. The *Sunday New York Times Magazine*, for example, added two Part 2s to its lineup, bringing the total to 12 a year on thematic topics such as the "World of New York," "Sophisticated Traveler," men's and women's fashion, and sports. Ad volume for the Sunday magazine rose 12% over 1983's level, to 4,683 pages.

The *Times* also expanded the Business Day section last fall, which included the addition of editorial staff. The *Times* was honored again this year with two Pulitzer Prizes; it also was ranked as the best designed newspaper by the Society of Newspaper Design in a nationwide survey commissioned by ADVERTISING AGE.

Over-all, the *Times* gained about 4% in ad volume. Average daily circulation exceeded the 1 million mark for the first time in 1985. According to ABC audit figures for the sixth month period ended March 31, 1985, daily circulation hit 1,013,211, up 4.4% from the corresponding period a year earlier. The *Sunday Times* was 1,623,562, up 1.9%.

In February/March, 1984, the *Times* gained classification as a national newspaper, and bore a new promotional campaign, "Much more of the world, much faster." The campaign was the first work created by newly hired agency Bozell & Jacobs. The campaign started testing during February, 1984, in Cleveland and San Francisco and later was expanded to other primary *Time* markets. As of December, the national edition circulation stood at 125,000 daily and 215,000 Sunday. This spring, the national edition launched a sixth printing site, in Lorain, O.

In June, 1985, the New York Times Co. acquired three dailies. The dailies, circulation and year-to-year circulation growth: The *Spartanburg* (S.C.) *Herald-Journal* (47,476, up 1.3%), and in Alabama, the *Tuscaloosa News* (31,397, up 1.6%) and *Gadsen Times* (29,560, up 3.9) from the Public Welfare Foundation. Circulations are ABC six-month averages ending March 31, 1985; the percentage increases are based on growth from March 31, 1984.

This year, the company announced its plans to purchase the daily *Santa Rosa* (Cal.) *Press-Democrat* (72,698, up 2%) and the *Healdsburg* (Cal.) *Tribune* (5,325), a semi-weekly, and WQAD-TV, an ABC affiliate serving the Quad Cities area of Illinois and Iowa.

The company in 1984 sold two weekly Florida-based newspapers to Asterisk Publishing, Fort Lauderdale—*Zephyrhills News* in February and the *Anna Maria Islander* in November. This left 20 daily newspapers and eight weeklies on the *Times* roster of regional newspapers at the close of 1984.

Among the regional papers, the dailies achieved a 4% circulation gain, while the weeklies rose 6%. Ad volume also increased over-all.

In July, 1984, the magazine group acquired *Cruising World*, a sailing magazine with an average circulation of about 115,000. All the magazines reported slight gains in ad pages carried in 1984 over 1983. *Tennis* boasted a 12% rise in ad pages in 1984, although its circulation remained at 1983's level of about 500,000. The other magazines posted slight gains in circulation except *Family Circle*, which slipped 4%. Last year, the company acquired two buildings for the magazine group—one in Trumbull, Conn., and the other in lower Manhattan.

The broadcast group operates three tv stations, an am and an fm classical music station and a cable tv system. Operating profit climbed 76% over last year, mainly as the result of higher ad revenues at the tv and radio stations and a greater number of subscribers to NYT Cable.

In October, NYT Cable TV acquired a 56th franchise, adding 1,500 subscribers. Over-all, the number of basic subscribers rose 10% to 121,000 in 1984; pay subscriptions increased 8% to 124,000.

WQXR-FM, the classical music station, cut its ad load by 15% early last year, partly in response to a listener survey. The move should not hurt revenue and profit projections for the station, which is at its most successful point in its 47-year history, according to a company spokesman.

The acquisitions made this year are expected to erode earnings somewhat in 1985. However, Arthur Ochs Sulzberger, chairman-ceo, still projects that 1985 will be another strong year for the company.

Oklahoma Publishing Co., Oklahoma City, is the 29th ranked media company in the U.S., according to media revenues estimated by ADVERTISING AGE at $389.2 million in 1984, a 16.1% increase over 1983's estimated media revenues.

The private company, tightly held by Oklahoma City's Gaylord family and known as Opubco, derives its revenues from an ever-expanding empire of media, entertainment, sports and production facilities.

Although Opubco's revenues and earnings remain closely guarded, Edward L. Gaylord, president, was quoted earlier this year as saying the company's 1984 profits were expected to be in excess of $68 million.

During 1984, the company expanded its involvement in sports and country music, began improvements to its Opryland properties acquired in 1983 for about $500 million and introduced major improvements in some of its key media properties.

Following Opubco's merger of the evening *Oklahoma City Times* into the *Daily Oklahoman* on March 1, 1984, for an initial combined morning circulation of 264,000 (of which about 35,000 was duplication), the *Daily Oklahoman* opened a major $50 million-plus satellite production facility with new presses and other state-of-the-art technological improvements, including a $2.2 million electronic pagination system.

According to Howard Nicks, vp-general manager, the newspaper's weekly circulation in the first week of March, 1985, had grown to 262,385. Saturday circulation was up 21,197, to 240,990, and Sunday circulation was up 15,138, to 335,027. These compare with six-month Audit Bureau of Circulations statements of 252,364 daily, 235,734 Saturday and 317,750 Sunday.

Opubco's venture with Battelle Development Corp., Columbus, O., the DataTimes computerized library system, became a wholly owned subsidiary of Opubco under the Datatek name. It services newspapers and other subscribers.

By 1985, the DataTimes database was offering access to full-text libraries of the Associated Press, *Dallas Morning News, Houston Chronicle, Daily Texan* (University of Texas at Austin), the *Oklahoman & Times*, the *Journal Record* (Oklahoma City business publication), and to newspapers in Arkansas, Louisiana and Washington.

The service also provides a directory of Oklahoma companies, an Oklahoma legislative tracking database, an Oklahoma City traffic watch service, and other on-line electronic communication services including electronic mail.

Opubco's *Colorado Springs Sun*, after moving to tabloid format in 1983, reported continued circulation gains to 45,549 daily and 46,636 Sunday as of March 1985, up from 40,595 daily and 43,465 Sunday the year earlier. ABC averages for the six-month period ended March 31 show 41,960 daily, 41,572 Saturday and 44,750 Sunday. The dominant paper in the market is the combined morning-evening *Gazette-Telegraph*.

Gaylord Broadcasting, based in Dallas, named University of Oklahoma president William S. Banowsky to the post of president, succeeding Mr. Gaylord, who remained chairman and chief executive officer.

When the Federal Communications Commission changed its ownership rules in 1984, Gaylord Broadcasting jumped on the acquisition bandwagon and bid $500 million for McGraw-Hill's network affiliated tv stations in Denver, Indianapolis, San Diego and Bakersfield, Cal. But McGraw-Hill declined to accept the offer.

Gaylord Broadcasting expanded its sports involvement in 1984 with acquisition of one-third ownership of the Arlington, Tex.-based Texas Rangers, which finished 14½ games behind the champion Kansas City Royals in baseball's American League West. The about $20 million purchase included over-the-air tv rights and the right of first refusal on purchase of the remainder of Texas Rangers stock, owned by oil executive Eddie Chiles.

The acquisition initially failed to pass the required majority vote of the American League owners, but was approved by the overriding vote of baseball commissioner Peter Ueberroth. Sources reported that the purchase was approved after Gaylord Broadcasting agreed it would not strike for superstation status with the telecast of games outside the Rangers' immediate six-state area and into home areas of other Major League teams.

The Texas Ranger games are broadcast over Gaylord's KTVT, Dallas-Fort Worth. The company also carries games of the Cleveland Indians and Cavaliers over WUAB, Cleveland; the Seattle Mariners over KSTW, Seattle-Tacoma, Wash.; the Houston Oilers 1985 pre-season games over KHTV in Houston, and the Milwaukee Brewers and Bucks over WVTV, Milwaukee.

Opubco's Opryland USA acquired the Nashville-based Acuff-Rose group of music publishing companies jointly owned by country music entertainer Roy Acuff (member of the Grand Ole Opry since 1937) and music publisher Wesley Rose. On March 26, 1984, the Federal Communications Commission approved Gaylord Broadcasting's acquisition of WSM (am, fm), which was the only remaining portion of the Opryland USA acquisition that had been pending.

The Nashville Network, acquired in the purchase of Opryland USA (completed Sept. 1, 1983), continued its record growth at the rate of about 500,000 households a month, to finish 1984 with about 22 million households. The network had estimated ad sales of $18 million in 1984, according to Cabletelevision Advertising Bureau. A new revenue stream is expected to flow from the operation in 1986 when it is scheduled to begin charging affiliates per subscriber. Those fees generally run between 10¢ and 20¢ per subscriber per year.

During 1984, the network expanded into Canada and said it is considering expansion into Japan. Nashville Network also began the first regular live tv broadcast of the Grand Ole Opry, which continued its radio broadcasts via clear channel WSM radio.

Opryland's Music Country Radio Network, a joint venture with the Associated Press, continued to reach millions of overnight radio listeners via satellite over 100 affiliate stations with what MCRN boasts as the only satellite package offering an overnight country music variety format.

Privately held Outlet Communications, owner of four fm radio stations, one am station and seven tv stations, is the 94th largest U.S. media company in 1984.

ADVERTISING AGE estimates the company's revenues climbed to $104.5 million, a 10% increase over 1983's estimate. All revenues were from Outlet's tv and radio properties.

On Feb. 1, 1984, the acquisition of Outlet Communications by the Rockefeller Group for $300 million was finalized, representing the first media property purchased by the Rockefeller Group. The group owns Rockefeller Center Management Corp., Rockefeller Center Development Corp., Rockefeller Center Telecommunications Corp., Radio City Music Hall Productions and Cushman & Wakefield.

In January, 1984, Outlet Communications was forced to sell radio station WSNE-FM in Taunton, Mass., because its acquisition by the Rockefeller Group invalidated its grandfather status in the eyes of the FCC with the co-owned and co-located WJAR-TV station in Providence, R.I. Buyers Donald Wilks and Michael Schwartz, Springfield, Mass., paid $3.6 million for the fm station.

Outlet Communications was frustrated in 1984 in its attempt to purchase two Texas tv stations—KTXA, Fort Worth, and KTXH, Houston. Outlet was outbid by Gulf Broadcasting, which paid $160 million for the two stations and later sold them to Taft Broadcasting with the rest of its media properties.

After being rebuffed in the Texas sales, in January, 1985, Outlet purchased independent WATL-TV, Atlanta, from Sillerman-Morrow for $28 million. The next month, Outlet bought independent WPDS-TV, Indianapolis, for $22 million from Anapcomp Inc., a publicly held computer company.

After acquiring the two uhf tv stations this year, Outlet Communications will not be making any new acquisitions in the near future, says Fred Griffiths, vp-corporate affairs. Talking about the company's future direction, he says the interest of the industry as a whole is shifting to satellites and cellular radio.

Park Communications, Ithaca, N.Y., is the country's 96th largest media company with estimated net revenues of $98 million, all from broadcasting and newspaper operations, up 13.6% from 1983.

By the end of the year, Roy H. Park Sr., whom *Forbes* magazine calls part entrepreneur, part showman and one of the country's 400 wealthiest people, plans to get "back out on the acquisition trail."

The 74-year-old communications magnate says he and the board of directors of Park Communications have begun searching for the person they hope eventually will replace him at the company's helm.

The heir-apparent will become chief operating officer and allow Mr. Park to do what he likes to do best—acquiring new outlets. Mr Park will continue as chairman-ceo.

"Most of the acquisitions, I make myself," he says. "I think the best way to do that is to see the guy who makes the decisions." And Park Communications—a new name since Park Broadcasting began offering stock to the public in October, 1983—has been very acquisition-minded.

Park, which in 1977 had reached the FCC's old maximum allowance of 21 broadcast outlets (7 tv, 7 am and 7 fm stations), a law that has been liberalized to 12-12-12, has bought at least one newspaper a year—"mainly, one a quarter," Mr. Park says.

The company's stock began trading at about $19 and now sells for more than $35 a share over-the-counter. Although it is considered a public company, Mr. Park and his wife, Dorothy, own 8.22 million shares, or 89.3% of the outstanding shares.

"No one can come in and take over," Mr. Park says.

The company has 75 daily, weekly and controlled circulation newspapers and still owns seven am and seven fm radio stations and seven tv stations. It employs 1,700 fulltime workers, 400 in tv, 1,100 in newspapers and 200 in radio.

Newspaper properties are in small markets where they are the dominant publications, concentrating mainly on local news, a Park trademark. Last year, Park's *Statesville Landmark & Record* in North Carolina broke a company record of pictures per publication when it ran separate pictures of 183 locals in a single edition.

Now that the FCC has raised the maximum number of broadcast outlets a company can own, Mr. Park has been exploring additions in that area, as he has in other communications fields.

"Broadcast properties recently have been very high priced," Mr. Park says. "People have been offering more for them than we think they're worth."

One area of broadcasting where Mr. Park and other broadcasters are making a strong push is low-power tv. Of the company's 39 applications, the FCC has awarded lptv licenses by lottery in seven of the application areas, all to competitors. However, Park is exploring the possibility of purchasing construction permits from successful bidders in several areas.

Wright Thomas, senior vp-finance, says he expects the cost for such purchases to be "relatively inexpensive, somewhere in the low five figures."

Mr. Park is not without the means to make acquisitions. The company pays no dividends to its 425 shareholders and does not plan to in the near future. As a result, it has $16.7 million in working capital available, along with lines of credit totaling $90 million from two banks.

And its cash flow from its operations is strong. Its net income rose nearly 27% in 1984 to $14 million, and gross revenues climbed more than 13% to nearly $106.4 million.

In the first quarter of this year, ended March 31, the company reported net income rose 16%. Mr. Park says the company's 1985 growth will do as well as that of 1984, "even though business in general is not as robust this year."

Park Communications spent much of its money and effort in improving its holdings in 1984.

It began Sunday newspapers in Morgantown and Statesville, N.C. "Sunday papers are worth two to 2½ times the value of ad linage in an average weekday," Mr. Park says.

Park doubled the power of WBGM, its CBS affiliate in Birmingham, Ala., to more than 2 million watts; it overcame objections from local pilots and received FCC approval to triple the height of its tower and boost power to 100,000 watts for KJJO (fm) in Minneapolis.

It also constructed a new building for its Yankton, S.D., WNAX (am) station. The station, which depends on farm, weather and market reports for the bulk of its programing, reaches 233 counties in seven states.

Early in 1984, Park bought the Medina, N.Y., *Journal-Register*, a 5,000-circulation newspaper; its companion weekly, the *Albion* (N.Y.) *Advertiser*, and two controlled-circulation shoppers early in the year. Park also bought the Jeffersonville, Ind., *Evening News* and its companion weekly, the *Clark County Journal*, in December.

Mr. Park also operates Park Outdoor Advertising, which is run by his son, Roy H. Park Jr. The company is owned by RHP Inc., a separate company owned by the senior Mr. Park and his wife. RHP also owns an ad agency and a real estate operation, with which Park Communications does business.

For Penthouse International, New York, 1984 was a year to try new strategies to prop up the company flagship's sagging circulation rates and to address the dilemma of hemorrhaging ad revenues in the beleaguered "men's sophisticate" magazine field.

Penthouse International had estimated revenues of $115 million, up 5% from restated revenues in 1983, ranking it 86th among the nation's leading media companies.

If there was a lesson to be learned from the company's experience last year, it was that nothing brings good health to a men's magazine like a photo spread of the reigning Miss America in the buff. The September issue of *Penthouse*, with a series of erotic photos of Vanessa Williams and another woman, came out almost a month early—in July, during the summer news doldrums. It was preceded by a debate as to whether the first black Miss America should be the first in the pageant's 63 years to be asked to step down because of the controversy.

When the magazine hit the stands, 5 million copies were snapped up in four days.

"No other magazine ever sold as many copies [in that period of time]," says exec vp-ceo David Myerson. "There's nothing comparable in the history of magazine publishing." The issue, which has become a collector's item, eventually sold 5.85 million copies, after the company put out a second press run.

It couldn't have come at a better time for *Penthouse.* The magazine had, as of June 30, 1984, lost more than 250,000 in circulation in a year, extending a two-year downward trend, and ad revenues had fallen 7.2% at the end of 1983 from the previous year. Even with the record-breaker in September and a followup nude appearance by Ms. Williams in November, the yearend circulation level of 3.77 million still didn't equal that of 1982.

Ad revenues for the company's flagship also were down, by 14.5%. Part of the drop can be attributed to a new policy, starting in the January, 1985, issue, of raising the editorial-to-ad ratios from 2-to-1 to an uncluttered 5-to-1. But the magazine, like other men's sophisticates, has been losing to other general interest magazines for several years.

Five out of the company's six magazines last year were in that category, and Penthouse has added another this year: *New Look*, an American version of a French pictorial magazine. *Spin*, a music magazine, also joins the family this year.

Penthouse's other men's magazines —*Forum, Variations, Penthouse Letters* and *Girls of Penthouse*—all either maintained their previous year's circulation levels or showed slight losses.

Omni, on the other hand, continued to increase in circulation and ad revenues. Circulation was up 4.3% to 837,282, as ad revenues increased 10.4%.

Company executives are inclined to attribute the circulation problems to the forces of prudery. For example, pressure groups in the Pacific Northwest have prompted supermarkets and drugstores to stop selling *Penthouse* and other men's magazines. The Tupelo, Miss.-based National Federation of Decency organized demonstrations in front of about 400 of Southland Corp.'s 7-Eleven convenience stores last August to protest sales of men's magazines. Canada banned *Penthouse* last November, after protests about the December issue, with a feature on women in bondage.

"If you get the magazine out there, it sells," Mr. Myerson says. "The consumer demand is still there. The problem has been that the pressures brought on the retailing establishment, by groups opposed to us, have been holding down growth."

Despite its troubles in recent years, *Penthouse's* media gross revenues increased 3% last year, to $158 million, Mr. Myerson says. Other gross revenues dipped, to $10 million from $12 million in 1983, he adds. The company, owned by the controversial and colorful Bob Guccione, has a diverse collection of successful properties, from a burgeoning list of video releases (for example, "Girls of Penthouse"), Omni books, ("The Whole Earth Software Catalogue"), movies ("Caligula" and, now in preproduction, "Moll Flanders") and international licensing agreements (Penthouse Clothes in Japan).

Penthouse has abandoned its money-losing televised "$1 Million Pet of the Year Pageant," and it is looking for a buyer for its ill-fated Atlantic City casino property, which stands, a partly built rusting hulk, on the boardwalk.

Petersen Publishing Co., Los Angeles, the 76th largest media company based on its $142.3 million in media revenues in 1984 from its 14 special-interest monthlies and three every-other-monthlies and one-shot magazines, is marching to a faster cadence this year. Media revenues are up 8.6% from 1983.

For the first five months of 1985, total ad revenues from its magazine properties are up 18.2% compared with the similar period in 1984. Included in the growth is a 6.9% ad rate increase (compared with a 6.2% increase in 1984), a 6% increase in ad pages and improvements in newsstand sales.

The growth in 1985 represents an unexpected turnaround in the company's low growth forecast. Carol Johnson, director of advertising administration, says the original projections were made in 1984 when Petersen publications ran 10,260 ad pages compared with 9,536 in 1983, a 7.6% increase.

The improved outlook has generated estimates of a 14.5% increase in ad revenues to $90 million and a total revenue projection of $167.2 million by the end of 1985. Total revenue projections compare with $150.3 million in 1984, the difference between media contributions and the total being returns from art galleries, real estate and restaurant properties.

Circulation changes also are part of the reason for the improved outlook. Newsstand revenues in 1985 have been on the rebound, a fact Petersen traces to its new relationship with Curtis Circulation Corp., West Caldwell, N.J.

This year Petersen plans on reversing a slow but consistent decline in newsstand single copy sales by launching a nontraditional marketing strategy, says Nigel Heaton, vp-circulation.

"Previously we focused our attention on the over-all market. Now we plan to focus on the regional markets on a title-by-title basis," he says. "By working directly with the regional wholesaler, we plan to solve the newsstand display problem that is eroding sales. This new blood [Curtis] is giving us all high energy levels," Mr. Heaton says.

Another Petersen publication, *'Teen*, is typical of the problem the publisher has faced as newsstand single copy sales suffered throughout the industry in 1984.

The proliferation of titles created a display problem at newsstands, and the whole industry has faced major difficulties in merchandising titles at point of sale.

As a case in point, *'Teen* newsstand sales fell 10% in 1984 and consequently its ad pages dropped 4.7%. Nevertheless, thanks to a strong subscriber base, combined sales of newsstand and subscription dropped only 2.5%, from 12.37 million in 1983 to 12.06 million in 1984.

Vying for children's dollars at the newsstand, *'Teen* suffered as youngsters opted to spend their money on fan magazines and videos.

But the tide is turning in 1985 and *'Teen* has started a comeback. Mr. Heaton anticipates circulation to climb back to 12.28 million, almost reaching 1983 levels.

Petersen president Frederick Waingrow says last year the company felt a tightening of newsstand and subscription circulation patterns, but both these areas have loosened up in 1985.

In the company's stable of automotive magazines, leaders in increased ad pages are *Petersen's 4-Wheel and Off-Road* and *Motor Trend.* Besides being one of the growth leaders among the magazines, *Petersen's 4-Wheel and Off-Road* is the ad page leader, running 888.5 ad pages in 1984, an increase of 10.2% over the previous year.

This year, the most spectacular performer in increased ad pages, however, is *Motor Trend*, up 33% in the first six months of 1985 over the similar period in 1984. The June, 1985, issue set a record for the magazine of 102.4 ad pages.

Motor Trend circulation is now at 2.4% above the rate base. Ms. Johnson believes the public is just starting to notice important changes in the magazine's editorial content, such as more attention to the import car market and more use of color.

The improved circulation picture already has meant a slight revival for *Petersen's PhotoGraphic.* Circulation is running 4.3% above the rate base, but ad linage continues to drag.

As it was last year, *Petersen's 4-Wheel and Off-Road* circulation maintained the strongest growth rate among the magazines. From 1982 to 1983, average circulation increased 24% to 263,982. From 1983 to 1984, circulation of the magazine jumped to 300,529, an increase of 14%.

The magazine is circulating at 41% above its rate base, forcing rate base changes every six months, Ms. Johnson says.

Other Petersen automotive publications are performing exceptionally well. *Dirt Rider*, started in November, 1982, posted a 48.1% increase in ad pages, for a total of 345 ad pages in 1984. Its circulation is 111,182, up 11.2% over a 100,000 rate base.

Petersen's firearms magazines have not matched the growth of its automotive titles, but they still are performing satisfactorily, Ms. Johnson says.

The leader in the group is *Petersen's Hunting*, which ran 556.1 ad pages in 1984, an increase of 16.2%. Its circulation is 290,343, exceeding the rate base of 275,000.

Guns & Ammo turned in ad pages of 605.5 in 1984 for a 2.1% increase, and its circulation—at 522,256—is 10% above the rate base of 475,000.

The future of *International Combat Arms*, which was spun off in September, 1984, from a successful one-shot specialty magazine, is still uncertain. The editorial content was overhauled after its initial two issues. It is still too early to predict the outcome, Ms. Johnson says.

One casualty in 1984 was *Sports Car Graphic*, covering the technical and racing aspects of sporting cars. The magazine ceased publication in December after 12 issues.

So far in 1985, the only disappointment has been Petersen's failure to rejuvenate *Pickups & Mini-trucks*. Ms. Johnson says the magazine's editorial content overlapped too conspicuously with *Petersen's 4-Wheel and Off-Road* for it to achieve a separate identity. After a name change and at least two major attempts to alter editorial direction, the company folded the publication in June.

In 1984, Petersen issued 42 one-shot specialty magazines that sold more than 4.4 million copies. Another 49 one-shot titles are planned for 1985, including four teen-oriented magazines, a dozen hunting and gun specials, and a magazine on home fitness equipment, a new frontier for Petersen. The remainder will be in the automotive area.

Pittway Corp., Northbrook, Ill., is the nation's 87th largest media company with media revenues of $115 million for 1984, an increase of 17.3% over 1983.

Media revenues came entirely from Pittway's business press subsidiary, Cleveland-based Penton/Industrial Publishing Co. and made up 23% of Pittway's total 1984 revenues of $496 million.

Pittway's 1984 net income was $32 million, up 20.6% from 1983. Net income for Penton/IPC was not available, but pretax income from publishing was $19.8 million, says Thomas L. Dempsey, chairman-ceo, Penton/IPC, and vp, Pittway. Saddlebrook Real Estate & Resort, a property contained in the publishing division, reported a pretax income of $1.7 million.

Mr. Dempsey says ad revenues from 26 magazines and one annual catalog accounted for about three-quarters of Penton/IPC's revenues of $150 million in 1984, up 19% from 1983. Part of those revenues come from group buys through Penton Executive Network, a network of 13 Penton/IPC publications with primary circulation of 1.5 million that is sold as a group.

Graphic services, marketing and education services and its Saddlebrook Real Estate & Resort business made up the balance, Mr. Dempsey says.

He projects an increase of 10% to 15% in revenues in 1985. With 21 of the company's magazines reporting increases in ad pages and profits, total ad pages have risen 7% by the end of May, 1985. Mr. Dempsey says Penton/IPC posted 35,000 total ad pages in 1984, an increase of about 10.5% over 1983.

A major contributor to Penton/IPC's success in 1984 was *Machine Design*, which Mr. Dempsey calls "the No. 1 IPC magazine last year and this year." He says the magazine has a circulation of 165,000 and posted an increase of 650 ad pages in 1984. The publication had 1984 estimated gross ad revenues of a little more than $20 million, Mr. Dempsey says.

Last year proved successful for a number of other Penton/IPC publications as well. *New Equipment Digest* was up 187 ad pages, *Industry Week* was up 191 pages, *Heating/Piping/Air Conditioning* reported an increase of 229 ad pages, *Production Engineering* was up 176 pages, and *Computer-Aided Engineering* posted an increase of 150 ad pages in 1984, according to Mr. Dempsey.

The company has one annual magazine—*Chemical Engineering Catalog.* All other publications are monthly or every-other-monthly, and no changes in issue schedules are planned, Mr. Dempsey says.

The company widened its publications family with the March, 1985, acquisition of *Millimeter* from Peter Jablon and Bill Blake for an undisclosed price. Targeted at readers who are "production people in movie and television programing," the magazine is printed 13 times a year and has a circulation of 26,000, Mr. Dempsey says. *Millimeter's* ad pages were 1,700 in 1984 and have risen 3% thus far in 1985, he says.

Penton/IPC instituted a rate increase in 1984 for the battery of magazines of between 5% and 6%, and followed it with an increase in 1985 of 5%, Mr. Dempsey says, adding that no further increases are slated for the rest of the year.

Playboy Enterprises, Chicago, is the 67th largest U.S. media company, with media revenues of $166.3 million for the fiscal year ended June 30, 1984, up 4.9% from fiscal 1983.

Media revenues accounted for nearly 89% of total 1984 revenues of $187.1 million. In the previous year, restated media revenues of $159 million constituted 84% of the corporate total.

Publicly held Playboy reported fiscal 1984 net income of $27.3 million, nearly a $45 million turnaround from the $17.5 million net loss reported in fiscal 1983.

For the nine months ended March 31, 1985, however, Playboy's net income was down 67% from the year-earlier period, while income from continuing operations was down 20%, to $3.5 million. The drop reflects declining newsstand sales and slow growth at Playboy Enterprises video division. Previous year figures, however, included gains from the sale of casino and real estate holdings. Nine-month revenues were flat, up only 3.4% to $144.9 million.

The company's media sales consist of revenues from *Playboy* and *Games* magazines, the cable Playboy Channel and sales of "adult" videocassettes.

The flagship *Playboy* magazine contributed 72% of the company's total media revenues in 1984, with the monthly *Games* and other publishing activities adding another 16%. Publishing division revenues of $147 million were down 2% from restated 1983 publishing revenues of $150.2 million. Pretax income for publishing operations was $17.9 million in 1984, up 175% from $6.5 million in 1983.

The remaining 12% of media revenues consisted of $15.6 million in subscription fees for the Playboy Channel, an 88% increase from the previous year. Launched in November, 1982, the service had 720,000 subscribers at fiscal yearend, its first full year of operation.

Revenues of $3.4 million attributed to programing production and home video product sales are included in the media totals.

Playboy's video segment posted total revenues of $19.2 million, up 55% from 1983. The division suffered a pretax loss of $317,000 in 1984, compared with a $2.3 million loss a year earlier.

Fiscal 1984 saw a continued but tempered downturn at *Playboy*, with total revenues for the magazine of $120 million representing a 1.6% drop from fiscal 1983 revenues, which were down 12.7% from the previous year.

The recent decline was mostly because of lower ad revenues, though higher circulation revenues partially offset those declines. Newsstand revenues were up $1.8 million, or 4.4%, in fiscal 1984 mostly because of an October, 1982, price increase first reflected in fiscal 1983 results. (In June, 1984, *Playboy* again raised its cover price 50¢ to $3.50.) Subscription revenues were up $1.9 million, or 5.5%, in the same period.

Ad revenues, however, fell 12.5% to $46.4 million because of a 10% drop in total ad pages, to 1,039. The magazine's total rate base dropped from 4.4 million to 4.1 million in August, 1983, resulting in a 7.2% decline in ad rates.

Playboy's guaranteed rate base has remained steady at 4.1 million—including 2.2 million subscribers—since that time though; a 7% ad rate increase took effect last October.

The New York-based *Games* magazine had a yearend 1984 circulation average of 660,000, up 1.2% from the previous yearend. *Games* sold 252 ad pages in 1984, a 24% drop from a year earlier, while ad revenues for the magazine were $2.9 million, down 13.3% from 1983. The company attributes the drop to erosion in videogame advertising as that industry suffers continuing declines. For the first three issues of 1985, the magazine sold just 49 ad pages for revenues of $590,000.

Plans for improving *Games'* fortunes include developing automotive, camera and computer ad categories to reach the magazine's college-educated, younger and relatively affluent audience.

Several executive changes at *Playboy* signaled a changing of the guard as company president-chief operating officer Christie Hefner continues to implement her long-term strategy for the flagship magazine.

That strategy includes an increased emphasis on service features in *Playboy*, an attempt to differentiate the 30-year-old magazine from its more sexually explicit competitors.

Company chairman-ceo and founder Hugh Hefner, father of Christie, said he will lessen his involvement in day-to-day affairs of the magazine following a stroke suffered in March, 1985.

Nat Lehrman, senior vp-president of Playboy Enterprises' publishing division and associate publisher, *Playboy*, announced his intention to retire when a successor is named, though he says he will remain a consultant to the magazine.

On the corporate side, John Phillips, senior vp-chief financial officer, also left the company in May, 1985. Earlier last year, the two-member office of the president was disbanded when exec vp Marv Huston left the company. Stephen Silverstein, the senior vp-chief financial officer who preceded Mr. Phillips, also left.

Meanwhile, Paul Klein left his post June, 1984, as corporate senior vp and president of the Los Angeles-based Playboy Channel to form the competing HiLife pay cable network.

In early 1985, Playboy execs announced the channel would begin airing older, nonsex-oriented features to broaden its appeal, and they said the company would invest $30 million on original programing and promotion for the channel. The promotional effort includes a $3.2 million, seven-month campaign promising "entertainment for men and women," a sign that execs hoped to bring a more varied life-style approach to the soft-core sex channel.

The cable service also hopes to expand its presence in the growing hotel pay tv market.

Providence Journal Co., Providence, R.I., is the nation's 65th largest media company with 1984 estimated media revenues of $172 million, up 18.8% from the prior year.

Media, consisting of revenues principally from the *Providence Journal & Evening Bulletin*, Colony Communications, three tv stations and *Soap Opera Digest*, accounted for 43% of total revenues of $398 million, up 23% from 1983.

Providence Journal Co.'s newspapers—the morning *Providence Journal, Evening Bulletin* and *Providence Sunday Journal*—have maintained their news dominance in southeastern New England.

The morning *Journal* circulation grew slightly during 1984 to 84,866 reported by ABC for the March 31, 1985 period. Circulation dropped 3.4% for the *Evening Bulletin* to 125,321 from the year-earlier period, and circulation for the Sunday paper was up 1.3% to 255,425.

Providence Journal Broadcasting, which operates the broadcast properties, experienced considerable change and expansion in 1984.

The two Providence radio stations operated by the company for many years—WEAN (am) and WPJB (fm)—were sold to Eastern States Broadcasting, Washington.

In joint ventures with Southland Broadcasting and Mountain States Broadcasting, PJC expanded its tv operations into the West, buying WZAZ-TV, Tucson, Ariz., and KGSW-TV, Albuquerque, N.M., in January, 1985, and started cellular radio services in Providence (Metronet) and Raleigh, N.C. (Carolinanet).

Also demonstrating expansion, the company's Providence Gravure subsidiary, based in Providence, bought a $10 million, state-of-the-art laser gravure preparation system to improve printing reproduction and trim ad lead times.

The PJC's Colony Communications cable subsidiary continued to grow in 1984 with total basic subscribers of 198,208, up 5.7%, and total pay of 200,926, up 11.6%.

Colony acquired Vision Cable Co., Pawtucket, R.I., in March, 1985, from Rhode Island Cable Television, a subsidiary of Times Mirror. The Pawtucket system has a 29,948 subscriber potential. Colony also opened in May, 1985, the Costa Mesa, Cal., system with a 34,000 subscribers potential which Colony holds in joint venture with Copley Newspapers. The joint venture expects to start up operations in the third quarter, 1985, in Cyprus, Cal., system with a potential of 13,000 subscribers.

Throughout 1984, Colony has upgraded several systems including the Woburn section of Greater Boston Cable, adding an addressable converter and building up from a 35 channel to a 58 channel capacity. The converter allows additional services like ESPN, HBO or the Disney Channel to be added by computer to a subscriber's line.

Colony got a new president-chief operating officer when Charles Townsend replaced a vacancy left by Roger R. Turner who became president of Cable Vision Industries in Liberty, N.Y. Mr. Townsend was formerly vp-marketing, United Cable Television of Denver.

A major management shift corporatewide took place in April, 1985, when Michael P. Metcalf, a third-generation Providence Journal Co. executive, was promoted to board chairman-chief executive officer following the retirement of John C. A. Watkins, who had been chairman since 1974.

Traditionally attuned to press promotion only, the *Providence Journal-Bulletin* newspapers used spot tv to call attention to its new "Sports Monday" pages wrapping up the heavy weekend sports activities. According to Leading National Advertisers, the papers pumped $170,000 into the medium to introduce the sports product last fall. Spots, prepared by Quinn & Johnson, Boston, featured New England Patriots quarterback Steve Grogan and head coach Ron Meyer.

Pulitzer Publishing, the 46th largest media company with media revenues of $256 million in 1984, up 5.8%, stepped out of its traditional business of publishing daily newspapers in June, 1985, to purchase the Lerner Newspapers, a chain of weekly newspapers.

Pulitzer, whose major property, the *St. Louis Post-Dispatch*, faces encroachment in its own market from free community weeklies, in purchasing Lerner gets 45 weeklies, four Sunday papers and three free "shoppers" rimming the Chicago area. Lerner has a combined circulation of 300,000 and minority interests in 11 suburban Chicago cable-tv franchises.

All of Pulitzer's revenues are generated by media sources. About two-thirds come from the company's two newspapers, about $132 million from the *Post-Dispatch* and $38 million from the *Arizona* (Tucson) *Star*. The remainder comes from its broadcast properties.

Lerner, which should contribute as much as $15 million in revenues to Pulitzer, became a likely acquisition target following the death of Louis Lerner in November, 1984. He was editor, publisher and sole owner.

Pulitzer Publishing is privately owned, with the majority of stock held by chairman of the board Joseph Pulitzer Jr. and other members of the Pulitzer family.

Mr. Pulitzer, now in his early 70s, is expected to retire within the next few years. Successors probably will be his brother, Michael E. Pulitzer, vice-chairman of the board, and Glenn A. Christopher, president-ceo.

In addition, Joseph Jr.'s son, Joseph IV, who is in his mid-30s, is being moved through the ranks of reporting, editorial, production and advertising departments at the *Post-Dispatch*, apparently in preparation for leadership of the company.

The company spent much of the past year trying to adjust to some of the changes it brought upon itself. Early in 1984, Pulitzer's flagship property, the *St. Louis Post-Dispatch*, switched from afternoon to morning publication and steered a path of direct competition against its old partner, the *Globe-Democrat*.

Independent publisher Jeffrey M. Gluck bought the *Globe* in February, 1984, after its previous owners, Advance Publications (S.I. Newhouse) tried to close it. Because the *Post* and *Globe* were operating under a federally sanctioned joint operating agreement, the Department of Justice intervened to expedite the sale of the *Globe*.

The *Globe* has survived as a slimmer version of its former self. Circulation dropped from more than 230,000 when Mr. Gluck took over the paper to 210,000 in September, 1984, and 201,000 for the six-month period ended March 31, 1985.

The *Globe* launched a free-circulation Sunday paper this May 5 in an effort to crack the *Post's* monopoly on the Sunday market and to muscle in ahead of the Suburban Journals of Greater St. Louis, a chain of free Wednesday weeklies. The Suburban group, owned by Ingersoll Publications of Lakeville, Conn., reportedly long had been considering starting a weekend edition.

Post-Dispatch circulation rocketed during the first three months after its move to morning and has continued a steady growth pattern. Circulation for the six-month period ended Sept. 30, 1984, was 264,721 daily, 243,500 Saturday and 479,075 Sunday.

By March, 1985, the *Post-Dispatch's* daily circulation had risen to 273,784, a 7.6% gain over March, 1984, while Sunday increased to 495,111, up 1.2% over the previous March.

Post-Dispatch officials say they are less concerned with ad competition from the *Globe* than with competition from the Suburban Journals, whose free weeklies have a combined circulation of some 827,000.

The suburban weeklies have taken most of the grocery chains' preprint advertising away from the dailies, and the *Post-Dispatch* has fought back by starting a total market coverage vehicle called *You*. The 12-to-16-page broadsheet is dropped at 500,000 doors Wednesday mornings. *You* has been struggling—officials admit it has lost money most weeks—but apparently it's considered a defensive necessity.

The area's largest grocery chain recently dropped its Suburban Journals connection and began mailing its inserts via John Blair & Co.'s ADVO-Systems. In response, the *Post-Dispatch*, which argues that the Suburban Journals are losing their grip on the grocery chains, says it is developing a new editorial package to lure other grocery chains away from the Suburban Journals.

While the *Post-Dispatch* has made gains during the past year, circulation at Pulitzer's Sunbelt daily, the morning *Arizona Star* of Tucson, is slipping. Daily circulation as of March, 1985, fell 0.08% to 80,384 and Sunday dropped 0.04% to 150,059, according to ABC reports.

One reason, perhaps, for the slight stagnation in circulation is the *Star* raised its single-copy price to 35 cents from 25 cents this January, and the Sunday paper went from 75 cents to $1 last October.

The *Star* has a joint operating agreement with Gannett Co.'s evening *Citizen*, whose circulation dropped 4.4% during the past year to 62,445 in March.

While Pulitzer's newspapers are doing well, challenges lie ahead. Newsprint costs are on the rise again, and according to Pulitzer vp, Nicholas G. Penniman, "we still don't have a good handle on labor costs at the *Post-Dispatch*." Union contracts there will expire in February, 1986.

Pulitzer got out of the big-city tv business in 1983 when it sold its St. Louis tv property to Multimedia Inc., of Greenville, S.C., in return for $8.5 million in cash plus tv stations in Greenville and Winston-Salem, N.C.

Later that year it purchased uhf stations in Fort Wayne, Ind., and Louisville, Ky., from Gannett.

Pulitzer apparently prefers to operate tv stations in midsized cities—those in the 30th to 100th largest markets. "We seem to do well with stations in that size range," Mr. Penniman says.

The most profitable Pulitzer stations are said to be WGAL-TV in Lancaster, Pa., and WYFF-TV in Greenville, S.C. Both are NBC affiliates that lead their respective markets. Pultizer's KOAT-TV in Albuquerque remains one of ABC's strongest affiliates.

RCA Corp., New York, ranks as the 4th largest media company with media revenues of nearly $2.4 billion in 1984, up 13.4% from 1983. All of the company's media dollars are generated by NBC.

Once again, NBC represented nearly a quarter of the corporation's annual revenues. Pretax earnings for NBC last year came to $218.1 million, up 40% from 1983.

All of the operating units under the NBC umbrella recorded higher profits in 1984.

The NBC-TV Network scored significant A.C. Nielsen Co. ratings gains in the recently completed 1984-85 prime-time tv season. NBC, which now has 206 affiliates, advanced from third to second position in the prime time Nielsen ratings race early last fall. It consolidated its runnerup position with the World Series last October and with its first November sweeps win since 1976, as ABC fell into the Nielsen cellar, also for the first time in nearly a decade.

NBC's owned tv stations division (five outlets) also enjoyed record sales and earnings, for the fifth straight year. The company, which did not break out results for its radio networks and eight owned radio outlets, said audience levels for the radio division continued to increase; NBC's three radio networks (NBC, The Source, Talknet) have more than 500 affiliates.

During the opening 1985 quarter, RCA reported NBC was the standout in its quarterly report, with earnings triple those of the 1984 opening period, although the parent did not disclose NBC results.

Perhaps even more important than its upsurge in prime time household ratings, NBC executives said, is the network's increasing hold on viewers in virtually all the key age, sex and income demographic breakouts supplied by Nielsen, even as CBS and ABC showed slippage. NBC executives were especially pleased with having led among adults aged 18 to 49, the category "with the greatest appeal to advertisers," and among those aged 25 to 54, an audience segment archrival CBS long has been touting as the most attractive.

Explaining how CBS can win the homes ratings race while NBC captures the total persons crown, William Rubens, NBC vp-research, says NBC's strength is among younger households containing four or more people, whereas CBS dominates among the older one and two person households.

According to Robert Blackmore, senior vp-sales, demographics, not household ratings, form the basis "for 95% or more of our advertising sales."

Besides posting household ratings gains every night of the week in the past season, led by Thursdays and Fridays, NBC boasted of dominating its rivals in ratings tallied by made-for-tv and theatrical movies and miniseries. Of the new-for-fall 1984 series that will be renewed for 1985, NBC and CBS each has two: "The Cosby Show" and "Highway to Heaven" on NBC and "Murder, She Wrote" and "Crazy Like a Fox" on CBS.

Besides "Cosby," NBC placed "Family Ties" and "The A-Team" among network tv's top 10 for the full season in household ratings, with "Cheers," "Riptide," "Highway to Heaven" and "NBC Monday Night Movie" cracking the top 20, the latter the highest rated movie package of all the networks. Seven other shows were among the season's 40 highest rated programs.

NBC, coming off a season in which it trailed prime time leader CBS by just seven-tenths of a rating point, is poised for its strongest competitive thrust in prime time in 10 seasons. Executives forecast the tightest ratings race in recent memory.

NBC, which recently unveiled its new fall prime time schedule, is replacing just four hours of weekly programing, which Brandon Tartikoff, head of NBC Entertainment, noted is "the least amount of change NBC's had in 15 years."

NBC for the first time in two years will carry the Super Bowl, also sure to bolster its Nielsen performance for 1985-86. Due Jan. 26, Super Bowl XX is pegged at a record $550,000 per 30-second commercial; last season, ABC was the first to put this event over the $500,000-a-30 (or $1 million-a-minute) plateau.

Looking beyond prime time, Tony Cervini, vp-affiliate relations, says, "Our goal is to be No. 1" across all dayparts, with Pierson Mapes, network president, adding that NBC has the best chance of attaining that unheard of goal of any network in recent years.

Mr. Tartikoff pointed to ratings leadership in Saturday morning children's programing (for the third season) and in late night by "The Tonight Show," now solidly ahead of No. 2 CBS' rerun fare. Mr. Mapes noted "Today" is giving ABC's front-running "Good Morning America" its stiffest ratings challenge in several years in the early morning daypart. NBC's evening newscast with Tom Brokaw has recaptured the No. 2 spot in that daypart from ABC (the runnerup a year ago).

That leaves daytime, whose continuing growth is "our No. 1 priority," said Mr. Mapes. A distant also-ran in the daytime race as recently as 1983, NBC has closed to about a rating point behind runnerup ABC. To narrow that gap still further, Mr. Mapes and other NBC executives have been exhorting holdout affiliates to improve clearances. CBS and ABC have daytime clearance levels of 93% and 96%, compared with NBC's 91%, so "we need 94% coverage for parity," Mr. Mapes says.

NBC's biggest daytime push, in both promotion and clearances, for the past year has been focused on "Santa Barbara," which began in July, 1984, and has until July, 1986, to make good. Having already persuaded enough affiliates to give that soap opera 96% clearance (up from 74% last summer), NBC executives hope to cajole the remaining reluctant stations for that serial as well as for Procter & Gamble's "Search for Tomorrow" and the game show "Super Password."

The NBC News operation, which occupies about 20% of the network's schedule, is out to begin operating as a profit center instead of a loss leader in the season ahead, according to Larry Grossman, president.

There will be a series of "Time Out" children's news specials in the after-school viewing span as well as "America's Almanac," NBC's 14th attempt at a weekly prime time newsmagazine. "Almanac" will have two pilots and a series of monthly on-air tryouts from August through December before its weekly bow in January.

As chairman Thornton Bradshaw and president-ceo Robert Frederick have pointed out on numerous occasions, the parent in the past four years has been emphasizing its "core businesses," entertainment, communications and electronics. In the past couple of years, Mr. Bradshaw has reiterated that NBC, given its importance to this core-businesses strategy, is not for sale.

"Our health is obviously better" than in the past four years, NBC chairman Grant Tinker told the annual affiliates convention in May. Thanks to its ratings comeback, forecast of stronger ad sales and RCA Corp.'s ongoing support, Mr. Tinker said, "We don't have to worry about people like Ted Turner casting covetous glances our way."

In radio during the past year or so, NBC sold one outlet, WRC (am), Washington, and acquired another, WJIB (fm), Boston. Early in 1984, RCA initially showed interest in a Dallas fm station, KIXK, that ABC Inc. later bought. On the management side, NBC Radio division in the summer of 1984 named Randall Bongarten, formerly vp-general manager, WNBC (am), as president.

Home video, a potential ad medium of the future, represented a growth area for RCA, both in terms of hardware sales of videocassette recorders and in software sales of prerecorded videocassette titles here and abroad. Income for 1984 was hurt by the special provision of $175 million,

Reader's Digest Assn., Pleasantville, N.Y., is the country's 57th largest media company, with 1984 U.S. media revenues estimated by ADVERTISING AGE at $204.5 million, up 1% from 1983's estimated media revenues.

The company's media revenues are derived from its flagship monthly, *Reader's Digest*, and Source Telecomputing, the personal-computer electronic information service. It is estimated the *Digest* provided 95% of domestic media revenues; it also produces considerable revenue from its foreign editions.

For 1984, advertising revenues for the U.S. edition of *Reader's Digest* rose 10.1%, to $111.9 million, while advertising pages rose 4.3%, to 1,076. Through the first six months of 1985, ad pages were down 1.9%. As of the six months ended Dec. 31, circulation stood at 17,866,798, down 0.4% from the year earlier period, continuing the decline that began in 1983.

The past year has been one of digestion for Reader's Digest Assn., as it assimilates and adjusts to the sweeping changes at its highest levels that took place in May, 1984. At that time, George Grune became chairman-ceo, Richard McLoughlin vice-chairman/publisher and William Cross president-chief operating officer. These moves followed the replacement of editor-in-chief Edward Thompson by Kenneth Gilmore.

The changes, just after the death of co-founder Lila Acheson Wallace, shone a bright spotlight of publicity onto the usually low-profile company; articles characterizing the changes as "upheaval at the top . . a fight over philosophy . . . intrigue behind the ivy" appeared in such publications as the *New York Times* and *Fortune*.

Since then, the company has been working hard to reshape operations to conform more closely to its new top executives' philosophies and practices.

There have been several changes in personnel at key posts. Lynn Mapes was named vp-associate publisher and Richard Murray became vp-advertising sales director.

Among the other steps taken at the company's various and far-flung worldwide operations were: Closing its Philadelphia sales office; opening one in Washington; closing its Madrid-based Spanish subsidiary; discontinuing its educational division, which marketed *Reader's Digest* Software; shutting the Original Print Collectors Group, a direct mail catalog operation, and reducing marketing efforts aimed at increasing subscriptions among blacks in South Africa, while at the same time giving advertisers rebates when circulation in that country did not match figures projected to include growth among black readers.

In the advertising, marketing and promotion areas, there were several developments. Effective with last January's issue, advertisers in *Reader's Digest* are being offered a "perfect" half-circulation A/B split run, at half the regular page rate. *RD* execs are implementing a program to attract marketers' tune-in advertising, tied to specific tv miniseries and other "event programing." That included, for example, Procter & Gamble and NBC's "A.D." and Bristol-Myers and CBS' "Do You Remember Love."

The tune-in advertising, in the form of multipage ads, is of a type that usually would appear in *TV Guide* or daily newspapers, thus representing new opportunities for *RD*.

In the Latin American market, a new total Spanish-language circulation rate base of 1,555,000 is being presented to advertisers, covering 10 editions and offering discounts as high as 40%.

Reader's Digest changed agencies for its trade advertising twice, to follow James Parry as he changed agencies, first from Posey, Parry & Quest to Henderson Friedlich Graf & Doyle, and then to James Parry Inc. from HFGD.

Mr. Parry also is working on a corporate campaign for the parent Reader's Digest Assn. And *RD's* single-copy sales account was moved, too, to *TV Guide*, which now handles accounts of other publications, from Select Magazines. *RD* in April marked the 30th anniversary of the acceptance of advertising in its U.S. edition.

In other areas, Reader's Digest Assn. is expanding its entertainment unit, which produces tv programing, into feature films. And it has signed a cooperative agreement with Metropolitan Life Insurance Co. for the latter to sell insurance to *RD* subscribers.

RKO General, a subsidiary of GenCorp, Akron, O., the nation's 59th largest media company, had estimated 1984 media revenues of $200 million, up 13.8% from 1983. Media revenues represented 53.9% of total revenues in 1984 of $371 million, up 10.6%.

RKO's parent, GenCorp, renamed from General Tire & Rubber two years ago, had total net revenues of $2.7 billion in 1984, up 8% from 1983.

RKO consists of divisions in tv and radio broadcasting, soft drink bottling, theatrical production for pay tv, motion picture productions, hotel development and management, airline transportation, and data and information transfer systems.

RKO recently announced the sale of its radio networks to United Stations Radio Networks, New York-based producer of network radio programs partly owned by entertainment entrepreneur Dick Clark. Terms have not been disclosed, but it is believed RKO's asking price was about $20 million. RKO Radio Networks supplies programing and advertising to about 1,500 radio station affiliates. The sale was precipitated in part by trouble encountered by the company last year when it was disclosed that RKO had overbilled advertisers by some $7.9 million.

The network sale will have no impact on RKO owned and operated stations, says Steve Ellis, vp-communications.

The company spent a good deal of time extricating itself from the internal and credibility problems created by the highly publicized overbilling, which led to the resignation of three top executives of RKO Radio, including president Thomas Burchill. His replacement, Jerry Lyman, was elevated from vp-general manager of RKO's WGMS (am, fm) in Washington and vp-governmental relations. The overbilling also has become an issue in RKO license renewal hearings for its radio and tv holdings before the FCC.

Elsewhere among radio properties, RKO's WRS (fm) in New York and WAXY (fm) in Fort Lauderdale, Fla., became ratings leaders in their respective markets.

Tv also produced "exciting" results for RKO, Mr. Ellis says. WOR-TV, New York, enjoyed ratings increases primarily because of the improved performance of the New York Mets, whose games are televised by the station.

RKO Pictures also finished production of two films to be released later this year—"Mesmerized," featuring John Lithgow and Jodie Foster, and "Plenty" featuring Meryl Streep and Sir John Gielgud. RKO also is attempting to market films on home videocassettes. Growth has been as slow as expected because of the competitive market, acording to Mr. Ellis.

In other nonmedia areas, Frontier Airlines, which continues to perform poorly, is on the block. The air carrier lost $9 million last year, only a slight decrease from the $9.9 million loss in 1983. Mr. Ellis blames tight competition in the Denver hub of operations and the cost of fuel for the poor showing.

RKO Bottlers posted a record net revenues of $171 million during the year. It acquired the Pepsi-Cola Bottling Co. of Dover, O., its 10th bottling franchise, during the year.

RKO General chairman-ceo Thomas F. O'Neil retired in 1984 and his son, Shane O'Neil, 37, has taken over his duties, although with the title of president.

† Indicates gross ad revenues were estimated by company sources and/or Advertising Age

Rogers Cablesystems had consolidated gross revenues in 1984 of $134.9 million, a decline of 3% from 1983, ranking the Toronto-based company the 81st largest media company.

The decline is attributed to a major internal reshuffling that took place in 1983. It affected 1984's operating income which showed a 44% decline, to $31.8 million. Ad revenues, an emerging revenue stream, sprinted ahead 30% over 1983.

Ad revenues are expected to grow another 20% this year. Also in 1985, the company is emphasizing increasing the number of subscribers to basic service in the U.S. and the number of pay subscribers in Canada.

This growth plan is a new program for the company, which has stabilized after a 1983 restructuring, according to Phil Lind, president of Rogers U.S. Cablesystems. While Rogers' basic service succeeded in the U.S. in 1984, pay service continued to be a tough sell in the Canadian market, Mr. Lind says.

It was only two years ago that the Canadian government permitted the selling of pay tv services. Public approval has been equally slow in coming. Whereas 80% of the Canadian population receives basic cable, only 15% opts for pay service. There are two primary reasons: Canadian government requirements regarding content and expenditure (40% of programing content and 40% of an operator's budget must be devoted to Canadian productions) and lack of legal access to more and better U.S. services.

It is expected, however, that before yearend these constrictive regulations will go the way of the 4% limit on increases for basic service, which was rescinded in September, 1984. Rogers now has pending rate increases averaging 10% targeted for several of its larger Canadian systems.

In the U.S., Rogers consists of two divisions, Rogers U.S. Cablesystems and Rogers UA Cablesystems. According to Mr. Lind, Rogers U.S. Cablesystems generally operates newer systems mainly in the northern U.S., whereas Rogers UA Cablesystems operates the older systems in the southern half. Both companies are wholly owned by Rogers, but they are legally separate and have different corporate structures.

Concerning the poor showing in fiscal 1984, Mr. Lind says that "to make comparisons with 1983 figures is not useful because of the major changes that have occurred." Gross income per subscriber, on the other hand, averaged $268.32 a year, up from $239.78 for Rogers U.S. Cablesystems and $184.43 for Rogers UA Cablesystems in 1983.

Rogers, which serves about 500,000 basic subscribers in 16 states, in 1984 signed an agreement with Zenith Electronics Corp. to wire San Antonio, Tex., with a two-way cable system. The system became operational in March, 1985. Subscribers can order special pay-per-view programing and respond via cable to survey questions. New converter boxes are being connected at the rate of 10,000 a month, and surveys show subscribers use the services frequently.

Other locations Rogers now serves with two-way cable are Orange County, Cal.; Minneapolis and Portland, Ore. Mr. Lind believes these addressable cable systems are the wave of the future in the cable industry.

In addition to addressable systems, Rogers' is paying close attention to cost-cutting and boosting ad revenues. Because Rogers is now almost a purely operational company and has completed its construction phase, Mr. Lind says he expects the number of employes to decrease, although he declined to indicate how many employes he has now or what the drop will be.

He also says there is great potential for increased ad revenue. By late 1985 or early 1986, he expects the cable system to be spending about 10% more promoting itself in its various markets.

Sammons Communications, Dallas, the nation's 88th largest media company, posted an 11% increase in the number of basic cable tv subscribers in 1984 and a 23% increase in the number of pay subscribers to record estimated media revenues of $113 million, up 20.2% from 1983.

With 661,329 basic and 598,000 pay units, Sammons, a wholly owned subsidiary of the privately owned Sammons Enterprises, is the nation's 12th largest multiple system operator, the same position it held in 1983.

The cable company has for a number of years concentrated on consolidating its properties rather than seeking new franchising not contiguous with existing systems.

However, Sammons is prepared to act when it finds a good purchase, says Jim Rosene, company spokesman, noting Sammons made a major acquisition in 1984, buying the system serving Pascagoula, Miss. Previously run by Gulf Coast Cable, the system serves 19,000 basic subscribers.

In other areas of the South, Sammons is consolidating operations. In 1984, Sammons acquired from Warner Amex Cable Communications the systems serving Dumas and Sunray in the Texas Panhandle—near other Sammons systems in that area. Sammons also concluded the purchase from Storer Cable Communications of a number of small systems in the Fort Worth area. These Texas systems represent 58,000 new basic subscribers for Sammons.

The Fort Worth system has two-way capability. Subscribers may bank, pay bills, receive Dow Jones information and obtain numerous other services through their cable system.

Mr. Rosene says this service is priced about the same as Sammons' other systems.

Sammons continues to emphasize addressability, providing specific programs and advertising to designated markets. Such a system was tested in portions of Sammons' Pleasantville, N.J., market.

Mr. Rosene says the test was conducted to establish the office and technical procedures for contending with the complexities of an addressable system.

Scripps Howard, Cincinnati, the nation's 18th largest media company, continues to solidify its properties in many of its highly competitive markets. The company has embraced a more modern image to back that effort and to complete a corporate reorganization that began in 1984.

The 106-year-old company had media revenues in 1984 of $829 million, up 10.4% from 1983, ranking Scripps Howard the nation's 18th largest media company.

Media consists of newspapers from privately held E.W. Scripps Co., Cincinnati, with estimated revenue of $700 million, up 7.7% in 1984, and tv, radio and cable from Scripps Howard Broadcasting, Cleveland, a publicly though tightly held company with revenues in 1984 of $118 million, up 17%, and net income of $18.2 million, up 3%. Cable revenues of $11 million increased substantially over last year—up 76.6%.

While E.W. Scripps Co. remains the legal name for the holding company of more than 70 media-related businesses, the company is pressing its case to be known to the public as Scripps Howard, sprucing up the lighthouse-beacon logo into a more stylized version, and dropping the hyphen in the trade name.

The largest enterprises under the Scripps Howard umbrella are its 14 daily newspapers, with a combined circulation of 1.4 million daily and 1.6 million on Sundays. It also has 21 nondailies, located in California, Florida and Kentucky, with a combined circulation of more than 565,000.

Heated competition continues between Scripp's largest paper, the *Rocky Mountain News*, and the *Denver Post*, owned by Times Mirror Co. The tabloid-sized *News* holds a strong lead in the daily competition—317,638 to 234,303—and a narrower Sunday spread of 366,003 to 354,406, according to the Sept. 30, 1934 ABC auditing period. The *News* circulation has been steadily increasing. Its March 31, 1985 daily circulation according to ABC was 329,381, up 3.2% from the corresponding period in 1983, and the Sunday paper circulation was 385,807, up 4.7%.

The *News* has invested heavily in expanding news coverage to maintain its lead. *News* staff is 60% larger than four years ago.

It is local news coverage that the *Post* itself stresses in its advertising directed at the *News*, which bears the image of the "local" paper mainly because the *Post* more recently fell to outside ownership (Los Angeles-based Times Mirror Corp). "There's more Denver in the *Post*" is the theme of its current tv and radio campaign in pressing the *Post's* own case for local flavor.

A $14 million addition is being added to the *News* building in downtown Denver, making more than 95,000-sq.-ft. available for business and editorial offices by October.

Scripps Howard strategists say they expect weekly papers to eventually expand into dailies in high-growth communities. Scripp's *Stuart* (Fla.) *News*, for instance, a former weekly, now is published seven days a week. Three nondailies, in Destin, Fla.; Jupiter, Fla., and Bardtown, Ky., now are published three times a week.

Contributing to its print media revenue is Scripps Howard's wire service, subscribed to by more than 100 newspapers. The wire service's Washington bureau is among the largest in the country, employing 40 reporters, editors, editorial writers and columnists. James Wieghart, former editor of the *New York Daily News*, joined Scripps Howard as national political correspondent last July.

United Media, New York, oversees United Features Syndicate and Newspaper Enterprise Assn. divisions. Those agencies employ, among others, advice columnist Miss Manners, investigative reporter Jack Anderson and editorial cartoonists Mike Peters and Ben Sargent, both Pulitzer Prize winners.

Comic strips such as Garfield and Peanuts have been successful for United Media. Peanuts characters, such as Charlie Brown and Snoopy, have been featured in 27 tv specials since 1965.

Another Scripps' division is Berkley-Small, Palestine, Tex., the nation's leading newspaper circulation supply house, providing promotional, management and circulation ideas for 10,000 publications. Scripps' Medina, O., plant manufactures printing presses and coin-operated newsracks.

Scripps Howard purchased Cordovan Corp. in 1980. That company publishes local business journals in 12 cities (with a combined circulation exceeding 200,000), along with four monthly magazines: *Texas Fisherman, Western Outfitter, Horseman* and *Jet Cargo News*.

Scripps Howard has sponsored the National Spelling Bee since the 1920s and several awards for journalism excellence, including the Ernie Pyle awards for human interest reporting.

Scripps Howard Broadcasting Co., the company's tv and radio broadcasting arm, has been publicly held since 1963. E.W. Scripps Co., however, owns most of the stock, increasing its 77% holdings last year to 80%. Under this arrangement, the parent company can include Scripps Howard Broadcasting on its consolidated tax return and is not obligated to pay a dividend tax for its subsidiary.

Both companies share many of the same directors and executives through the Scripps Howard Central Management Fund.

Scripps Howard Broadcasting operates five vhf tv stations, two uhf stations, three am and four fm radio stations. It owns 10 cable tv systems and has partnerships in three others located in: Bridgeport, Conn. (50% interest); lower Fairfield County, Conn. (49%), and Ann Arbor, Mich., (50%).

Because of the change in FCC broadcast ownership rules allowing greater accumulation of properties, Donald L. Perris, president-ceo, Scripps Howard Broadcasting, says the company is seeking additional tv and radio stations.

Scripps' newest station, KNXV-TV, Phoenix, began operating under the Scripps Howard name Jan. 11, when the FCC approved the transaction. The uhf station was bought for about $26 million, including a covenant not to compete, from New Television Corp. of Phoenix. The covenant prohibits the seller to use the sale money to start a station which would compete with the station just sold.

However, Scripps was ordered by the FCC to divest itself of Phoenix radio stations KMEO (fm, am) within 18 months. This is to comply with FCC regulations prohibiting ownership of both radio and tv stations in the same area. Scripps has filed a petition for reconsideration of the order.

To expand its tv audience in Tulsa by 15%, station NBC affiliate, KJRH-TV, in partnership with another local station, completed construction in October, 1984, of its 1,839-ft. transmitter.

To finance construction of its Sacramento cable system, Scripps arranged for a $100 million revolving credit facility with a group of banks. This was after Scripp's exercised its option to terminate the interest of Charles F. Dolan and his Cablevision Systems Sacramento Corp. in the Sacramento system.

Mr. Dolan's maneuvering was credited with having won the contract when he submitted his bid with Scripps Howard to wire the 350,000-home area. Scripps Howard and Mr. Dolan's company each owned 47.5% of the Sacramento cable package. A group of local investors owned the rest.

The Sacramento system when completed will have 3,000 miles of cable, making it one of the largest urban cable systems in the country. Scripps has estimated $125 million will be spent to complete construction of the system, scheduled for 1989.

The Seattle Times Co., Seattle, is the nation's 72nd largest media company, with an estimated 11% increase in revenues in 1984 to $150 million, all from newspaper properties.

The Seattle-based Blethen family continues to own 50.5% of the company's voting stock; the balance is owned by Knight-Ridder Newspapers, which also owns 65% of an issue of nonvoting stock.

Frank A. Blethen, who at 39 became publisher in March, 1985, following the death of W.J. (Jerry) Pennington in a boating accident, says there are no plans for any change in the control of the company.

The evening *Times'* six-month average circulation as of March 31, 1985, according to ABC, was 227,844 up from 226,038 for the period a year earlier.

The morning *Seattle Post-Intelligencer*, a Hearst Corp.-owned paper that the *Times* circulates under a joint operating agreement, has increased its circulation from 192,494 to 196,996 for the six-month period ended March 31, 1985, according to the ABC. The combined Sunday edition had a circulation of 477,307, up from 473,155 for the 1984 period, according to ABC.

The *Times* leads in most zones in the primary market area, and the combined penetration of the *Times* and *P-I* is among the highest for any major metropolitan area, Mr. Blethen says.

Ad volume, which weakened somewhat in 1983 because of a slow economy in the Pacific Northwest and the impact of joint operations with the *Post-Intelligencer*, has begun to increase. *Times* ad volume rose 5.1% in 1984, the *P-I*, 19.3%, and the Sunday paper 5.7%, for an over-all increase of 11.2%.

First-quarter linage in 1985 increased 9.5% at the daily *Times*, 18.2% at the *P-I* and 14% for the Sunday paper, a combined product for which the *P-I* has four news pages.

Mr. Blethen says the joint operating agreement, two years old in May, 1985, is going well. "The circulation and linage numbers speak for themselves," he says. "More important, both papers have put more into improving the product." The *P-I*, for example, assigned a reporter exclusively to covering developments on the countries that line the Pacific ocean, and the *Times* has followed suit. "It's obvious that rather than banking the savings [from the joint operating agreement] the *P-I* has allocated larger resources to its daily newspaper," Mr. Blethen says.

The *Times* increasingly is emphasizing service to advertisers. Last August it increased the frequency of its total market coverage product (*A Slice of the Times*) from monthly to weekly and the paper (with a circulation of about 290,000) is now anchored by Pay'n Save Corp., one of the region's largest retailers. On Jan. 1, the *Times* boosted from weekly to daily the frequency of its zoned edition for Bellevue, where the *Times* faces strong competition.

The company also has begun to revitalize its locally edited Sunday magazine, *Pacific*, which lost most national advertising to *Parade* (included in the Sunday package) when the joint operating agreement began. First-quarter linage at *Pacific* rose 125% from a small base, reports the paper. The magazine has attracted several new local retailers, including Nordstrom. "We've made a commitment to a quality Sunday magazine," Mr. Blethen says.

As for diversification, "We are always interested in other newspapers," Mr. Blethen says, "but we don't put a lot of energy into it," primarily for lack of available properties. The company does not plan to diversify out of newspaper-type operations into broadcasting. "That would dilute our management focus."

The company recently began offering Data Times, a research service that puts the years of newspaper coverage on-line for electronic retrieval. And the company is keeping a close eye on Knight-Ridder's experiment with videotex.

H. Mason Sizemore Jr., Times president, says: "We want to keep an eye on the leading edge—how to get a product to readers and to service advertisers. There is nothing definite yet, but we won't get caught surprised."

Even as a new face in the media business, SFN Cos., Glenview, Ill., ranked as the 79th largest media company in the nation in 1984. But as quickly as SFN entered for the first time the 100 leaders' chart in 1984, it may exit in 1985.

Long known as a leading publisher of educational and professional materials, SFN in 1983 became a communications company as well. Although educational publishing continued to contribute 60% of SFN's net revenues, which in 1984 exceeded $320 million, media made a strong first showing, totaling $140.2 million for SFN's broadcast and print holdings.

SFN had been reporting on a fiscal year that ends April 30. However, because the company went private in January, full-year estimates are based on projections of the unreported fourth quarter. Starting next January, SFN will report on a calendar-year basis.

But just as quickly as SFN made its move into media it began divesting the properties at a good profit. Within a week's span in early June, 1985, the company announced it would sell its WFTV, the ABC-affiliate in Orlando, for $185 million to Cox Enterprises Inc., Atlanta—$60 million more than it had paid for the station in 1984. Then it announced it would sell *New York Law Journal* and its weekly companion publication, *National Law Journal* to Price Communications, New York, for $20.5 million, for a $4 million-plus profit.

SFN's foray into media commenced when John R. Purcell took office as chairman-president Nov. 1, 1982. By the end of June, 1983, the former CBS and Gannett Co. executive had completed SFN's first acquisition, the purchase for $16.5 million of ABC Industries, parent company of New York Law Publishing Co., the leading member of the legal publishing field that is now being sold.

SFN also agreed on June 30, 1983 to purchase Broadcast Advertisers Reports, a database publisher of advertising/media-related information. BAR, which cost SFN $24 million, marked the company's entry into database retrieval. The end of 1983 saw the acquisition of yet another media property, Biomedical Information Corp., a medical publisher, for $30 million.

If 1983 was SFN's year for print purchases, 1984 was its year of the broadcast acquisition. Starting in January, SFN sought to acquire Western Broadcasting Co., a private owner of three tv and three radio stations, as well as a Spanish-language program production company. The deal was finalized June 27, 1984, for $116 million.

Next came the purchase on July 15, 1984, of ABC affiliate WFTV, the No. 1 station in the growing Orlando market, for $125 million. That station, which is being sold by SFN, is No. 1 in news and other local programing and most daypart programs in Orlando, but its revenue stream has been affected by ABC Network's poor ratings performance beginning last fall.

During the height of the company's media acquisition spree, the investment community got involved.On Aug. 23, 1984, an investment group led by E.M. Warburg, Pincus & Co. and Drexel Burnham Lambert offered $425 million for SFN. E.M. Warburg, *et al.*, already owned 9.4% of SFN's common stock. The recent broadcast purchases alone required funding of about $270 million, and the proposed leveraged buyout would provide SFN with the necessary loan collateral.

Indeed, once the dust had settled and the SFN board had voted, company stock rose by $3 a share on the New York Stock Exchange the next day. The only dissenting votes were those of the founding Scott and Foresman family descendants.

But before the stockholders' meeting could finalize the buyout, another player, greeting card marketer Hallmark Cards, Kansas City, Mo., laid its cards on SFN's table and ended up with a 30% share of the company through a $50 million investment. The final buyout is valued at $470 million, of which 40% of SFN is owned by Warburg, Pincus & Co. and its affiliates, 15% by Drexel Burnham Lambert, 30% by Hallmark Cards and 15% by SFN's senior management.

The 30% Hallmark stake underscores that company's plans to diversify into specialty publishing, broadcasting and other areas, such as its recent purchase of the Binney & Smith crayon company. Whether Hallmark decides to increase or sell its share of SFN remains to be seen, as well as the long-term plans of the company's other investors.

SFN still is pursuing other media properties. Pending are a broadcast acquisition in the $60 million-to-$70 million range, as well as two smaller broadcasting transactions, and the potential purchase of a database publisher, according to Mr. Purcell.

SFN's primary interests are in tv and professional database publishing, according to Mr. Purcell. He says there are no plans to expand on the radio front, and magazine buys are basically complete, "unless something very attractive comes along."

In the broadcasting area, Mr. Purcell sees SFN's greatest opportunity for growth in the Hispanic market. Through its ownership of the top-ranking tv station in San Juan, WAPA-TV, and Televicentro Films Inc., Puerto Rico's biggest program production and sound recording company, and because the Hispanic population is a growing segment in the U.S. and abroad, "I would say our greatest expansion opportunity is in the Hispanic programing area for distribution worldwide," Mr. Purcell says.

A new division, SFN Communications, has been formed to look after the company's broadcast holdings under the leadership of former CBS Broadcast International executive Sherman C. Wildman and WFTV-TV alumnus Walter M. Windsor, who became president and chairman, respectively.

Another media property earmarked for potential growth is BAR, SFN's Darby, Pa.-based database company that provides national and local advertising activity and expenditure information to advertisers, agencies, stations and networks, and its Radio TV Report division, which supplies the country's ad agencies and advertisers with photoboards. Mr. Purcell says he plans to expand SFN's database retrieval business beyond radio and tv monitoring. In an interview (AA, Feb. 13, '84) Mr. Purcell said, "We'd like to cover other media. For example, direct marketing. There isn't a whole lot of information [currently] as to who is spending what on what."

The properties acquired from Western Broadcasting form the largest portion of SFN's broadcast holdings. Included are three radio stations, all in Montana; two vhf Georgia tv stations, which are the ABC affiliates in Columbus and Augusta; an independent vhf tv station in San Juan, and the program production company Televicentro Films.

Storer Communications, Miami, is the 24th largest media company in the country, with revenues of $536.8 million in 1984, all generated by the company's cable tv and broadcast operations.

Revenues may have been up 17% from 1983, but the bottom line was a lost $16.7 million in 1984, compared with a loss of $39.6 million in 1983. Although Wall Street expects Storer to be back in the black this year, 1985 has been tumultuous for the company.

Just as a two-year restructuring plan designed to keep the company afloat appeared to be paying off, in March a group of dissident shareholders waged a campaign to elect a rival slate of directors to the company's board. If elected, the candidates vowed to liquidate the company for an estimated $2 billion, which they planned to distribute to company shareholders.

Hoping to thwart the pending proxy fight, Storer agreed in principle to a leverged buyout by a corporation to be formed by Kohlberg Kravis Roberts & Co., a New York investment banking company. *(See Kohlberg Kravis Roberts & Co. profile on Page 39.)*

The buyout plan called for each share of Storer common stock to be converted into $75 in cash, $25 face value of preference stock, and warrants to purchase common stock of the new company. Based on Storer's 16,446,785 shares outstanding, the transaction has an indicated minimum value of $1.64 billion.

As it turned out, the dissident group —New York-based Coniston Partners, which owns 5.3% of Storer—won four of the nine seats on Storer's board. The Coniston board members said they supported the proposed leveraged buyout agreement with KKR but they would seek higher bids. However, Storer executives needed to maintain only a majority control of its board of directors to complete the deal, and therefore it is expected to go through.

The definitive agreement calls for Storer to merge with KKR Holding Inc., a corporation recently formed by KKR. Storer's management would continue to run the organization.

An overzealous plunge into cable tv franchises strapped Storer with $1 billion in construction expenses over the past several years, forcing the company to become so heavily leveraged that "we were sweating out the vernacular bullets," says Peter Storer, company chairman and son of founder George Storer.

But to the amazement of many analysts, an equally zealous bailout plan had begun to turn the company around in just 24 months. Because of streamlining and improved sales in its cable tv division, Storer earned $6.4 million during the last quarter of 1984, it's first profitable quarter in almost two years. "The strides Storer has made forward are remarkable," says Peter Falco, an analyst with Merrill Lynch & Co., New York.

Such impressive improvement is what spurred Coniston Partners to push for liquidation. Keith R. Gollust, one of the group members, says, "Previously, it would have been difficult to realize a good return for Storer's assets. Their improvement, coupled with recent deregulation in cable and broadcasting, now makes these prime properties."

The company's turnaround plan consisted of selling 24 cable systems that served 165,900 subscribers, or 10% of its subscriber base. These sales enabled Storer to recoup $185 million.

The second corrective move was to focus on marketing and to squeeze more dollars out of the systems Storer kept. In 1984 Storer averaged cashflow margins of 36.5% (of revenues) on its cable systems, up from 29% in 1983.

Despite the sales, Storer remains the country's fifth largest cable operator. The company is also a major player in the broadcast tv business, with seven stations. However, many analysts criticize Storer for having never made the most of these properties. "They don't have tremendous depth of middle management. As a result, their broadcast stations have always been in the sluggish 30% [cash flow as a percentage of revenues] range," said Tony Hoffman, an analyst at Cralin & Co., New York.

Taft Broadcasting Co., the first company to reach the FCC's new limit of 12 tv station properties, was the nation's 66th largest media company in 1984 with media revenues of $171.5 million, up 21.8% from 1983.

Cincinnati-based Taft agreed in February, 1985, to purchase the five tv stations and seven radio properties of Gulf Broadcast Co., Dallas, for $760 million. The company then turned around and struck a deal with CBS to buy five radio stations—three of the Gulf stations and two Taft-owned stations. FCC approval was granted on the first in June and is pending on the second.

Taft, whose media properties represented 37.8% of total revenues of $453.8 million in 1984, now owns 10 vhf and two uhf stations, pumping its coverage of the U.S. market from 9% to 15%.

Electronic Media recently reported Taft estimated 1985 revenues for the Gulf tv station acquisitions: CBS affiliate KTSP-TV in Phoenix, $17 million; ABC affiliate WTSP-TV, Tampa, $16 million; KTXH-TV, a Houston independent, $8.6 million; KTXA-TV, a Dallas-Fort Worth independent, $7.5 million, and ABC affiliate WGHP-TV, Greensboro-Winston Salem-High Point, N.C., $4 million. The Gulf radio stations are projected to earn annual revenues of $11 million to $12 million.

Gulf stations purchased were WKLS (am, fm), Atlanta; KTXQ (fm), Dallas-Fort Worth; KLTR (fm), Houston; WNDE (am) and WFBQ (fm), Indianapolis, and WLTT (fm), Bethesda, Md. But in February, to comply with FCC regulations prohibiting one company from owning both tv and radio properties in the same market, Taft retained First Boston Corp. to sell five radio properties (three from the upcoming Gulf acquisition and two currently Taft-owned stations).

CBS in May, agreed to buy the five stations—KTXQ (fm), Dallas-Fort Worth; KLTR (fm), Houston; WSUN (am) and WYNF (fm), Tampa-St. Petersburg, Fla., and WLTT (fm), Bethesda. The sale will bring Taft $85 million.

Taft Broadcasting Co. is both a communications and entertainment company. It primarily is involved in commercial tv and radio broadcasting, production of animated and live-action programing for tv and distribution of programing for tv, cable and home video.

The company has smaller interests in themed amusement parks in Canada and leisure-time properties. Together with Tele-Communications Inc., Taft owns 16 cable tv systems.

The 1984 sale of its three domestic theme parks for $167.5 million to Kings Entertainment Co. (a group of investors that includes executives from Taft's Attractions Group) will help finance Taft's recent acquisitions. The company's fast-action buying and selling has caused much speculation among industry analysts.

After a quick rise from the amusement parks sale, Taft's stock still was estimated by Paul Kagan & Associates, Carmel, Cal., to be undervalued. Shares were selling at about $68, whereas Kagan, which publishes "Broadcast Investors" newsletter, estimated Taft's "previous market value" at about $89 a share. That started rumors that the company was a desirable acquisition target until the $760 million Gulf property price tag. Now speculators say Taft is too indebted to be a serious takeover candidate.

"Nobody was or is trying to buy us out—no offers, at least. And we have no plans to go private," a Taft spokesman says, adding the "company strategy is to grow as a leading group broadcaster, and that's why we acquired the Gulf stations. This is our core business. We are expanding in the area we know best."

Beyond traditional broadcast techniques, Taft's teletex newspaper is being transmitted over WTBS-TV, the Turner Broadcasting station in Atlanta. Taft's ad-supported World System Telecast will be the only national world-based teletext operation in the U.S.

In the entertainment field, Taft is producing original tv programs with other broadcast groups. The most recently formed is the New Program Group, which puts Taft in partnership with Gannett Co., Washington; Hearst Corp., New York; Metromedia, New York, and Storer Communications, Miami. The stations have banded together to produce situation comedies, tv series, movies that will be broadcast over stations owned in the group (making up 45% of the market) and other programing.

As the leading supplier of animated programing to network tv on Saturday mornings, subsidiary Taft Entertainment Group attracted Fred Silverman to move his InterMedia Entertainment last summer from MGM-Television/-UA to the Taft subsidiary's Los Angeles offices.

Taft Entertainment and Mr. Silverman's company were to create and develop animated projects along with other family-type programs.

Other established talent the Entertainment Group has garnered recently is Ed Weinberger, formerly associated with "The Mary Tyler Moore Show" and "Taxi." He also co-created and cowrote the pilot for the current NBC hit "The Cosby Show." Mr. Weinberger has an exclusive deal to create, write and produce tv programing and feature films for Taft Entertainment.

The subsidiary also hired Richard Klinger, most recently programing vp at RCA Video, who was executive producer of the four "Jane Fonda's Workout" tapes and discs. Mr. Klinger will develop, package and produce home videos as well as pay tv and music videos.

Cable	449	347	29.4

Tele-Communications Inc., the nation's 26th largest media company with all-media revenues increasing 29.4% in 1984 to $449.4 million, attributes its gains to aggressive acquisition, expansion and improved service in its cable systems.

Denver-based TCI, the nation's largest cable tv multiple system operator, reported 1984 operating income of $107.7 million, a 27.4% increase over 1983, and earnings from continuing operations of $17 million, down 15.3%.

At yearend, TCI owned or managed cable systems serving 3.6 million basic subscribers and 2.6 million premium subscribers, increases of 29.4% and 34.2%, respectively, over the previous year.

TCI's appetite for acquisition shows no signs of abating. In the spring of 1985, TCI made a formal bid for Warner cable properties. Although interest was expressed in cable properties of New York-based Capital Cities and Storer Systems of Miami, TCI made them no formal bids.

TCI in June made an offer with Time Inc. (owner of American Television & Communications Inc., the nation's second largest cable operator after TCI) to buy Warner Amex for $750 million in equity and assumption of $500 million of Warner Amex debt. Warner Amex's own management, MTV Networks and Viacom International also are suitors.

Before 1984, TCI largely steered clear of major metropolitan markets, believing that the best opportunities had passed and that the cities were apt to impose costly franchise requirements. But 1984 saw that change with a vengeance, as TCI bought the Pittsburgh system from Warner Amex, picked up 75% of the St. Louis franchise, extended its holdings in Chicago, and became 10% shareholder in the system that won Washington's franchise. Total expansion during 1984 eventually will involve more than 1 million cable subscriptions.

Company spokesmen and analysts attributed the change in strategy to the belief that the uncabled major cities, soured by years of negotiations, would be eager to offer a profitable deal to a company with the wherewithal to string cable. Marketplace friendliness was enhanced by the passage of the federal Cable Communications Act, which largely deregulated the cable industry. The $93.4 million Pittsburgh sale, for example, was concluded in November after only seven months of negotiations—short by most standards. The deal hinged on TCI's proposals to pare back franchise promises Warner Amex had made.

The company spent $419.7 million in stock and cash for cable systems it purchased during 1984. It also spent $184.1 million on systems purchased with various partners, including Taft Broadcasting, Knight-Ridder Newspapers and Scripps Howard Broadcasting—the latter two of which TCI teamed up with to bid on Storer Communications, Miami, eventually bought out by Kohlberg Kravis Roberts & Co. (See Storer profile in this issue).

Purchases included smaller systems such as the 58,000-subscriber Complete Channel, which serves 34 municipalities in the area of Madison, Wis., and the 18,000-subscriber Hamilton, N.J., system, purchased in partnership with Knight-Ridder in July from Hamilton Cablevisions.

TCI increased its stockholdings in Denver-based United Cable Corp. from 4.8% to 19.2% by exchanging three TCI systems in suburban Denver, six in the Tulsa area and one near Papillion, Neb., for United stock. TCI also sold its Huntsville, Tex., system, consisting of 2,200 subscribers, to Texas Telecable. In all, TCI sold or exchanged cable systems for about $125 million, resulting in a net gain of $24.5 million.

In January, TCI spun off Republic Pictures Corp. Republic had been purchased in 1970 to provide the system with pay tv films. The divestiture of Republic leaves TCI holding only cable properties.

It has not been a year of unallayed success. The company was part of a consortium that owned Sports Time, the ill-fated pay cable network that operated for less than a year before being shut down in March, 1985.

And there have been legal setbacks. Central Telcommunications Inc. of Jefferson City, Mo., sued TCI for unfair business practices involving the renewal of TCI's cable contract with Jefferson City, Mo. A jury fined TCI $57 million on Feb. 22, 1985. TCI is appealing the verdict.

In September, 1984, TCI started a market and operational test in its Boulder, Colo., franchise of Data Cable's X*PRESS information service. Data Cable, a joint venture of TCI and Telecrafter Corp., feeds news, financial, sports and weather information into personal computers through the tv cable without the use of a modem. If the test is successful, TCI intends to roll out the X*PRESS service to many of its other systems in 1985.

TCI is taking a back seat in developing a system to insert local advertising into cable programing. Only 12 of its about 700 systems currently sell advertising. TCI senior vp John Sie recently said he doubts ad revenues ever will amount to more than 15% of the cable industry's gross revenues.

The company, however, seems convinced of the value of advertising its own merits. A national print campaign during 1984 with the theme "Cable is choice TV" involved 350 TCI systems in 38 states.

Privately held TeleCable, Norfolk, Va., the nation's 95th largest media company, increased revenues 26.6% in 1984 to $100 million, all from cable. The multiple system operator was a subsidiary of newspaper giant Landmark Communications until January, 1984, when TeleCable was spun off.

As of March, 1985, TeleCable had 453,000 basic and 474,000 premium subscribers in its 22 systems, located in the Southeast, Midwest and Texas.

Alfred F. Ritter, TeleCable vp-finance, says Landmark spun off the multiple system operator to allow more flexibility in finding capital for construction, system upgrading, and acquisition. Landmark has an "extremely conservative" attitude toward debt, Mr. Ritter says.

According to vice president James S. Key, "TeleCable has grown primarily through building new systems or expanding systems acquired in their early stages of development."

Nevertheless, 1984 was a quiet year, with no major acquisitions. TeleCable did expand its Lexington, Ky., system with the addition of Jasmine County. It also completed construction on its systems in Plano and adjacent Richardson, Tex. Mr. Ritter attributed the company's growth during 1984 to expansion in existing markets and, to a lesser extent, to rate increases. He also says the company is in the market for good purchases.

TeleCable executives constantly refer to the company's orientation toward providing good customer service. Mr. Ritter is careful to note, however, that there's a difference between satisfying the customer and making excessive franchise promises. "We try to find out what the customer really wants, and no one wants 108 channels," he says.

At the end of 1984, TeleCable hired a companywide manager to coordinate its entry into local advertising. By the beginning of the year, TeleCable was selling local advertising at five of its larger franchises. Each system hired local sales forces for the venture. Revenues are exceeding expectations, according to a company spokesman, who says the company is optimistic about the potential of ad sales, and that if the experiment continues to go well, it probably will be expanded.

Arthur Polizos Associates in Norfolk handles TeleCable's consumer advertising. Campaigns during 1984 used the themes "Good as Gold" and "We Guarantee It," a promotion that promised customer satisfaction or a refund.

The privately held 13-30/Esquire, Knoxville, Tenn., which expects its media revenues to more than double in the next five years, ranked 99th among the nation's leading media companies with revenues of $95 million in fiscal 1985.

Revenues for 13-30/Esquire, all of which are in media, increased 42% over the previous year and contributed to the high sense of expectancy at 13-30/Esquire where a $25 million expansion plan has been mapped out and a $10 million venture capital fund established for new product research and development.

The company is the umbrella for 13-30 Corp., a publisher of specialty magazines, and for *Esquire* magazine.

Annual growth has averaged 40% during the past several years, according to Christopher Whittle, 13-30/Esquire chairman, who anticipates the company could achieve yearly revenues of $350 million by 1989.

Esquire turned its first profit in more than a decade in June, 1984, a good part of that contributed by increased ad revenues. The magazine's gross ad revenues were $29.9 million for 1984, a 22.7% increase over the previous year, according to Publishers Information Bureau. Bringing *Esquire* into the black has been a five-year task for Mr. Whittle and his partner, Phillip Moffitt (*Esquire* editor and 13-30/Esquire president), who bought the trouble-ridden *Esquire* in 1979 when it had revenues of just $9 million and was said to be losing $5,000 a day.

When the publishing duo repositioned the magazine to appeal to up-and-coming men between the ages of 25 and 44, critics complained that *Esquire* had lost its editorial class of earlier years when the magazine showcased such legendary writers as Ernest Hemingway and Tom Wolfe.

But during Messrs. Whittle and Moffitt's *Esquire* ownership, ad page growth has been strong. With an initial ad page drop from 926 in 1978 to 400 in 1979, the total grew from 1,259 in 1983 to 1,357 in 1984, up 7.8%. The circulation had grown from 614,300 in 1979 to 739,104 June 30, 1984, according to SRDS (with subscriptions responsible for 609,933 copies and single sales totaling 129,171). That's up 1.2% from 1983, but the magazine has yet to match its record of 1.2 million copies sold in the mid-'70s.

During 1983 and 1984, *Esquire* featured a number of special issues designed to drum up public interest. The first so-called *Esquire* print event appeared in June, 1983. Called "How we lived," it featured reprints from *Esquire's* first 50 years. It was followed by "Fifty who made a difference" in December, 1983, which won the National Magazine Award for single topic issues. Then, in the December, 1984, issue, Esquire issued its "*Esquire* Register," which recognized the achievements of 300 "outstanding Americans under the age of 40."

Esquire magazine's sister operation, the 13-30 Corp., was founded by Messrs. Whittle and Moffitt when they were students at the University of Tennessee in the late 1960s. The company, named for the audience the publishers orginially set out to serve, pro-

Source: Advertising Age estimates

duced a student magazine called *Nutshell.* Focusing on this formula of creating magazines for special audiences, Mr. Whittle evolved into the strategic marketer, handling product development and drumming up sponsorship for the magazines, while Mr. Moffitt was dubbed the concept man and concentrates on *Esquire.*

The company, originally funded by friends, family and a bank loan guaranteed by a former professor, produces 23 special interest magazines. Some are single-sponsor publications. The typical deal is for a company to sign a three to five-year contract worth between $1 million and $6 million.

In the early days of 13-30, Sweden's largest publisher, Bonnier Group, was a joint venture partner. But after Messrs. Whittle and Moffitt purchased *Esquire*, they also bought back 7.5% of Bonnier's stock. The Swedish company then sold its remaining share to the London-based Associated Newspapers. This English company and 13-30/Esquire formed a $10 million venture capital fund, called the British American magazine fund, in 1984 and already have spent $3.4 million studying new properties. Projects have included an investment in *New England Monthly*, an *Esquire* Video Pilot for cable tv's Showtime and a film script for Warner Brothers.

Also key during 1984 was the unification of four media into a new division, Campus Voice Network. Mr. Whittle expects this division, which accounts for $11 million of the company's revenues, to be worth $20 million by the end of 1987. Included in the reorganization were *18 Almanac*, an annual magazine for high school seniors with a circulation of 750,000, and *Nutshell*, now published twice yearly and circulating to 1.2 million college students. These two magazines were combined into *Campus Voice*, distributed to 1.2 million high school seniors every March and to college students five times a year.

Good Stuff, an annual program in which $12 million worth of sample products are distributed to college students, was renamed *Campus Voice* Sampler; and Wallpaper Journal, a wall poster ad medium that changes every two weeks during the school year, was renamed *Campus Voice* Biweekly and will be expanded from its current 4,500 installations to 7,000 locations within three years. Bob Hanggii was named vp-publisher of Campus Voice Network and Keith Bellows is group editor. Prices for ads range between $29,800 for a black-and-white page in *Campus Voice* to $510,000 for a combined run in the various media.

Other poster ad media kicked off by 13-30/Esquire in the fall of 1984, include *Physician's Weekly*, a health magazine distributed weekly to 1,000 of the nation's largest hospitals; *Pet Care Report*, and *Esquire* Magazine's Health and Fitness Clinic. The clinic is a unit with three editorial panels and three panels of ads that are changed weekly. They are installed in 1,000 health clubs in the top 50 markets and 600 more clubs will be added next year.

Magazines introduced during the fall include *Tables*, a glossy trade magazine for waiters and waitresses; *Buy*, a monthly sponsored by Black & Decker and mailed free to more than 10,000 small appliance buyers and retailers, and *Veterinarian Practice Management*, sponsored by Ralston Purina. *Destinations*, a three-times-yearly publication, was discontinued.

The 13-30/Esquire organization operates on a decentralized basis with 650 staffers directly involved in decision making. The distribution system, which stocks and delivers publications in 100 cities, employs 200 of these people and is expected to be tripled in size in three years.

During 1985, 13-30/Esquire plans to add one women's magazine devoted to health and another covering entertainment and explore electronic media forms. It recently hired Wayne LoCurto of Richardson-Vicks Benelux countries operations as ceo to head a European branch of 13-30/Esquire to be set up in 1986.

Revenues from the U.S. operations of Thomson Newspapers Ltd., Toronto, overtook those from its Canadian newspaper properties in 1984 in ranking 34th among U.S. media companies with revenues of $320.6 million, up 13.8% from 1983.

Thomson Newspapers, whose Canadian papers contributed $312.5 million in 1984, up 10.8%, had total revenues of $633.2 million, up 14.9% from 1983, is continuing to build its U.S. newspaper franchise. At press time, the company was negotiating to buy six more U.S. newspapers to add to its 88 U.S. dailies and four weekly newspapers with total daily circulation of 1.38 million.

Lord Thomson of Fleet, chairman of Thomson Newspapers, would not reveal the locations of the six, but hinted they were in the South. He also is chairman of International Thomson Organisation Ltd., the umbrella corporation for Thomson Newspapers and for International Thomson Holdings, its trade press operation that is also profiled in this issue.

Both companies, traded publicly, are controlled by Thomson family interests: International Thomson by about 73%, and Thomson Newspapers by 60%. Figures in this report have been converted from Canadian dollars using an average annual rate of exchange for 1984 of U.S.$.78 = C$1.00.

It is slightly more than 50 years since Roy Thomson, later to become the first Lord Thomson of Fleet, bought his first newspaper, a weekly in the small northern Ontario mining town of Timmins. He parlayed this into an international media, oil, retailing, insurance and travel conglomerate, which is now controlled by his son Kenneth.

Lord Thomson makes no secret of where the future of both companies' media expansion lies—the U.S. With 39 dailies and 13 weeklies in Thomson Newspapers' Canadian base, the company probably has reached saturation point in Canada, he says. There has been public and political disquiet in Canada over the concentration of press ownership between Thomson Newspapers and Southam Inc., 50% owned by Maclean Hunter, also profiled in this issue.

Fears had been expressed that if the two were to merge, a monopoly would be created. Such an agreement is unlikely because of a difference in philosophy between the two companies.

The fundamental business philosophy of TN has been, and still appears to be, to buy small-town properties where there is no local competition; then to modernize production facilities to make them less labor-intensive. Southam operates mainly in larger metropolitan centers and most of its newspapers are strongly unionized.

The Thomson family's experiences with union newspapers in major cities have not been particularly happy. The strike at the *Times of London* and the *Sunday Times* led to the eventual sale of these titles to Rupert Murdoch's News International Ltd., after Thomson finally lost patience with such confrontations. However, as new technology defuses the power of craft unions, Thomson's entry into larger markets should not be ruled out.

The acquisitions of five daily newspapers during 1984 follow the company's pattern of targeting small-town properties. The papers and their ABC circulations for the period ended March 31, 1985, compared with the year-earlier period: *Express*, Easton, Pa., 46,795, up only 49 subscriptions; *Altoona Mirror*, Altoona, Pa., 34,775, down 3.3%; *Americus Times-Recorder*, Americus, Ga., 6,651, up 5.3%; *Post-Crescent*, Appleton, Wis., 51,232, up 88 subscriptions; *Daily Spectrum*, St. George, Utah, 13,080, up 12,7% (Sept. 30, 1984 vs. 1983). Thomson sold the *Citizen*, a weekly in Phenix City, Ala.

Since yearend, TN has bought two more dailies, the *Daily News*, Lebanon, Pa., 27,375, down 151 subscriptions, and the *Herald-Palladium*, Benton Harbor/St. Joseph, Mich., 36,288, down 245 subscriptions; and sold its daily, the *Daily Dispatch*, in Douglas, Ariz.

This net full of small fry has paid big dividends for Thomson Newspapers. During 1984, net income was $120 million for Canadian and U.S. properties, compared with $98.4 million a year earlier. TN does not break out U.S. net income, but operating income in the U.S. of $130 million compared with $108.2 million a year earlier. During that period, Canadian operating income was $85.9 million vs. $75.6 million for the year earlier.

Additionally, the company has taken some steps into vertical integration with a half-share interest with Abitibi-Price Inc. in Augusta Newsprint Co. Following a $187.2 million expansion program, the mill became fully operational last year. Thomson Newspapers appears to be set for another year of expansion in the U.S., barring any federal action on limiting foreign ownership of print media.

Time Inc., New York, is the country's 3rd largest media company, with 1984 U.S. media revenues estimated by ADVERTISING AGE at $2.576 billion, or 84% of total revenues of $3.067 billion. Media revenues rose 14.6% from $2.248 billion in 1983, or 81.7% of total revenues of $2.717 billion.

Time Inc.'s introduction of a new logo this spring—the words "Time Inc." in a simple typeface demonstrated new directions for the company.

After years of experimenting with opportunities in new technologies such as teletext and over-the-air subscription tv and branching out into related, but noncore fields such as newspapers, it's back to basics for Time.

President J. Richard Munro told the Time Inc. annual meeting April 18 that while 1985 will not be the kind of "watershed year" the company enjoyed in 1984, when it registered record revenues and operating profits, it will "consolidate the gains we've made and pick up the pace we've achieved." Much of those gains and achievements have come in the company's traditional core business—magazines.

Following a period in which the dramatic growth of Time Inc.'s video holdings overshadowed the company's magazine operations, the pendulum is swinging back. Magazine operating profit last year leaped 78%, significantly narrowing the gap between magazine and video. In 1983, video racked up $215 million in operating profits to magazines' $106 million (including a $47 million loss from the *TV-Cable Week* fiasco). But a year later, the figures were $212 million video to $188 million magazines. To further underscore the commitment to magazines, Time Inc. sold its Pioneer Press chain of suburban Chicago weeklies last October to Marshall Field V's Field Corp.

Of Time Inc.'s seven current magazine titles, the three weeklies—*People, Sports Illustrated* and *Time*—had a stellar year. *People*, in its 10th anniversary year, carried 4,063 ad pages, up 17.9%. Ad revenues reached $232.9 million, up 32.8%, while circulation for the six months ended Dec. 31 totaled 2.84 million, up 2.1%, from the comparable period a year earlier.

SI broke a record when its special Olympic issue brought in $24 million in ad revenues, the most for a single issue of any magazine. For the year, its ad revenues rose 26.1% to $230.8 million, ad pages rose 10% to 3,035 and circulation at yearend hit 2.64 million, up 7.6%.

And *Time* widened its ad and circulation leads among newsweeklies as its worldwide ad revenues topped all titles for the 15th straight year; U.S. ad revenues rose 12.1% to $335.6 million, ad pages rose 4.2% to 2,817 and circulation at year-end was 4.62 million, up 0.1%.

Fortune, Time Inc.'s sole every-other-weekly, shared in the boom for business publications, as its U.S. ad revenues reached $111.7 million, up 15.1% from 1983; its ad pages topped 3,486, up 7.4%, and its yearend circulation hit 710,141, up 2.6%.

Among the monthlies, the best performance was turned in by *Money*: Ad revenues up 35.1% to $57 million; ad pages up 6% to 1,516 and circulation at yearend to 1.51 million, up 9.6%. The monthly *Life* ad revenues rose 19.8% to $35 million, as ad pages rose 3.7% to 762; a special Olympics issue was well-received. Circulation at yearend, however, fell 4.1% to 1.45 million. The science monthly *Discover* continued the disappointing results that prompted last year's change in top management: Ad revenues down 10.4% to $10.6 million, ad pages down 14.5% to 434, though yearend circulation rose 8.1% to 977,526; the circulation rate base since has been reduced to 850,000.

To underline the magazine renaissance, Time Inc. in February made its largest acquisition ever in the field, paying $395 million in cash plus $85 million in other considerations to buy Southern Progress, Birmingham, Ala., owner of *Southern Living, Creative Ideas for Living, Progressive Farmer*, and Oxmoor House books.

Southern Progess was the 87th largest media company in ADVERTISING AGE's 1983 rankings, with estimated media revenues of $110 million in fiscal 1983. The deal, which closed in late March, brings to Time Inc. strengths in new publishing categories, such as regional, special-interest and women's.

Time Inc.'s magazine development group kept up its investigation of potential new titles. After conducting mail tests of four magazines—weeklies called *Flash, Investment Week* and *Picture Week* and a monthly called *Leisure*—the group decided last March to focus its efforts on *Picture Week.* To be tested in 13 markets for several months, starting in July, *PW* will be introduced early next year if it is received enthusiastically by readers and advertisers.

A one-shot called *Home Office*, aimed at those who work at home, was brought out in late March, solely sponsored by International Business Machines; response is being gauged to determine whether there would be further issues.

The acceleration in magazines contrasts with a slowdown in what was once Time Inc.'s big growth area, video. American Television & Communications, the subsidiary that operates cable tv systems, has continued to grow as it concentrates on owning cable systems clustered geographically, however, the system has been retarded by weakness at Home Box Office Inc., operator of the Home Box Office and Cinemax pay cable services. The rapid growth of pay tv began to slow in 1984, a situation that has continued into 1985 and has even become more pronounced. In this year's first quarter, for instance, profit at HBO fell, while ATC's rose.

Last October, the video group lost

Home Box Office Inc. chairman-ceo Frank Biondi. He was succeeded by Michael Fuchs, previously president-chief operating officer; Joseph Collins was subsequently named president. Mr. Biondi since has joined Coca-Cola Co.'s entertainment business division as exec vp.

The video group is attempting to rectify its problems via methods ranging from new ad campaigns to a new intensive direct marketing program to entering the backyard earth station market (selling pay services directly to owners of dishes or their cable systems). To cut costs and diversify its offerings to subscribers, HBO is producing more of its own programing and is renegotiating licensing agreements with the major movie studios and independent producers. On the latter front, in April, Time Inc.'s board of directors approved new agreements with Columbia Pictures and with Tri-Star Pictures (owned by Columbia, Time Inc. and CBS).

MEDIA PROPERTIES

Cable/video

Cinemax, Home Box Office, USA Cable Network (33⅓% interest). Also, American Television & Communications Corp., now divided into 22 divisions and one national division that includes many smaller communities in 21 states. The individual divisions include Birmingham, Ala.; San Diego, Cal.; Denver, Co.; Florida; Savannah, Ga.; Hawaii; Indianapolis, Ind.; Shreveport, La.; Portland, Me.; Jackson/Monroe, Miss.; Kansas City; Albany, Rochester, N.Y.; Charlotte, Fayetteville, Greensboro, Raleigh/Durham, N.C.; Reading, Pa.; Memphis, Tenn.; Austin, Tex.; Appleton/Greenbay, Wis. Included in the national division are the following states and, in parentheses, the number of systems in those states: Arkansas (one), California (five), Colorado (seven), Connecticut (one), Illinois (one), Indiana (two), Iowa (one), Kansas (five), Kentucky (four), Minnesota (three), Missouri (six), Nebraska (two), New Jersey (one), New York (one), Ohio (two), Oklahoma (one), Pennsylvania (six), Texas (one), Virginia (one), West Virginia (one), Wisconsin (two).

Times Journal Co., Springfield, Va., the nation's 98th largest media company, had 1984 media sales estimated by Advertising Age at $95.8 million, up 14% from 1983.

Privately held Times Journal predicts its Washington suburban Journal newspapers will show a profit this year for the first time since they went daily in 1981. Meanwhile, the company's other media operating division, Army Times Publishing Co., is turning out ad revenues about even with 1984, which was less than spectacular.

The *Journal* newspapers, with five separate editions for three Virginia and two Maryland communities, saw circulation rise 2% to 150,000 in 1984, according to Henry Belber, exec vp. For the first half of 1985, ad linage is up about 15%, while ad revenue has soared 28%, largely from classifieds.

Army Times Publishing Co. publishes the weekly military newspapers: *Army Times, Air Force Times* and *Navy Times.* Combined circulation remained at 320,000 in 1984. Ad linage in 1984 was up 11% and shows similar growth this year.

Federal Times, a weekly paper geared to government workers, dropped 5% in circulation to 40,000.

Company executives are considering starting a new national publication in early 1986, according to Mr. Belber, who declined to reveal any more details. The Times Journal did not begin any publications in 1984. Instead it concentrated on its *Journal* newspapers, spending $500,000 on a radio campaign by W.B. Doner & Co., Baltimore, to attract subscribers and classified advertisers.

Mr. Belber says the *Journal* will spend another $500,000 this year, using similar radio spots, which emphasize the need for daily news coverage of the suburban communities. The classified spots use testimonials from satisfied advertisers. The papers will continue with their tag line, "The *Journal.* Suburban Washington's newspaper."

The weeklies went to a weekday schedule after the *Washington Star* folded in August, 1981. Mr. Belber says no weekend editions are planned because the paper relies on mail delivery to suburban homes. Its main competitor is the *Washington Post's Weekly* suburban section, divided into city, Maryland and Virginia editions and inserted in Thursday newspapers.

Mr. Belber thinks the Journal papers finally are reaching maturity. "We're edging toward our fair share of the business, vis-a-vis the *Post,*" he says. "And the *Post* is gaining in advertising, so the pie is enlarging."

The Journal's classified advertising has jumped 41% so far this year, he claims.

Renewal rate for the papers increased to 78% in 1984, Mr. Belber says, which he hopes will not be hurt by a May, 1985, subscription increase from $32 to $39 a year.

The Times Journal Co. also operates the Times Journal Telemarketing Co., which offers a telemarketing service to outside clients such as Citicorp.

Times Journal Printing Co. prints *USA Today* regional editions, the *Washington Post's* Sunday tv guide, Times Mirror Co.'s *Sporting News* and some special sections.

Times Mirror Co., Los Angeles, passed the century mark in publishing in 1984, when it recorded media revenues of $1.98 billion, an increase of 4% over the previous year, making it the 5th largest media company.

Total revenues for the multimedia company were $2.8 billion, with $1.47 million attributed to its major business of newspaper publishing. The newspaper segment's revenues were up 16% over the previous year.

Magazines and broadcast tv ran neck and neck, both groups up 7% over 1983. The past year saw the 102-year-old *Los Angeles Times* pull out all the stops in its coverage of the Olympic Games, with Times Mirror spending $5 million to sponsor an Olympics Arts Festival. These ventures took their toll on profits, but improved ad linage helped offset expenses.

Times advertising for 1984 topped out at 213,171,000 lines, up 18% from a year earlier. The nation's longtime leader in classified, the newspaper once again asserted its dominance with 30,332,000 lines, a 24.9% increase over 1983.

Completion of new satellite plants in Orange County and in the San Fernando Valley are expected to add more productivity gains.

The new San Fernando Valley facility has enabled the *Times* to come out with a new Valley edition for some head-to-head competition with the Tribune Co.'s Los Angeles *Daily News* in the Valley and southern Ventura County. The new edition, according to Times publisher Tom Johnson, has helped double display advertising from Valley retailers and accounted for a 75% gain in classified ads from the area.

The *Times* also unveiled a new in-depth sports section called Monday Special Sports and announced plans for expansion of its financial news and the start of a new Sunday magazine supplement coming Oct. 4.

Total *Times* circulation, according to ABC statements for the six months ended March 31, stood at 1,069,564 daily and 1,332,138 Sunday—dominating the Los Angeles market. But Times Mirror found the going tougher in more competitive markets in Dallas and Denver.

The circulation war between the company's *Dallas Times Herald* and the rival *Dallas Morning News* found the *Times Herald* trailing across the board. According to ABC's six-month averages ended March 31, 1985, the *Times Herald's* 241,055 all-day paper compared with 368,683 for the *News*, and its 345,932 Sunday circulation gave way to the *News'* 476,003.

The *Times Herald* took steps to shore up its position with a $46 million capital expansion project and broadening of its circulation sales and distribution.

Times Mirror's *Denver Post* has been facing the same sort of circulation challenge from Scripps Howard's *Rocky Mountain News.* The *Post* circulation, in its Sept. 30 report to ABC (the *Post* did not file in time to be reported March 31, 1985), stood at 223,249 daily and 337,870 Sunday. For the same period, the *Rocky Mountain News* reported 317,638 for its morning daily, and 366,003 for Sunday.

The *Post* has begun a $28 million expansion of plant and editorial improvements to stem the circulation slide, and named ad agency Schenkein/Associates, Denver, to help step up its circulation promotions. The *Post* is saying its Sunday product increased to the 400,000 range as of March 31, 1985, attributing the jump to the addition of 60,000 subscribers of United Cable Television Corp., a local cable franchise holder, whose program offerings now are being listed in the *Post's* "TV Week" Sunday supplement. The *Denver Post* also took a Pulitzer Prize for feature photography, helping Times Mirror become the first media company ever to win four Pulitzer prizes in a single year. The *Los Angeles Times* added two more and *Newsday* another.

Newsday, Times Mirror's Long Island daily, which continued to build up its New York edition, has total daily sales of 542,073 (up 1.7%) and Sunday sales of 611,403 (up 0.5%). The paper now is sold on newsstands in Manhattan, where it has a circulation of about 45,000. The paper has begun offering a daily themed special section, following a similar practice begun by the *New York Times* several years ago.

On the corporate front, Times Mirror president-chief executive officer Robert F. Erburu was named to the added post of chairman of the board, effective Jan. 1, 1986. At that time Otis Chandler, board chairman and editor-in-chief of Times Mirror, will take over as chairman of the board's executive committee. In mid-December, Phillip L. Williams was elected exec vp of the company, effective Jan. 1, 1985.

In line with a corporate strategy of increasing participation in communications businesses while disposing of others that are not in that line, in early 1985 Times Mirror acquired Call-Chronicle Newspapers, Allentown, Pa., for $106 million, giving the company its eighth newspaper property.

At the company's recent annual meeting, however, Mr. Erburu told shareholders it appears unlikely that Times Mirror would be a high bidder for media properties coming on the market in the near future. He said the company's management believes the current merger "frenzy" may have temporarily inflated prices, which "far exceed" historical valuations. "While Times Mirror will remain active in acquiring new media properties," he said, "it is unlikely that we will be high bidders at current levels."

Circulation of the *Call-Chronicle*, distributed in a nine-county area in the Lehigh Valley, is 130,996 daily and 169,046 Sunday, both figures up about 2,000 subscribers from year-earlier figures.

In late 1984, Times Mirror ended its legal battle with the Connecticut Department of Public Utility on ownership of newspaper and cable properties. The company agreed to sell its interest in a Hartford cable tv franchise by Sept. 4, 1987.

Divestiture of the 60,000-subscriber system is part of a proposed court settlement with the state, which had challenged Times Mirror's ownership of both the *Hartford Courant* and cable tv franchises in Hartford and downstate Meriden. Then early this year the company signed a letter of intent to sell its Hartford cable tv system to Denver-based United Cable for $61.5 million cash, on approval of state and federal authorities and company boards.

Another agreement with Storer Communications, Miami, provided for the exchange of cable tv systems involving 446,300 residential units evenly divided between the two companies. Times Mirror traded its systems in North Little Rock and Jacksonville, Ark.; Point Pleasant Beach, N.J., and Louisville, N.C., for Storer systems in Phoenix, Mesa and Paradise Valley, Ariz., and in Orange County, Cal.

Times Mirror also sold its 625,000 shares of Commerce Clearing House for $31.6 million and its Graphic Products Group for another $52 million in cash and a $3 million note. The company then announced it will be spending more than $100 million in cash for a Xerox Corp. subsidiary that sells management and sales training programs.

At the same time, Times Mirror and Knight-Ridder Newspapers, Los Angeles, agreed in principle to sell their jointly owned cable tv operation serving Long Beach and Signal Hill, Cal., to Simmons Communications, Stamford, Conn.

Despite an industry wide slowdown in spot advertising in the fourth quarter of 1984, Times Mirror's seven-station broadcast tv group produced record sales and earnings for the year. KDFW-TV, the flagship station, maintained its strong market position in the competitive Dallas-Fort Worth market throughout the year.

Revenues for the company's cable tv group were up 63% over the previous year, reflecting the full-year sales of two major systems in Phoenix and Las Vegas, which were not fully owned in 1983. Contributing to that growth were more cable subscribers, up to 910,000 for basic services and 741,000 for pay services, and rate increases in some franchises.

Times Mirror is ranked the seventh largest cable system operator in the U.S., with 57 systems serving 300 communities. The company also began operations of its Times Mirror Videotex Services, with the September opening of its new Gateway service for consumers in Orange County.

Videotex marketers reported more than $1 million in national ad commitments for Gateway's first year of scheduled service.

Times Publishing Co., St. Petersburg, Fla., which completed 1984 with upbeat results for its lead newspaper and entered the new year with plans for a new magazine, *Georgia Trend*, was the nation's 71st largest media company in 1984.

Times Publishing, which publishes the *St. Petersburg Times* and the *St. Petersburg Evening Independent*, had estimated revenues of $152 million in media, up 12.8% from 1983.

Although the business and financial journal, *Georgia Trend*, is opening in a new market, it is not a new product category for Times Publishing, which publishes the 26-year-old statewide business magazine, *Florida Trend.* First issue for the Atlanta-based *Georgia Trend* will be September, 1985.

In the company's primary market, St. Petersburg, circulation at the *St. Petersburg Evening Independent* leveled off in 1984 after three straight years of losses. Leo Kubiet, Times Publishing ad director, says the decline in past years has been part of the Times Publishing's effort to restrict circulation of the paper. Circulation of the evening paper increased 1.1% to 38,085, according to ABC's six-month averages ending March 31, 1985.

"We decided it would be best for the paper to confine distribution to the immediate St. Petersburg area and the beach communities just south of the city. Circulation has not fallen for any other reason," Mr. Kubiet says.

The morning *St. Petersburg Times*, on the other hand, retains its regional target area, he says, adding that distribution for the *Times* has not been restricted. Its daily circulation increased 1.8% to 287,700; Sunday circulation rose 3.7% to 370,283 for the same six-month period.

Ad inches for both papers increased. At the *Times*, ad inches are divided into two categories: Part-run ads that appear in one but not all of the *Times'* eight regionally zoned editions; and full-run ads that appear in all the zoned editions.

For the morning daily, full-run ad inches were 2,445,758; part-run, 1,745,566, for a total of 4,191,324 ins., exceeding last year's total by 15%. In the Sunday edition, there were 1,053,851 full-run inches and 560,025 part-run inches, for a total of 1,613,879 ins., again exceeding last year's total by 0.3%.

The evening paper, with no zoned editions and only full-run ads, ran 1,647,540 ins., up 12.5%. Total ad linage for morning, evening and Sunday papers was 13,275,940, up 10.8% over 1983. Over-all ad rates increased an average of 10%, Mr. Kubiet says.

In editorial matters, the company has increased staff in many of its departments, including business, foreign news, and state and local departments.

Modern Graphics Arts, which handles some commercial printing for Times Publishing, including preprint inserts, will publish *Georgia Trend*. Modern Graphic Arts also prints *Florida Trend*.

The monthly *Georgia Trend* will sell against two Atlanta-oriented publications: Scripps Howard's *Atlanta Business Chronicle*, a tabloid weekly covering Atlanta with 15,242 ABC-audited circulation as of Sept. 30, 1984; and Communication Channels Inc.'s *Business Atlanta* monthly, a slick, four-color product like Georgia Trend with 22,149 circulation for the same period.

Georgia Trend's niche among the three will be its statewide coverage, although 67% of the responses to its circulation mailers have come from Atlanta—which is basically the population breakdown in the state, says Frank Quigley, ad manager. He hopes to convert an initial 20,000 paid-controlled circulation mix in the first year to fully paid by the time the start-up grace period of three years is lifted by Times Publishing.

Projection for advertising, to cost $1,695 for a full page b&w and $2,295 for four-color, is $175,000 for the four months of 1985, which includes give-away ads in December for advertisers who buy the first three months.

The expansion of Times Publishing into the Georgia market initially caused some speculation that the company might be planning other ventures into that state's publishing industry. Mr. Kubiet says the company has no plans for such an effort, noting that the publishing company is somewhat restricted by its covenant to move into certain areas of publishing.

Nelson Pointer, former owner of the Times Publishing who died in 1978, established in his will that the company could not acquire papers other than those it owned at the time of his death, that is, the two St. Petersburg papers. He also stipulated that those two papers never be sold to another company. "Of course, this stipulation does not preclude starting or acquiring magazines such as *Georgia Trend*," Mr. Kubiet says.

Triangle Publications, Radnor, Pa., publisher of *TV Guide*, *Seventeen* and the *Daily Racing Form*, had estimated media revenues in 1984 of $657 million, up 13.4% from estimates in 1983, to rank 20th among the nation's leading media companies.

Triangle, controlled by Walter Annenberg, in 1984 changed leadership and moved into new distribution and publication ventures.

As of Jan. 1, 1985, William Henrich Jr., who had served as outside counsel for Triangle, succeeded Mr. Annenberg as president. Mr. Annenberg, 77, who was honored as publisher of the year for 1984 by the Magazine Publishers Assn., assumed the new role of chairman.

In 1984, Triangle entered into the magazine distribution arena, picking up the national newsstand distribution accounts for *Newsweek*, *Reader's Digest*, *Soap Opera Digest*, *Woman's World* and the *Washington Post Weekly*, in addition to *TV Guide* and *Seventeen*, according to a company spokesman.

Triangle also has announced plans to resume publication of *Good Food*, a *TV Guide*-sized monthly, in early 1986. Frank G. Wolf, current publisher of *Seventeen*, will become group publisher of both *Seventeen* and *Good Food*. The new magazine will carry a cover price of $1, with an initial circulation of 2 million.

Good Food will be headquartered in New York in the same building as *Seventeen*. Personnel from other Triangle publicatons will be named to positions within *Good Food*.

The company's mainstay, *TV Guide*, carried 3,799.6 ad pages in 1984, up 4.6% from 1983, according to Publishers Information Bureau. Gross ad revenues were $304.3 million, up 12.9% from 1983. The publication instituted a 5% rate increase in July, 1984, and will boost its ad rates 6% in July, 1985. This 6% hike will bring the cost of a four-color page in *TV Guide* to $94,605.

Net paid circulation for 1984 was 17.2 million, a 3.6% increase from 1983. However, circulation is still slightly below the 1982 average.

Managing editor R.C. Smith says the publication worked hard in 1984 to stay abreast of changes affecting the tv viewer. In September, *TV Guide* began a vcr report, included in the Insider section of the magazine. The report, which began as a spread every other issue, became a one-page weekly feature in late May.

"Our audience is so huge, with 43 million readers, that we have to move cautiously with changes," Mr. Smith says.

Seventeen, which celebrated its 40th anniversary with the September, 1984, issue, had estimated ad pages of 1,496.4 in 1984, up 13.9%, and gross ad revenues of $32.3 million, up 25.3%. The magazine hit a record high circulation of 1.7 million for 1984. *Seventeen* had a 3% ad rate base increase in August, 1984. Following an increase in guaranteed circulation to 1.6 million in February, 1985, the magazine had another rate base increase of 0.3%.

Publisher Frank G. Wolf says the magazine is prospering because of a change in the nature of its audience, despite a decline in the number of teen age girls. "The market we are serving is

more affluent," Mr. Wolf says. "The number of two-income families is increasing, making the teen age daughter more responsible for household tasks. She is being richly rewarded for her role, and no one is supervising how she spends her money."

Michael P. Sandler, publisher of *Daily Racing Form*, reports a strong performance for the turf daily in 1984, its 90th year of publication. Last year, the newspaper began operating a satellite transmission system to enable it to print the northwestern edition in Seattle, Wash., from negatives prepared in Los Angeles.

ABC figures show net paid circulation of 186,257 Saturday; 124,824 Monday, and 108,196 Tuesday to Friday, for the U.S. and Canadian editions. These numbers represent an increase of about 10% over 1983 circulation. *Daily Racing Form* is largely circulation driven.

The Tribune Co. collected its best performance ever in 1984 and quickly plowed that into a media acquisition in May, 1985, that shored up its future position in broadcast in the nation's three leading markets.

The Chicago-based company ranked 9th in 1984 with media revenues of $1.60 billion, 89% of total corporate revenues. The only nonmedia activities at Tribune Co. include those of its newsprint and forest products segment and the Chicago Cubs baseball team.

The acquisition from Kohlberg, Kravis & Roberts of Los Angeles station KLTA-TV did not catch Tribune Co. watchers by surprise, but the price did. The $510 million paid for the independent will be the most paid for a single tv property. Most analysts believe Tribune Co. paid from $50 million to $100 million too much.

Yet, taking the steam out of the debate over the price is the fact that the purchase gives Tribune Co.'s growing broadcast unit access to 20% of the U.S. population, a nice ad and programing package. The company already has independent stations in Chicago and New York.

But this may serve the Tribune Co. more in the future than in the present. The acquisition caused brokerage houses to pare earnings estimates for 1986 as much as 60¢ a share to $3.30, a 15% decline—a figure in keeping with the company's own estimate of the acquisition's impact on earnings.

This new debt at Tribune Co. is unattractive to the acquisition-minded. The company also is tripling the number of authorized common shares to 150 million "to impede a takeover or to make changes in the control of the company more difficult," as the company put it at its annual meeting. The two measures confirm suspicion that the giant Midwest media company was either being considered prime bait for takeover, internal or external, or has feared such.

Although the asset value of the company has been double its current stock price, making it attractive to a takeover artist, a hostile takeover would be virtually impossible because McCormick family and employe trusts own more than 50% of the stock. A staggered board on which members are elected for three-year terms at alternate years is another block.

Its 1984 performance would make any takeover artist salivate. Operating revenues jumped 13.1% to $1.79 billion and net income jumped 48.8% to $103 million. That was followed by an equally attractive first quarter, ended March 31, 1985, when company revenues rose to $449 million, up 14%, and net income hit $16.6 million, a surge of 66%. Tribune Co. stock, which sold for $26.75 a share when the company went public in October, 1983, is now in the mid-$40s.

The newspaper group is the big revenue generator among Tribune Co.'s operating segments. In 1984, ad revenues were up 15% in the segment, which had operating profit of $188.5 million, up 29.4%, and revenues of $1.28 billion, up 12.1% from the previous year—a revenue increase echoed in the first quarter of the new fiscal year.

The newspaper segment will be most affected by the KTLA-TV investment. Tribune Co. will have to divest its *Los Angeles Daily News* in addition to cable operations in Lakewood and Palmdale, Cal., to abide by FCC rules preventing media crossownership in a single market. The company expects to complete the transactions within the year.

Last year the Tribune Co.'s 138-year-old flagship newspaper, the *Chicago Tribune*, entrenched itself further in the Chicago market, where it enjoys a 63% share of total ad linage at the expense of major rival, the *Sun-Times*, purchased in January, 1984, by Rupert Murdoch.

Mr. Murdoch's purchase of the *Sun-Times* routed several noted staff members, among them veteran columnist Mike Royko, who walked across Michigan Ave. to join the *Chicago Tribune*. *Sun-Times* publisher James Hoge left to become chairman-publisher of the Tribune Co.'s *New York Daily News*, a direct rival of another Murdoch paper, the *New York Post*.

According to Audit Bureau of Circulations figures for the six months ended March 31, 1985, the *Tribune's* average Sunday circulation grew 1.8% to 1.17 million, compared with a 0.5% increase at the *Sun-Times* to 690,904. The *Tribune's* daily circulation grew 1.7% to 775,664 as the *Sun-Times* daily circulation increased a similar 1.7% to 639,187.

More recent moves by the *Tribune* to ensure its position include creating its own version of total market coverage with a direct mail service called *Tribune Plus* that will reach suburban consumers who are not subscribers and lure more ad spending from large retail chains. Also, the *Tribune* plans to launch its first satellite edition sometime this year.

Even the headache in the Tribune Co.'s newspaper lineup—the *New York Daily News*—is responding to medication. In 1982, the *News*—the nation's largest general circulation paper—was on the auction block. People moving to the suburbs, competition from the *Post*, labor costs, the failure of an afternoon edition—the *Daily News Tonight*—all contributed to make the giant ill.

Mr. Hoge has restructured the printing and distribution system, moving operations from Manhattan to Brooklyn. Some 98% of the target market are now getting papers printed after midnight, ensuring late-breaking news and sports scores.

As a result of Mr. Hoge's guidance, industry observers say, the paper is more lively and the reporting better. The sports and business sections are larger, as is the Sunday magazine. When the *Post* raised its price from 30¢ to 35¢ last September, Mr. Hoge kept the price of the *News* at 30¢. The *News* also pirated away the *Post's* editorial cartoonist.

Mr. Hoge's mission is not finished, however. ABC figures for the six months ended March 31, 1985, show Sunday circulation continues to decline, down 2.2% to 1,773,676. However, by the end of last year, daily circulation of 1,390,955 was heading up for the first time since 1982. It was a 1.1% increase over the previous six months.

The *Post's* daily circulation for the same period showed a decline of 6.4% to 901,313. Last year, the *News* had 43% of retail advertising linage in the New York market.

What promises to drastically affect both papers, however, is the recent purchase by Mr. Murdoch and Denver oilman Marvin Davis of Metromedia's seven tv stations for $2 billion, a move that apparently will force Mr. Murdoch to unload both the *New York Post* and the *Chicago Sun-Times* because of crossownership conflicts.

"This has got to benefit both [Tribune Co.] papers, the *Daily News* in particular," says Edward J. Atorino, analyst with Smith Barney-Upham & Harris, New York. "Just the transition period alone will give the Tribune Co. papers a chance to build circulation and reach new advertisers," he says.

NOTE: Some major cable operations are joint ventures, including Showtime/The Movie Channel, (Showtime has 5.4 million subscribers, The Movie Channel has 3.2 million) co-owned by Viacom International and Warner Amex Cable Communications; Lifetime (25 million subscribers) co-owned by American Broadcasting Cos., and Viacom International; and Arts & Entertainment Network (12.5 million subscribers) co-owned by American Broadcasting Cos., RCA Corp., and Hearst Corp.

The Tribune's Florida papers, which account for 23% of the newspaper group's revenues, have shown the biggest growth. The *Orlando Sentinel's* Sunday circulation jumped 7.7% to 309,078, according to ABC figures for March 31, 1985, while daily figures increased 5.2% to 245,194. In 1984, full-run ad linage grew 18%.

The combined *Fort Lauderdale News* and *Sun-Sentinel* also did well, increasing Sunday circulation 3% to 267,793 and daily circulation 3.6% to 210,703 on March 31, 1985. Annual growth of 20% is predicted for the Florida papers for the next few years.

The California properties are paced by the *Daily News*—now on the auction block. The paper has evolved from a free nondaily shopper into a full-service newspaper with daily circulation of 145,523, up 2.7%, on March 31. The daily Palo Alto *Peninsula Times Tribune* showed a decline of 1.4% to 58,175, and the daily Escondido *Times-Advocate* grew 7.5% to 35,862 for the same period. This group is anticipating a 10% growth rate over the next few years.

In 1984, Tribune Community Publications was formed to manage the company's free distribution shoppers and weekly newspapers that have combined circulation of 1.4 million.

Operating revenues at the Tribune Co.'s broadcasting and entertainment segment grew 23.6% to $282.2 million and operating profits increased 3.8% to $47 million in 1984.

In 1984, the company purchased Atlanta independent station WANX-TV for $32 million and renamed it WGNX-TV. The acquisition brought company-owned stations to five at yearend, including superstation WGN-TV, No. 1 independent in Chicago, and WPIX-TV in New York, the No. 2 independent in its market. Tv broadcast revenues, representing 70% of broadcast and entertainment segment, were up 19.2% to $198.2 million.

Part of the hearty performance returned by the entertainment portion of the segment can be attributed to the good year turned in by pennant-minded, Tribune Co.-owned Chicago Cubs. Entertainment revenues grew 48.8% last year to $45.4 million. However, operating profit margin for the entertainment portion of the segment was down 3% from 1983 because of costs of developing the new Atlanta station bought last year and New Orleans station WGNO-TV, bought in 1983.

According to analysts, broadcasting the Cubs games brought the segment an additional $5 million in net income. The Cubs could generate considerably more revenue, however, if lights were installed at Wrigley Field, the only unlit Major League Baseball park. ABC stirred up this issue in late May reporting it would broadcast World Series games only during prime time. ABC had this option as part of its $80 million contract with professional baseball.

The Tribune Co.'s five radio stations—including WGN (am) in Chicago and WPIX (fm) in New York—reported the highest operating profits in the group's history, up more than 30%. Revenues were up 22% for this segment that contributed 14% of the broadcasting and entertainment segments operating revenues. WGN has the highest audience share in Chicago and is the largest billing am radio station in the U.S. It also greatly benefited from broadcasting the Cubs last year.

Aside from the Cubs, analysts are high on the entertainment and broadcasting segment because its programing arm complements individual tv ownership. Last year several new ventures were created to take advantage of this internal symbiosis.

Inday, a joint venture with LBS Communications, will offer a two-hour daytime program to independent tv stations. TV Net, developed with Viacom Enterprises, will provide stations with movies never aired on network tv.

Revenues for the cable division grew 27% to $40 million in 1984. New systems were completed in California, Minnesota and Oregon. Basic subscribers increased 28% to 185,000. Pay subscribers grew 34% to 175,000. Because of the $180 million going into the development of the two major systems in Tampa, Fla., and Montgomery County, Md., there was an operating loss of $5.8 million for the year. When completed, the new systems are expected to add an additional 150,000 to the subscriber list.

The major media focus last year was on its subsidiary bought for $21 million in 1981—the Chicago Cubs baseball team. Loyal Cubs fans who could still remember the team winning a pennant in 1945 were rewarded as the oft-maligned, club—dubbed the "doormat of the National League" by a favorite son (folk singer Steve Goodman)—came out roaring from the All-Star break to win the National League Eastern division.

Turner Broadcasting Co., Atlanta, which ranked 45th among media companies in 1984 based on its media revenues of $265.8 million, up 32%, is playing a pivotal if not a vulnerable role in Ted Turner's bid to take over CBS Inc., especially if the bid turns into a protracted legal battle.

Without the bid, TBS could have expected net income of about $22 million in 1985. That figure has been pared to $16.5 million based on the $7 million to $8 million cost of the bid regardless of the outcome, says Bonnie Cook, financial analyst at J.C. Bradford & Co., Nashville.

TBS has been showing steady growth the past few years. It recorded a $7 million profit in 1983 and a $10 million profit in 1984. In the first quarter of 1985, the company reported a net loss of $741,000, a considerable improvement, however, from a loss of $5.3 million in the year-earlier period. The improved quarterly earnings picture is the result of higher subscriber rates at Cable News Network in 1985 and the impact of the purchase of Satellite News Channel (later folded) on profits in the first quarter of 1984.

During 1984, TBS' sole media profit source, superstation WTBS in Atlanta, had an operating profit of $65.8 million on revenues of $177.4 million for year-to-year increases of 52% and 27.1%, respectively. WTBS contributed 59% of total revenues of $299.7 million in 1984. CNN and its affiliate, CNN Headline News, posted an operating loss of $15.3 million on revenues of $88.3 million.

In Mr. Turner's bid for CBS, made this April, he asked the broadcast network's shareholders to exchange their shares for some TBS stock and high yield, high risk "junk bonds" with a face value of about $5.41 billion. TBS would ask for two years to redistribute properties that would violate cross-ownership restrictions. This would include TBS' syndication arm and CNN Headline News, as well as agreements with broadcast radio and tv stations. Final approval from federal agencies could take six months or more.

CBS quickly declared its strong opposition to the proposal. On April 25, 1985, Mr. Turner met with the Gannett Co. Sources suggested the two companies discussed joining together in the bid.

During 1984, Mr. Turner made an effort to cash in on the music video industry and launched the Cable Music Channel on Oct. 25. But an unreceptive market forced TBS to shut down CMC in a little more than a month, and earned CMC the title of the shortest lived national cable service.

MTV Networks bought out the service for $1 million in cash and a pledge to buy $500,000 of ad time on TBS' WTBS superstation, Cable News Networks and CNN Headline News. Also included in the deal were the CMC name and a 400,000-person subscriber list. Two weeks before the sellout, TBS had revised the CMC subscriber count to 400,000 from 2.3 million and reduced 30-second spot ad rates to $45 from $110. CMC's loss was $2.2 million prior to the $1 million payment from MTV Networks.

WTBS, which has been threatened by the success of other superstations, remains one of the most watched ad-supported cable services. It contributes 53% of the incremental revenue growth of the company. WTBS increased the number of households reached to 33.1 million by Dec. 31, 1984, up 16% from a year earlier.

The superstation reported $8.1 million net income on revenues of $78 million for the second quarter of 1984, representing nearly a doubling in net income. This was a 29.1% increase in revenues over the same period in 1983, when a net income of $4.3 million was recorded on revenues of $60.5 million. The gain was attributed to increased fees to cable operators and an improvement in the cable sales market.

During 1984, WTBS bid $60 million for the three-year exclusive cable rights to United States Football League games, but lost out to Entertainment & Sports Programming Network, which agreed to pay more than $70 million in cash. On June 27, 1984, TBS learned that the U.S. Supreme Court had abolished the 33-year-old centralized system under which college football rights were bought and sold. This established that TBS, along with ABC and CBS, were violating antitrust laws. The contracts became null, and previously paid amounts reverted back to WTBS and the networks. WTBS also lost the battle for tv rights to college football games to ESPN in June, 1984. However, TBS made an agreement with the Big Ten and the Atlantic Coast Conference for the cable and syndication rights to 25 football games airing Saturday evenings during the next two years.

Average rates per subscriber charged to operators for the new service carriage declined during the first quarter of 1984 when compared with the first quarter of 1983. However, average rates per subscriber over the next three quarters of 1984 increased over the comparable 1983 period and are expected to increase further during 1985.

Though CNN reported a profit for the first time in five years, in the three months ended in December, 1983, the service suffered a loss in the first quarter of 1984. Net income for CNN in 1984 was not available, but Mr. Turner says CNN has been nearing the break-even point and the increase in fees may help.

Some analysts predict CNN will be profitable in 1985. CNN now broadcasts live not only in the U.S., but also in Australia, Canada and Japan, as well as in other locations worldwide via the Armed Forces tv and radio network.

On Sept. 15, 1985, a satellite is scheduled to deliver a live English-language package of CNN and CNN Headline News to Europe. The projected market is cable systems. About 15 million U.S. cable homes now receive CNN Headline News programing.

CNN began boosting fee levels to subscribing systems to the extent permitted by contracts in 1984. According to company spokespersons, the increase is intended to result in a new fee structure that would lower fees if the system carries WTBS and make them even lower if all three TBS services are carried.

Not discussed in this media analysis is the TBS professional sports division, which accounted for revenues of $24.3 million in 1984. Mr. Turner owns 100% of the Atlanta Braves baseball team and 96% limited partnership interest in the Atlanta Hawks basketball team. Though the baseball franchise lost $2.9 million in 1984, TBS paid the operation $1 million for the right to broadcast 150 games.

United Cable Television Corp., the nation's 78th largest media company with fiscal 1984 revenues of $140.7 million, all in cable, expects considerable growth in the current fiscal year as revenues begin to flow from its newly awarded Baltimore franchise and recently purchased Hartford, Conn., system.

Revenues at the Denver-based company, which owns 37 cable systems and is partner in four more, were up 21.1% to $124.7 million for the nine-months ended Feb. 28 of the new fiscal year. Much of the revenue growth is traced to United's 834,000 basic subscribers and 729,000 premium subscribers as of the end of April, percentage gains of 25.8% and 27.5%, respectively.

The big news at United Cable came at the beginning of 1985 when United was awarded Baltimore's 300,000-home franchise. United Cable is putting together the $70 million to $80 million needed to finance system construction. Then in April, 1985, United Cable agreed to buy for $61.5 million the 60,000-subscriber Hartford, Conn., system from Times Mirror Cable Television.

In March, 1985, United Cable bought six cable systems in suburban Tulsa, Okla., from Denver-based Tele-Communications Inc. and TCI Growth Inc. in exchange for new stock. The 11,500 subscribers in those systems were folded into United Cable's existing Tulsa operations.

United Cable recently won the franchise for Orion, Mich., an extension of its Oakland County system, and is proceeding with construction on new California franchises in Los Altos, La Puente, Baldwin Park, Pico Rivera, Hacienda Heights and South Whittier. Purchases from Tele-Communications Inc. became final in August, 1984, for mature systems in Golden, Lakewood and Jefferson County, Colo., and in Papillion, Neb.

Not all proposed deals went through. At the end of 1984, the company pulled out of a management contract with CommuniCom cable tv system in the Los Angeles area. It had been agreed that Neilson Enterprises would sell the CommuniCom system to a limited partnership formed by United, but according to a United spokesman, there was exceptional debt on the system, and financing negotiations became too difficult to pursue. The company wrote off a $1.3 million loss on expenses associated with the negotiations in the quarter ended Nov. 30, 1984.

And the company basically has scrapped its uplink program, in which it transmitted signals to satellites that bounced them into other markets. Once proposed as a possible expansion into business communications, the uplink project was stymied by proposed litigation from Mountain Bell.

The company has completed a tender offer expiring May 20 to buy back 2.02 million shares (about 16.6%) of its stock at $39.75 a share. The offer was aimed at stockholders who own fewer than 100 shares, in an effort to reduce service costs.

During the past year, United engaged in a major effort to stop cable pirating and to confiscate illegal equipment. These system "audits," in conjunction with an ad push, were completed in Denver; Boise, Ida., and Tulsa, Okla.

Following the success of local advertising in the Denver and Tulsa systems, United is pursuing efforts to expand ad sales throughout its other systems. The company estimates advertising will bring $1.2 million in revenues to the Denver system in fiscal 1985 and $900,000 in Tulsa alone.

U.S. News & World Report, Washington, is the nation's 74th largest media company, with 1984 media revenues estimated by Advertising Age to be $143.8 million, up 8.1% over 1983.

Media totals include estimated net revenues of *U.S. News & World Report* and *Atlantic Monthly*, both properties of which are owned by Mortimer Zuckerman.

The first half of 1984 was a rough one for *U.S. News & World Report*, the nation's third largest newsweekly, and although it recovered strongly in the third and fourth quarters, 1984 ad pages still were down 1.6% from 1983. Ad revenues, however, showed an 8.2% increase.

The recovery had snowballed in 1985, with first-quarter figures showing *U.S. News* with the largest percentage gain in ad pages and revenue of any weekly or every-other-weekly consumer magazine in the country.

The other corporately owned magazine, *Atlantic Monthly*, continued to show impressive circulation and ad gains in 1984.

To say 1984 was a year of transition for *U.S. News* is an understatement. After 50 years of independent operation, U.S. News was bought last fall by Mortimer Zuckerman, a Boston real estate developer and publisher since 1981 of *Atlantic Monthly*.

Mr. Zuckerman moved quickly to make his imprint on *U.S. News*, both editorially and on the advertising and marketing side.

He appointed Shelby Coffey III as editor, replacing Marvin L. Stone, editor since 1976, who left for an expected appointment as deputy director of the U.S. Information Agency. Mr. Coffey, 38, had been assistant managing editor for national news at the *Washington Post*.

Harold Evans, formerly editor of the *Times* and *Sunday Times* of London, was named editorial director, as well as editor-in-chief at Atlantic Monthly Press.

David Gergen, former director of communications in the Reagan administration, and former Rep. Barber Conable, a leading congressional tax expert, were named contributing columnists. Kathryn Bushkin, press secretary to Sen. Gary Hart, was appointed a vp, responsible for coordinating special projects between the business and editorial sides of *U.S. News*.

Mr. Zuckerman brought in business-side executives from other publications, including Richard Thompson and James Mason from the two top business positions in *Business Week* to become publisher and associate publisher, respectively, of *U.S. News*.

Stephen A. Douglas, now *U.S. News* vp-research and development, had been director of strategic research at *Newsweek*. In another key appointment, Fred Drasner, vice-chairman of U.S. News & World Report, became president-ceo.

While ad gains have been impressive in the past several quarters—and insiders say much of the groundwork for those gains already had been laid by the time Mr. Zuckerman took over—editorial changes are more evolutionary in nature.

"We're really not ready to talk about editorial changes—we've only had our new editor since April 3," one *U.S. News* executive says. "But you can pick up some subtle changes—a little more sophistication and covers with more impact."

Insiders note the magazine's hiring of editorial and business personnel from other business-oriented publications, including *Business Week*, the *Wall Street Journal* and *Fortune*, make it obvious that *U.S. News* increasingly will be marketed toward the business and financial communities, both editorially and in advertising. "Look at whom they're hiring," one media watcher says. "The inference should be clear."

Two production changes are under way—color will be available for every page, primarily for editorial purposes (before, ads had been moved to available color pages), and the editorial closing time will be moved from 8 p.m. Friday to midnight, giving what one executive terms "four important hours of additional editorial coverage."

U.S. News circulation in 1984 remained virtually static at 2.1 million, compared with 4.6 million for *Time* and 3 million for *Newsweek*. The 1984 yearend ad figures were disappointing, with pages down 6% to 1,756, although ad revenues increased 8.2% to $101.5 million on a gross basis.

But most of the bad news came early in the year, and Publishers Information Bureau figures for the first quarter of 1985 showed *U.S. News* up 8.9% in pages and 14.6% in revenues from the first quarter of 1984—the largest gain, *U.S. News* officials say, of any weekly or every-other-weekly consumer magazine.

Ad revenues increased to $22.3 million, up 14% over the year-earlier period. During the same time, according to PIB, *Time* ad revenues were up 10.9%, and *Newsweek*'s were up 2.8%.

At *Atlantic*, the first-quarter 1985 PIB figures show a 16.9% increase in ad pages and a 25.5% increase in ad revenues from first-quarter 1984 figures, with revenues increasing to $1.6 million. Circulation has increased to a new base rate of 450,000 from 325,000 in 1982. The groundwork had been laid in 1984 when ad pages increased 14.8% to 591.4 for total revenues of $6.7 million, up 27.8%.

Mr. Zuckerman's purchase of U.S. News for $163 million last fall included substantial real estate adjoining U.S. News' new eight-story building. Two of the four then-vacant tracts are being developed with a Park-Hyatt hotel and an office building. Company officials will not disclose figures, but it's been estimated the properties in Washington's West End—adjacent to Georgetown—may be worth close to $500 million.

Parkway Communications, U.S. News' only broadcasting property—a classical radio programing service—was sold before Mr. Zuckerman's purchase of the company. A company official says the Parkway sale was "hardly worth mentioning" financially.

It's estimated that revenues from two newsletters published by U.S. News were about $5 million in 1984, the same amount as from Atlantic Monthly Press.

U.S. News' Publishers Service International, Carlstadt, N.J., had estimated annual revenues of about $30 million. The company, treated as nonmedia in this issue, is an electronic prepress operation, setting type and graphic data for a number of publications, primarily magazines, including *Business Week*, *Penthouse* and Conde Nast.

Viacom International, a diversified communications and entertainment company, is the country's 44th largest media company, with media revenues of $267.3 million, down 1.5% from 1983.

Viacom, the nation's 10th ranked multiple system operator according to the Cabletelevision Advertising Bureau, had total revenues of $320.4 million, up 1.5% from the previous year, and net income of $30.6 million, up 8.8%.

Media totals come from cable television, and a broadcasting and other services segment that includes Showtime/The Movie Channel. Viacom's program distribution business is not included in media activity for this report.

Although media revenues slipped during 1984, they do not reflect the company's pro rata share in Showtime/The Movie Channel. Results of that cable network have been deconsolidated to be treated on an equity basis now that Viacom has traded its 100% ownership of just Showtime for 50% equity in Showtime/The Music Channel, a joint venture consumated with Warner Communications and Warner Amex Cable Communications Sept. 1, 1983.

Under the equity method in accounting, revenues of an entity that is deconsolidated no longer appear on the "parent's" financial statement. Only earnings, amounting to a company's ownership percentage, appear under equity investments, which in 1984 rose to almost $9 million, up from $1.5 million in 1983.

Had revenues from Showtime/The Movie Channel been included, revenues would have increased 34% in 1984 from 1983.

(Because of the merger on Sept. 1, 1983 of Showtime and The Movie Channel, eight months of revenues of Showtime appear on Viacom financial statements for 1983.)

The company suffered $2.6 million in losses from its equity in Lifetime, in which it has a one-third partnership. In 1984, the joint venture partners—Cable Health Network (an affiliate of Viacom), Hearst Corp. and ABC—announced plans to infuse the ailing Lifetime, an ad-supported cable tv network, with $25 million to upgrade programing. This includes $5 million to support it with stronger marketing and advertising.

Lifetime abandoned its bent toward heavy information, concentrating instead on entertainment, controversy and phone-in participation. Thomas Burchill, named president of the network in 1984, says Lifetime's intention is to become "glitzier."

The new format has resulted in major changes: 77% of the network's prime-time programing is new and the majority of the evening hours are all-talk shows. These include "Smart Money," a one-hour show on consumer finance; "America Talks Back," and "Good Sex!" with Ruth Westheimer, the most popular and highest-rated show in this network.

Company officials would not release figures of the network's performance since the overhaul, but they do indicate it is doing "10% above projected revenue for 1985." Moreover, the call-in shows average 3,000 viewer calls per show, according to a company spokesperson.

Revenues from cable tv operations increased 21% over-all in 1984 over 1983, primarily because of increases in the number of basic and pay subscribers and in rates. The number of basic cable subscribers rose 9%, to 790,000 by yearend. Pay cable units also rose in the number of subscribers, by 10% to 645,000.

The cable tv division welcomed the passage of the Cable Communications Policy Act of 1984, which brought regulatory relief to the industry. In most cases it eliminates the local governmental regulation over rates and sets a 5% limit on customer fee increases that can be imposed by system operators.

Within the broadcasting and other services segment, comprised of Showtime/The Movie Channel and radio and tv properties, revenues from radio and tv stations rose 32% in 1984 over 1983. The company attributes this to improved radio formats and tv programing. Showtime/The Movie Channel's conversion to the equity method of reporting resulted in a drop of revenues in 1984 to $83.6 million, down from $119.8 million in 1983.

Early in 1984, the company made a format change for one of its radio stations, WKHT, New York. The country format was dropped in favor of adult light contemporary, and the call letters were changed to WLTW-FM. According to a corporate spokesperson, the station is "going gangbusters" since the switch. No figures were available, however. Company officials attribute this success to the new format being better suited to the market and the station playing more music and having fewer breaks.

Its tv stations also have improved performance as a result of program fine-tuning. For example, WHEC-TV in Rochester, N.Y., moved to the No. 1 position, up from second place. And WNYT-TV in Albany moved from third to second place in its market.

Viacom continued its acquisition strategy, adding another radio station, WEAM in Virginia, for $1.2 million. In December, the company also announced a definitive agreement to purchase radio station WKDJ in Memphis for about $1.5 million. The completion of this purchase brings the company's holdings to four tv and eight radio stations.

Showtime/The Movie Channel, the joint venture of Viacom, Warner Communications and Warner Amex Cable Communications, gained in market share in 1984, with a total of some 8.5 million subscribers. The five-year agreement with Paramount Pictures, for exclusive national pay tv rights to its theatrical motion pictures, continues to bring excitement with upcoming hits such as "Beverly Hills Cop" and "Star Trek III." In early 1984, the service acquired the Spotlight pay tv service, which added nearly 700,000 subscribers.

In other developments last year, Viacom Enterprises announced plans for an ad-supported videocassette on fitness, featuring athlete Steve Garvey. This "life-style" tape, as it is dubbed by company officials, is still on the drawing board, but it is likely to feature exercising in "natural environments" such as the home or office. The advertising in it will be soft-sell, such as the use of the sponsor's products as props in the setting.

Viacom Enterprises and Tribune Entertainment Co. entered an agreement to launch a prime-time syndicated program service, called TV Net. A company spokesperson says the service, launched earlier this year, is "very successful," and now reaches 92% of all U.S. households.

Warner Communications, New York, is being carved apart—its MTV Network went public last year, its record division is on the auction block and Warner Amex may be sold—as the company sidesteps the takeover mine field in an effort to go private.

What will be left of the company to go private will be its movie studio, the backbone of Warner Communications. Reportedly, Steven J. Ross, chairman-chief executive officer, has approached a number of Hollywood celebrities to participate in a buyout.

Warner is the 42nd largest media company, with media revenues estimated by Advertising Age at $271 million in 1984, up 8% from 1983. Total revenues for the troubled communications and entertainment conglomerate were up 17.4% in 1984 to $2.02 billion, but net income losses amounted to $586 million, compared with net income losses of $417 million in 1983.

During 1984 Warner halved its corporate overhead costs, mostly by reducing its staff and executive ranks, and the company took other actions to improve its financial situation. The results of these efforts showed up in the first quarter of 1985, with reported profits from ongoing lines of $21.4 million, triple 1984's first-quarter earnings of $7.2 million. Revenues in the same period rose 19% to $562.9 million.

Warner's media revenues derive from its 50% ownership in Warner Amex Cable Communications (American Express Co. owns the other half) and from Mad magazine and DC Comics, businesses of the company's publishing division. Warner Amex primarily distributes broadcast tv signals and satellite programing to cable subscribers. In the past, it has operated at a loss mainly because of the large costs of building new urban cable systems, starting them and the low initial rate structures in certain systems.

Operating losses from Warner's broadcast and cable operations, including its interest in Warner Amex, shrank to $4.4 million in the first quarter of 1985, from $16.3 million in the corresponding period a year earlier.

For the year, losses were minimized by proceeds from the July, 1984, sale of MTV: Music Television and Nickelodeon by Warner Amex Satellite Entertainment Co., a unit of Warner Amex. The unit was sold to MTV Networks, a new company, for $67.7 million in cash and a 66.1% stock ownership by Warner in MTV Networks. *(See profile on MTV Networks on Page 44 for further details.)*

Other actions taken by Warner Amex during 1984 to reduce losses included selling major urban cable systems in Pittsburgh and in the suburbs of Chicago and St. Louis. These systems, with a total of about 136,000 subscribers, were expected to continue to record losses because of the extraordinary high construction and startup costs.

Warner also sold 20 smaller systems in eight states, with a total of about 52,000 subscribers. Eight of these systems, with total subscribers of about 30,000 located outside Los Angeles and Hood River, Ore., were sold to comply with an FCC order resulting from Warner's acquisition in 1983 of 42.5% of BHC, a subsidiary of Chris-Craft Industries. BHC owns and operates six tv stations in the same areas as the Warner Amex cable systems. The FCC will not permit cable and broadcast tv station crossownership in the same market.

In addition, Warner Amex sold Home Sports Entertainment, a regional sports pay channel operation in Houston and Dallas, and Warner Amex Security Systems, its home security and medical alert service businesses. The two sales enabled Warner Amex to reduce its indebtedness to $550 million at the end of 1984, from $852 million at the end of 1983, and also to reduce its lines of credit to $624 million, from $875 million over the same period.

In June, 1985, American Express signed an agreement with Time Inc.'s American Television & Communications subsidiary and Tele-Communications Inc., both of Denver, to sell Warner Amex Cable Communications Corp. for $850 million in cash and assume $500 million in debt. Warner, however, must approve the deal as a joint venture partner.

There was speculation at the time Warner was presented with the deal from partner American Express that a group led by Drew Lewis, Warner Amex chairman, also was seeking to buy the cable unit from Warner. Viacom International also submitted an offer to buy Warner Amex along with Warner's two-thirds interests in MTV and Showtime/The Movie Channel. Warner owns 31% of Showtime, Viacom 50% and American Express, 19%, through its Warner Amex investment. Showtime/The Movie Channel provides 24-hour-a-day programing for pay cable.

In May, 1985, Warner approached Motown Record Corp., Los Angeles, to see if Motown might want to buy its record division. Jay Lasker, Motown's president-chief operating officer, approved such an acquisition, although a formal deal has yet to be struck. Warner's record unit controls about 17% of the U.S. market, about the same as RCA Records. CBS Records is largest with about 23% of the market.

Warner's record division turned in its strongest quarter ever in the first quarter of 1985, posting a pretax operating profit of $30.2 million, up 42% from 1984's first quarter. Both the Warner Bros. and Atlantic Records units have strong sales with such artists as Madonna and Phil Collins.

In other actions to reduce losses, in July, 1984, Warner sold the home videogame and computer divisions of its Atari holdings to what is now called Atari Corp. for $240 million in notes. In February, 1985, the company sold the controlling interest in Atari's coin-operated games division and expects to sell 46 coin-operated videogame rooms owned by Atari Adventure Corp., a wholly owned unit of Atari, sometime in 1985.

Warner Cosmetics, Warner Leisure and its controlling interest in the Cosmos Soccer Club also were sold in 1984.

In March, 1985, Warner sold 85% of its Franklin Mint Corp. to American Petroleum Industries for $96 million cash and about $66 million in 9%

What is 'media'?

Pinning a definition on media is like trying to pin Jell-O to the wall. As soon as a consensus is seemingly reached, "media" slips out from under those constraints.

This year, 18 of the companies on the top 100 media chart contained "communications" in their titles, a word that seems broad enough in the case of many of these companies to still identify activities that ranged far from the classical forms of media that show up in the names of most media companies: Broadcasting, newspapers, printing, publishing and even media.

Drawing a cue from the implied idea that "communications" is more than media (but not that much more), the editors opened up their traditionalist eyes to let new forms of communications slip under the media door.

ADVERTISING AGE's definition of media in this fifth annual report has opened up to encompass total market coverage units within newspaper companies in general, and also from companies as freestanding as their inserts—in short, direct marketers.

Videodiscs, subscription-based information networks that provide everything from electronic news services to analysis of corporate returns and commodity information to farmers, and unique media like the *Wallpaper Journals*—13-30/Esquire's wall poster ad medium that changes every two weeks on college campuses—were merged into the definition as well.

Media, of course, continues to be cloaked in the traditional mantle in which revenues from communications vehicles are derived from advertisers or subscribers—which is the language that ruled the first few AD AGE top 100 media issues.

Still on the doorstep, but not included in ADVERTISING AGE's interpretation of media, are program production, motion pictures, syndication activities, book publishing and revenues derived by ad rep companies for sales made to non-owned broadcast stations. The classical view still dominates.

But what about those companies fixated on electronic catalogs or mass Mylar balloon floatings? Will they be the "media" of the future?

seven-year notes. In the same month, it also sold its wholly owned subsidiaries, Eastern Mountain Sports and Panavasion. The company's 48% interest in the Pittsburgh Pirates baseball team is also on the block.

The Warner Bros. movie division—the subject of all the carving up of Warner Communications—had a first-quarter, 1985, pretax profit growth of only 3% to $40.6 million, compared with the first quarter of 1984, which was especially strong because of the release of its hit "Police Academy."

Washington Post Co., with revenues of $984.3 million, all in media, continues to diversify into more communications areas with the acquisition of Capital Cities' cable operation, its first entry in the cable business.

The Washington-based company in June, 1985, agreed to pay Cap Cities $375 million for its 55 systems with 365,000 subscribers that rank the cable unit 20th among systems operators, according to Cabletelevision Advertising Bureau Inc., New York.

The company, which earlier in the year purchased 17% of Cowles Media Co. for $55 million, was ranked the 13th largest media company on the basis of its media revenues, which in 1984 represented an increase of 12.2% over 1983. The year was a profitable one as net income increased 26% to $85.9 million.

During 1984, Washington Post Co. generated $517 million from its newspaper division dominated by the *Washington Post*, up 13% from 1983; $332 million from magazines, up 10%; and $136 million from broadcast, up 14%.

Acquisitions will stimulate revenues even more in 1985. The Cap Cities properties contributed $76.3 million in revenues to Cap Cities in 1984. The Post Co. did sell its holdings in cable tv sports channels to CBS for $25 million. In addition to cable revenue contributions in 1985, the company will add revenues from its 99% stake in a Miami cellular telephone license, an investment made in 1985.

The newspaper division continued to perform well in 1984, climbing 20% in operating income to $95 million. *Newsweek*, the company's magazine property, had an exceptionally strong year, showing a 44% increase in operating income to $22 million. Post president Richard Simmons says a 3% reduction in the magazine's fulltime staff contributed to the resulting gains.

The four Post-Newsweek tv stations increased income 29% to $51 million in 1984.

Washington Post Co. in March, 1985, paid $55 million for the 17% stake in Cowles, a family-owned company that owns the *Minneapolis Star & Tribune* and controlled the Des Moines Register & Tribune Co. until its buyout in March, 1985, by Gannett Co.

Mr. Simmons insists the buy is merely an investment, and the Post has no intention of buying a controlling interest in Cowles.

The *Washington Post* newspaper produced ad revenue of $390.7 million in 1984. It gained 0.4% in daily circulation to 771,253 on March 31, 1985, a six-month average compared to the similar period in 1984 according to Audit Bureau of Circulations. Sunday circulation rose 2.2% to 1,065,782 for that period.

The newspaper, seeking to attract younger readers and strengthen its already dominant position in the market, in January, 1985, launched *Health*, a weekly tabloid insert designed to appeal to healthcare advertisers and health-conscious young adults.

The *Post* in April broke its first tv image campaign, the brainchild of newly hired marketing director Pierce DeGross, counting on the spots to sway younger readers to pick up the paper.

The *National Weekly*, a spinoff started in 1983, reached 47,406 circulation in 1984.

Newsweek's rate base climbed to 3 million in 1984, an increase of 50,000. It once again held the lead in ad pages among newsmagazines with 3,003.5 pages in 1984, up 2% from 1983. Gross ad revenues rose 13% to $247.1 million in 1984, according to Publishers Information Bureau. *Time*, for example, had 2,817.5 ad pages, up 4.2%, and ad revenues of $335.6 million, up 12.1%.

Mr. Simmons expects to decide soon whether *Newsweek* will publish a Japanese-language edition. It would be the first time a newsweekly ran a foreign-language edition, Mr. Simmons says. *Newsweek International's* combined rate base for its three editions is 655,000.

In July, 1984, the newsmagazine began co-publishing with Australia's dominant newsweekly, the *Bulletin*. A 24-page section of *Newsweek* is bound into every issue of the *Bulletin*. The venture boosted *Newsweek's* Pacific edition rate base to 305,000, from 230,000.

Domestically, *Newsweek* will concentrate on special sections. Last fall it put out a successful publication covering technology, *Newsweek Access*, which it will produce again this fall, Mr. Simmons says. Editions for college students, women and executives will continue.

The Post Co.'s four tv stations had operating margins increase 39% in 1984. WDIV, Detroit, moved into first place in 1984 in that market, according to Nielsen. The Post Co.'s other stations are also top-ranked in their markets.

Mr. Simmons says first-quarter 1985 increase of 15% in revenue for the stations "substantially outstripped the industry."

The Post Co. probably will not buy more tv stations in 1985. "We continue to look at all of the deals," Mr. Simmons says. "At the current moment, prices are a little too extravagant for our tastes."

The *Herald*, Everett, Wash., had a 3.3% decrease in daily circulation to 53,957 in 1984, according to the March 31, 1985 ABC audits. Advertising inches increased 7%, but the paper did not make a profit in 1984, Mr. Simmons says. He predicted the *Herald* would be in the black in 1985.

In nonmedia areas, Post Co. has decided not to accept any more cellular radio partnerships unless it has a controlling interest, Mr. Simmons says. The FCC recently awarded the Post Co. a 99% interest in a Miami cellular radio franchise. Mr. Simmons says the company will invest $30 million in that system in 1985 and 1986.

The Post Co., which lost $3 million from cellular systems in 1984 and projects 1985 losses of $8 million, holds a 20% interest in Baltimore and Washington cellular telephone franchises, which should be profitable by 1986, Mr. Simmons says. A Detroit operation in which the Post Co. owns 18% will be operational soon.

In January, 1985, the Post Co. and its partner, Cablevision Systems, Woodbury, N.Y., sold part of their investment in four regional cable sports network to CBS Inc. The Post Co., which lost $10 million on those operations in 1984, said it received about $25 million from the sale. Mr. Simmons says the company will remain in that business, which he expects to be profitable in 1987.

The Post Co. now owns one-third of SportsChannel ventures in New York, Philadelphia and Chicago and one-sixth of SportsChannel New England. It invested $20 million in the SportsChannels in 1984.

The Post in late 1984 purchased the Stanley H. Kaplan Educational Centers, which had 1984 revenues of $35 million. The centers help prepare students for college admission tests.

The company in April also repurchased $135 million of its Class B common stock.

Westinghouse Electric Corp., Pittsburgh, had an increase of 17.8% in media revenues of $945 million in 1984 from its Westinghouse Broadcasting & Cable to rank as the 15th largest media company.

Media revenues included contributions from radio stations and cable tv outlets. About $748 million in revenues came from Group W Cable operations and the remainder from broadcasting.

Group W Cable ranks as the third largest multiple system operator with basic subscribers of 2,013,000 in 1984, according to Cabletelevision Advertising Bureau Inc., New York.

Program syndication revenues of about $50 million are not included in the total.

Media at Westinghouse contributed 9.6% of total revenues of $10.27 billion, which were up 7.7% over corporatewide revenues in 1983. Operating income from media, which increased 49% in 1984 to $71.2 million, was 11.7% of total operating income.

Westinghouse reported first quarter 1985 sales of $2.31 billion, up 1.8% from the first quarter of 1984, and net income of $129.7 million, up 11.2%. The company said broadcasting and cable tv operations showed the biggest increase among its business segments in profitability, but did not provide figures.

During the year, Group W Radio purchased KQXT (fm) in San Antonio, an easy-listening format station, from Tichenor Media Systems for a reported $7 million. It also finalized the sale of NBC affiliate WPCQ-TV in Charlotte, N.C., ending a four-year foray into the tv business in that market.

The Charlotte station was sold to Odyssey Partners of New York for $24.3 million. The station was unable to gain a foothold with two competing vhf stations in the market. In the rating period prior to its sale, WPCQ attracted a 3 rating (percentage of tv households in the market) and 9 share (or percentage of tv homes with sets in use) from sign-on to sign-off. The struggling station had dropped its "NBC Nightly News" in 1982.

Westinghouse has five other affiliates, including two CBS affiliates, KPIX, San Francisco, and KDKA, Pittsburgh; two NBC affiliates, WBZ, Boston, and KYW, Philadelphia; and ABC affiliate, WJZ, Baltimore.

Group W Satellite Communications launched Home Team Sports, a regional pay cable services serving a five-state region from the Washington-Baltimore area.

Televising its second year of Baltimore Oriole baseball, Washington Capital hockey, Washington Bullet basketball, Baltimore Blast indoor soccer and college football and basketball, the service has grown to 82,000 subscribers.

Group W Satellite Communications also markets and distributes The Nashville Network, a country-oriented cable program owned by Oklahoma Publishing Co. and offered in partnership with the Grand Ole Opry. Subscribership for the network increased by more than 50% to 20 million.

Group W during the year grew to 140 cable systems serving 605 communities in 34 states. It was awarded two major franchises in 1984 in Chicago where it has formed a limited partnership, and became the first operator to begin installation in the city.

The cable group also is attempting to ward off wholesale cancellation of service by those who purchase videocassette recorders. Vcr users often disconnect cable service temporarily until the flush of home movie watching has passed. Group W says about 35% of its cable customers are outfitted with vcr's, up from 30% a year ago. Group W launched an ad campaign, created in-house, to show vcr owners how to hook up their machines without disrupting cable service. Copy in bill stuffers, direct-mail pieces, newspaper ads and local cable commercials ends with: "All you need is your cable and your vcr."

In executive changes, Pat Polillo, vp-general manager of KYW-TV in Philadelphia, was named corporate vp-East Coast for Westinghouse Broadcasting & Cable. Jane Hartley was named acting vp-corporate communications for Westinghouse Broadcasting & Cable from vp-markets development, Group W Cable. Also, Zvi Doron was named vp-international projects, a new post at Westinghouse Broadcasting & Cable, from vp-business development, Group W Satellite Communications.

Y&R-NBC deal ignites tv upfront buying fuse

By VERNE GAY

New York—Several major prime time upfront network tv advertisers last week began moving swiftly to close deals for the 1985-86 season.

The activity sparked what had been comparatively slow upfront sales after word leaked that Young & Rubicam in early June already had struck an $80 million, multiclient buy on NBC, which has emerged as the "Be there" network for advertisers as well as for yuppie viewers.

All three networks put their sales staffs on late shifts to process imminent orders anticipated from Kodak, Burger King and Ford (J. Walter Thompson); AT&T for news and prime time (D'Arcy MacManus Masius and N W Ayer, respectively); Pepsi-Cola (BBDO); McDonald's (Leo Burnett), and Nissan (William Esty). Ogilvy & Mather will complete several buys this week as well, sources said.

Network and top agency executives agreed the prime time market will weigh in at a little more than $2.4 billion, about the same as last year when the market was spurred by the time crunch created by the national election and the Summer Olympics. Last month, when upfront buying and selling began in earnest, sources were projecting $2.1 billion in network upfront sales. The upfront is expected to last through most of the summer.

According to ABC-TV, the three networks already have the $2.4 billion in advertiser requests. If the upfront market hits $2.4 billion, it is a reflection either of strong advertiser demand or the decision by the networks to put more inventory into the upfront market, on the assumption that the economy may not hold strong and the scatter market throughout the year will remain soft.

In either case, the upfront market took on a bullish look after the Y&R preemptive strike came to light. Agency sources, commenting on the ploy, said the strategy could be adopted soon by others.

At the end of May, after the networks had screened their new fall lineups, Y&R offered each network a chance to bid for half of the upfront budgets for Y&R clients Lincoln-Mercury, Johnson & Johnson, R.J. Reynolds Foods and Clorox. The package was worth $80 million, and the leverage was that the losing two networks would have to compete for the remainder of the four clients' upfront pie.

Paul Schulman Co., the network negotiator for Ralston-Purina, traditionally is the first agency to make an upfront buy. Schulman generally pays slightly higher than market rates, but gets to cherry-pick the most desirable programing.

The Y&R deal, however, broke tradition and moved before the Schulman buy, according to network sources. Instead of

Merger sets adrift $50M in ad business

By STEWART ALTER

The merger of D'Arcy MacManus Masius and Benton & Bowles, both New York, is dumping nearly $50 million of ad business on the street.

The biggest plum cut loose by client conflict at the future D'Arcy Masius Benton & Bowles is B&B's $24 million Texaco account, loser to DMM, Chicago's $25 million Amoco Oil Co. account.

B&B's Gaines Food, an $18.9 million account overlooked in earlier speculation on conflicts, also is on the market because of a conflict with DMM's Kal Kan (a unit of Mars Inc.) business, although B&B will continue handling until a successor agency is named. The Gaines dog food brands involved include Cycle, Gainesburgers, Gravy Train and Top Choice.

In addition, sources said the relationship between Detroit-based Stroh Brewery Co.'s Schlitz Malt Liquor and B&B will be severed soon.

A decision on the account, which is said to be worth $5 million to $6 million, could come as early as this week.

Hunter Hastings, Stroh vp-brand manager, refused to comment on the report, as did B&B.

Upping the price tag on the largest agency merger in history, B&B withdrew last week from consideration for the $25 million Hyundai Motor America account because of a conflict with D'Arcy's General Motors business, which includes Pontiac and Cadillac. On Friday the South Korean company named Backer & Spielvogel for its U.S. account.

In San Francisco, D'Arcy has decided to continue defending itself in a review for the paper products portion of Crown Zellerbach consumer products busi-

Celebrating the creation of the new D'Arcy Masius Benton & Bowles agency are George Simko, president of DMB&B/Diversified Communications Cos.; Hal Bay, president of DMB&B; John Bowen, chairman of DMB&B; Peter Redsell, president of DMB&B/International, and Roy Bostock, president of DMB&B/USA.

Cannes digs BBDO

By CLAIRE WILSON

Cannes—BBDO was the big winner at the International Advertising Film Festival here, taking the coveted Grand Prize for its Pepsi-Cola "Archeology" spot plus a Silver Lion for "Robots" and a Bronze Lion for "Space shuttle"—both also Pepsi spots.

The awards, considered by many to be the most coveted international creative advertising honors, were to be announced last Saturday.

In all, judges screened 2,178 commercials. At press time, it was unclear how many awards the festival would present, as the number varies from year to year.

It was the second year in a row

Last Minute News

Jack in the Box may drop WRG

San Diego—Jack in the Box is reviewing agencies for its $20 million account, currently at Wells, Rich, Greene/West, Los Angeles, reliable sources say. The fast-food chain is said to have made preliminary overtures to San Francisco shops Dailey & Associates; Della Femina, Travisano & Partners; Doyle Dane Bernbach, and Ogilvy & Mather, as well as to Scali, McCabe, Sloves, New York. WRG is expected to be included. There is speculation Jack in the Box executives also approached Cohen/Johnston, Los Angeles, a new agency founded by two former WRG execs (AA, Feb. 11). WRG/West may consider closing its office in Los Angeles if it loses Jack in the Box, agency sources say. WRG/West president Richard Kelly refused comment. Mr. Kelly, a former Scali executive, also denied sources' reports that he had been in contact with Scali concerning his interest in heading that agency's soon-to-open Los Angeles office (AA, June 20).

Hyundai Motor opens door to Backer

Garden Grove, Cal.—Hyundai Motor America has selected Backer & Spielvogel, New York, as first agency for its $25 million account. B&S will establish a Los Angeles office to serve the South Korean auto maker.

Sweep prize: Joan or $1 mil

By NANCY GIGES

When "Dynasty" fans tune in to find out what happened to the Carrington crowd next fall, they will see the self-styled bitch/goddess Alexis in another role as well.

Joan Collins, who plays Alexis Morrell Carrington Colby Dexter, will invite viewers in a tv spot for Canada Dry ginger ale to enter a sweepstakes offering a grand prize of dinner with her or $1 million.

Canada Dry and agency Young & Rubicam, New York, came up with the idea several months ago when the company decided on the cash giveaway.

Said Bill Appelman, Y&R senior vp-group creative director, "After all, Canada Dry ginger ale prides itself on being not too sweet. So does Alexis. Canada Dry wanted to drop a cool mil; Alexis would do that in a blink. Canada Dry stands for class and

(Continued on Page 54)

Bill Appelman, senior vp, Young & Rubicam, had no complaints about shooting a Canada Dry commercial with Joan Collins.

Smaller carriers may tumble

IBM link adds clout for MCI

By BRIAN MORAN

The proposed alliance of MCI Communications Corp. and IBM will force smaller long-distance telephone carriers to quickly scramble for special vertical markets, telecommunications analysts say.

The partnership, announced last week, also may put some AT&T competitors out of business in the residential long-distance battle. The handful of companies that survives will do so by developing networks for new, commercial business-to-business customers that the giants might not serve, analysts said.

"The marketing clout of MCI has just increased by a quantum leap," said Neil Yelsey, an analyst at Salomon Brothers, New York. "The only safety for the smaller carriers will be to narrow their marketing initiatives to niches."

MCI, the No. 2 long-distance carrier behind AT&T and the only profitable AT&T challenger, has agreed to allow IBM, the largest computer company, to acquire up to 30% of its stock. As part of the $1 billion deal, MCI will buy Satellite Business Systems, a smaller long-distance company controlled by IBM and Aetna Life & Casualty.

Armonk, N.Y.-based IBM has pledged to invest up to $400 million in cash in MCI over the next three years, a war chest that MCI will use to narrow the gap in its adver-

Eastern Air Lines will attempt to overcome the handicap of a late takeoff in the booming European summer travel market with a heavy media blitz for its new Miami-to-London service. *See Page 4.*

Book publishers, looking for a piece of the booming home-video programing market now dominated by Hollywood, are busily writing business for themselves in a new medium. Giant publishing houses, including Simon & Schuster and Random House, still nursing bruises from dabblings in microcomputer software, are taking their first tentative steps in video. *See Page 6.*

The Saatchi & Saatchi buying spree, which so far this year has netted U.S. direct-marketing, public relations, corporate identity and sales promotion companies, is not over yet. Last week, the U.K.'s biggest agency group made its first major foray into Canada with the $6 million acquisition of Hayhurst Advertising, Toronto. *See Page 10.*

Grey Advertising, in its first published analysis of the network tv marketplace, suggests that several factors at work bode ill for the price-conscious tv advertiser. Grey reports that the number of commercial slots will remain about the same this year, but the number of advertisers competing for that time will continue to increase. Meanwhile, the number of viewers watching each commercial spot will continue to shrink. *See Page 12.*

Ad Age begins a new monthly feature spotlighting the most creative and effective newspaper advertising, as judged by a panel of experts. This month's top ads are for Nike, Apricot computers, Arco, Seven-Up Co. and Miller Brewing. *See Page 28.*

It never won any ad awards, but the "I am the nation" print ad from Norfolk & Western Railway may be the most widely read, widely reprinted, widely quoted, long-lived print advertisement ever. *See Page 30.*

CORPORATE CLOSEUP

HOLIDAY
CORPORATION
The Leader In Hospitality

Like other relics of the 1950s, the familiar green Holiday Inn sign that once beckoned vacationers from the sides of America's highways is all but gone. In its place is a new emphasis on serving business and family travelers, from a revitalized lodging company, Holiday Corp., that within the past six weeks has been given a new name, a new address and a new advertising strategy. *See Page 4.*

FORUM

Management consultant Glenn KnicKrehm discusses brands, brand names and consumer marketing. *See Page 18.*

Pamela Berns warns that clients are people, too, and there is more than one kind of target audience. *See Page 18.*

Young, upwardly mobile agency interns are profiled by one of their own. *See Page 18.*

INTERNATIONAL

European marketers are experimenting with global strategies on a few products rather than an entire line, and so far they like the results, according to speakers at a two-day conference in London last month that was sponsored by *The Economist*. *See Page 32.*

The controversy surrounding the alleged discovery of Nazi war criminal Josef Mengele's body in Brazil is helping Germany's No. 2 consumer magazine, *Bunte*, in its market battle with archrival *Stern*. *See Page 33.*

DIRECT MARKETING

Direct marketers appear to be gaining in their effort to obtain direct access to telephone-directory information from the seven regional telephone operating companies. *See Page 42.*

Beginning this fall, consumers at shopping malls around the country will be able to watch direct satellite broadcasts of news, advertising and messages at kiosks provided by the Advanced Telecommunications Network. *See Page 42.*

Wendy's 'syncs' into breakfast

By SCOTT HUME

Wendy's International today makes its first national move toward all-day restaurants with the debut of the long-expected (AA, Feb. 25), eight-week network campaign for its breakfast menu.

Dublin, O.-based Wendy's says it's approaching breakfast as a new product and will spend on this campaign more than the $10 million it budgeted for the introduction of its last major menu addition, stuffed baked potatoes.

While Clara Peller doesn't return, the new tv spots from Dancer Fitzgerald Sample, New York, do have a familiar ring and certainly a familiar tune. The chain has rested the "Where do you think you are, Wendy's?" theme line that has accompanied the two-year, market-by-market breakfast introduction. Instead, it has revived the "Only Wendy's" theme, sung to The Platters' 1950s classic "Only You," last used in the chain's 1983 hamburger advertising.

The campaign also includes Wendy's first network spots targeted to black consumers (created by Lockhart & Pettus, New York) and Hispanics (via Mendoza, Dillon & Asociados, Newport Beach, Cal.).

As it did with "Only Wendy's" the first time around, DFS has built two of the five new spots around customers lip-syncing Wendy's words to The Platters' melody. Other commercials rely heavily on close-up product photography to promote the menu, which includes scrambled eggs, omelets and a breakfast sandwich served on wheat or white toast.

The breakfast effort follows a six-week campaign for its Light Menu salad offerings (AA, May 6), but the chain isn't ignoring sandwiches. A bacon cheeseburger topped with swiss is being tested in selected markets (with local tv spots that will continue to run beside the network breakfast cam-

Late West Coast news

Dailey shop taps Chabre as chief

Dailey & Associates exec vp Stephen Chabre has been named to the new post of chief operating officer of the Los Angeles agency. The appointment, in the making for a year, gives the 41-year-old, nine-year Dailey veteran responsibility for all agency accounts, including Thomas J. Lipton Inc.'s Lawry's Foods, for which he worked most recently as a group director.

Former Chiat/Day associate creative director Steve Hayden, who left the agency to join Tracy-Locke's new Los Angeles office opening here Aug. 1 (AA, June 3), has lured two of his former Chiat/Day colleagues to T-L: Yvonne Smith, former art director, has become creative director; Lori Brandalise, copywriter at C/D, becomes associate creative director.

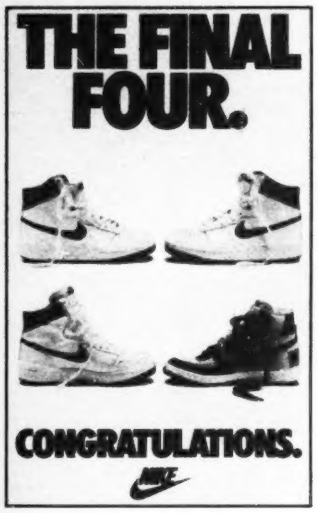
Hong Kong-based Lee Kum Kee will begin testing a new commercial for its House of Lee Chinese barbecue sauce in Los Angeles July 8, featuring a Chinese cowboy who talks like John

(Continued on Page 8)

NOTICE

There will be no issue of Advertising Age Thursday on July 4, Independence Day.

BEST OF PRESS



With this page, ADVERTISING AGE begins a new monthly feature that will reproduce newspaper ads that we believe represent a creative and effective use of the medium. The ads are culled from tear sheets collected by National System Inc., St. Louis, which clips more than 300 newspapers each day. The panel includes Hank Simons, vp-creative director, Newspaper Advertising Bureau, New York; James Dunaway, vp-director of information for the NAB, and William F. Gloede, who covers the newspaper industry for ADVERTISING AGE. Ads may be submitted to Mr. Gloede at AD AGE's New York bureau.

Saluting the NCAA's Final Four is this ad for Nike Athletic Shoes, via Chiat/Day, Los Angeles. Creative: Jeff Gorman, Gary Johns.

We're about to change how American business views the computer industry.
apricot

The right dose of color highlights the new fruit on the computer systems block in this ad for Apricot computers via Levine, Huntley, Schmidt & Beaver, New York. Creative director, Allan Beaver; creative group heads, Lee Garfinkel, Tony Gregorio; art director, Michael Vitello; copywriter, Lee Garfinkel; photography, Cailor-Resnick Studio.

This Flash Report of newspaper advertiser investments, compiled for ADVERTISING AGE by Media Records, is derived from tabulations that cover 29 dailies and 23 Sunday editions in 15 cities: Atlanta, Baltimore, Boston, Cincinnati, Chicago, Cleveland, Dallas, Denver, Detroit, Los Angeles, New York, Philadelphia, San Francisco, Washington and Youngstown.#

Source: Media Records Inc.

Newspaper ad spending strong

NEW YORK—The ADVERTISING AGE Flash Report for March shows advertisers spent about $56.5 million more in daily newspapers in 15 major markets than they did a year before.

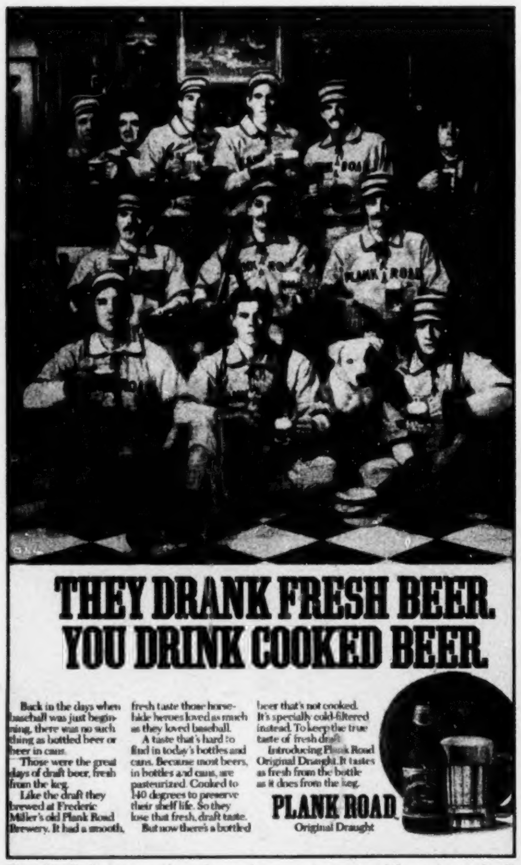
Department stores and general-merchandise stores lead all categories by far, with percentage increases of 30.7% and 55.8%, respectively. Department stores increased spending $21.4 million to $90.9 million, while general merchandise retailers pumped $14.9 million more into the measured dailies in March, bringing their total spending to $41.6 million.

Other categories posting large percentage gains were new cars, up 48.8% to $15.9 million; public service utilities and commissions, up 51.9% to $8 million; radio-phonograph-tv-records, up 29.4% to $16.8 million; computer stores and supplies, up 31% to $5.5 million; food stores, up 21.1% to $27.8 million, and amusements, up 14.7% to $30 million.

Other gainers included alcoholic beverages, up 2% to $2.2 million; publishing and media, up 8.3% to $11.3 million, and banks and trust companies, up 8.8% to $9.4 million.

Categories in which ad spending declined were stock, bond and investment houses, down 16.3% to $1.8 million; airlines, down 9.1% to $11.5 million; cigarets, down 11.8% to $3.1 million; computers, equipment and services, down 14% to $4.1 million, and cameras, photo supplies and services, down 70.9% to $146,168.

The Flash Report is compiled for ADVERTISING AGE by Media Records Inc., based on linage measurements in 29 daily and 23 Sunday newspapers in 15 major markets.#



THEY DRANK FRESH BEER. YOU DRINK COOKED BEER.
PLANK ROAD
Original Draught

Back in the days when baseball was just beginning, there was no such thing as bottled beer or beer in cans.

Those were the great days of draft beer, fresh from the keg.

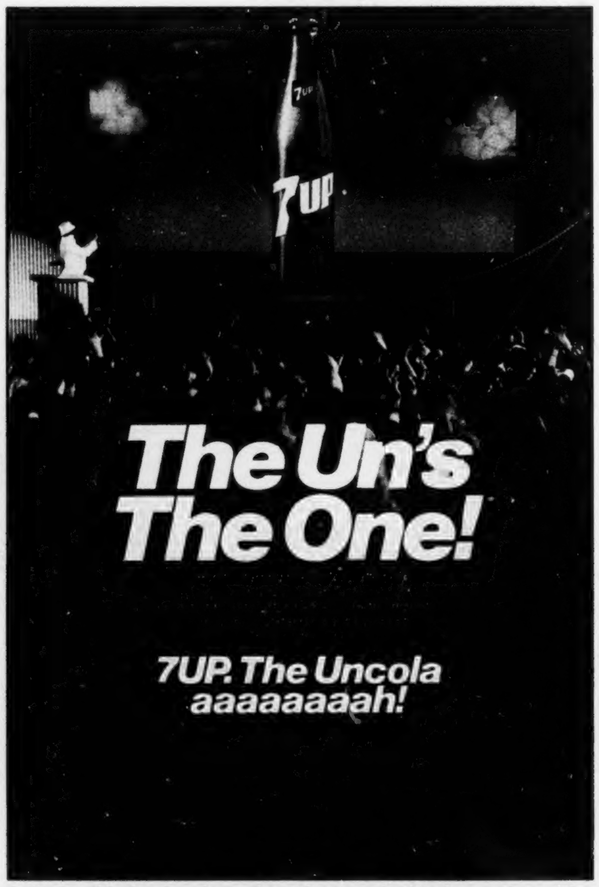
Like the draft they brewed at Frederic Miller's old Plank Road Brewery. It had a smooth, fresh taste those horsehide heroes loved as much as they loved baseball.

A taste that's hard to find in today's bottles and cans. Because most beers, in bottles and cans, are pasteurized. Cooked to 140 degrees to preserve their shelf life. So they lose that fresh, draft taste.

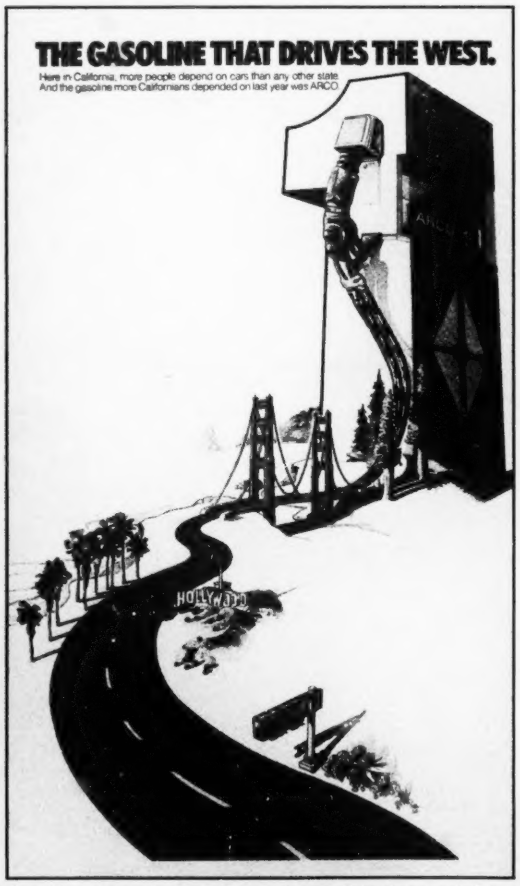
But now there's a bottled beer that's not cooked. It's specially cold-filtered instead. To keep the true taste of fresh draft.

Introducing Plank Road Original Draught. It tastes as fresh from the bottle as it does from the keg.

Capitalizing on the Americana craze with a baseball theme, Chiat/Day, New York, ran this ad, featuring a tintype-style photo, for Miller Brewing Co.'s Plank Road beer, now in test in Hartford, Conn. Creative: Mario Giua, Robin Raj.



A tie-in with the Academy Awards propels this four-color ad for the Seven-Up Co., via N W Ayer, New York. Executive creative director, Keith Gould; art director, Greg Grann; copywriter, Janet Dorfman.



THE GASOLINE THAT DRIVES THE WEST.
HOLLYWOOD

Here in California, more people depend on cars than any other state. And the gasoline more Californians depended on last year was ARCO.

Creative use of pump hose drives this Arco ad, from Foote, Cone & Belding. Creative director, Larry Tolpin; art director, Tom Guttman; copywriter, Larry Tolpin; art supervisor, Mel Sant; illustrator, Bob Rodriguez.

This data has been provided by Media Records for exclusive publication in Advertising Age and may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Reporting Service, Total Advertising data shown has been supplied by the publisher to Media Records and included in this compilation. All publisher supplied figures are converted to MRCS/SAU inches by Media Records. These newspapers are indicated with an asterisk (*).

REPORTING METHODOLOGY

Media Records continues to measure in linage but due to the introduction of the SAU 6 column format Media Records has designed and developed a methodology with the approval of our subscribers, the INAME Measurements Committee, The ANPA/NAB Working Committee, The AAAA Newspaper Committee, and other industry groups.

The approved methodology is titled The Media Records Conversion System (MRCS) and is based upon the printed page area of each product of the newspaper and is a five step approach as follows:

1. Measure Printed Page.....
   Width and Depth in Inches.
2. Determine Square Inches of Page.....
   Multiply Width by Depth Inches.
3. Determine the Number of SAU Inches of Page.....
   Divide the Square Inches by 2.0625 (SAU Inches).
4. Measure the Total Lines of the Page.....
   Multiply Column Depth Agate Lines by the Number of Columns on the Page.
5. Determine the Factor for Converting Measured Lines to Reported SAU Inches.....
   Divide the Total Lines of Page by the Number of MRCS/SAU Inches of the Page.

Summer forecast: Hotter for coolers

By SCOTT HUME

The booming, $333 million wine-cooler segment is digesting a series of strategic moves that brought new players and new tactics into the action last week.

The big surprise among the players is the dramatic entry of Brown-Forman. The Louisville-based distiller bought out segment leader California Cooler, Stockton, Cal., for $63 million in cash plus millions more in incentive payments based on future sales.

Also trying to cash in, through new products rather than acquisition of an existing brand, are brewer Adolph Coors Co., Golden, Colo., and vintner-distiller Schenley Industries, New York.

Separately, G. Heileman Brewing Co., La Crosse, Wis., is expanding distribution of two brands in an effort to become a national player.

The tactical maneuvering generated by the crush of cooler brands is beginning to show itself in a battle for niches in the marketplace: Citrus-based versus malt-based products, four-bottle versus six-bottle packs and price-point testing.

Brown-Forman plans to operate California Cooler as an independent unit, said a spokesman for the distiller, adding that California Cooler chairman Michael Crete and president Stewart Bewley will stay on in those positions.

B-F is "very pleased" with advertising Chiat/Day, Los Angeles, has done for California Cooler and "there has been no consideration" given to an agency change, the spokesman said.

California Cooler director of marketing Tom Gibbs predicted the acquisition will allow it to substantially increase its annual ad spending, estimated at $10 million.

Chiat/Day executives are expected to meet July 9 with their counterparts at California Cooler and B-F to discuss strategy for the coming year.

Industry observers put California Cooler's share

(Continued on Page 64)

Saturn, ringing with hype, puts off agency pick

By JESSE SNYDER

DETROIT—The agency review for one of the year's most intriguing new accounts, General Motors' Saturn unit, has been postponed 12 months amid waves of free publicity that have already generated widespread public interest in the venture.

That move reverses expectations by Saturn and GM executives when the new subsidiary was established Jan. 8 that an agency might be picked by midsummer (AA, Jan. 10).

"We don't need an agency to build up Saturn's image," said spokesman Stan Hall. "Almost the reverse is true. We've had so much positive publicity that we need to cool public expectations. After the plant-site selection is behind us, Saturn executives are going underground for a while."

GM has not publicly discussed likely ad budgets for Saturn, but, based on expected sales targets, it would start with an ad budget of about $50 million and build within three years to about $120 million a year.

The delay in picking an agency certainly hasn't slowed unsolicited contacts. "Dozens" of letters, presentations and even videotapes of roughed-out commercials are bulging file cabinets at Saturn's temporary headquarters in suburban Detroit.

"We've heard from image-builders, agencies, students, even professors who want us to look at class projects," Mr. Hall said.

Among agencies that have expressed interest in Saturn are: W.B. Doner & Co., Southfield; N W Ayer, Detroit, GM's corporate agency, and Benton & Bowles, which will become part of the GM agency family through its merger with D'Arcy MacManus Masius, Bloomfield Hills. DMM handles GM's Cadillac and Pontiac divisions.

Saturn plans to announce soon—maybe as early as this week—the site for its plant.

The GM unit's first president, the late Joseph Sanchez, said he wanted an agency on hand before the plant site was announced so it could begin to shape a positive

Ready to rebound

Tv sports market decline ends

By ROBERT RAISSMAN

Tv sports, which last year saw prices and ratings plummet virtually across the board, may be poised for the start of a turnaround this season. No one is calling sports a seller's market, but there are signs that the decline of tv sports has bottomed out.

"I wouldn't rely on the sports market staying soft for long," said Steve Leff, exec vp, Backer & Spielvogel, New York. "If it stays relatively depressed and all other marketplaces move along in other dayparts, sooner or later sports is going to regain the attraction it lost when it was so aggressively priced."

Network sales executives, who generally try to portray every tv daypart as bullishly as possible, no longer are admitting that sports sales are soft. Still, the network sales chiefs concede that because of the glut of sports programing last season and the availability of nonsports programing alternatives that appeal to men, the actual health of the sports market remains impossible to predict with accuracy.

"This is a very hard market to call, so I'll call it uncertain," said Robert Blackmore, senior vp-sales, NBC. "There is a little more to work with in this market as

(Continued on Page 64)

Last Minute News

Honig will switch from Geers Gross

NEW YORK—Marvin Honig definitely is leaving Geers Gross, where he is vice-chairman and executive director, as soon as he completes some client assignments within the next month or so, sources say. Mr. Honig, formerly vice-chairman/creative director at Doyle Dane Bernbach, joined Geers Gross last fall. Neither Mr. Honig, who had previously denied he was leaving (AA, June 17), nor agency president Bob Gross could be reached.

Benetton exports Sisley chain to U.S.

NEW YORK—Benetton, the Italian sportswear retailer, this fall will introduce here its Sisley chain of upscale women's clothing stores. J. Walter Thompson USA handles. JWT also has created the Benetton shops' first tv commercials, for MTV: Music Television, and their first radio commercial, a fund-raiser for USA for Africa.

Max Factor talks scents with Paul Newman

STAMFORD, CONN.—Paul Newman is in the "initial stages" of discussing a men's fragrance with Max Factor, but Factor president Paul Masturzo says progress in the talks will depend on how great a part the actor is willing to play in advertising the fragrance. Another fragrance company discussed a similar project a year ago but backed off when Mr. Newman said he did not wish to appear in any advertising, sources say.

GM agencies make demands of magazines

DETROIT—General Motors' "point agencies" designated to head corporatewide negotiations with magazines (AA, May 27) are demanding a

NBC bucks billion barrier in upfront

By VERNE GAY

New York—NBC-TV by the end of the week is expected to become the first network ever to write $1 billion in upfront business, network and agency sources say.

The network, which has figured prominently in the upfront plans of virtually every advertiser seeking young adults, was most recently bolstered by major commitments from Leo Burnett USA, BBDO, Ogilvy & Mather and J. Walter Thompson USA, each of which completed its NBC buy over the last 10 days.

There also were reports that Procter & Gamble, Cincinnati, and Lever Bros. have put sizable buys on "hold," the last step in the negotiating process before signing contracts. General Foods Corp., White Plains, N.Y., and Coca-Cola Co., Atlanta, also have made substantial commitments to NBC, sources said.

NBC has emerged as the darling of upfront advertisers, primarily because of its strong showing last season in the A.C. Nielsen Co. ratings but also because of its apparent willingness to make deals quickly. NBC also leads its competition by a slim margin among adults 18 to 49, the most sought-after demographic group.

The network's meteoric rise has led some observers to speculate that ABC-TV and CBS-TV, which have severely lagged their rival in booking upfront sales, would be left playing catchup.

However, both began courting advertisers aggressively last week when it became apparent NBC was coming close to snagging nearly half of all upfront budgets, expected to top off at about $2.4 billion.

"CBS and ABC have caught up and have become very, very aggressive," said one agency source.

Last year, NBC wrote about $784 million in the upfront market, sources said, while CBS wrote $767 million and ABC captured $856 million.

Less than $1.5 billion in upfront sales had been clocked before July 4, network and agency sources said. Sources speculated that ABC and CBS, both vigorously pursuing the estimated $900 million still uncommitted, could end up with just

(Continued on Page 62)

Seven 'USA Today' pages hail contributors

Kellogg runs serial ad

By JULIE FRANZ
and WILLIAM F. GLOEDE

Kellogg Co. celebrated July 4 by thanking by name 173,268 consumers who helped the company raise money for the Statue of Liberty-Ellis Island Foundation restoration fund.

The listing took up seven of the nine advertising pages in *USA Today's* first holiday edition, a message that cost Battle Creek, Mich.-based Kellogg an estimated $150,000, minus volume discounts.

The only other display ad in the paper was an Advertising Council color spread, via Kenyon & Eckhardt, New York, for the foundation. Gannett Co., which owns *USA Today*, donated those two pages, a foundation spokesman said.

Kellogg called its seven-page salute a "Statue of Liberty Honor Roll" of the names of consumers who sent the company two Universal Product Codes from Kellogg's Corn Flakes and Kellogg's Crispix. In exchange for the UPC codes, Kellogg donated $86,634, or 50¢ per participating consumer, to the foundation.

As one of the seven founding sponsors of the Statue of Libery restoration project, the company placed itself under a "multi-million-dollar obligation to the fund," the foundation spokesman said. The ad dollars Kellogg spent July 4 were part of that obligation, he added.

Thus far, the foundation has raised $160 million of

Late West Coast news

'Here's how' fails; A-T turns to Chiat

Software publisher Ashton-Tate, Culver City, Cal., last week abruptly fired Dancer Fitzgerald Sample, Torrance, the same agency it dismissed and rehired less than a year ago. Chiat/Day, San Francisco, was named to replace it. Sources say the company shifted its account to Chiat after concluding the "Here's how" campaign DFS created wasn't boosting sales. A-T vp marketing John Merson said the split with DFS was by mutual agreement. "We decided it was time for a fresh approach," he said. A-T spent about $13 million on advertising and promotion last year.

Pioneer Electronics' vp-marketing communications Sharyl Juhlin has left the Long Beach, Cal.-based consumer electronics company to take on a senior marketing post with CL9, Los Gatos, the new venture founded earlier this year by Apple Computer cofounder Stephen Wozniak. CL9, which stands for Cloud Nine, is developing computerlike products that work with home entertainment sound and tv systems. Vp-marketing Chris Byrne takes on most of Ms. Juhlin's responsibilities at Pioneer.

Hitachi Sales Corp., Compton, Cal., will start its first new network tv campaign in two years in August. "Step into the world of tomorrow with Hitachi," the upcoming ads set in a futuristic space station will say. The commercials will use Hitachi's existing spokesperson, actress Holly Smith.

Sanyo Electric's consumer electronics division, Compton, Cal., named William Byron to the new post of president. The appointment follows the departure of exec vp-sales and marketing Jeffrey Berkowitz, who sources say resigned under fire. Mr. Byron, most recently a principal in a manufacturers' rep company in Southern California, was Sanyo's senior vp-sales marketing from 1971 to 1981. During his tenure at Sanyo, the tv and stereo marketer worked with Nathanson Advertising, Encino,

(Continued on Page 66)

Tv sports

(Continued from Page 1)

opposed to last year."

The tv sports marketplace has been depressed for a number of reasons. The breakup last summer of the National Collegiate Athletic Assn.'s monopoly over college football tv rights led immediately to oversaturation of the sport on tv, both on network and in syndication and cable. The quality of productions varied greatly, and many big events fell short of expectations as entertainment vehicles.

Image tarnished

Also, the image of professional athletes has been tarnished by reports of drug abuse; grand-jury inquiries into suspected drug sales and consumption by baseball players; gambling scandals in professional and college sports; player strikes; huge contracts, and the general impression that athletes are fatter cats than the fat cats who own the teams. There also has been a paucity of star personalities, especially in football, the sport that holds the key to success.

Another reason, sometimes overlooked, is the increasing number of entertainment alternatives presented to male viewers. "People who have watched sports in the past now can also watch a movie on cable," said J. Larre Barrett, vp-sales, ABC Sports.

Mr. Barrett and other network sales executives pointed to a few things that indicate the network sports marketplace may be moving toward the beginning of a turnaround. Programing executives, they said, have begun to respond to the imbalance in the supply-demand equation in sports.

"There will be fewer hours of sports programing [in 1986]," said Jerry Dominus, vp-sales, CBS-TV Network. "There will be a greater concentration on the events that command viewer loyalty."

The major indicator of the health of tv sports is sales for each network's National Football League package. Executives at all three networks said football sales were going well, but none offered specifics.

Mr. Barrett said ABC already has identified $35 million that was put into football in 1983 but was not spent in '84 because some clients had heavy Olympic commitments. "My suspicion is that number is low," Mr. Barrett said. "It may be closer to $50 million, but if you had taken those dollars and put them into the '84 marketplace, you would have had a totally different situation."

Mr. Dominus agreed that the Olympic money would strengthen the market. "I haven't identified how much is out there yet. But they [advertisers] have lots of options," he said. "Some of the money was [allocated as] special appropriations and some of it will be redirected. The question is where."

Monday game the key

A key to over-all NFL sales is ABC's "Monday Night Football." Mr. Barrett indicated that sales were going well, although the "MNF" package is being sold at a lower upfront price than it was during the '84 season.

He said six automobile marketers—Nissan, Ford, Chrysler, Chevrolet, Pontiac and Buick—have bought into the series. Last season, Nissan, Chevy and Buick split the automotive exclusivity. Chevy, however, dropped out of the Super Bowl in a protest over the $1 million-per-minute price tag. Ford picked up that option and has been able to keep its hold in the regular-season games.

The confusion resulting from the Supreme Court decision that broke the NCAA's control of college football tv rights has lifted and both CBS and ABC, the two networks that televise college football, should finally benefit from the lower rights fees they paid for the college games.

Last year, key sports advertisers, worried about dilution and segmentation, cut back spending. Both networks cut ad prices in half (AA, July 30, '84, *et seq.*), charging about $30,000 for a 30-second spot. During the '83 season, college football was priced between $60,000 and $65,000. This season, prices will be increased, but no where near the level reached before the Supreme Court's decision.

Mr. Barrett said during the '84 season ABC sold 11 30-second units to franchise advertisers. He expects 26 units per game on ABC's College Football Assn. package will be sold on a franchise basis. Nissan, which had never been a sponsor of network college football, according to Mr. Barrett, already has purchased a half-game franchise. Miller Brewing Co., Milwaukee, and Stroh Brewery, Detroit, also have bought time on the CFA package.

Last season, the Supreme Court's ruling came so close to the opening of the college football season (AA, July 2, '84) that getting a package to the marketplace was a chore in itself. Mr. Barrett pointed out that ABC had projected a 6.0 rating to its advertisers for the '84 season and wound up doing 33% better.

Many syndicators gone

In all probability there will not be as many games placed into syndication in 1985 as there were in '84. Last season put many syndicators out of business, leaving a much smaller roster of companies around to pick up the pieces.

"Last year, from a network perspective, we, as has CBS, showed that college football is a viable marketing tool for advertisers to utilize and can again get solid ratings," Mr. Barrett said.

But some network executives said that to hold college football up as a sign of a turnaround in the market may not be an accurate measurement. "College football is not a big [advertising] pot to fill up," said one network executive who declined to be identified. "It's not difficult to fill under any circumstances."

Another key to the market will be ABC's sales of the baseball World Series. ABC is exercising its option in its contract with Major League Baseball to telecast all the games in prime time. In 1983, the last time ABC broadcast the World Series, the network sold 11 franchise units per game. For the '85 fall classic, Mr. Barrett said, there will be at least 22 franchise units per game.#

Estimated costs of a :30-spot this fall on major sports

Television sports in 1984-85 was hit with continued audience erosion and severe fragmentation, especially in college football. As a result, prices plummeted and the outlook for 1985-86 was anything but robust. Nevertheless, the tv networks have increased the price of a 30-second spot on every major fall sports property except weekend baseball championship series, ABC's "Monday Night Football" and NBC's coverage of the American Football Conference games. The following chart lists the estimated cost of a 30-second spot on major sports this fall. The prices are based on extensive interviews with network and agency sources and reflect the average prices being paid in the upfront market. These prices, however, vary significantly during the course of the year. A Thanksgiving Day football telecast will command higher rates than a typical weekend game, for example. Likewise, football games played in September will cost less than games played in November and right before Christmas. The prices listed below, however, are a good reflection of the state of the prime sports market at this time. *Source: Advertising Age.*

Sport (network)	1985 Price ($)	1984 Price ($)
College Football (CBS)	35,000-40,000	25,000-30,000
College Football (ABC)	45,000	25,000-30,000

Super Bowl (NBC)	550,000	500,000 (ABC)

Coolers

(Continued from Page 1)

of the wine-cooler category at 55% to 60%, though the rapid influx of new players is steadily eroding that lead.

According to *Market Watch*, published by M. Shanken Communications, 29 new brands were introduced last year. Nearly a dozen more have appeared on retail shelves so far this year.

Intensely crowded

The crowding is already intense enough that the new players are trying to find niches for their products in subcategories in an effort to claim distinctiveness and avoid charges of "me-tooism."

Coors' Colorado Chiller, a brand rumored earlier to have been in development (AA, June 10), is a malt-based beverage the company hopes to position between the beer and wine markets.

Tv spots created by Tatham-Laird & Kudner, Chicago, carry the theme "Lighter than beer, more refreshing than wine." Those spots begin airing this week in Colorado Chiller's six test markets—Charlotte, N.C.; Dayton, O.; Lubbock, Tex.; Orlando; San Diego, and Spokane, Wash.

Schenley is touting its wine-based Dubonnet Splash brand as a "new wave" in coolers, one that sculpts a niche somewhere between coolers and blush wines.

Unlike California Cooler and most of its competitors, which are citrus-flavored, Splash has a taste Schenley says is closer to white zinfandels or kir royale (champagne and creme de cassis).

Both marketers also have pushed the quest for points of difference to their products' packaging. Colorado Chiller will be sold in six-packs rather than the four-pack that has become the cooler standard. Price points ranging from $3.75 to $4.25 will be tried in test, though Coors brand development manager Craig Guthrie said all will give Colorado Chiller a per-bottle price advantage over its competitors.

Schenley is sticking with the four-pack style for Dubonnet Splash, but the product will come in clear bottles. That gives the product what Schenley vp-marketing Andrew Berk called a "far more elegant presentation" than the green bottles commonly used.

Complementing the elegant look is the tv advertising created by Leo Burnett USA, Chicago. The 30-second commercial that broke last week in selected southern and western markets has a glitzy, avante-garde look that is graphically reminiscent of Hollywood musicals of the 1930s and '40s, an agency spokesman said.

Themed "Catch the new wave of refreshment," the spot combines briskly edited footage of a swimmer, a sailor on a motorboat and a cliff-diving woman.

"Basically, we think the brands that will come out on top will be those willing to spend the most marketing dollars," said Schenley's Mr. Berk. "It will be a question of who has the most financial staying power."

Consequently, Schenley is experimenting with three different levels of ad spending—at national rates of $28 million, $20 million and $17 million—to determine just how much money will be necessary for Splash to come out on top.

Industry watchers also expect well known brand names to best survive the category's inevitable shakeout.

As the category creator, California Cooler has created awareness for its name, but such brands as New York-based Joseph E. Seagram & Sons' Seagram's Cooler are getting early trial based on name familiarity, these sources suggest.

Schenley has followed that lead by giving its cooler the Dubonnet name used on its line of cordials.

Brewers cautious on names

Brewers—especially Coors and Stroh Brewery Co., Detroit, which are marketing malt-based rather than wine-based coolers—have shied from tying their names too closely to the products.

Tv spots for Colorado Chiller are tagged "Made by Coors in Golden, Colo.," but the brewer's name is downplayed on product packaging.

"This is a different product competing in a different category [than our other brands]," Mr. Guthrie explained. "If we called it Coors' Colorado Chiller, consumers would automatically think beer, and we don't want that."

Similarly, packaging and advertising for Stroh's White Mountain Cooler carry no mention of the brewer (AA, March 11). MCA Advertising, New York, handles.

Heileman is preparing national rollouts for two products in the category. One is Country Cooler, a wine-based product marketed under an agreement with Vineyards Unlimited, Santa Fe Springs, Cal. (AA, Aug. 20).

Heileman also is moving La Croix Sparkling Cooler, carrying the name of its mineral-water subsidiary, into national distribution. The company said it has no immediate plans for national ad campaigns. W.B. Doner & Co., Southfield, Mich., handles.

One brewer that reportedly has pulled out of the cooler market is Milwaukee's Pabst Brewing Co. According to published reports, Pabst ceased marketing its Margarita Cooler brand (AA, Sept. 3) after the brewery was acquired by Paul Kalmanovitz. A Pabst spokesman declined comment on the brand's status.#

'Do you know me?' Yes, but I'm Peking

By STEWART ALTER

New territory in on-location tv commercials shooting was opened last month when American Express Co., New York, and its agency, Ogilvy & Mather, became the first to shoot an American commercial in the People's Republic of China.

The commercial, which will be the 65th in the "Do you know me?" series for the American Express Card, will go on the air later this month or early August, said Glen Gilbert, director of advertising-consumer card marketing at American Express. It was shot June 11 and 12 in three locations in Beijing—the Forbidden City, Tian An Men Square and the State Guest House.

The featured person in the new commercial is Lord Wedgwood. "Do you know me? I'm one of the biggest names in china," he says, referring to Wedgwood china. "But here in Peking a lot of people don't recognize me."

The card is accepted in more than 145 establishments in 19 cities in the PRC, and just last April 15 the Great Wall Sheraton Hotel in Beijing became the first internationally managed property in that country to accept the card.

Letting people know that "we are the international card and our presence in China is growing" was one of the reasons for developing the Chinese commercial, said Mr. Gilbert. But "it was also a way of refreshing and extending the 'Do you know me?' campaign."

He would not say how much the commercial cost, but said it was "not terribly out of the pattern" of costs for producing other commercials in that series.

While American Express is the first American company "to our knowledge" to shoot in China, said Mr. Gilbert, the Hong Kong crew it used believed Asian commercials had been filmed there.

While the Chinese were helpful, they were unaccustomed to American tv commercials production, and some explanation was required. For instance, in an eating scene in the State Guest House, it had to be explained that they were perfectly satisfied to have actors dressed as businessmen rather than real businessmen in the background. And no, they were not interested in eating the food that had been sitting on the plates during the lengthy shoot.#

Digging up a winner

Even before the weeklong International Advertising Film Festival started at Cannes last month, the street talk was that BBDO's "Archeology" spot for PepsiCo was a strong contender to win the festival's highest honor, the Grand Prix. *See Page 7.*

Getting a soap fix

Fans of "Dynasty" are wondering what to do while waiting to learn who lived or died in the season-ending cliff-hanger. For some, though, that's no problem—they're re-reading a wickedly funny "Dynasty" newsletter. *See Page 32.*

Special Report—Europe

Europeans are cultivating their own brand of creativity, be it in advertising or on television. International—Europe Special Report takes a look at some of the people and the media making waves across the Continent, *starting on Page 15.*

Presstime

Seven-Up rolls to Burnett

St. Louis—Seven-Up Co. will move its entire $45 million account to Leo Burnett USA, Chicago, from N W Ayer, New York, sources say. Burnett already handles 7UP and Diet 7UP overseas. A Seven-Up spokesman had no comment.

Grey snares LHS&B

New York—Grey Advertising has acquired a majority interest in Levine, Huntley, Schmidt & Beaver. LHS&B, whose 1984 billings totaled $71.3 million, will become a separate subsidiary with its existing management intact.

Big Boy co-op to EPB

Washington—Marriott Corp.'s Big Boy Family Restaurants this week awarded its new $10 million national co-op account to Earle Palmer Brown Cos., Bethesda, Md. EPB last winter created the much-publicized "Stay or Go" campaign for the restaurants' Big Boy mascot.

New Mich spot tested

St. Louis—Anheuser-Busch is testing "alternative creative" for its Michelob superpremium beer in Chicago. A tv spot, running in late fringe, features a Hollywood theme. Test radio spots are similar. An A-B spokesman said the spots are "not intended to compete with or replace" the lifestyle "Where you're going it's Michelob" national campaign by Ted Bates Advertising/New York. A-B declined comment on reports that former Michelob agency D'Arcy MacManus Masius, St. Louis, produced the test commercials.

Schlitz at B&B. . .for now

Detroit—Stroh Brewery Co.'s Schlitz Malt Liquor, one of the account conflicts created by the merger of D'Arcy MacManus Masius and Benton & Bowles, will for the time being stay at B&B, sources say. Just before the merger announcement (AA, June 24, *et seq.*), B&B had completed new creative for the brand, and Stroh officials reportedly liked the execution. Once the new spots air, however, Stroh will conduct an agency review, concentrating on its current agencies, especially BBDO, New York, and MCA Advertising, Westport, Conn., sources say.

Chi-Chi's reviews agencies

Louisville—Chi-Chi's Mexican Restaurants is reviewing the creative assignment for its $13 million account. It has narrowed the field to Chicago agencies N W Ayer, Needham Harper Worldwide and Young & Rubicam, as well as New York shops Della Femina, Travisano & Partners; Marschalk Co.; Ketchum, and Saatchi & Saatchi Compton. Incumbent Fortis Fortis, Chicago, will be a finalist. MZD, Indianapolis, will continue to handle field service and media placement.

Apple eyes U.S.S.R.

BBDO accepts its Grand Prix at Cannes. On stage at the closing ceremonies were: BBDO producers Gene Lofaro (l.) and Jane McCann and senior vp and associate creative director Harvey Hoffenberg. *(See related story on Page 7.)*

Doing Cannes can leave you out in the dark

By John O'Toole

Commentary

Rumors flitted about here like the swallows at sunset, but Phil Dusenberry's lips were sealed.

As a judge at the 32nd International Advertising Film Festival, he had been burdened since 10:30 a.m. Wednesday with the knowledge that his agency's creation for Pepsi-Cola, "Archeology," was the Grand Prix winner—and the obligation to tell no one.

As the other American on the jury, I had only to fend off my eager colleagues from London who were trying to confirm the rumor that Foote, Cone & Belding had won a Gold Lion in the household-maintenance category for the Dulux paint commercial "Art Gallery."

Thus, Phil and I gave the impression of being the only ones in Cannes who didn't know all the major winners at least 48 hours before the news was announced Saturday night at the Palais des Congres.

Rumors are as much a part of the festival as the reels. They emerge in the morning from the combed-and-brushed beaches of the Carlton and Gray d'Albion hotels, they gain velocity as delegates gossip over langouste luncheons, they bounce about like pinballs in the Martinez Bar at the casino after midnight.

But they are for the delectation of delegates, not judges. The 18 men from 12 countries who chose the winners were unconcerned. At the end, we knew all the so-called secrets.

At the beginning, we heard little from outside the screening room which we entered at 8:30 a.m. and left, blinking and stumbling, at 7:30 p.m. After five such Kafkaesque days, we had screened 2,178 films, then rescreened 270 of them.

No one who has missed spending the greater part of a week staring at commercials on film and videotape can appreciate how eye-grinding, muscle-numbing and brain-draining the experience is. In fact, the physical demands are such that almost every judge gropes his way out of the screening room each night feeling the quality level has plummeted this year. It happens, we were told, every year.

My notes, scribbled in the semi-dark, attest to a mounting melancholia:

"Soft drinks. Doesn't anyone use a glass anymore?

"A dancing fishburger. Now I've seen everything.

"Wrong. Just saw a talking toilet.

"God created deserts so there'd be somewhere to shoot car commercials.

"Full circle. I've seen at least 30 films in b&w.

"Why I prefer judging print contests: A rotten 30-second spot takes as long to view as a good 30-second spot.

"Another space vehicle. Strange encounters of the 103rd kind.

"Another Tarzan spot. Another break-dance spot. Another Indiana Jones spot. . ."

Then, as the sun dropped behind Cap d'Antibes on the fourth day, the

Weather's popularity reflects state of Belgian tv

By Barbara Bowers

Belgians do not have many interesting tv programs that are locally produced, which may explain why they look forward to Armand Pien's twice weekly weather reports.

A largely cabled country with two broadcast tv networks, Belgium allows no product advertising on tv.

Program producers must survive on funds from the government. Imported programs plug the gaps between original programing from Belgium. "Dallas," "The A-Team" and "Bewitched" are current hits.

One home-grown program many Belgians tune in to Tuesday and Friday evenings is the evening news' 12-minute weather forecast by Belgium's favorite meteorologist, Armand Pien.

"It is easily the most popular show we produce," says a programing executive at BRT, the Flemish-language tv network.

Mr. Pien's scholarly approach, offbeat sense of humor and engaging personality make his show unique. He has been a weather expert for 36 years and works fulltime at the Royal Meteorological Institute.

Mr. Pien mixes a hefty dose of fun with his in-depth, scientific look at the weather. He often uses several satellite photos in his broadcasts, saying, "They make it easy for people to understand what's happening right off."

He sometimes concludes the program with a humorous anecdote, but viewers seem to most enjoy his frequent pranks.

For example, at Christmas Mr. Pien decided to capture the holiday spirit by directing stagehands to tie a rope around his waist and hoist him skyward at the end of his report when a voice called, "Pien, come see what St. Nicholas brought you."

All went according to plan until the equally prankish crew decided to leave him dangling over the newscaster's head for more than 20 minutes.

Another time, Mr. Pien raised a glass of milk at the end of his report to encourage milk-drinking among children.

"I'm going to drink some local precipitation," he said. But the crew had spiked the milk with salt. "I had an awful time drinking that without grimacing," he says. "How could I make a face and then expect children to drink milk?"

Viewers love to send him samples of bizarre crops resulting from long bouts of good or bad weather. Produce displayed on recent shows include a 2-lb. tomato, a cucumber that stretched 47 ins., a potato that had grown into the shape of a heart and a sugar beet that looked like a woman's bust.

"What a strange way to make a living," he says.

Barbara Bowers is an American free lance writer living in Brussels.

Controversial Spanish program tackles problems

By Marina Specht

Every Tuesday evening 60% of Spain's 20 million tv viewers tune in to *"Si yo fuera Presidente"* ("If I were President"), one of the most popular and controversial programs ever aired in Madrid.

"We invite ordinary people to our studio and let them pretend to be ministers and congressmen, unburden their gripes or just give their own piece of wisdom," says Fernando Tola, who writes, directs and hosts the program.

The "studio" may be a set built to look like a subway car, the Spanish Congress or a window labeled "complaints" where people line up to talk to *"Senor Presidente"*—Mr. Tola.

Standing in line one night are a young couple expecting an unplanned, unwanted baby (abortion is illegal in Spain) and another couple who has tried desperately to adopt a child but has been frustrated by years of government red tape. The two couples—who have never met—begin discussing their plights. Before the end of the program and still on camera, they have arranged an informal adoption.

Further down the line, a man with a seeing-eye dog wants to know why the government lets restaurants ban dogs such as his when the blind obviously need them.

"Government officials often call us and ask for time on the program to explain their positions or promise to look into individual complaints," Mr. Tola says. His show is an example of how life has changed in Spain since the end of the 40-year dictatorship of Gen. Francisco Franco in 1975.

Even so, by criticizing and parodying not only the government, but also the Catholic Church and other conservative groups, *"Si yo fuera Presidente"* has stirred controversy since it made its debut in October, 1983.

"It's also become the third most popular tv show in Spain, and the government wouldn't dare to interfere, even though it owns the two national tv networks," Mr. Tola says.

Despite the high ratings and success with advertisers, Mr. Tola is considering taking a break.

"Our problem is that we create a totally new program every week, and this makes you run out of ideas sooner or later," he says.

On one program, a Communist state attorney and a conservative congressman have to be separated by barbed wire from a horde of convicted thieves and their victims for a discussion on the safety of Spanish cities.

Recently "Presidente" was filmed in a huge labyrinth, where Mr. Tola met a clown seeking a partner, a homeless family looking for shelter and an intellectual in search of the student activism of the 1960s. The week's theme was "things we look for and can't find."

Breaking the language barrier

By John Parry

Lydia Boesch, 14, has an advantage when watching pan-European Sky Channel on cable tv in Zurich. She's bilingual—her father is Swiss, her mother is English. But even her non-English speaking friends watch Sky Channel, she says.

"They like the music programs and the commercials, and they are really making progress learning English from just being tuned in to things like 'Sky Trax,'" a Sky Channel-produced afternoon music program, she says. Such Sky programing is most popular with Lydia and her 17-year-old sister, Cornelia Boesch.

Zurich is one of the more highly cabled cities in Europe, with 82% of homes hooked up and 14 channels offered.

Although Switzerland is highly cabled and is Sky's second largest market—after the Netherlands—with 597,946 subscribers, the average person in Switzerland watches only about one hour of tv daily compared with more than five hours in England.

But in the English-speaking community, the word is apparently out that Sky is available—and worth watching—in Zurich. However, it has not yet extended to other major Swiss cities with the exception of a few hotel room linkups in Geneva.

"We are moving from this house next year, and in the course of talking with people who might like to buy it, I came into contact with an English family living in [French-speaking] Geneva who are moving up here to [German-speaking] Zurich," Margaret Boesch, the girls' mother, says. "One of the first things the lady asked me was whether Sky Channel was available. She was very pleased when we told her it was."

People Patterns 'Typical' American family a dying breed

By PETER FRANCESE

As the debate over tax reform heats up, someone probably will try to determine its effect on the "typical" American household. The problem is that there aren't any typical households anymore, and the effect of any tax policy will vary depending on the kind of household it falls on.

The end of the deduction for child care, for example, would fall only on those families with children. The latest figures from the Census Bureau show that they are becoming a smaller and smaller minority every year.

Currently only 28.5% of American households are husband-wife families with children, a substantial decline from 1970 when the figure was 40%. What we used to say was a "typical" husband-wife family with two children now is found in only 11% of all households.

Since 1970, married-couple families with children actually have decreased by 1.2 million, while all households have increased by 22 million to a new record of 85.4 million.

From a political point of view, married couples with children are of little consequence. This can be seen in attitudes toward public schools. The decline in the quality of education has occurred simultaneously with the decline in the households that need schools. It's easy to defeat school district budgets or bond issues and tell teachers that there is no money for raises when so few voters have children in school.

Couples with no children make up the largest plurality of American households (30%). They have increased by 6.5 million since 1970 and are mostly older people. Two out of every three couples without children are headed by a person older than 50.

People who live alone make up the second largest household type without children. Single-person households have increased about 9 million since 1970 and now account for nearly 23% of all households.

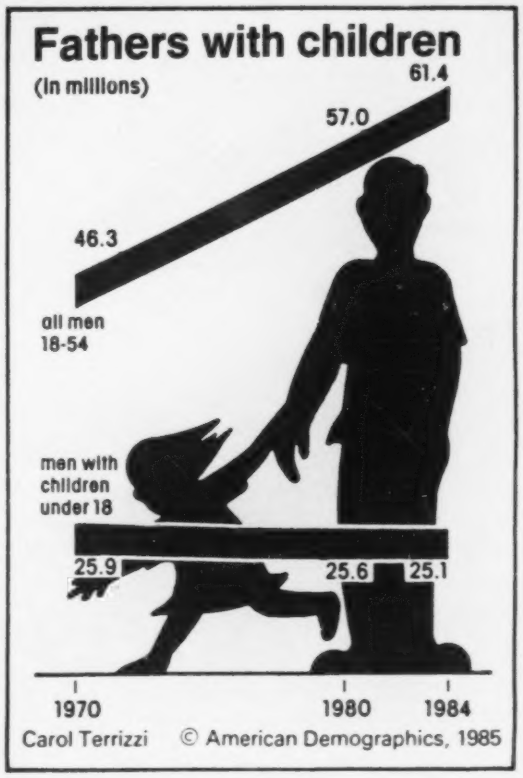
The combination of people who live alone, childless married couples and the few people who cohabitate without being married add up to 57% of all households.

The exception to this pattern involves single-parent families. About one of every five children in the U.S. lives with only one parent, usually the mother. The number of households consisting of a woman with one or more children has doubled since 1970. There are now nearly 6 million such families, most of whom live in poverty.

Changes in the tax laws probably won't affect them very much, but they have been deeply affected by continuing cuts in AFDC, food stamps and other such programs that primarily benefit children in poverty.

Nonetheless, the sweeping changes proposed in the tax code may have dramatic consequences on many American families.

If the so-called marriage penalty for dual-earner families is reinstated and the deduction for children is raised, maybe the number of husband-wife families with children will start to grow again. However, if the marriage penalty is high enough, it just might encourage more people to forget marriage and just live together.



Carol Terrizzi © American Demographics, 1985

As the American family has changed, so has the "father" component of that family.

Fathers come in many demographic varieties. Some are husbands in husband-wife families with children, a few are single parents raising children alone, and a growing number still have adult children living at home with them.

According to the latest Census Bureau survey, 24.3 million dads are living with moms and an average of 1.9 kids younger than 18. A much smaller group of 800,000 fathers is made up of single parents with an average of 1.5 kids.

The curious thing is that while our population has increased 15% and the number of adult men (18 to 54 years old) has grown 33% since 1970—from 46.3 million to 61.4 million—the number of fathers living with their children has declined by 3%.

In 1970 more than half of all men aged 18 to 54—25.9 million of them—had children younger than 18 who lived with them. By 1984 that figure had shrunk to only 41% (25.1 million of 61.4 million).

Part of this shrinkage has been caused by high levels of divorce—with the children of divorcing couples almost always ending up living with their mothers. However, even if we take the growing single parent phenomenon into account, several million men who we would have expected to become fathers by now haven't. The question is: Why?

In our society the usual prerequisite for having children is getting married, and millions of young adult men have not only delayed marriage but also still are living with their parents. More than one-third of the men in their 20s continue to live at home with mom, or mom and dad. That's 7.3 million men, double the number in 1970, who have chosen to remain in the nest beyond the customary 18 or 19 years.

That large number of adult men still at home more than accounts for the lack of growth in fathers since 1970.

Theories abound for this delayed flight from the nest. One suggests that it's because of the weakened economic rationale for early marriage. No longer, the theory goes, do most young women need young men to marry and support them. Young women are as well-educated as young men and are capable of supporting themselves.

But that still doesn't explain why more of today's young men don't go out and live by themselves or with friends or get married like young women do. Less than one-fourth of women in their 20s live at home.

Again, there are many theories, mostly centering on the different ways that parents treat adult male children and the differences in job opportunities between this and the previous generation of young people.

It will be fascinating to watch what happens during the next 10 years when these young men finally leave home. Who knows, maybe they won't.

Parting Shot Broadway has lost the 'right to fail'

By RANCE CRAIN

Live theater is thriving in Chicago, and London's West End is having one of its brightest seasons ever. But New York theater is in the doldrums. Is it because there's less risk-taking among New York producers? Or because of intolerance among the critics for less-than-total success? Or both?

I opt for both, and I'd also venture that the critics' choices are a major reason why there's not more risk-taking. It's similar to newspapers complaining that U.S. companies are being run for short-term profits and then playing up the corporations' quarterly earnings.

A case in point is the Broadway musical "Grind." The New York critics found very little of a redeeming nature about the production—to my mind, a perfectly agreeable and entertaining night on the town.

"One could weep for the talent that is expended to so little cumulative effect," wrote Frank Rich of the *New York Times.* "Too many bumps spoil the 'Grind,' " headlined the *Post.* "There are just two things wrong with 'Grind': The book and the songs," began the Daily News' review.

The musical had a good advance sale, thanks to corporate entertaining, but the show was forced to close in mid-June. In our crowd (we were part of an International Radio & Television Society outing) most people came away if not dazzled by the show at least engaged.

Ben Vereen stars in the musical, which takes place in a 1930s burlesque house in Chicago. There are elaborate sets, high-spirited and even frenetic singing and dancing and an involving story line. Mr. Vereen is a very entertaining guy, but I personally thought Timothy Nolan's lilting baritone and poignant songs were worth the price of admission.

> ***New York theater is in the doldrums. Is it because of intolerance among the critics for less-than-total success?***

"Surely it's overkill to erect as huge an edifice as 'Grind' to tell us that life wasn't all a cabaret in the urban America of 1933," wrote Mr. Rich.

What does he want? This is no morality play. Director Hal Prince gives us a pleasant, diverting evening. Isn't that enough?

Apparently not, at least at those prices. Top ticket prices of Broadway musicals are routinely more than $40 nowadays, and that provides a key clue to the problems afflicting New York theater today.

Michael Billington, theater critic for the *Guardian* in London, maintains the New York critics aren't killing theater; the problems are due more to the high costs of production. He concludes that government subsidies are the most critical factor in determining the difference between London and New York theater. Americans still regard subsidies as a form of "creeping communism," he contends.

Mr. Billington noted that Chicago has a much healthier theater community than New York. He visited New York and Chicago for three days recently, and found New York depressing but thought Chicago was active and exciting. His subsidy theory doesn't hold up well in Chicago, however, where some of the best live theater in the nation is being performed by companies that are 100% supported by season subscribers and box office sales.

But he does argue convincingly that an important factor is that there are more critics in London than New York. Frank Rich has so much clout in large part because he's the critic for the most influential news outlet in New York.

London, on the other hand, has four or five serious daily newspapers, each with its own equally serious critic—and each giving a different perspective.

In London, the variety of plays, the presence of permanent theater companies and economic subsidies give productions "the right to fail"—a luxury New York producers simply don't have.

Coke's switch a Classic

It expects turnaround to spark new growth

By NANCY GIGES

Coca-Cola Co., erring in taking away what has been "an old friend" to the American consumer, may have stumbled into a stronger position to compete against its archrival Pepsi-Cola USA.

Industry analysts and marketing consultants working with Coca-Cola believe this mistake could be one of the best things that could have happened to the company. It provides it with a sweeter line extension that competes more directly with Pepsi and gives Coke an edge in blind taste-tests. Pepsi has touted its greater preference in blind taste-tests for years in its "Challenge" tv campaign.

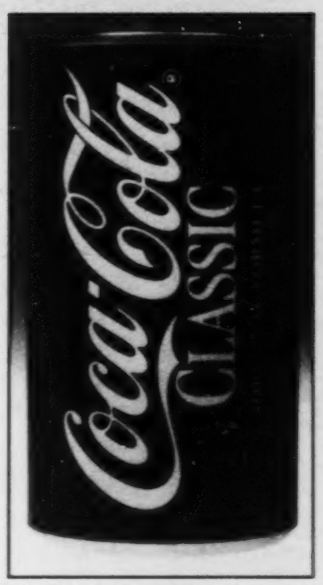
Alvin Schechter, partner in the Schechter Group, a design company that has worked with Coca-Cola on most of its packaging, said the company has been trying for years to figure out how to bring out a sweeter line extension.

"If they had come out with new Coke as a line extension or Coke Plus or whatever, the bottlers would have balked; supermarkets wouldn't have stocked it. They would have said, 'Who needs two flavors?' Coca-Cola was convinced they couldn't do it," Mr. Schechter said.

Emanuel Goldman, an analyst at Montgomery Securities, San Francisco, also suggested that Coke now can compete better against Pepsi with the new Coke and still satisfy those who want a stronger cola with the old brand.

John Bergin, vice-chairman of Coke's agency, McCann-Erickson Worldwide, who has been associated with the company for many years, commented that the family has expanded by one new member. Others include Diet Coke, caffeine-free Coke, caffeine-free Diet

(Continued on Page 82)



The "classic" package design for old Coke was developed in just 48 hours last week by Schechter Group, New York.

Smart or stupid? Opinions mixed

An Advertising Age roundup

It could wind up in the history books as the *classic* marketing blunder of all time. Or perhaps, in Coca-Cola Classic, a company has restored not only a revered soft-drink taste but consumer confidence and its reputation as a master marketer.

A survey on consumer reaction to Coke Classic—Page 82.

From a sampling of opinions throughout the marketing community, there generally is the belief that Coca-Cola has bitten the bullet and righted an essentially dumb move in restoring the old Coke formula while keeping a new Coke that's more competitive from a taste standpoint against archrival Pepsi-Cola.

Here are some of the reactions to the Coke Classic announcement last week:

Bob Gross, chairman, Geers Gross Advertising, New York: "So much for research! Research is great, but people are better. The new Coke has become the Edsel of our times."

Sara Ridgway, vp-pr, Lorillard, New York: "They have immortalized themselves forever in marketing textbooks, right up there with the Edsel. . .I've been stockpiling the 'Real Thing' for three

Upfront's a good time for Mac

By VERNE GAY

New York—McDonald's Corp., which last year nearly doubled its upfront network tv prime time spending to $80 million, has spent $133 million this year to emerge as the single biggest advertiser in an upfront market filled with surprises.

Leo Burnett USA, Chicago, riding the wave of higher spending by Oak Brook, Ill.-based McDonald's and its recent assignment as the prime time negotiator for all General Motors divisions, has become the No. 1 agency in network upfront prime time billings, with more than $300 million placed this year. J. Walter Thompson USA, Young & Rubicam and Ted Bates Advertising had been bigger in upfront billings than Burnett, which last year placed about $225 million in prime time upfront.

But the real new giant coming out of the 1985-86 upfront prime time season—during which advertisers make commitments for the full tv season, rather than purchase individual spots on a "scatter" basis during the year—is NBC-TV, which not only secured nearly half of all upfront dollars spent, but also garnered some of the highest unit prices in tv history for individual shows.

"The Cosby Show," NBC's top-rated program last year, has commanded as much as $300,000 per 30-second spot, an alltime high for a regular series.

"Cosby" is expected to bring in more than $3 million per original episode for NBC, while sources said the program costs the network about $500,000 per show to produce.

NBC's "Miami Vice" also was priced aggressively, pulling in an average $175,000 per 30 seconds. By comparison, NBC's "The A-Team," a much higher rated show than "Miami Vice," sold in the upfront market for between $140,000

Burnett wins 7UP

By SCOTT HUME
and STEWART ALTER

Disagreement over revival of the Uncola ad theme is said to have been behind Seven-Up Co.'s decision last week to make N W Ayer its "un-agency."

The St. Louis-based subsidiary of Philip Morris abruptly shifted the assignments for its 7UP, Diet 7UP, Like cola and Sugar Free Like to Leo Burnett USA, Chicago, from Ayer, which had been a Seven-Up agency since 1978 (AA, July 11).

The account had total measured-media billings of more than $41 million in 1984, but sources put the total value of the Seven-Up business at closer to $60 million. Burnett will officially assume the account Oct. 12.

In a statement, Seven-Up

Gross tells of gains

By STEWART ALTER

New York—Any ad agency ceo would be pleased to win a new piece of business with projected 1986 billings of more than $20 million, especially if it came on top of a string of $10 million in additional assignments from one of his two largest clients.

But the new billings are particularly gratifying for Robert Gross, managing director-ceo, of Geers Gross, who in recent weeks has been battling what he calls the inaccurate and unfair perception that his London and New York agency is in financial trouble.

The new client, expected to spend over $20 million in a major new-product introduction next year, is Nintendo Inc., Redmond, Wash., the U.S. arm of a leading Japanese electronic game manufacturer. Best known here for its Donkey Kong video game, Nintendo, with $300 million in sales, is said to have 95% of the home video market in Japan and half of U.S. video arcade game sales.

The agency also picked up

Follows Honda dealer shift

Ex-Needham exec sued over account

By STEWART ALTER

New York—Needham Harper Worldwide has sued a former employe for allegedly misappropriating the agency's media plan and some creative footage involving a former Needham account he now handles at another shop.

The suit in federal district court here names Richard Belding, a former account supervisor on three Honda dealer association accounts. He was making $61,500 a year when he left Needham two months ago.

In mid-May, Mr. Belding joined Sklar-Lenett Associates, Rye Brook, N.Y., an agency billing $12 million. Sklar-Lenett then gained as a new client the Western Pennsylvania Honda Dealers Assn., one of the three dealer groups supervised by Mr. Belding at Needham.

The court papers include a letter from Sklar-Lenett's media director to three Pittsburgh tv stations dated May 17, two days after Mr. Belding left Needham. The letter states that Sklar was "picking up" the media buy from Needham scheduled to start three days hence, and that "as of this day we are the agency of record."

Needham has sought "an order permanently enjoining" Mr. Belding from using the "proprietary information" and is asking for more than $300,000 that includes "$250,000 in punitive damages for defendant's reprehensible conduct." It also sought $40,000 representing a

Campbell dipping into Lipton's soup market

By GAY JERVEY

Campbell Soup Co. will soon enter the $434 million dry-soup market with a six-item line the company describes as the most aggressive soup introduction in its 116-year history, and one it hopes will make it the undisputed super-company in soup.

For decades, dry soup has been the special turf of Thomas J. Lipton Inc., which dominates the category with some $120 million in sales.

Camden, N.J.-based Campbell, the canned-soup king, will spend an estimated $20 million to promote its new line of dry soups that will go national this fall under the name Campbell's Quality Soup Mix.

Since 1983, the items have been tested in Pittsfield, Mass.; Eau Claire, Wis.; Portland, Me., and Bakersfield, Cal., under the name Comin' Home (AA, May 14, '83).

Multimedia ads for Quality Soup Mix, via Leber Katz Partners, New York, will stress Campbell's high-quality heritage. They are to break just in time for the key cold-weather selling season.

The new packaging is distinctly Campbell, with the white script logo and the indentifying red and white colors on the boxes.

In addition, Campbell is toying with other experiments in dry foods, an area that not only has enticing profit potential but also fits today's faster-pace, dual-income life styles. "It's natural for us to start with soup, but there is no reason we can't use the technology and infrastructure we have put forth in these efforts in other areas," said Paul Masaracchio, general manager of Campbell's dry foods business unit.

Executives at Lipton, Englewood Cliffs, N.J., could not be reached for comment.

Campbell is making other moves to strengthen its key soup business, such as expanding marketing of Home Cookin', a family of premium, ready-to-serve soups now only available in certain parts of the Midwest. Home Cookin's niche? A somewhat lighter, upscale version of Campbell's Chunky soup. BBDO is Home Cookin's agency.

The company also has recently moved coast-to-coast with Gold Label Creamy Natural soups, which the company describes as a "restaurant quality" line of cream soups, including cream of broccoli, asparagus and cauliflower. Backer & Spielvogel, New York, handles.

Campbell has particularly high hopes for the instant soup business, which accounts for about 26% of the total soup category and is growing. For one thing, its test of Comin' Home showed there is plenty of elbow room. "We grew the market 34%, on top of the fact that Lipton maintained its share in the cities we were in,"

BURGER KING
WHOPPER
Aren't You Hungry?
BURGER KING

Oh, yes! It's Mr. Bill for BK

Former "Saturday Night Live" stalwart Mr. Bill takes some lumps from Burger King in a network tv spot breaking this week for BK's new Whopper sandwich. While whooping it up for the larger burger, he gets flattened by a falling Whopper container. J. Walter Thompson USA, New York, handles.

Late West Coast news

Hearst Cal. papers for sale to Scripps?

Hearst Corp. is negotiating to sell a substantial portion of its 30 Hearst Community Newspapers in Southern California to Cincinnati-based Scripps Howard, in an estimated $19 million deal. Scripps executives last week confirmed negotiations are under way, but said no deal has been struck. Hearst executives, based in New York, would not comment, but Hearst officials in California denied a sale had taken place.

Tomy Corp., Carson, Cal., last week named Scott Lancaster Mills Atha, Los Angeles, as agency for its new hobby and crafts division headed by former Tomy vp-general manager Dan Oakland. The Aurora division will market Aurora brand home racing kits, but has plans to expand beyond that. Initial ad spending is estimated at around $2 million. SLMA had handled Tyco Industries, Morristown, N.J., before losing the business to Bozell & Jacobs/Pacific last month (AA, June 3).

Old National Bank, Seattle, is reviewing its $2 million account, currently at Elgin Syferd, follow-

P&G's Ivory shampoo lathers up $3M ads

By LAURIE FREEMAN

Procter & Gamble Co. is celebrating the first anniversary of its national launch of Ivory shampoo and conditioner with an estimated $3 million campaign intended only for the month of July.

The Cincinnati, O.-based marketer is telling the trade it will spend $2 million for national tv spots and $400,000 for radio time, "reaching saturation levels." In addition, the company planned to drop over 200 million coupons, including two 50¢-off coupons on Sunday, July 14, and Sunday, July 28. A $650,000 print campaign will support the broadcast and coupon efforts.

Ivory was introduced nationally last July with a campaign themed "Not fancy, just fabulous," handled by Benton & Bowles, New York (AA, May 21, '84).

The theme will continue to be used during the anniversary month, said a P&G spokeswoman.

According to the latest available A.C. Nielsen Co. figures, Ivory shampoo holds an 8% share of the $1.38 billion segment.#

Garfield pens AA column

New York—Robert Garfield, award-winning columnist for *USA Today*, has joined Advertising Age and the Crain Syndicate as a general columnist.

Mr. Garfield's column will make its AA debut Monday, July 22.

A prolific writer for national publications as well as a twice-weekly columnist for Gannett Co.'s *USA Today*, Mr. Garfield's essays have focused on the humorous aspects of advertising and marketing, from the fractured grammar of tv commercials to the flood of calorie-reduced "light" foods and beverages.

In announcing the appointment, AA editor-in-chief Rance Crain said Mr. Garfield will have the latitude to cover the entire spectrum of American life, from the "light and bright" to serious reflections on current events and topical subjects.

R. Garfield

Mr. Garfield will report to AA editor Fred Danzig. Said Mr. Danzig, "We believe our readers will not only enjoy Bob's unique slants on things and his talents as a writer, but will also benefit from his impressive background as a business news reporter."

The Chicago-based Crain Syndicate will make Mr. Garfield's work available to daily newspapers and other periodicals starting later this year.

Mr. Garfield, a native of the Philadelphia suburb of Bala-Cynwyd, is the recipient of the Saatchi & Saatchi Compton Award, presented annually for superior newspaper coverage of the advertising business.

He was a member of the start-up staff at Gannett's national daily in 1982, having served as a business and investigative reporter in Delaware for the *Wilmington News-Journal*, another Gannett daily, and Pennsylvania's *Reading Times*.

Mr. Garfield, 30, received awards in both states for his reportorial work. In Delaware, he was honored for an in-depth examination of Du Pont and in Pennsylvania for a candid jail-cell interview with a convict who was responsible for a 16-year crime binge.

He has contributed frequently to such publications as *Esquire*, *Manhattan, inc.*, the *New York Times*, *Philadelphia* and *Washington Journalism Review*. He will continue to be based in Washington.#

CORRECTIONS & CLARIFICATIONS

- Chiat/Day, San Francisco, is the agency for California Cooler, not Chiat/Day, Los Angeles (AA, July 8, P. 1).
- West Nally Inc., New York, working on behalf of Worldwide Sports & Entertainment, Los Angeles, was the company that had signed Eastman Kodak Co. and AT&T as Live Aid corporate sponsors. An earlier story credited Worldwide with those sales (AA, July 8, P. 41).
- Now in his 70s, Democratic Rep. Edward P. Boland continues to represent the Massachusetts second congressional district in Washington. An article about the impact of the "I am the Nation" ad erroneously referred to "the late Edward P. Boland," who read the ad into the "Congressional Record" on July 5, '55 (AA, July 1, P. 30).
- Mountain Bell says it does not permit resale of directory assistance listings obtained through its new computer service, ScanTel. Resale of its listings obtained in printed form is possible, however (AA, July 1, P. 42).
- Foote, Cone & Belding, New York, not the agency's Chicago office, handles the Fritos account for Frito-Lay (AA, July 1, P. 3).
- An item on Harcourt Brace Jovanovich's *Corporate Travel Agent* (AA, July 1, P. 8) omitted the total circulation for its September launch. The controlled-circulation magazine will reach 20,000 readers at 7,000 travel agencies.
- A photo of Steve Shaw, new assistant director of research, Media General Research, was incorrectly identified earlier (AA, June 17, P. 56).
- Feldman Calleux Associes figures for 1984 gross income and billings were incorrectly listed (AA, May 20, P. 6). Gross income for that year was $13.1 million and billings were $87.2 million. The figures apply to FCA Holdings, consisting of B&B Publicite, Concurrence Moderne, IDM Conseil Group and Marianne; the May 20 report only listed figures for Feldman Calleux Associes and not its other offices.#

the CouponCounter

THE COUPON COUNTER HAS MORE SALES DRIVE

The Coupon Counter® is the revolutionary machine that gives shoppers valuable coupons every week, right where they shop. And because it conveniently puts your coupon right into shoppers' hands, it puts more sales into your pockets.

GET BETTER SALES MILEAGE

Our track record speaks for itself. In 1984 The Coupon Counter blew past conventional coupon vehicles, racking up redemption rates in excess of 13%. In fact, a coupon delivered through The Coupon Counter is almost three times as likely to sell your product. Because it's conveniently delivered in a pre-clipped stack of non-competing brands. Never in a clutter.

FEEL INSTANT SALES RESPONSE

Thanks to our unique in-store delivery system, Coupon Counter coupons are usually redeemed immediately. Which means you get virtually instant sales response. This also makes it easy to coordinate your coupon drop with timely in-store displays and promotions.

TAKE A TRIAL RUN TODAY

To experience all the features designed to help sell your products harder, you've really got to try The Coupon Counter. Once you do, we're sure you'll join the long list of top companies who count on us.

Schonfeld tracks ad spending

CHICAGO—Schonfeld & Associates has issued its ninth annual report on advertising budgets and spending ratios.

The study shows advertising-to-sales ratios, advertising-to-gross-margin ratios and advertising growth rates for each company in 1984, '85 and '86.

The accompanying table contains average 1984 ratios and the annual ad spending growth rate by industry. However, individual companies may spend more or less than the average, cautioned chairman Eugene Schonfeld.

Raw data for the study were compiled from 10-K reports filed by publicly owned companies with the Securities & Exchange Commission. Therefore, ad expenditures include such nonmedia spending as collateral literature and production. For this reason, these figures are often substantially larger than estimates from media-auditing services.

Although data were compiled from published reports, cautious interpretation is required for several reasons.

First, companies may vary in what they include under ad spending. Second, many large companies are in several fields, yet are listed only in their primary-industry sector; distortion may result because a large subsidiary may not be included in the industry in which it competes. Third, a few large companies are privately owned and are not included.

The Schonfeld study also forecasts ad budgets of 5,000 companies in 275 industries. Forecasts from the study predict Procter & Gamble, Cincinnati, to be the largest advertiser in 1986 with a total budget of $1.2 billion. Sears, Roebuck & Co. is expected to be close behind with spending of $1.1 billion. General Motors Corp., Detroit; Philip Morris, New York, and Beatrice Cos. also are expected to pass the billion-dollar mark.

The major diversified food marketers will lead all other industries with spending of $5.5 billion in '86, the study predicts. The drug and pharmaceutical industry will be second with $4.7 billion. Retail department stores will be third with $4.4 billion in advertising.

Service industries with small budgets will show greatest growth. Management consultants, security services, hospitals, real estate brokers and engineering services show annual compound advertising growth rates of 22% to 48%.

High-technology industries will remain strong with growth rates in the 15%-to-22% range. A key company to watch is Compaq Computer Corp., Houston, which is predicted to invest $53.2 million in 1986, up 56% from '85.

Retailers will show strong growth. Federated Department Stores, Cincinnati, will spend $402.2 million, up 11.6%, and K mart Corp., Troy, Mich., will hit $704.3 million, up 8.6%.

McDonald's Corp., Oak Brook, Ill., will invest $210 million, up 11.7%.

Some of the greatest growth, however, will come from medium-size specialty retailers and regional companies such as Perry Drug Stores, Pontiac, Mich., which will spend $17.4 million, up 16.1% in 1986. Shoe Town, Harahan, La., will spend $3.9 million, up 20.1%. Foreign companies will continue to be competitive in many industries. Matsushita Electric is predicted to spend $358.7 million in 1986, up 7.3%. NEC will spend $163.8 million, up 13.5%. Honda will invest $486.9 million, up 10.8%. But the Japanese won't be the only big spenders. Northern Telecom will invest $87.2 million. Philips NV will spend $459.4 million.

The U.S.' heavy and basic industries continue to moderate or reduce ad spending. Failure to reinvest in market development will be both a cause and effect of industrial decline, Schonfeld believes.

A copy of the study is available for $275 from Schonfeld & Associates, 2550 Crawford Ave., Evanston 60201.∎

Advertising-to-sales ratios, 1984 *(By industry)*

Coffee grinds to a halt, decaffeinates stay hot

By JOHN C. MAXWELL JR.

The coffee industry appears to have bottomed out in 1984. Consumption, up 3.1% from 1983 to 26.7 gals. per person, may be sustainable for the near future, but we believe the industry may experience further declines.

Some think the coffee industry has bottomed out for good. Others believe the National Coffee Assn.'s campaign, the "Coffee achievers," and youth-targeted ads by companies such as General Foods Corp. will result in near-term gains among young consumers but nothing permanent or lasting.

The largest per capita gain last year was among 15-to-19-year-olds, up 15.4% from 1983. Although a strong year-to-year increase, consumption levels are far from that of the '60s and '70s.

We believe that the proliferation of decaffeinated coffees and the tremendous amount of new-product marketing are reasons for the increase in over-all 1984 consumption. The jump in decaffeinated consumption relates to the health-conscious '80s. People are concerned, in general, about what they put into their bodies and, in particular, about caffeine.

While instant consumption remained rather flat for the year, regular or ground consumption continued to increase. With more coffee makers and a penchant for freshness in foods and beverages, people appear to be using more regular coffee than in the past. The new coffee makers, especially the preprogramable kind, prepare one or more cups of fresh coffee as fast as one can boil water for instant coffee. The overwhelming consensus is that fresh tastes better—thus the increase in ground consumption, which now represents about 12% of the total regular coffee market.

Price is very much a factor in consumption. In 1984, regular canned coffee (16 ozs.) averaged $2.578 and instant (9.1-to-14-oz. jars) averaged $5.347. Bean prices have been relatively stable since the International Coffee Agreement of 1981 and, barring any unforeseen disasters such as a crop freeze in Brazil, no substantial changes are expected.

In 1984, General Foods easily maintained its No. 1 position in the instant category despite slipping slightly from 44.3% to 44%. Nestle Foods Corp., the second-place producer, remained almost flat, while No. 3 Procter & Gamble Co. picked up a share point, thanks to the introduction of Folgers decaffeinated.

In the regular or ground segment, General Foods gained almost two share points because of increased sales in Master Blend, Max-Pax, Brim and Sanka Brand. P&G's Folgers was about even, while Hills Bros. and Chock Full O'Nuts were up.

Growth opportunities for coffee producers appear to be not only in the expansion of the decaffeinated market but also in specialty coffees. As the consumer becomes a more sophisticated coffee drinker, the industry believes he or she will try different types of coffee. Flavored coffee is only 1% of total sales, but it's growing. General Foods is clearly the leader in this segment, but other competitors are expected as this category takes hold.#

Mr. Maxwell is with Furman Selz Mayer Dietz & Birney, New York.

Coffee market shares

If you look at the market share percentages coffee makers hold, the dominance of a few becomes evident. Source: John C. Maxwell Jr.

Presentations bring yawns? Workshop has wake-up tips

New York—The difference between a good presentation and a bad presentation is the difference between applause and a yawn. . .a sale and a rejection.

To communicate effectively and interestingly is an art and a skill that will be discussed at the Advertising Age Creative Workshop by Peter Rogen, president of Peter Rogen & Associates, communications specialists. The workshop will be held Aug. 25 to 28 at the New York Hilton.

Mr. Rogen, whose client roster includes more than 30 ad agencies and companies such as American Express, Citicorp, Marine Midland, IBM, Westinghouse and Frito-Lay, will demonstrate how to be a more powerful communicator. His session is entitled "Bringing Creativity to Presentations."

Mr. Rogen sees creativity as a perception and says the ability to make others have the same perception is the key to successful presentations. To do so, a number of techniques are at one's disposal.

Included are obvious "tricks," such as film clips, surprise guests and live demonstrations. But "energy and enthusiasm are paramount, as is bringing statistics to life," says Mr. Rogen. "You must have an awareness of how your own personality interplays with that of your audience. And you must create a chemistry or magic between each member of the audience and yourself."

Mr. Rogen believes awareness of the space within which you are working is important. "Try to tailor the presentation to the space, if possible. . .be aware of your surroundings and understand the implications of distance."

In another session, Roberto Duailibi, director of the Brazilian agency Duailibi, Petit, Zaragoza, will talk about limited or one-time commercial spots. He will discuss the efficiency, the economy and the sales results of this innovative procedure in a session entitled "One-time Advertising."

With examples from Brazilian tv commercials, he will show how a number of agencies have tied advertising to current events to create timely, exciting, albeit limited, pieces. He calls this type of advertising "one-shot" or "parody of life" advertising.

"It takes a courageous agency and a client willing to invest in opportunities to create this kind of advertising, but it can be extremely effective," Mr. Duailibi maintains.

"The possibilities in this kind of advertising are endless," he says. "We can do ads when gas prices go up or if a popular soccer team loses a big game. It's all everyday events, any one of which can be used."

Mr. Duailibi sees the advantage of such advertising to be cost (in terms of over-all budget and production time) and visual excitement. "There is a lack of repetition. . .each ad is something new." He also believes certain products lend themselves comfortably to this approach. He will discuss the kinds of advertising for which this is appropriate and will describe how to use this approach.

Du Pont airs radio, tv spots in Detroit

By RAYMOND SERAFIN

Du Pont is buying radio and tv time in Detroit to persuade auto designers to abandon steel for a new generation of plastics in fenders, doors and hoods.

The so-called thermoplastic auto-body parts are a keystone in the plans of Wilmington, Del.-based Du Pont to increase its auto industry presence. Last year its sales to auto makers were $2 billion, which doesn't include fuels and lubricants sold by Du Pont-owned Conoco.

Tv commercials by N W Ayer, New York, now breaking in Detroit, show the use of Du Pont thermoplastic auto body parts in the Pontiac Fiero and other cars and use a theme "For quality in automotive development."

The commercials, airing on the Detroit market's top three late-night news shows, "are aimed at the guys who go to work in the morning at the auto design centers," said Nelson Bryant, program manager-marketing communications for the Du Pont automotive development center in Troy, Mich.

Radio spots will begin airing in the Detroit market in the fall, and print ads are running in newsweeklies and auto trade publications.

Du Pont is now working with auto manufacturers to develop bumpers, fenders, doors and quarter panels on future models.

Ford's Taurus sedan, which is due for introduction this fall, has bumpers made by rival General Electric Plastics.

James Giggey, vp-polymer products at Du Pont, predicts plastics will eventually account for more than 300 pounds in an average car, or 20% of the total weight.

By 2000, Mr. Giggey estimated, the automotive plastic industry would grow to $10 billion in annual sales.#

P&G, S.C. Johnson in sweeps tie

By LAURIE FREEMAN

Procter & Gamble and S.C. Johnson & Son, rivals in several product categories, have teamed up for a $250,000 sweepstakes.

P&G's Joy dishwashing detergent and Johnson's Pledge furniture polish are sharing top billing during the summerlong "The winning shine" promotion.

"The original idea came from an associate product manager at P&G," said Bob Caulk, Pledge marketing associate at Racine, Wis.-based Johnson. "They were looking for a product with similar brand characteristics to Joy—and Pledge offers some of those same characteristics."

Both Joy and Pledge come in lemon scents, and are positioned as leaders in lemon-shine cleaning.

"We thought we'd have broader consumer impact if we joined these two category leaders together. They both have a high level of household and brand-name penetration—almost everyone knows about Joy and Pledge even if they don't use them," said Mr. Caulk.

Planning for the promotion began more than 18 months ago, involving delicate negotiations between brand managers at Cincinnati-based P&G and Johnson.

Grey Advertising, New York, P&G's Joy agency, is agency of record for the promotion. The promotion kicked off in June with a one-time insert containing a 50¢-off coupon for Joy and a 20¢-off coupon for Pledge, run in newspapers around the country.

Additional support for the sweepstakes comes from 10-second tag lines now running on regular Joy tv spots. Johnson is not airing any additional advertising tied to the promotion.

A P&G spokesman said when the company looks for joint promotion possibilities with competitors, the involved brands cannot be in direct competition with each other. In this case, S.C. Johnson does not compete in the dishwashing liquid category, nor does P&G market wax-based polishes. However, both companies do jockey for position in the personal care and over-the-counter drug categories.

"The winning shine" promotion is one of the first Johnson has held with another company, although P&G occasionally has teamed up with outside marketers, the P&G spokesman said.#

Crest readies road show

By LAURIE FREEMAN

Procter & Gamble will support its estimated $37 million ad campaign for its Crest Tartar Control Formula toothpaste with a traveling exhibit promoting dental care and the new product.

Cincinnati-based P&G's five-month national tour begins the week of July 29, when Crest exhibits will be displayed at one location in Manhattan and at a New Jersey shopping mall.

The tour will then make stops in the top 50 national markets, said a spokeswoman for Manning, Selvage & Lee, the New York public relations agency handling promotions for the new Crest formula.

Benton & Bowles, New York, handles the $37 million introductory ad campaign (AA, June 17).

The walk-through exhibits will resemble those used during test-marketing for Crest Tartar Control Formula in Minnetonka, Minn., and Sutton, Neb. (AA, March 18).

The booths will be staffed by dental hygienists and students, who will conduct oral examinations and explain the difference between plaque and tartar.

Consumers will be invited to have an oral examination; those who are found to have tartar build-up will be advised to see their dentist.

After passing through the exhibit, consumers will be given a "gift package," including a t-shirt, toothbrush, P&G coupons (for several brands), dental-care literature and balloons.

"We're trying to make dental care seem less scary," the spokeswoman said. "Most people don't know what the dentist is doing when he's cleaning their teeth or why it's necessary. This takes some of the mystery out of the process."

Plaque is a sticky, bacterial film that P&G says can be removed by any toothpaste and a toothbrush. Tartar, however, hardens into a cement-like substance on teeth and below the gum line. Tartar can be removed only by a dentist.

The new Crest formula has sodium pyrophosphate, which P&G claims aids in tartar removal.#

Jingle rings 'em up

McDonald's never has seemed like a company that would spend more than a half-billion dollars on advertising and promotion using a theme penned on a bus, but it has done just that with "It's a good time for the great taste of McDonald's," which has been its signature since June, 1984. *See Page 4*.

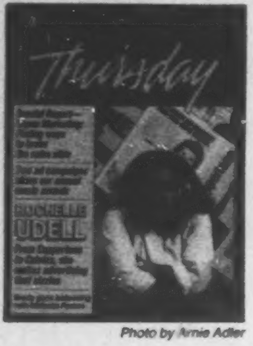

Photo by Arnie Adler

Hot ads

Rochelle Udell, a recent addition to the Della Femina, Travisano & Partners creative font, is direct, witty, iconoclastic and responsible for some of the most sensual and provocative advertising ever to appear on tv. *See Page 9*.

Family feud

The Bingham family, owners of premier newspaper and broadcast properties in Louisville, has voted to split control of its holdings. The move is seen as an attempt to strengthen the family's control of the newspapers—the *Courier Journal* and the *Louisville Times*—which are considered far more valuable than their broadcast properties. It follows a public offering of 18% of the family holdings by Sallie Bingham, but other family members, who are feuding with Ms. Bingham, maintain the events are not linked. *See Page 50*.

Special Report—Liquor

Liquor sales continue to slip into a deep freeze. However, industry innovators are launching new products and realigning their sales divisions in an effort to cope with a market that will continue to take its share of shots. *See Page 13*.

Presstime

Ad forecast chillier

New York—Robert Coen, McCann-Erickson's senior vp-director of forecasting, this week lowered his projections on 1985 U.S. ad spending increases to 9.1%, down from the 9.7% boost he predicted last year for '85 (AA, Dec. 17). The new total comes to $95 billion. Local advertising is expected to increase more than 10%, but national advertising should be only 8.3%, down from Mr. Coen's earlier 9.2% projection. Mr. Coen cited as reasons for the lower increase weaker-than-expected economic performance in the first quarter and a "flattening out" of spending by computer companies and utilities.

Trintex seeks agency

White Plains, N.Y.—Trintex, the videotex joint venture of CBS, IBM and Sears, Roebuck & Co., is conducting its first agency search. The service, expected to start in 1986, will bill $10 million to $15 million, sources say.

Dailey flies with Western

Los Angeles—Western Airlines has moved its $20 million account to Dailey & Associates after a review that did not include incumbent Doyle Dane Bernbach.

Teachers picks Elliott

New Britain, Conn.—W.V. Elliott Co. has signed an agreement with William Teachers & Sons, Scotland, to become sole importer of Teachers Highland Cream, Teachers' Royal Highland and Teachers' Glendronach scotches. Bacardi Imports, Miami, previously had the brands. William B. James Advertising, Elliott's in-house shop, will handle advertising. Rumrill-Hoyt was the last agency to handle the brands.

Live Aid lags on ABC

New York—ABC-TV's live prime time telecast July 13 of the Live Aid rock concert averaged only an 11.6 A.C. Nielsen Co. rating and 23 share, to rank 30th among all programs that aired during the week ended July 14. Meanwhile, "20/20" posted an unusually high 16.3/29 to rank No. 6 that week; the ABC show led off with a story on new Coke and the return of "old" Coca-Cola. NBC, however, won the week, its 11th win of the last 12 weeks, as ABC lagged—hurt not only by Live Aid but the July 14 U.S. Football League championship (7.6/14).

Imahara trims work week

Sunnyvale, Cal.—Imahara & Keep, responding to cash-flow problems, has put everyone at the 25-person Silicon Valley agency on a four-day work week at 80% pay for three months.

New agency for insurer

Boston—New England Mutual Life Insurance Co., which had been with Hill, Holliday, Connors, Cosmopulos for 17 years, is about a week away from naming a new agency here for its $5 million account, says Daniel Logan, vp-director, corporate communications and advertising. Cosmo-

Yuppie ad? Yep and nope: Can this ad, which pictures an abstract painter and talks about Rose's Lime Juice's quality tradition in tiny type, be aimed at yuppies? Yes, but not according to the view of them as crass materialists, which is not the way Ammirati & Puris, also agency for BMW cars, sees the market.

Yuppie pursuit: It's too trivial for marketers

By Stewart Alter

July 18, 1985 in Denver. It's a place and a date that will go down in yuppie folklore.

For this evening at the Denver Center for the Performing Arts, American Express will begin the rewriting of yuppie history. It will salute Denver-area young professionals involved in volunteer work; those who undermine the stereotype of yuppies as materialistic, self-absorbed hedonists; those who, in the words of the American Express ad that kicked off the program a few months ago, "know that there's more to life than a vcr, a food processor and a new pair of running shoes."

What's happened here? Just a short while ago the marketing world was slavering over young urban professionals, a breed seen as having utterly redefined the concept of discretionary spending through an absolute devotion to superficiality.

Then, according to a deluge of press accounts, yuppies said they resented being stereotyped as mammon-worshipers and, in a wink, the advertising world has transformed this actually-quite-small market segment from sinners into saints. "The yuppie phenomenon is in retreat," said one newspaper headline.

Well, what's happened, according to some agency executives, is an image switch from Mr. Hyde to Dr. Jekyll that is no more realistic or accurate than before.

From a marketing point of view, the inaccuracy is not so much one of factual description, but of context. Because yuppies buy things doesn't mean they do nothing but buy things, buy things only for status or represent all high-ticket-product buying power in the U.S.

There are, of course, some campaigns that have specifically played up yuppie status-seeking, but these are not for the products successfully associated with the market. Brands such as Cuisinart or BMW cars continue to advertise without the "Hey, yuppie, looking for status?" approach. Am-

Liquor Marketing

Petroff

Distillers try tactics to brake sales slide

By Ed Fitch

The ice age cometh. Just when the liquor industry needs a thaw, its sales slip further toward a deep freeze.

Distilled spirit sales declined for the third consecutive year in 1984—down 1.4% from 1983—as per-capita consumption of distilled spirits dropped from 2.77 gals. to 2.70 gals., according to *Impact*, a wine and spirits industry newsletter. Pouring appealing new products into the market and repositioning existing brands has helped, but these moves will not melt consumers' tough attitudes toward distilled spirits.

For the short term, health and waistline consciousness and concern about driving under the influence of alcohol are souring most companies' revenue potential and causing sales to tumble. Unless Americans decide that pouring down a couple of stiff ones is fashionable, the industry may have contracted permanently.

James Thompson, chairman-president and chief executive officer of Glenmore Distilleries Co., Louisville, Ky., likens the industry to a fish pond that is diminishing in size. "At some point, the size of the pond can't support a healthy population," he says. "When that occurs, it's a question of acquiring, merging, undertaking joint ventures or shrinking operations to suit the circumstances—whatever works best in helping a company better deal with obtaining larger pieces of a shrinking pie."

The big fish get bigger; the little fish are eaten or keep a low profile at the edge of the pond. Stand back Charles Darwin, a textbook case of survival of the fittest is unfolding.

"Unquestionably, there is greater merger and acquisition activity," says John W. Andersen, president-chief executive officer of Whitbread North America, Lake Success, N.Y. Whitbread acquired the Buckingham Corp., best known for marketing Cutty Sark, from Beatrice Cos. and merged it into its Julius Wile Sons & Co. subsidiary, forming the Buckingham Wile Co. in April. He says the trend toward consolidation is "not likely to abate through the end of this century."

Mr. Andersen distills the situation into a case of critical mass. "There is the recognition that companies must have sufficient enough strength and reach sufficient critical mass to compete effectively."

The trend, he says, began in the industry's retail sector and was followed closely by merger and acquisition activity among wholesalers. "The movement on the manufacturing side is a more recent phenomenon," Mr. Andersen says. And although retailer and wholesaler consolidation has reached its limits in some markets, on the distillers' side, "considerable opportunities remain—for small, medium and large companies," he says. "You won't find them listed in the 'We are for sale' catalog, but they are there."

They certainly are, and they find each other. In true survival of the fittest fashion, the race is on to carry the biggest club to market, beating competitors in meeting consumers' vagaries.

Current hot properties are those companies with an attractive portfolio of cordials, the industry's No. 1 icebreaker, realizing the greatest growth of any category. *U.S. News & World Report's* "Wine and Spirits Marketing Bulletin" shows shipments of cordials increasing 9.6% in 1984, making it the fourth largest category in terms of volume.

"Certainly filling product niches is an important part of bringing the product portfolio

(Continued on Page 14)

Reorganized Seagram ready to battle for share

By Cara S. Trager

Seagram is the QE2 of the liquor industry: A little slow getting underway, perhaps, but once it's moving it cuts quite a wake. The beverage behemoth's major reorganization and ambitious new product developments are churning the waters of the industry, illustrating its determined effort to increase flexibility and overcome the liquor industry's latest challenge—decreased consumption.

As president of the company since last September, Edgar Bronfman Jr., grandson of the founder of Seagram Co. Ltd., Montreal, and its U.S. subsidiary, Jos. E. Seagram & Sons, New York, makes no bones about his intent: "To get additional volume by winning share. The industry is no longer a growing market and requires capturing shares from other companies."

Indeed, the liquor industry is in the midst of a sales stagnation. Moderation is the name of the game, as more Americans emphasize health and fitness and turn their attention to alcohol abuse, particularly driving while intoxicated. The House of Seagram, the largest sales revenue generator in the distilled spirits business, is not immune to the life-style changes that have altered the industry's course.

Its leading brands, Seagram's 7 Crown, Seagram's V.O. and Seagram's gin, while Nos. 3, 8 and 9 on *Impact's* May 1 listing of 1984's top 50 brands, are not what they once were. From 1983 to 1984, Seagram's 7 Crown and Seagram's V.O. both dropped 4% in case depletions, while Seagram's gin declined 2.5%.

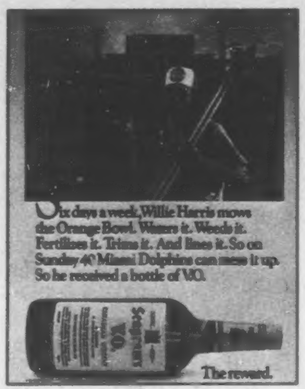
Nevertheless, hope is on the horizon. Seagram's 7 Crown's decline represents an improvement over the brand's 7% drop in 1983, according to *Impact.* Additionally, the brand managed to increase its share of the bleeding blended category by a point, rising to an estimated 39% in 1984.

To boost that brand's performance, along with Seagram's V.O.'s, which Mr. Bronfman says has been affected by lower-price bulk imports, the company has increased both products' ad budgets substantially. He declines to reveal the amount, however.

"We can't expect a turnaround in one year, but the sales declines of both have slowed down, and in the near future, we will see a positive growth," predicts the 30-year-old company president. Over-all, the company, he says, expects to spend well in excess of $100 million in marketing its brands, with ad dollars up 6% to 8% from last year.

And that's only the tip of the iceberg. In a move to increase sales "by getting more people to drink less," Mr. Bronfman overhauled his company's innerworkings in February. The results: New product efforts were streamlined; comparable brands—in price or volume—were reassigned to a specific marketing company; two marketing companies were dissolved—General Wine & Spirits Co. and Calvert Distillers—in favor of two distinct operations, 375 Spirits and Perennial Sales Co., and the roles and management of Seagram Distillers Co. and Summit Sales Co. were redefined and reshuffled.

(Continued on Page 16)



Six days a week, Willie Harris mows the Orange Bowl. Waters it. Weeds it. Fertilizes it. Trims it. And lines it. So on Sunday 40 Miami Dolphins can mess it up. So he received a bottle of V.O.

The reward.

The ad budget for Seagram's V.O. has been increased substantially.

Cara S. Trager, a frequent contributor to Special Report, profiled Carillon Importers and TBWA Advertising in last year's Liquor Marketing Special Report.

House of Seagram

Editor's note: Because the House of Seagram reorganized earlier this year, the entire company is covered in this profile.

Sales: In 1983, Seagram Distillers Co. realized the highest sales in the industry of any sales division with $490 million in revenue. General Wine & Spirits Co. and Calvert Distillers Co., both of which were dissolved in the reorganization, ranked 11th and 13th, respectively, with sales of $160 million and $135 million.

Volume: Seagram Distillers Co. ranked third in 1983, having shipped 15.4 million 9-liter cases, accounting for 8.3% of total industry depletions. Calvert Distillers ranked seventh and General Wine & Spirits ranked 15th. Respectively, they accounted for 3.5% and 2.1% of total industry case depletions.

Major 1984 brand action:

- Seagram's 7 Crown—5.2 million cases depleted, down 4.1% from 1983. (Warwick Advertising, New York, handles.)
- Seagram's V.O.—3.4 million cases depleted, down 4% from 1983. (Ogilvy & Mather, New York, handles.)
- Seagram's gin—3.4 million cases depleted, down 2.5% from 1983. (Mingo Jones, New York, handles.)
- Kessler—1.5 million cases depleted, down 1% from 1983. (Warwick Advertising handles.)
- Crown Royal—1.4 million cases depleted, up 8.7% from 1983. (Warwick handles.)
- Lord Calvert—1.2 million cases, same as 1983. (Doyle Dane Bernbach, New York, handles.)
- Wolfschmidt—1.2 million cases, down 0.4% from 1983. (William Esty Co., New York, handles.)
- Leroux cordials—1 million cases depleted, up 0.5% from 1983. (Warwick Advertising handles.)
- Calvert Extra—1 million cases depleted, down 6.5% from 1983. (Doyle Dane Bernbach handles.)
- Chivas Regal—950,000 cases depleted, same as 1983. (Doyle Dane Bernbach handles.)
- Ronrico—830,000 cases depleted, up 5.1% from 1983. (Doyle Dane Bernbach handles.)

Sources for all sales, volume and brand action boxes: *Impact, 1985 Impact Yearbook.*

Distillers

(Continued from Page 13)

up to critical mass," Mr. Andersen says. "It is necessary to have the ability to cover the range with your product line to bring more power to bear on the wholesaler."

Broadening product lines is only a part of the picture, however. Many companies are more interested in consolidating volumes or realizing more efficient production capabilities, he says.

"One company may have superb facilities and a weaker product line, while another may have the products, but not the facilities," Glenmore's Mr. Thompson says. "Facilities have a lot to do with it because of the capital expenses involved."

Schenley Import Co. reportedly was interested in acquiring Glenmore earlier this year to tap into the company's extensive production capability. Economies of marketing, sales coverage and administration also can be substantial, he says.

"You can typically spread out more of your people over the organization and handle more volume," Mr. Andersen says. "At Buckingham, for example, we had about a 50-50 rate between retaining people or letting them go."

Cost-cutting moves such as this can overrule product conflicts. "If you have brands that overlap, some may have to be divested," he says. "But in many instances it is not a category conflict if the products are at different price points. This can be a strengthening move if you can cover the range in a category."

Some companies view diversifying out of the distilled spirits industry as a strengthening move. "Any company with any sense is looking outside of the industry," Mr. Thompson says. "This is a case of not only diversifying their risk, but also of increasing growth opportunities."

Glenmore, for example, is looking at food lines, where marketing and production needs parallel distilled spirits', he says. "I doubt we'll ever be in the business of selling tire and rubber or nuclear armaments."

Mr. Andersen says some obvious problems arise from stepping outside of the liquor industry's boundaries. "The most notable being that you split your management focus and often are unable to maintain an integrated operating structure."

The critical factor, he says, may be whether a distiller is publicly or privately held. When publicly traded companies reach a certain size, he says, "their growth is limited by the markets in which they are active. They need to generate growth to support their stock," and this means looking for new and often diverse sources of business. "Because Whitbread does not worship at the feet of Wall Street, we are not limited by this."

London-based Whitbread & Co.'s activity illustrates a twist in the acquisition mix. According to industry estimates, foreign-owned companies control 35% of the U.S. spirits business.

Mr. Andersen predicts this percentage will increase as foreign companies "look out of their home economies for investment opportunities. For the most part," he says, "they've gone through the same problems—Britain experienced a similar situation eight to ten years ago. The pendulum in America never fails to swing all the way to the right and left before it settles in the middle."

The pendulum will swing back in the industry's favor "in 40 or 50 years—and perhaps I'm being optimistic," Mr. Thompson jokes. "There are positive developments. It's not all gloom and doom."

And while both executives say consolidation won't stimulate consumption or change America's tastes, it may keep Mr. Thompson's fish pond from freezing over entirely.

Fiber cereals in bran(d) shootout

None of the 25 cereals pictured in this ad stack up to the fiber content in General Mills' NutraSweet-sweetened Fiber One, claim ads via J. Walter Thompson USA, Chicago.

Reagan news primes market

By JULIE FRANZ
and NANCY GIGES

Three major cereal marketers are bringing out new high-fiber products just as President Reagan's recently diagnosed colon cancer has refocused attention on the possible health benefits of a high-fiber diet.

Although many accounts of the president's condition included the National Cancer Institute's recommendation that a high-fiber/low-fat diet can help prevent such cancer, General Mills, General Foods and Kellogg say they will not try to capitalize.

While the cereal marketers run their discreet ad messages, Warner-Lambert, marketer of Early Detector self-examination kits used in the detection of colon cancer, ran its ad headlined "You've been hearing a lot about colorectal cancer." Other marketers of in-home tests said they would be doing more promotion, as will the American Cancer Society. *(See story on Page 62).*

General Mills, Minneapolis, is entering the fiber frenzy by starting its national rollout of its Fiber One entry (AA, July 15).

Archrival General Foods Corp., White Plains, N.Y., is introducing two new varieties of its Fruit & Fibre cereal.

Meanwhile, sources say, cereal-market leader Kellogg Co., Battle Creek, Mich., is poised to roll national with Extra Fiber All-Bran, currently testing in upstate New York and other markets (AA, March 18).

All the companies said that the president's new health problem would not lead them to change advertising content or schedules for the products.

"The president's health is a personal issue, and we intend to respect the personal nature of his health," said a Kellogg spokesman. The company said the budget for its controversial All-Bran campaign, promoting the cereal as useful in a cancer-prevention diet (AA, Oct. 29, *et seq.*), had been set and will not be altered.

Because General Foods is focusing advertising for its

Missing ingredients in 'new' Coke's research

By JACK HONOMICHL

Coca-Cola is the "sublimated essence of all America stands for—a decent thing, honestly made, universally distributed, conscientiously improved with the years." Statement attributed to the late William Allen White, Pulitzer Prize-winning editor of the Emporia *(Kan.)* Gazette, *in 1938.*

This quote gets considerable lip service inside Coca-Cola Co. Its public relations department writes it into speeches for Brian Dyson, president of Coca-Cola USA, the company's domestic division, and it was the inspiration for the code name "Kansas," which was used internally to designate the secret Coca-Cola reformulation program headed by Jack Carew, director of new-product development.

Beyond lip service, it is becoming increasingly evident that many key marketing executives at Atlanta-based Coca-Cola Co. didn't appreciate the essence of Mr. White's statement.

Instead, they took a naive view that Coca-Cola was simply a thirst-quenching liquid—period.

Just look at the much-vaunted research program that led to Coke's reformulation. Over a period of about 2½ years, there were—as has been widely reported in the press—about 180,000 to 200,000 blind taste-tests done, pitting three or more "new" Coca-Cola recipes against "old" Coca-Cola, as well as archrival Pepsi-Cola.

But, according to Roy Stout, senior vp-marketing research at Coca-Cola USA, only 30,000 to 40,000 of these involved the specific

Coke outpoints Pepsi in ad awareness. AdWatch, P. 6. Researchers react to Coke's flip-flop. P. 58.

Pepsi takes 2nd shot at Coca-Cola's switch

By NANCY GIGES

Pepsi-Cola couldn't resist the temptation to poke more fun at Coke in new advertising, even though Roger Enrico, president of Pepsi-Cola USA, said just days ago he had no intention of doing so.

The new spot, put together in days, began airing July 17. It features the same character named Wilbur who appeared in an earlier spot teasing new Coke. This one creates confusion about Coca-Cola's decision to restore its original flavor of Coke under the Coca-Cola Classic brand name.

In the new spot, Wilbur goes to a fountain and asks for a Coke. The counterman asks, "Which one?" When Wilbur replies, "Just a Coke," the counterman says, "There's lotsa them. See, the old Coke is the old Coke before it became the new Coke. The new Coke is the one that used to be your old Coke, which became your new improved Coke. Except for your Classic Coke, which is really the old Coke, but that's your new Coke. Know what I mean?"

Wilbur tells the counterman to give him the one he likes best. And, of course, the counterman pulls out a Pepsi. The spot closes with "Now more than ever. The choice of a new generation."

Philip Dusenberry, vice-chairman and executive creative director of BBDO, which handles Pepsi, said the spot really talks to the issue at hand. "We wanted to remind people of the confusion," he said, but added this will be Pepsi's last lighthearted gibe at its rival. "We really want to get back to our own game plan, to the likable, enjoyable, award-win-

Smoke ads stunted

Marketers head for great outdoors

By WILLIAM F. GLOEDE

The tobacco industry is cutting advertising spending in the face of flat sales and the specter of a long-term decline in cigaret smoking.

According to Advertising Age estimates based on projections from the tobacco and media industries, total estimated spending by tobacco companies on cigaret advertising declined 4.5% in the first quarter of 1985, to $160 million, compared with $168.2 million in the same period last year.

At the same time, according to the estimates, several tobacco companies are shifting dollars away from print and into out-of-home media. This is no great surprise for magazines and newspapers, because they have seen tobacco-advertising revenue fall precipitously from the unprecedented levels achieved in the early 1980s, when tobacco marketers were conducting open warfare on the new-product front.

Ad Age estimates magazine spending by the tobacco marketers was down 6.5% in the first quarter of '84, to $84.7 million.

Newspapers suffered a 42% decline in the same period, to $20.1 million.

Outdoor advertising, however, is booming. Cigaret spending there increased 30.3%, to $55.9 mil-

Douglas in wings for Miller's FTC job

By STEVEN W. COLFORD

WASHINGTON—The White House nomination of Federal Trade Commission chairman James Miller III last week to succeed David Stockman at the Office of Management & Budget was expected to move commissioner George Douglas into the FTC's top slot on an interim basis, according to government and industry sources.

Despite his earlier vaguely announced plans to leave the commission in September, Mr. Douglas, according to a wide range of sources, was to be asked by chairman Miller and the White House to stay on for a time.

That shuffle would preclude the need for the White House to find two FTC replacements—for Messrs. Miller and Douglas—in a short period of time. It would also represent a dimming of the political star of commissioner Terry Calvani, a Republican heretofore thought to be the most likely successor to Mr. Miller.

Though the Douglas elevation would be surprising for two reasons—his previously announced departure plans and his Democratic affiliation—it also seems natural, given Mr. Douglas' close personal and philosophical union with Mr. Miller.

Both are economists by training, and they have virtually identical voting records at the commission. They preach the same deregulatory gospel, and co-authored a 1974 book on the deregulation of the domestic airline industry.

An unknown quantity to advertisers when he arrived in Washington three years ago, Mr. Douglas has pleased the industry in his 32 months on the job through his unflagging support for the policies of Mr. Miller, an unabashed friend of business.

While those deregulatory policies have sparked frequent criticism from consumer groups and Democrats in Congress, they also have allowed advertisers much more latitude, including the possibility of legislation that would grant them a first-ever exemption from the FTC's unfairness rule-making authority.

"I think George Douglas would do a credit-

Ads portray 'Big Brother' image

MCI attacks AT&T

By BRIAN MORAN

MCI Communications Corp. will depict the eerie, chilled grimness of a world without challengers to AT&T as part of an estimated $25 million ad blitz set to begin this week.

In two new tv spots via Ally & Gargano, New York, MCI evokes the stark spirit of Apple Computer's celebrated "1984" commercial in a poke at the supposed drudgery of a long-distance phone market ruled by AT&T.

One spot attacks the sheer volume of ad messages put forth by MCI's giant rival. Reminiscent of a scene in the film "A Clockwork Orange," the spot shows a man forced to sit in front of nine giant tv screens, all spewing different AT&T spots.

"Last year, the public got an estimated 20 billion messages from AT&T," a voiceover says. "To that, MCI says, 'Don't be brainwashed. Every time you see or hear an AT&T message, think of MCI.' "

The other commercial, called "A week in the life of a shopper," is set in a grocery store in an unnamed Eastern European country and pitches MCI as a means of escape from "Big Brother" AT&T. A man visits the store three times to order meat and each time is given fish instead.

"Imagine a country where business faced no competition," the voiceover says. "No competition is what AT&T had with long-distance in America. Now you're free to choose MCI's lower rates and more up-to-date system."

The spots—a departure from MCI's celebrity campaigns featuring Burt Lancaster, Joan Rivers and Merv Griffin—will break this week in a few cities and will be rolled out through MCI's system in the next few weeks. Under MCI's decentralized marketing organiza-

Della Femina lands 2 new L.A. accounts

KCET, Los Angeles' public tv station, and Mr. Build, the Santa Ana, Cal.-based home remodeling and maintenance chain, both named Della Femina, Travisano & Partners, Los Angeles, as their agency. Combined billings are $2 million. Joining the agency to supervise both accounts is Walter Hagstrom, a former Century 21 International and Wells, Rich, Greene/West executive. He was most recently head of his own agency in Orange County, with Mr. Build as principal client. Former KCET agency was Kresser, Robbins, Los Angeles (now Kresser, Craig). Also new at Della Femina: Betsy Hunter, former vp-management supervisor, Tracy-Locke, Dallas, in a similar post on Carl's Jr., the $12 million fast-food account the agency won last week (AA, July 15).

Lucky Stores' automotive division named Shelly-Berman Communicators, Columbus, O., for its $3 million-to-$5 million account, succeeding Bernstein-Rein, Kansas City, following a review. Also competing for the Phoenix-based division of the Dublin, Cal., retailing company were: Admarketing, Los Angeles; WFC, Phoenix, and Wyse Advertising, Cleveland.

Westin Hotel Co., Seattle, named five finalists for its $7 million-to-$10 million account now in review: Incumbent Cole & Weber, Seattle; Dancer Fitzgerald Sample, San Francisco; Ketchum Advertis-

Hard-driving GF hikes ad dollars in 'No. 1' plan

By NANCY GIGES

Rye Brook, N.Y.—Hoping to obtain 85% of revenues from brands in No. 1 positions, General Foods Corp. is boosting ad and promotion spending 20%, to $518 million during its current fiscal year, president Philip Smith says.

Mr. Smith, addressing a press briefing before the company's annual meeting here last week, said GF's revenue-source goal is important to assure retail shelf space for the company's products.

The remaining 15% of revenues would come from products considered unique that could be advertised and would not have to be sold on trade deals, he said.

GF now gets 75% of its revenues from brands holding the top spots in their markets. Four years ago, the figure was only 50%.

The increase in ad and promotional spending for this fiscal year, which began March 31, is more than double last year's 9% increase, Mr. Smith said. The money will be spent across the board, with areas offering growth potential getting special attention.

These areas include Louis Rich turkey products, frozen novelties, desserts, Maxwell House Instant decaffeinated coffee and several other new undisclosed items, he said.

Mr. Smith said GF is making

Treasury looking for coin agency

By JANET MEYERS

Washington—The U.S. Treasury Department has an advertising assignment available that could mean $25 million in business for the winning agency.

The government wants to repeat its successful Olympic coin sales promotion, which raised millions of nontax dollars for the 1984 U.S. Olympics program.

This time it will benefit the Statue of Liberty-Ellis Island restoration program.

The Treasury expects to receive bids from at least 10 agencies by its Aug. 5 due date. The Olympic program drew proposals from only three agencies.

A bill signed into law last week lets the Treasury bypass the government's normal time-consuming contracting rules so that promotion may begin around November. The campaign will last about 13 months.

The Statue of Liberty campaign, similar to the effort mounted by D'Arcy MacManus Masius, New York, for the Olympics, is expected to raise $53 million through coin sales. After advertising and other costs are subtracted, the balance would be turned over to Lee Iacocca's Statue of Liberty-Ellis Island Foundation.

The Statue of Liberty coins will be sold and promoted in much the same way as the Olympic coins (AA, June 17), using tv, radio, print, direct mail and pr.

Advertising will be directed at consumers, with special programs aimed at financial institutions and children. The coins will be sold through the Treasury's direct mail, post offices, financial institutions and some department stores and retailers.#

World News Roundup

Milan—**Nordica ski boots**, looking to expand its advertising around the world, has named Publinter Ayer to handle its new $7 million worldwide account. Ayer previously handled the account only in Europe.

Sao Paulo—**Ford Brasil** last week introduced its world truck model, called Cargo, to the local market with an hourlong tv commercial. J. Walter Thompson Publicidade handles. Ford plans to export the medium-size truck from Brazil to the U.S. and Canada in the fall.

London—**Citizen of Japan** picked Marsteller Little & Strodl to handle a $7 million European campaign for its new line of computer printers and peripherals. Marsteller will work with its network partner, Havas Conseil Marsteller, in Germany and France.

Sydney—**Monahan Dayman Adams**, Australia's largest local agency, has acquired a majority stake in Adman, a small agency in Singapore, as a step toward an international network.

London—**A London high court**, ruling in favor of McDonald's Corp., prohibits Burger King Corp. and J. Walter Thompson Co. from putting up posters headlined "It ain't just big, Mac." The judge, ruling on a 1983 lawsuit, said the posters could be mistaken for a Big Mac ad. Burger King said the posters were removed two years ago.

Tokyo—**Grey Advertising** picked up its first piece of Mars business by gaining a major new pet food product introduction in Japan from Mars' Effem subsidiary.

Sydney—**Australia's largest advertiser**, retailer Myer Emporium, is being acquired by Australia's largest retailer, G.J. Coles, in a $1

GM puts brakes on shop pay

By JESSE SNYDER

Detroit—General Motors is putting the squeeze on agency compensation, in effect cutting the standard 15% commission on media buying to as low as 12.5% by the beginning of the 1986 model year, sources inside GM and the agencies acknowledge.

The cutbacks are not being applied strictly on a commission basis, but over-all work out to a 10% to 17% reduction in agency commissions.

Layoffs at all five major agencies are expected by the staffs of the agencies, although only Campbell-Ewald, Warren, Mich., Chevrolet's agency, has made cutbacks thus far

Source: Robert Coen, McCann-Erickson

By STEWART ALTER

New York—Robert Coen, senior vp-director of forecasting for McCann-Erickson, has lowered his projections for U.S. advertising expenditure increases in 1985. While the major national advertising categories remain strong, he said, there is weakness in secondary categories and a lack of any major new growth areas.

Mr. Coen, who late last year predicted a 9.7% increase in U.S. advertising and a 9.2% increase in national advertising, lowered those predictions last week to 9.1% for the total—to $95.9 billion—and 8.3% for national advertising (AA, July 17).

The well known industry forecaster also made his first predictions for 1986, prophesying that U.S. advertising would exceed $100 billion for the first time, rising 8.5% to $104 billion, while overseas advertising would increase 6%, to $70 billion.

In lowering his 1985 predictions, Mr. Coen noted that the top national product categories still looked strong, based on first-quarter comparisons with 1984. Among the top product categories in the three major national media—network tv, spot tv and magazines—there were these results in the first quarter, compared with the year-ago period: Candy/soft drinks rose 29%; automobiles, 22%; restaurants, 19%; foods, 15%, and drugs/reme-

'Cosmo' celebrates 'That Girl's' 20th

By STUART J. ELLIOTT

New York—Can it be 20 years since That *Cosmopolitan* Girl first sashayed onto the magazine scene?

Since the answer is yes, publisher D. Claeys Bahrenburg and editor Helen Gurley Brown—that quintessential *Cosmopolitan* girl—are making big plans for a special November issue of the Hearst Magazines monthly.

"Being the 20th anniversary of how the *Cosmopolitan* girl has revolutionized society with her life style," said Mr. Bahrenburg, "we think it's time to say this is where young women are today and where they're going in the future."

The salute to the *Cosmo* girl—"yes, we're still calling her a girl," said Ms. Brown, "though we often refer to her as a woman"—is actually a tribute to its editor. Ms. Brown's overhaul of what was a moribund general-interest title into one of Hearst's major profit centers ranks among the industry's most successful makeovers.

"Management is suggesting it's a celebration of my long tenure, but I certainly think it's wiser not to hit very heavily on that," said the ever-modest Ms. Brown. Instead, the issue will "examine every aspect of new womanhood," said Mr. Bahrenburg.

Ms. Brown, whose frugality in acquiring editorial matter is a subject even she jokes about, is buying big, brand-name authors for the

ADWATCH

Marketers find bad news does some good

By SCOTT HUME

You can call it brilliant or a blunder, but you can't say it was boring.

Coca-Cola's reformulation of Coke may have produced the broadest and fastest awareness for a new product in marketing history. The company's move obviously angered many consumers—enough to force the beverage company to eat humble pie and revive the original formula—and confused others. But one thing is sure: If you asked consumers over the past few months which soft drink came to mind first, the overwhelming response was "Coke."

That was true of Advertising Age's adWatch survey of advertising awareness. More than half (52.7%) of the 1,000 people polled last month named Coke when they were asked which soft-drink advertising they recalled first.

One of advertising's goals is to increase awareness for a product. What has happened with Coke is that the product has increased awareness for its advertising. Coca-Cola certainly was uncomfortable with the bad feelings its reformulation decision created. But now, having given consumers what they wanted, the company can't be unhappy with its brand and advertising awareness.

Coke's 52.7% ad-awareness share in June was nearly 10 percentage points higher than it had been in May (42.9%) and nearly double its awareness score in April (28.6%), before its management and commercials began appearing on network and local news broadcasts.

The controversy over new Coke blunted what had been a steady awareness increase for rival Pepsi. The launch in late February of new "Choice of a new generation" commercials, featuring singer Lionel Richie, had moved Pepsi ahead of Coke in top-of-mind advertising awareness. Pepsi came to mind first for 31.4% of the April sample, compared with 28.6% for Coke, whose advertising relied on spokesman Bill Cosby and his message that Pepsi was the sweeter beverage.

Even after the new Coke launch and Coca-Cola's share of first mentions rose 14.3 percentage points, Pepsi's share held fairly steady. Last month, however, Pepsi's ad awareness dropped, falling 8.2 percentage points.

Pepsi's gloating about Coca-Cola's forced retreat is understandable, and the No. 2 soft-drink producer may be correct in foreseeing substantial sales-growth potential. But Coke's hold on consumer awareness is undeniable—and can be expected to be stronger when July survey results are in.

Not surprisingly, Coke also led the over-all top 10 in advertising awareness for the month. The first question asked last month's survey sample was "Of all the advertising you have seen, heard or read in the past 30 days, which first comes to mind?" The results, in descending order: Coke, Pepsi, Miller/Miller Lite, Burger King, McDonald's, Budweiser/Bud Light, Pizza Hut, AT&T, Tide and Chevrolet.

AdWatch is a joint project of Advertising Age and SRI Research Center, Lincoln, Neb. Ad awareness is measured by asking a nationally projectable sample of consumers to name the advertising that first comes to mind—in a variety of product categories—from among all advertising seen, heard or read in the previous 30 days.

In June, 1,000 adults were polled by telephone. Under adWatch methodology, an increase or decrease of 2.8 percentage points is considered statistically significant and attributable to more than sample variation.

Airlines are another category in which the product has been drawing attention to its advertising. Like Coca-Cola's drink reformulation, United's pilots' strike angered and inconvenienced many of its loyalists but boosted the company's awareness score. Last month, United's advertising came to mind first for 25.9% of the sample, a 7.4 percentage point increase.

At the same time, awareness of advertising for Trans World Airlines was receiving a boost. TWA gained unfortunate extra visibility when one of its planes was hijacked in the Middle East. In addition, the airline was involved in a much-publicized search for a "white knight" to save it from an unwanted takeover. Its advertising received 13.7% of first mentions, its highest share ever, making it No. 2 among airline advertisers.

American Airlines, which didn't suffer a strike, hijacking or takeover threat, was last month's loser. Its advertising came to mind first for only 7.7% of the sample, 2.8 percentage points below its May score.

Among significant changes in other categories last month:

- There is news in the **camera** category for the first time in months as Kodak's "Because time goes by" ad campaign begins to get consumers to look up during commercial breaks. Kodak's awareness rose 3.2 percentage points to 23% of first mentions in June, strengthening its hold on the No. 1 slot. That increase apparently came at the expense of No. 2 Canon, whose share declined to 12.2% from 16%. Minolta remains No. 3 (with 8.8% in June).
- Tylenol last month strengthened its leadership position in the **medicine & drugs** category. Awareness of its advertising rose 4.5 points to 25.9% in June, well ahead of the No. 2 advertiser, Advil (5.5%) and No. 3 Anacin (4.8%).
- IBM once again threatens to make a race of the fight for awareness in the **computer** category. Awareness for No. 1 Apple's advertising has been sliding—it's down more than 10 points during the past four months—and now IBM is beginning to gain.

IBM came to mind first for 18% of last month's sample, a 3.8 point increase from May's 14.2%. With Apple's awareness level last month at 28.8%, the two major computer marketers are closer than they have been in more than a year.

Commodore remains No. 3, with 4.4% of first mentions.

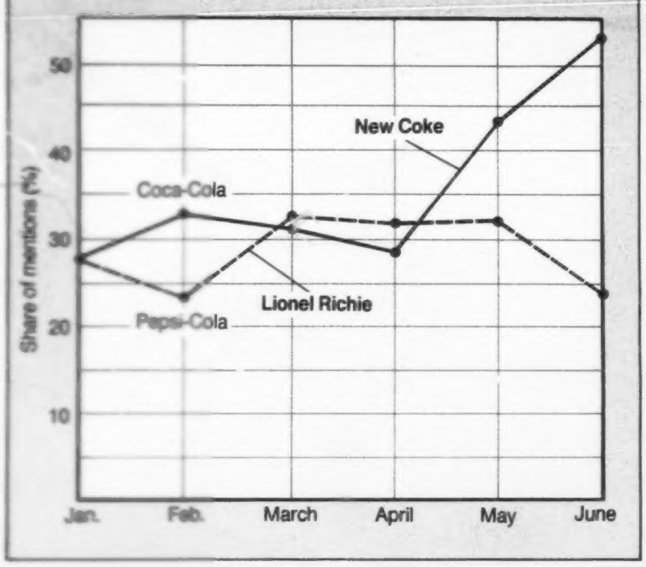
- Miller High Life had the best recalled advertising of all **beer** marketers in June, returning that brand to the No. 1 position for the first time in 27 months.

That can be credited to its "Made the American Way" campaign and to a decline for usual front-runner Budweiser. Bud's share of first-mentions was 11.6%, down from 13.6% in May. Coors, which grabbed the No. 1 spot in April, continues to cool. It garnered 9.2% of first mentions for last month's No. 3 spot.#

For additional information or data, contact: Gary Gabelhouse, SRI Research Center, 301 S. 68th St., Lincoln, Neb. 68506. Phone: (402) 489-0351.

Soft-drink ad awareness

Coca-Cola's introduction of New Coke may have angered some consumers, but it gave Coke advertising a tremendous boost in awareness. The move also blunted the awareness increase Lionel Richie's commercials had begun to give Pepsi's advertising. ***Source: SRI Research Center, Lincoln, Neb.***



CORRECTIONS & CLARIFICATIONS

- Peter Rogers Associates, New York, produced the Brooke Shields ads for Chicago-based Bally Corp.'s Health and Tennis Club division (AA, July 15, P. 74). J. Walter Thompson USA, Los Angeles, is the agency of record, handles all media buying and produces the other celebrity ads endorsing the national health-club chain. However, a Bally spokesman misidentified Thompson as the agency handling the Shields series.
- Ronalds-Reynolds Co., Toronto, and Dancer Fitzgerald Sample work together through a non-equity arrangement. A reference to DFS as partly owning R-R was incorrect (AA, June 17, P. 3).
- Berkley-Small, a newspaper circulation supply company owned by Scripps-Howard, is located in Mobile, Ala., and not Palestine, Tex., as reported in the 100 leading media companies issue (AA, June 27, P. 53). The company sells racks manufactured in its plant in Medina, O., and made at Southern News Rack Co. in Palestine.#

William Taylor shop changing its name

BELLEVUE, WASH.—William Taylor Agency has changed its name to the Taylor Group in an effort to expand its services to include public relations and marketing consulting. The $1.3 million agency, which specializes in industrial and high-technology accounts, remains at the same address.

Live Aid figures on second superconcert

By JAMES P. FORKAN

For Live Aid, the message was tune in, turn on and send money for African famine relief. In the end, the money pledged by viewers emerged as more important to the organizers than the ratings.

Still, the initial audience numbers for what MTV: Music Television promoted as "the biggest concert benefit in the history of the world" were large enough to warrant Band Aid founder Bob Geldof's proposing a Live Aid II for 1986 and USA for Africa's preparing a "We Are the World" event for later this year.

It took two decades to top Woodstock, but organizers of USA for Africa and Band Aid, which kicked off the music fund-raising concept, do not plan to wait that long to try surpassing Live Aid, which raised more than $70 million for African famine relief.

A second Live Aid is being touted for next spring, probably preceded by a home video special and an album from the first concert. And USA for Africa may stage its first live concert in August or September. The latter also is reportedly seeking tie-ins with such advertisers as Burger King Corp, Miami, although company officials said nothing is definite.

ABC's three-hour Live Aid prime time "superconcert" on July 13, which grossed about $5 million in ad sales, averaged a 28 share in the 10 A.C. Nielsen Co. overnight markets, led by the 40 share posted in Philadelphia, host city for the U.S. part of the 17-hour event. Once the national Nielsens were in, however, the biggest rock event since 1969's Woodstock seemed to lose some of its ratings luster, having dropped to a 23 share—despite the presence of rock superstars Mick Jagger, Tina Turner, Hall & Oates and Bob Dylan, and all the media publicity (including the Big 3 tv networks' newscasts).

Although some people may have been turned off by the hype, several tv sources think the likeliest reason for the low ABC numbers was that millions of young viewers opted for MTV's cablecast. ABC spokesmen maintained that its prime time results—strong enough to give ABC a narrow win for July 13—were "in the ballpark" with pre-event projections, which took into account that its coverage would be opposite MTV's and would be preceded by all-day syndication/MTV/radio coverage.

More than 40 million persons watched all or part of its Live Aid telecast, ABC researchers estimated, noting ABC's strongest shares, in the 24-to-25 range, came in the last hour. A demographic profile of viewers won't be available from Nielsen for several weeks.

Nonetheless, one agency executive complained the ABC rating was disappointing, especially given ABC's $125,000-a-30 Live Aid price (at least for those buying before Coke's exit). Some admen had been expecting shares closer to the 27-to-30 neighborhood—and that might have been attainable had the promoters staged the event on a weeknight. Said Paul Schulman, president, Paul Schulman Co. subsidiary of Gardner Advertising, a big chunk of that concert's target audience was out that night, rather than home watching tv. Any sequels, he felt, should be scheduled for a weeknight, *e.g.*, opposite baseball.

A fuller picture will emerge on Orbis' 105-station ad hoc network when the July sweeps books are published. WNEW-TV, New York, averaged a strong 7.3 Nielsen rating/26 share for its all-day Orbis-syndicated coverage, which ended at 6 p.m., and KTLA, Los Angeles, enjoyed a 9.0/25.

Although MTV officials stuck to their policy favoring the release of quarterly ratings reports over program-by-program data, ADVERTISING AGE learned that MTV's prime time coverage averaged an 11.6 Nielsen rating/20 share in MTV households (3.7/6 in total households). For its entire 17-hour coverage, MTV scored a 9.3/21 within its own universe, a 3.0 rating/7 share nationally.

On the sponsor side, the biggest Live Aid battle was between Coca-Cola Co. and Pepsi-Cola Co. (AA, July 1, *et seq.*). Only days before the event, Coca-Cola quit the ABC-TV sponsor roster for fear that archrival Pepsi, as one of four on-site corporate event sponsors, might upstage it (AA, July 15).

Coke executives undoubtedly got some satisfaction out of the fact that only Coke was sold at the Philadelphia site, though Pepsi may have scored some subliminal points from the on-stage and on-screen presence of Tina Turner and Lionel Richie (both under tour/endorsement contract to Pepsi). And cups with Pepsi's logo were visible atop the piano during one rock star's performance.

Given Coca-Cola's pullout, John Otter, senior vp-director, national broadcast, McCann-Erickson, declined comment on Live Aid's ratings. When asked if Coca-Cola might be interested in Live Aid II or the USA for Africa event, Mr. Otter said only that "we haven't gotten any proposals or offers so far" from the promoters.#

Perky pages promote Sears

By LAURIE FREEMAN

CHICAGO—Sears, Roebuck & Co. is presenting a bold, almost sassy image to readers of August issues of women's magazines: A four-page ad that emphasizes bright colors and brand-name merchandise.

In the center spread of the ad, three models leap into the air to celebrate Sears' "Bold Spirit" collection.

The first page of the ad spotlights New York-based Armitron Corp.'s Awatch, and the last page features Sears' Cheryl Tiegs clothing line.

The nation's largest retailer is running the ad in *Cosmopolitan*, *Glamour*, *Mademoiselle* and *Redbook*. A similar eight-page spread, also using trendy graphics and highlighting Sears' junior line, will appear in August issues of *Seventeen*, Sears said.

Needham Harper Worldwide, Chicago, created the print advertising effort by Sears.

Although the ads contain the company's familiar tag line, "There's more for your life at Sears," their bold style represents something of a departure for the retailer. The ads also portray a Sears that has enhanced its basic product line with more brand-name merchandise.

"Sears is following through with advertising on a policy it initiated long ago—to get recognizable, brand-name items into its stores," said John Landschulz, retail analyst with Mesirow & Co., Chicago.

Mr. Landschulz said the "enhanced product mix strategy" Sears is using is similar to marketing plans developed by J.C. Penney Co., K mart Corp. and Montgomery Ward & Co.

"This combination—price and brand—is one of the biggest trends among all retailers. In this case, the use of brand-name advertising reinforces Sears' image—not only as a store that serves mid-America, but for people who are brand conscious as well. Sears needs to create the impression that their stores contain high-quality goods," Mr. Landschulz said.

The upgraded image campaign comes as Sears continues to implement its "Store of the Future" strategy for remodeling and improving store interiors and layouts. To date, about 111 stores have been reformatted, with another 126 units scheduled to be completed by yearend.

Sears also is testing a smaller-scale Store of the Future prototype, specifically designed for markets of 20,000 to 100,000 people. The first such store recently opened in Alma, Mich., focusing on major appliances, durable goods, electronics, paint and hardware. The store also has a catalog office.

"Sears recognized there was a need for customized, modified stores that were a distinctly different look from its metro stores," said Mr. Landschulz.#

Coen

(Continued from Page 3)

dies, 12%. However, Mr. Coen said, based on first-quarter figures, he sees a "slowing down" in four or five secondary categories out of a total of seven that have traditionally shown strength. Of those secondary categories—cigarets, apparel, beer, pet foods, insurance, liquor and utilities and communications—only beer showed an increase in the three national media during the first quarter of '85, up 14%. Moreover, some of the new growth categories, such as computers, registered no increase at all in the first quarter.

"The utilities and communications categories topped out in the fourth quarter of 1984 and expenditures compare unfavorably with last year," said Mr. Coen. "In addition, the boom in the computer marketing spending appears over."

But Mr. Coen believes this plateauing of these new growth areas was an "unfortunate coincidence" that occurred in a post-Olympics year, in which gains would be modest by comparison anyway. If this topping out of those growth categories had happened last year, said Mr. Coen, it would have had "no impact." He said he was "confident" something would come along next year, but "nothing has now come along to replace utilities and computers."

Mr. Coen envisions the national advertising cutback affecting network tv most. He previously predicted a 5.5% growth for network tv revenues in 1985 (AA, Dec. 17), but has now trimmed that back to 3%. "I'm now not expecting anything but sharp declines in the third quarter, which will not be made up in the fourth quarter," he said. Fourth-quarter network tv increases would have to be in the range of 10% to 12% to offset a soft third quarter and achieve 5.5% for the year, he said.

Although network performance is "falling behind earlier expectations, spot tv revenue growth was significantly better than expected during the first half of this year," observed Mr. Coen, noting that network tv revenues were up 4% in the first five months of this year vs. year ago, while spot tv revenues were up 9%.

Mr. Coen cautioned, however, against looking too negatively even at lowered predictions for 1985. He noted the projected 8.3% growth in national advertising "is still higher than the rate of growth seen in most sectors of the U.S. economy."

As for local advertising, Mr. Coen is still sticking with earlier predictions of 10%-plus gains. "There's been a lot of unexpected strength in classified," he said, noting also that "local radio and tv advertising turned out to be far stronger in the opening months of this year than we had thought possible at the close of last year."

Mr. Coen sees non-U.S. advertising increasing 5.5% in 1985 to $65.9 billion, up from $62.5 billion in 1984. He predicted that some individual countries, however, would show greater growth.

As Europe frees itself from major restrictions on allowed tv commercial time, Mr. Coen observed that "Europe will surpass the U.S. in total spending."#

DELTA FLIES. . .

AA airline poll

10 favorite U.S. airlines

	Total points
1. Delta Air Lines (44)	213
2. American Airlines (43)	199
3. United Airlines (12)	107
4. Piedmont Airlines (15)	79
5. Trans World Airlines (11)	74
6. Midway Airlines (9)	42
7. Republic Airlines (5)	30
8. Western Air Lines (4)	19
9. Alaska Airlines (4)	18
10. People Express Airlines (3)	16
Ozark Air Lines (2)	16

Least favorite U.S. airlines

	Votes
1. Eastern Air Lines	50
2. United Airlines	36
3. USAir	18
4. American Airlines	17
5. People Express	11
6. Trans World Airlines	10
7. Northwest Orient Airlines	7

Source: Advertising Age *readers' poll. Note:* Advertising Age *asked readers to rate their favorite and least-favorite U.S. airlines. The results in the "best" category, listed below, were derived by totaling three points for each first-place vote; two points for second, and one point for third. First-place votes are in parentheses and total points are at right. In the least-favorite category, we asked for only one selection per ballot.*

EASTERN
We earn our wings every day

. . . while Eastern gets grounded in AA poll

By Robert Goldsborough

The question of America's favorite airline is no longer up in the air. The winner: Delta Air Lines, by the nose of a 727.

This was the verdict of ADVERTISING AGE *Thursday* readers, who selected the Atlanta-based carrier as the most popular domestic airline in a poll that began with a coupon in the May 23 issue. American Airlines taxied to the gate in second place, while the rest of the fleet lagged well behind the leaders.

In the same poll, we also asked readers to name their least-favorite airline. The clear winner of this dubious distinction was Eastern Air Lines, which easily outdistanced runner-up United Airlines.

We received nearly 200 responses, and they showed, as did our earlier airport poll (AA, May 23), that our readers are indeed frequent fliers. Respondents came from 31 states and the District of Columbia, and said they fly an average of 41 times per year.

In all, 32 different domestic carriers received votes on the ballots, in which we provided blanks for three favorite airlines and one least favorite. We also left space for readers to give reasons for their selections.

In the text adjoining our ballot, we said the criteria for ranking the airlines should include schedule convenience, ease of ticketing, on-time performance, cleanliness of equipment, attitudes of personnel, on-board services (food, drink, reading material), seating configuration and frequent-flier programs.

Delta, which winged to victory with 44 first-place votes and a total of 213 points (based on three points for first-place mentions, two points for second-place, one point for third), was most frequently praised for the attitudes of its personnel, as this sampling indicates:

"Cooperative, pleasant crews, who help when there are problems"..."Clean, courteous and helpful"..."They understand that they are in a service business"..."They focus on passenger needs"..."Happy employes"..."They seem to really have a passenger-oriented attitude."

Those who voted Delta tops also lauded the carrier for its on-time performance. Food, however, was something of a mixed bag. While some participants gave Delta's meals high marks, others, while praising the airline over-all, were critical of the cuisine.

Delta's support was geographically wide-ranging. First-place votes came from 18 states, with more No. 1 ballots being cast from northeastern states than from the South, Delta's headquarters and traditional base of strength.

While "friendly" seemed to be the key word among those rating Delta tops, "professional" was the description most often bestowed by those favoring runner-up American, which had only one less first-place vote than Delta (43) and 14 fewer total points. Although American also was praised for the friendliness of its crews and its on-time performance, the Texas-based carrier received its highest marks for the quality of on-board service, with several respondents referring to the line as "classy." And its frequent-flier program was mentioned more often than that of any other airline.

On the downside, American received 17 votes as least-favorite, most of them from passengers complaining about rude employes and poor food quality. (In contrast, Delta received only four "least favorite" votes.)

United, the largest U.S. carrier, finished a distant third in popularity, although it should be noted that the balloting took place during the recent pilots' strike against the Illinois-based system—a circumstance that may have affected both its popularity and its standing as runner-up in the least-liked category. A handful of respondents made negative comments about the airline's stance during the strike.

United received 12 first-place votes but also was named on 36 ballots as least-favorite. The blackest mark against United was for poor on-time performance, followed by arrogant employes ("They don't care about me") and lackluster food.

One interesting sidelight: Readers who picked Delta as their favorite line tended to name Eastern their least favorite, and the majority of those favoring American listed United as their least favorite.

Rounding out the top 10 in popularity were North Carolina-based Piedmont, TWA, Chicago-based Midway Airlines, Republic, Alaska Air, Western Airlines and Ozark and People Express in a 10th-place tie.

Our readers seemed to save their strongest emotions—most of them negative—for Eastern Air Lines, which received 50 votes as the least favorite U.S. carrier. Complaints about the Miami-based carrier were fairly evenly divided into three categories: Poor on-time performance, dirty aircraft and unfriendly personnel. Some samples:

"Rude personnel, little or no help in rescheduling connections"..."Nasty personnel, dirty airplanes"..."Personnel openly show contempt, even in first class!"..."The Eastern workers still don't care"..."All flight attendants seem to hate me"..."Flights are always late; ticketing and seat selections are sloppy"..."Dirty planes and discourteous people."

Anti-Eastern ballots came from respondents in 17 states, led by (in order) New York, Florida, North Carolina and Illinois. On the plus side, Eastern did get some positive responses—seven first-place votes, five seconds and ten thirds. Convenient schedules and on-time performance were among the reasons for its popularity with some readers.

Joining Eastern and United on the least-favorite list were (in order) USAir, American, People Express, TWA and Northwest.

Although most readers confined their comments to the space on the ballot, one reader from Libertyville, Ill., sent a four-page, handwritten letter in which he listed, in great detail, his grievances against United Airlines, including lost baggage, flight cancelations and abrasive ticket agents. We hope he feels better.

The most unusual flying experience was related by an Irvine, Cal., reader. On his ballot, he listed Pacific Southwest Airlines as his least favorite. In addition to such standard complaints as delays and unfriendly personnel, he said they are "The only airline I have flown that lost luggage I CARRIED on. [The stewardess left with it on a stopover.]"

He didn't feel the experience was a fluke, however. He said PSA "also lost my luggage the only time I checked it last year." ■

Newspapers are meeting pressure from advertisers, readership declines and competitors with standard advertising units, total market coverage and other methods. *See Page 15.*

Presstime

BBDO profits dip

New York—BBDO International reported a decline in profits in the second quarter and first half versus year-ago results. In the quarter, net income dropped 2% to $5.9 million; revenues rose 6% to $83.7 million. In the first half, net income declined 10% to $10.2 million; revenues increased 6% to $159.5 million.

B&B loses in London

London—Benton & Bowles here will lose almost half its $46 million in billings as media director Ray Morgan leaves to set up his own independent media-buying operation, Ray Morgan & Partners. Mr. Morgan will take with him the Allied Lyons wine and spirits' media-buying business, which had been consolidated for all brands at B&B. It is worth about $21 million.

DMM loses A-B unit

Dallas—Anheuser-Busch's Campbell-Taggart bakery unit will seek a new agency to replace D'Arcy MacManus Masius, St. Louis, on its approximately $10 million account. The split is due to a conflict with General Foods Corp.'s Entenmann's and Oroweat brands, which are handled by DMM merger partner Benton & Bowles. An A-B spokesman said a decision is expected within two weeks. Separately at St. Louis-based A-B, the brewer will run new Spanish-language tv spots for its Michelob superpremium brand on major-market Hispanic stations. The theme translates as "For me, Michelob, the taste of a better life." Castor Spanish International, New York, handles.

Wallace to Coke unit

Houston—Scott Wallace has been named to the new post of exec vp-marketing at Coca-Cola Foods. Mr. Wallace had been senior vp-worldwide marketing at Brown & Williamson Tobacco Corp., Louisville, before joining D'Arcy MacManus Masius Worldwide a year ago as corporate exec vp responsible for worldwide service for DMM's international clients (AA, Sept. 24). Mr. Wallace, who is known to have supported the agency's merger with Benton & Bowles, said the timing of his departure was "unfortunate" because "I don't want to leave the impression with clients or anyone else of disaffection." But, he said, "It's a very good job that came along."

Stabbing at Grey office

New York—A Grey Advertising employe was arrested July 23 after a stabbing outside the agency's headquarters here. A Grey spokeswoman said Arthur Hill, a 14-year employe in the agency's financial department, allegedly stabbed another Grey employe, Alfred Greaves Jr., who works in the production department. The stabbing allegedly was the result of a personal dispute between the two, the spokeswoman said. Mr. Greaves was hospitalized with a shoulder wound and his condition was listed as stable.

Advertising according to Lou Centlivre, executive managing director-creative at Foote, Cone & Belding, Chicago: "If an idea makes me laugh, that's a sure sign it's a good idea. All commercials should be entertaining, no exceptions made. . .Everybody ought to have fun. . .if you're not having fun [whether client or agency], then you're getting screwed."

Lou Centlivre has one thing in mind: F-U-N

By Laurie Freeman

The Centlivre Test for Good Ideas:

"If an idea makes me laugh, that's a sure sign it's a good idea. All commercials should be entertaining, no exceptions made."

It's one thing to say it, another thing to put it into effect, and Lou Centlivre has done both. Described by his co-workers as a man who "shoots straight from the lip," the 52-year-old executive managing director-creative at Foote, Cone & Belding, Chicago, has one thing in mind when he heads for the office each morning. Fun.

"Somebody's making the business too rational, which is wrong," he says. "Advertising is an emotional industry. It's getting so bad I can look at a tv commercial and tell what kind of a creative department or agency the work came from. The scary part is, does anybody care? Everybody ought to have fun. . .if you're not having fun [whether client or agency], then you're getting screwed."

Obviously, Centlivre enjoys talking about advertising—what it is and what it could be. He says he got into advertising because it was more fun than any other business. The problem is, this straight-shooter often speaks before he thinks. Maybe that's why Foote, Cone general manager Bruce Mason gave him a picture inscribed "Louie. . .remember. . .1,001, 1,002. . ." And maybe it's not really a problem.

Mason credits Centlivre's forthright approach with attracting many of the agency's newest accounts, including Long John Silver's, Lexington, Ky.; Pearle Vision, Dallas, and Volume Shoe, Topeka, Kan.

"I don't want to round out Louie's edges because most times what he says is the truth. Sometimes I think clients are going to hit the roof because of the outrageous things he says. But because he's sincere and really means what he says, the clients take it all in stride," says Mason. "I wouldn't want to put the brakes on Louie."

For his part, when the freewheeling Centlivre talks about "creative freedom" at the agency, he makes sure listeners know those marching orders come from the general manager's office.

The result is plenty of energy, from the top right down to the copywriter ranks—where it's converted into entertainment and humor, elements Centlivre looks for in copy.

By way of example, he points to S.C. Johnson & Son's Raid tv work, one of FCB's long-running campaigns. "Our task is to make it *fun* to watch these ugly mothers go to their eternal reward. 'Raid kills bugs dead!' Now that's fun," he says, laughing.

One gets the feeling the 11th floor at FCB, where Centlivre's "creative-oids" live, work and play, resounds with laughter from early morning till late at night.

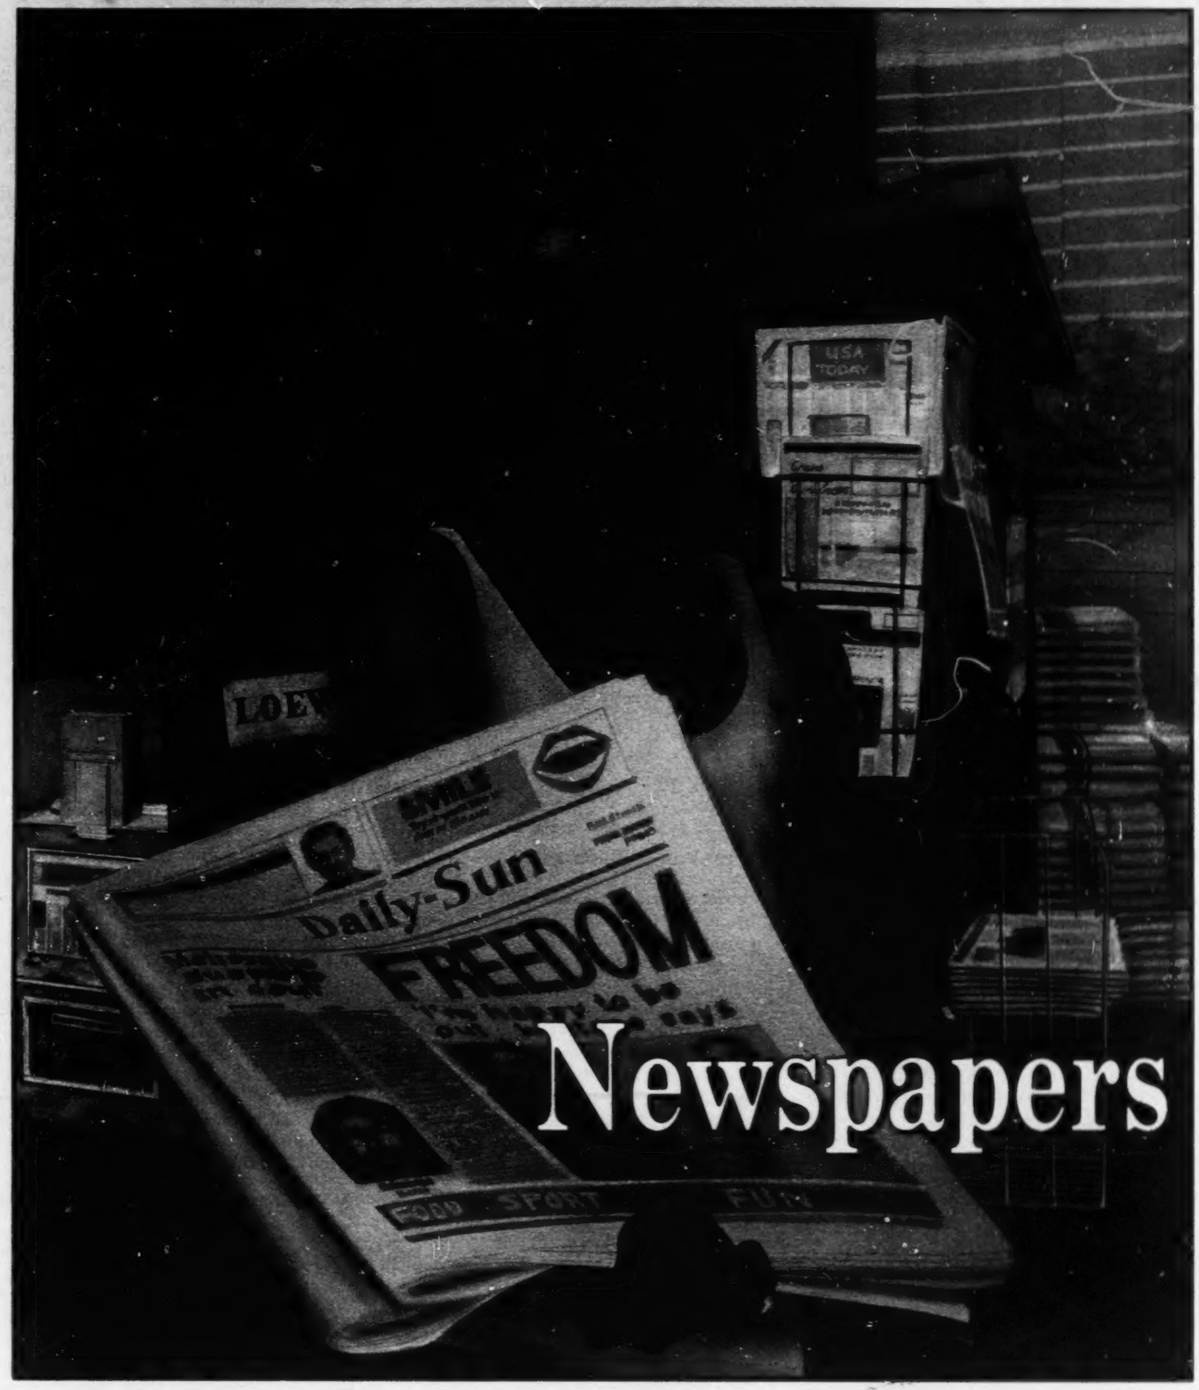
A visitor to the creative floor is overwhelmed by activity. When Centlivre's crew of 20-odd senior creative writers and directors get down to turning out copy, there's a lot of screaming and yelling back and forth between offices. Just the way the boss likes it.

"My motto is a pretty good barometer: 'Beware of silent halls.' When the loudest sound is the rustle of the *Wall Street Journal*; when you can't tell an account executive from a copywriter from looking at 'em or talking to 'em; when you can fire a cannon down the creative halls at five past five [o'clock] and not hit a soul—then you know terminal boredom has set in," he says.

Advertising without fun could be one reason for burnout among creatives, Centlivre says. It's something he combats not only by his own approach to work, but by the way he handles the work of others.

"My creatives only have to report to one person, not four or five like

(Continued on Page 63)



Newspapers

David Loew

Industry delivers solution to bad news

By William F. Gloede

"The function of the press in society is to inform, but its role is to make money," wrote A.J. Liebling in his book "The Press."

And money it does make—so much money that media companies often are willing to pay more than 20 times net earnings to snatch a newspaper from family ownership.

The newspaper business is big business. In 1984, total revenues among all newspapers exceeded $35 billion, according to informal estimates (actual figures are not available).

Why are newspapers so desirable as business properties?

"[The newspaper business] is one of the few, if not the only, major unregulated monopoly businesses in the United States," says Christopher Shaw, managing director of Henry Ansbacher Associates, a New York-based media property broker.

Newspapers are the nation's largest advertising medium. In 1984, the second consecutive year of 15%-plus increases in total ad revenues, newspapers took in $23.8 billion, giving them a 27.3% share of all U.S. ad revenues. Their closest competitor, tv, racked up a 21.9% share with $19.1 billion.

But newspapers are in danger of losing their historical preeminence in advertising to tv.

Thurman R. Pierce Jr., vp, U.S. manager-print media for J. Walter Thompson USA, New York, recently warned the annual Operations Management Conference of the American Newspaper Publishers Assn. in New Orleans that if the industry does not reverse its steadily declining share of the advertising pie, "You in newspaper management will wake up one day to find another medium is now No. 1—sometime in the next decade."

The industry sometimes is viewed by wags as something of a dinosaur, so slow to react to competitive pressures that it's bound for extinction. Ted Turner, the cable tv mogul who this year launched an unfriendly attempt to take over CBS, routinely predicts the demise of newspapers to just about anybody who'll listen.

And although newspapers remain healthy, vibrant and essential to the people who read them, they do have problems. Serious problems.

The Audit Bureau of Circulations reports that, nationwide, daily paid circulation remained stable in 1984 at 63.2 million, up only 18,252. But while daily circulation has remained stable in recent years, the population of the nation has not. Consequently, household penetration—the ratio of circulation to occupied households—has fallen.

That has given rise to a new segment of newspapering: Shoppers, those all-advertising publications that show up in mailboxes and on doorsteps, often every mailbox or doorstep in a community, across the country, every week. More recently, advertisers have begun mailing advertising circulars directly to customers in specific retail trading zones, effectively blanketing the area around stores.

Newspapers first began seeing display advertising moving into newspaper-delivered circulars in the 1970s. In the 1980s, they began seeing this retail advertising exit the newspaper and enter

(Continued on Page 16)

Unless otherwise noted, all daily newspaper circulation figures used in this special report are those reported to Audit Bureau of Circulations for the six months ended March 31, the most recent statistics available.

Ownership is changing the American press

By Ben H. Bagdikian

Although many familiar forces, such as new technologies and life-style patterns, are changing the American newspaper, a less noticeable but perhaps more important change comes from new owners of the daily press.

Traditionally, each American daily had a separate owner, usually a local one. In 1900 there were 2,042 U.S. dailies with 2,023 different owners. Now there are 1,700 dailies with about 600 owners, but about a dozen of the owners are large corporations that control a majority of circulation.

With a few exceptions, the new owners have not produced highly visible changes. But they have accelerated trends in such an intense way that it raises questions about the future of the daily newspaper.

Corporate ownership has become the norm because newspapers are highly profitable properties. Most of the new owners are large, publicly traded companies, their quarterly dividends and cash flow watched closely by Wall Street. As a result, more than ever before daily papers are under pressure to produce not just the very comfortable profits that the industry always has produced since World War II, but fast, maximum profits.

The new pressure for profits produces results partly from greater sophistication in management and cost analysis. But it also comes from new efforts to alter the content of papers and shrewd calculations on how to draw a maximum from any given market, in both subscription and advertising rates.

Because 80% of newspaper revenues come from advertising, the major focus on increasing profit margins has been directed at getting the most from that part of the business. Once ad rates are adjusted upward to extract the maximum feasible revenues from existing linage, the next step has been to alter the paper's content to attract more and different kinds of ads.

The main technique for changing content to attract more ad revenues is to change the demographics of the audience to emphasize upscale readers. Today, "yuppie" is the not-so-secret password in newsrooms and boardrooms of daily papers.

Attracting maximum ad rates and linage is a natural business instinct for the industry. But the current intense interest in concentrating on upscale readers challenges some historic assumptions about American newspapers.

Unlike specialized magazines and weeklies, dailies are community institutions that by tradition are directed at the whole population and are presumed to reflect the needs and wants of that whole population. This role is all the more compelling because in the U.S., unlike other industrialized countries, dailies are essentially local rather than national, and 98% of the dailies are local monopolies.

Consequently, the drive to alter editorial content and circulation patterns to emphasize affluent young people raises long-term questions about the role of the daily newspaper in American community life.

Most major media share the preference for an audience consisting of affluent consumers between the ages of 18 and 49. But other media do not have the historic mission of the daily paper.

That mission is far more critical for the local daily paper because American politics and political institutions are more concentrated in local control. Whereas broadcasting, for example, cannot control who receives the message, newspapers can influence who gets to read by concentrating circulation in prosperous districts and suburbs. The corollary of the concentration on the upscale readers is an indifference, in content and distribution of the paper, toward those who aren't affluent and those 50 and older.

Special Report: Commentary

Ben H. Bagdikian

The new managements and their drive for the upscale reader have produced new levels of profitability, but also may have thickened the cloud hanging over the newspaper industry: Aggregate national circulation has been stalled for 20 years.

Since the mid-1960s, the U.S. adult population has grown 50%, but dailies have been unable to push their aggregate circulation beyond 63 million. The American daily paper has become fat and prosperous, but its penetration of American households is declining, from 1,100 papers sold daily per 1,000 households in 1960 to 790 in 1980.

Some of the decline has come from the effects of broadcasting and changed living patterns. Some allege that a generation of tv has produced a nation of nonreaders, but that is exaggerated; the rate of college enrollment, as well as sales of books and magazines, have increased during the same period.

But some of the circulation decline is deliberate, the desired result from introducing upscale content. Some papers pull back circulation from areas that do not serve a profitable retail area. In the past 20 years, newspaper content has been altered (from 1960 to 1980, average pages issued a day by newspapers rose by more than 22 pages), but most of the added editorial matter—special sections on real estate and fashion, for example—has been designed to attract ads rather than readers.

Content most wanted by readers is clear. Years of surveys under the auspices of the National Advertising Bureau and of the American Newspaper Publishers Assn. show that the highest priority for readers is more live local and national news. But that kind of news is more expensive to produce (requiring live reporters instead of volumes of syndicated material) and it does not attract as much advertising as back-of-the-book sections.

There is only an illusion of paradox between higher profits and reduced penetration. Daily papers still have strong vitality and public appeal in news, in features and in ads. The daily printed paper physically delivered to the home will remain on the scene for a long time to come.

But advertisers and readers both have a stake in reversing the declining penetration of papers in the country's households.

Recent declines in free tv viewing because of competition from pay cable and videocassette recorders, both virtually adless, should be an omen.

Daily papers must decide whether they will continue the trend toward "elite" publication or continue their historic role. Having broad appeal does not have to mean sex and sensation or artificial brevity, as profitable papers such as the *Los Angeles Times* and *Philadelphia Inquirer* have shown.

A reversal of the narrow focus in content and distribution on 18 to 49-year-old consumers is best navigated while the industry is prosperous rather than waiting complacently until some sudden external competitive force produces disaster. ■

Ben H. Bagdikian is the newly named dean of the journalism school at the University of California at Berkeley. He is author of "The Media Monopoly" (Beacon Press, 1983).

Solutions

(Continued from Page 15)

the mail. Now, nearly all daily newspapers have developed or are developing total market coverage programs that use the newspaper to deliver advertising circulars to subscribers and use the mail to reach nonsubscribers.

Because retailers are the largest users of newspaper advertising space, this trend has had ominous implications. Newspapers, in order to remain the top ad medium, must at least hold their current share of retail advertising spending.

In addition, newspapers, once the dominant medium for national advertising, are now a minor player, falling far behind tv.

In 1984, newspapers' share of the $48.9 billion national advertising pie was 12.7%, according to the Newspaper Advertising Bureau, New York, and 6.1%, according to the estimates of McCann-Erickson, New York.

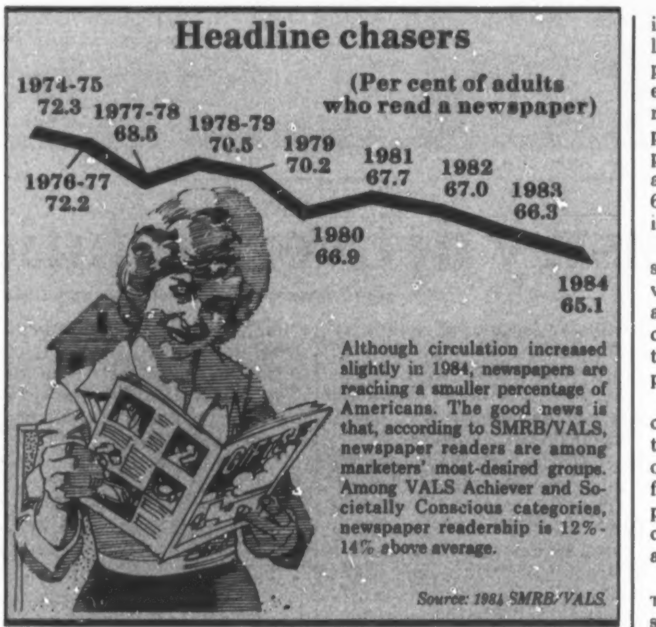
Despite an industrywide effort to standardize ad sizes for national and regional retail advertisers—an effort that resulted in the standard advertising unit system implemented in July, 1984—newspapers' share of national ad expenditures has continued to slide.

The reasons are many and varied, but three top the list: The costs of running deep national schedules are prohibitive; advertisers can not run color in most major markets, and newspapers are not "top of mind" as a media alternative among agency creative people and the clients for whom they work.

Classified advertising is the one bright spot in this foreboding advertising picture. Newspaper classified sections have been on a roll in recent years, with the category, the most local form of advertising, proving more recession-resilient than it had in the past. In 1984, classified ad revenues increased a whopping 27.5% to $7.65 billion, according to the NAB.

But, although beset with problems in the national and retail advertising arenas, the newspaper industry appears to be waking up. It suddenly has discovered marketing as it is practiced in the consumer products and advertising businesses.

Through local tmc programs and the industrywide "Future of Advertising" project, jointly sponsored by the ANPA and the NAB, it appears to be addressing the problems it faces.



Although circulation increased slightly in 1984, newspapers are reaching a smaller percentage of Americans. The good news is that, according to SMRB/VALS, newspaper readers are among marketers' most-desired groups. Among VALS Achiever and Societally Conscious categories, newspaper readership is 12%-14% above average.

Source: 1984 SMRB/VALS.

The time is right. Newspaper publishers are eyeing, with a certain amount of pleasant anticipation, the steadily eroding share of the network tv audience. Fragmentation among the broadcast media, they hope, will focus more attention on newspapers as a national advertising medium.

To take advantage of the situation, the "Future of Advertising" project committee is working on solutions to the cost dilemma faced by national newspaper advertisers, with some emphasis on the so-called local-national rate differential. This pricing policy, begun by newspapers decades ago, forces national advertisers to pay an average of 60% more for the same advertising space as a local retailer pays.

At the same time, color is sweeping the industry, and advances in printing technology are making color printing more cost efficient and more attractive for both advertisers and publishers.

If newspapers can begin to increase sagging household penetration while evening off the cost of national advertising and offering quality color printing, publishers believe they can increase their share of the national advertising market.

In this special report, Advertising Age takes a comprehensive look at the newspaper industry, its strengths and its shortcomings. Despite the shortcomings, we safely can predict that newspapers will be around for some time to come.

After all, where else can you get an hour's-plus worth of portable entertainment for a quarter? ■

Rivals battle for ad and promotion scoops

By Alan Radding

There's a romantic picture of two competing daily newspapers that thrives in movies and in the hearts of journalists and academics: Competing reporters for rival dailies pound the sidewalks to scoop each other by uncovering wrongdoing and win readers' everlasting affection and support.

Competing dailies have hung on in the largest U.S. markets, and in some cities, such as Boston, St. Louis and Baltimore, the second newspaper is clawing back from the brink of extinction. In these cities, however, the romance is that of the underdog desperately fighting stiff odds.

In Boston, Rupert Murdoch's News America Corp. rescued the failing Hearst Corp.-owned *Herald* in 1981 and took weekday ABC-reported circulation from 226,000 to the current 368,000.

In February, 1984, Jeffrey Gluck, in a surprise move, took over the St. Louis *Globe-Democrat*, on the verge of being folded by Advance Publications, and preserved St. Louis as a city with competing dailies.

In Baltimore, despite slipping circulation, Hearst's *News-American* hangs on to challenge the A.S. Abell-owned Baltimore *Sun* and *Evening Sun* newspapers.

The major battle in the struggle for survival, however, is not going on within the editorial pages. The tabloid *Boston Herald* often beats the *Boston Globe*, owned by Affiliated Publications, to local stories, yet the *Globe's* dominance in readership and advertising remains overwhelming.

The Herald *added special sections, such as this one on Boston's new cardinal.*

Nor is a paper's politics a key to survival. The growing ideological conservatism across the country has not contributed significantly to the revival of the *Herald* or the survival of the *Globe-Democrat* or the *News-American*, all conservative voices.

Instead, the battle is taking place in newspaper classified, circulation and promotion departments, and in cost-conscious executive boardrooms. While the quality of the *Boston Globe* editorial product is very high, for instance, the foundation for the paper's current success was built in the classified department decades ago.

During the newsprint rationing of World War II, newspaper executives had to make critical decisions about how to allot their quotas of newsprint, says independent newspaper consultant Mark Finley, a former *Herald* promotion manager.

While other Boston newspapers were using the bulk of their newsprint for display advertising, the *Boston Globe*, then back in the middle of the pack of competing Boston dailies, was devoting substantial portions of its newsprint to classified advertising. When soldiers returned home from the war, looking for jobs, houses and cars, the *Globe* was ready with a thriving classified ad section.

Today the *Globe* commands more than 90% of Boston's classified advertising, a tremendous revenue source and a powerful vehicle to build readership and advertising responsiveness. In St. Louis, the *Post-Dispatch* also dominates the classified business, carrying as much as 90%, says *Post-Dispatch* president Glenn Christopher.

"Once you make the effort to get the classified ads," says *Boston Herald* publisher Patrick Purcell, "only a small effort is needed to maintain it."

That works in the *Globe's* favor. Every year Boston educational institutions push thousands of graduates out their doors, and half remain in the area, says John Giuggio, *Globe* president. Because of its classifieds, he says, the *Globe* "is where they turn for their first car, their first job, their first apartment and their first house."

The *Herald*, however, is not surrendering in the fight for classified ads. While working on all aspects of the publication and substantially increasing circulation, it has targeted classified advertising for special treatment.

To build classifieds, the *Herald* first targeted help-wanted advertising in the fall of last year with a special offer of three free weeks for one paid week. To make the program work, however, the *Herald* had to provide inducements not only to classified advertisers, but to readers. A contest was initiated that would give readers who responded to classified ads a chance to win trips and prizes.

The result was an increase in daily help-wanted advertising from two to 15 pages, Mr. Purcell says. The promotion was followed with a similar effort in the daily real estate section and has resulted in an increase from one-half to five pages.

TWO-PAPER TOWNS

Mr. Giuggio dismisses these kinds of efforts by the *Herald* as short-term rate cutting promotions to which the *Globe* will not respond. Instead, twice a year, his newspaper heavily promotes its classifieds on radio and tv as the "Market of the Millions." Although there is no special rate or promotion otherwise tied to this, "It is a chance to talk about the classifieds," Mr. Giuggio says.

The classified section, however, is not the only area where the *Herald* must come from far behind. According to Media Records figures widely circulated by the *Globe*, the newspaper carried 81% of Boston's 1984 newspaper advertising, increasing its ad pages by 10% over 1983. In particular, the *Globe* carries 94% of the metro area's computer equipment advertising, 90% of alcoholic beverage advertising, and 90% of the department store ads.

In circulation, too, the *Herald* is a distant second. The *Globe's* weekday circulation is 510,567, soaring to 802,891 on Sunday, according to ABC figures. The *Herald's* circulation drops to 308,823 on Sundays, although that is up 11.8% from a year ago.
